optical fibre networks for distribution and communications services *(German)* 88−73993
optical fibre subscriber connection wideband system *(French)* 86−17567
optical fibre WDM, operation *(German)* 86−23879
optical FSK heterodyne single filter detection transmission using phase tunable DFB laser diode 86−49693
optical information selective reception by laser diode 88−22127
Optical Island of Milano Fair, new video services 86−54933
Optical Island optical fibre network at Milano Fair *(Italian)* 86−49589
optical pulse width modulation for electrically isolatedanalogue transmission 86−16112
optical signal processing using integrated optics 86−49572
optical star network, coherent, WDM 88−35495
optical time division multiplexing for multichannel telemetry systems 88−35557
optical two-channel DPSK transmission system with optical amplifiers, effect of channel spacing 88−67358
optimal digital optical communication systems, comparative sensitivity 88−53266
optimal local oscillator power in PSK homodyne systems 87−34551
optimisation using standard modulation codes 85−14302
optimum receiver of weak optical Gaussian signals 85−63672
Opto-lock using MM43200N IC 85−17758
opto-mechanical switch for multimode fibre 88−4054
optoelectromagnetics, microwave appls. 86−8449
optoelectronic components for local videocommunication networks *(French)* 88−22310
optoelectronic data link 86−36157
optoelectronic interconnections, reliability considerations 88−2146
optoelectronic LAN for industrial appls. *(Czech)* 88−60121
optoelectronic link in data acquisition system 85−42589
optoelectronic materials, conf., San Diego, USA (Aug. 1987) 88−49335
optoelectronic neural networks based on holographically interconnected image processors 88−65520
optoelectronic semiconductor devices appl. 88−9571
optoelectronic telephone exchange technology 85−52248
optoelectronics and communications computing 88−35467
optoelectronics development for fibre optic links, review 85−25875
Optonet fast local network *(German)* 88−21663
ore-blending yard information system development 86−4334
organic polymer films for nonlinear optics 88−71992
Ornskoldsvik T100 power station, power network control using fibre optical cables *(Swedish)* 88−17344
orthogonal modulation in optical fibre communications 86−37887
Orwell, protocol for integrated services local network 86−10745
OS-280 M long-haul optical fibre submarine cable system 86−17410
OS-280M, Japanese optical fibre submarine cable system design 85−37017
OS-280M optical submarine cable system, commercialisation test *(Japanese)* 88−28847
Oslo-Drammen fibre cable link *(Norwegian)* 88−15492
Oslo-Drammen fibre lint, meas. *(Norwegian)* 88−15494
OTDR for single-mode fibre using P_2O_5 doped fibre Raman laser 87−18604
OTDR specifications and selection criteria 88−68047
Otel analogue optical telephone system *(German)* 87−55610
outside plant, hostile environment operation 88−60191
overhead fibre-optic cable testing by Sydkraft electric utility, signal transmission *(Swedish)* 88−15462
overhead optical cable laying, Swedish joint projects *(Swedish)* 85−14263
overhead optical-fibre cables on power lines, for improved data transmission *(German)* 85−31038
overhead power lines with optical fibre telecommunication cables *(German)* 87−49042
overhead transmission line earth fault prediction using optical fibre link 87−78165
overlay and local network appls. with glass fibres, cable and system concept *(German)* 86−23899
overlay optical-fibre local-area network 86−54931
p_i-persistent protocol for unidirectional broadcast bus networks 88−289
p-i-n FET active feedback lightwave receivers 87−20501
p-type substrate mass-transported diode lasers for analog and digital modulation 88−20674
Pacific Bell's plan for fiber in the local loop 88−41458
Pacific cable system between the US and Japan 88−28897

optical links continued
Pacific region, telephone transmission via satellite and fibre optics, comparison 88−59485
Pacific telecommunications services, USA decisions 87−40126
packaged semiconductor laser amplifiers use as repeaters in optical transmission system 88−67394
PACS high-speed image transfer network with fibre optic transmission 88−36551
PACS system with fibre optic network, physician-friendly digital image display console development 87−20531
Pana-Lan, 32 multipurpose optical loop network 86−54929
paper mill, communication using fibre optics for telecontrol 88−73958
parallel optical interconnections and computer architecture *(German)* 88−33906
parallel processor interconnections using GaAs optoelectronic ICs 87−16967
passive all-fibre bit-rate limiter 88−47153
passive components, principles and connection methods *(French)* 88−41713
passive components for multimode fibre-optic networks, manufacturing technique 86−42328
passive devices for fibre optic communications *(Japanese)* 88−41666
passive fiber-optic coherence multiplexing for aircraft sensors 87−40963
passive fibre telecommunication network, eradication of central office 88−60200
passive optical components for automation *(German)* 85−42594
passive optical local network, system considerations for upstream channel 88−73651
passive optical subscriber loop architecture using 20 channel WDM, expt. demonstration 88−41619
passive star all-optical ultra-fast networks 87−69684
passive star LANs, very high speed, protocols 88−3597
passive star topology LAN, high-speed optical fibre based, protocols used 88−28380
passive star-configured optical LAN using CSMA/CD 88−3598
passive unidirectional bus network using opticalcommunications 86−54932
passive-star-configured fibre optic LANs 88−47067
PASTEL, European geostationary SPOT satellite optical telecom. project, development *(French)* 88−28776
pattern code modulation and optical decoding, code-division multiplexing for multifibre networks 86−23186
PCM 1.5 M optical transmission system for independent communication networks *(Japanese)* 87−28563
PCM glass fibre/digital transmission in Swiss telephone system *(French, German)* 88−67370
PCM signal transmission, optical fibre links and equipment, development, configs. and performance *(German)* 87−20512
PCM-TV signal optical transmission system using GaAs MESFET ICs 88−47154
PCVD graded-index fibre, 678 Mband optical transmission expt. 85−37051
performance improvement using decision feedback and partial response techniques 85−58147
Perth International Airport Project−telecom planning and installation aspects 87−33944
petrochemicals industry, impact of fibre optics 85−20195
PFM optical video transmission superluminescent diodes, expt. system study 86−4638
phased array antenna fibre-optic feed network 87−75645
phased array antennas, optical control considerations 87−75625
phased array radar, developments in optical control and signal distrib. techniques 88−74034
phased array radars, optical techniques for signal distribution and control 86−17514
phased locked semiconductor laser arrays, design 87−54348
phased modulated fibre transmission at 400 Mbit/s and 1 Gbit/s data rates, expt. study 86−23851
PHILAN, a local-area network based on a fibre-optic ring and TDM operation 87−28599
PHILAN, fibre-optic ring for voice and data 87−34558
PHILAN, integrated LAN for high speed appls. 88−35139
PHILAN, Philips optical fibre integrated LAN, ring config., TDM operation and protection 86−64972
PHILAN fibre-optic ring for integrated traffic 86−54921
Philips Integrated LAN with glass-fibre cables *(Dutch)* 86−43821
phone system networking, telecommunications future 88−3326
photodetector in optical fibre transmission system, noise variance calcs. using algorithmic method *(Polish)* 87−20561
photodetector with fiber-optic communication line, EM noise resistant 87−76780
photodetectors for 1.3 to 1.5 μm fibre optic transmission, state of the art *(French)* 88−67783
photodiodes, as component for slow optical systems, superiority over laser diode *(Swedish)* 85−51040
Photodyne 2260 XF smart fibre optic field test equipment 88−45076
photon counting appl. for optical fibre fault location 85−63715
photonic LAN, optical links appl. in local setting 88−9599
photonic methods of high-speed analog data recording 86−5132
photonic switching and automatic crossconnect systems 87−62992
photonics in telecommunications, developments *(Italian)* 88−28834
photopolymer holograms for optical interconnect appls. 88−58713
photorefractivé crystals in optical neural computers 88−65132
photovoltaic power for telephone loop plant using optical-fibre cables 87−30450
pilot plant communication problem, fibre optic soln. 85−20196
pilot-wire relaying system interfaced to fibre-optic network 87−3175
PIN photodiode optical receiver ccts., signal and noise performance *(German)* 87−76777
PINFET hybrid optical receivers for 1.2 Gbit/s transmission systems operating at 1.3 and 1.55 μm wavelength 85−3450
pipe and pipeline appls. 88−29425
planar optical waveguides for interconnection of VLSI 88−58386
planning, design, commissioning and maintenance *(Spanish)* 86−49617
planning of optical fibre transmission plants 85−58151
plastic fiber optic data links for short distance applications 88−15441
plastic fibre optic link for data communications 88−22106
plastic fibre optic technology introduction 87−25964
plastic fibre transmission link performance, influence of LED charact. variations 88−73933
plastic fibres appls. in automotive industry 88−39921
plastic-fibre-based optical links for short-haul data transfer 85−25876
Plessey 565 Mbit/s optical fibre systems, general charact. 88−9585
optical links continued
point to point clocking for FDDI fiber optic data rings 87−70109
Poland, rural link appls. *(Polish)* 88−67387
polarisation controlling coatings appl. 87−76793
polarisation insensitive coherent lightwave system using wide-deviation FSK and data-induced polarisation switching 88−41622
polarisation-maintaining fibre, spliced, 100 km long, crosstalk charact. 88−53250
polarisation-maintaining single-mode fibre design using stressed fibre with inhomogeneous core 88−13907
polarization effects in optical free space communications 87−40959
polarization insensitive optical amplifier configurations 88−47128
Polish optical telegraphy of 1830s *(Polish)* 85−58115
polymer optical-fibres, progress, props. and possible applications *(French)* 85−50906
polymer waveguides, plasma-etched for intrachip optical interconnects 88−51706
powder process use for fibre manufacture, LAN appls. *(German)* 87−74722
power and communications transmission on optical waveguides *(German)* 85−53337
power cable fault detect. system *(Japanese)* 85−48637
power demand supervising system to calculate elec. charges, data communication system *(Japanese)* 87−50640
power feed and control techniques for submarine optical transmission system 86−61642
power loss meas. during outside plant installations 85−8397
power overhead cables with optical fibres, for power and data transmission *(German)* 85−31037
power penalty due to decision-time jitter in opticalcommunication systems 86−43817
power plants automation/communication using optical waveguides for improved reliability and reduced interference *(German)* 85−52328
power system optical fibre communications network *(Norwegian)* 87−76760
power testing with computerised remote control *(French)* 86−51157
power transfer matrices used in system loss prediction, LAN components attenuation 87−25954
power transmission networks, optical telecommunication appls. *(German)* 86−12364
power-dependent enhancement in repeater spacing fordispersion-limited optical communication systems 86−59895
PPM optical channels, stretched pulse, pulse spreading estimation and decoding 85−62953
pre-ISDN integration of data and fibre optics voice networks, topological and architectural considerations 87−27853
pre-ISDN integration of fibre optic voice and data networks, topology and architecture 87−28571
preamble size for FDDI-II network distributed clocking 87−28617
precision pointing and tracking between satellite-borne optical systems 88−60165
premises wiring, fibre optic backbones use 88−35550
private broadband information network, experimental 87−40088
private communication networks, fibre optics appls. 87−40943
private communication networks with lightwave conductors, development *(German)* 88−73490
private intracompany communication network system from NEC *(Japanese)* 87−7926
process control appls. of fibre optic sensors and communications 88−72020
process control by optical transmission andintelligent sensor *(Japanese)* 86−30794
process monitoring, all-optical system *(French)* 88−41995
processor-to-processor communication interface unit 87−20246
processor-to-processor communications system with high speed optical token ring, performance evaluation *(Japanese)* 86−64683
programmable controller networks, fibre optic topologies 87−63002
proprietary optical fibre transmission systems, evaluation 85−8433
protocol for multiservice integration over star topology high speed fibre optic LAN 88−21738
Protos, broadband fibre optic network in Turin *(Italian)* 88−60143
Prussian link for modern data, and modern systems *(German)* 86−23896
PSK coherent optical transmission system, self AM 86−43853
PSK heterodyne expt., 100 Mbit/s, using travelling wave laser amplifier 87−40973
PSK homodyne system with balanced phase locked loop 88−41651
PSK transmission system with endless polarisation control, 565 Mbit/s, config. and performance 88−35477
PSTN use of high bandwidth optical fibres 86−59882

single mode optical fibre LED system, performance prediction 88−58375
single mode optical fibre system, high capacity, performance and maintenance features 88 -47107
single mode optical fibre telephone line system operating at 565 Mbit/s 86−23859
single mode optical fibre transmission system in southwest Florida 87−34598
single mode optical local networks 86−54934
single mode optical networks 87−20552
single mode optical subscriber links, economics of laser vs. LED 87−34539
single mode Oslo-Drammen fibre lint, optical line equipment *(Norwegian)* 88−15493
single mode to multimode optical fibre coupler, nonreciprocal behaviour, LAN and recirculating ring appls. 87−38778
single span optical systems, expts. on monomode SiO_2 fibres 86−11053
single-frequency lasers for coherent lightwave systems 86−22411
single-mode 1.3 μm optical fibre link for analoguemultichannel television 86−49838
single-mode 20 km optical fibre system for multichannel video, experimental FM/FDM config. 88−41631
single-mode 810M optical transmission system operating at 1.3 μm, config. and equipment design 88−28835
single-mode connector for broadband network appls. 87−18727
single-mode fiber measurements 87−68150
single-mode fiber transmission using edge-emitting LED for broadband subscriber loops *(Japanese)* 88−53307
single-mode fibre, 4-channel WDM-transmission of 2×565 Mb/s plus 2×140 Mb/s 86−11115
single-mode fibre, in 1300/1500 nm region, expt. study 86−4637
single-mode fibre, low-loss dispersion-shifted, for long-haul high-data-rate operation 86−22103
single-mode fibre, simultaneous transmission of 2 Gbit/s digital data and ten FM-TV analogue signals 88−53252
single-mode fibre analogue video signal transmission expt. using 1.3 μm edge emitting LEDs 86−30781
single-mode fibre appls. 86−69775
single-mode fibre arc-fusion splicing machine using cladding mode scattered power monitor 86−53978
single-mode fibre coherent transmission, principles, system config. and future prospects *(German)* 88−60208
single-mode fibre for long-haul telecommunications, drawing ratio tolerance requirements 87−28558
single-mode fibre link, 140 Mbit/s, external cavity BH laser 86−17374
single-mode fibre link using edge-emitting diodes, transmission study at 1.3 μm 85−42577
single-mode fibre links, bandwidth enhancement by correcting chromatic dispersion 87−49077
single-mode fibre links, dispersion reduction 86−17368
single-mode fibre links using multi-longitudinal-mode lasers, end-to-end dispersion 86−49678
single-mode fibre measurements 87−62938
single-mode fibre transmission, long-range, power dependent bandwidth variation due to self-phase modulation 88−65872
single-mode fibre transmission at 1 Gbit/s using edge-emitting LED and PINFET receiver 87−49027
single-mode fibre transmission at 560 Mb/s and 140 Mb/s using 1300 nm LEDs 86−49696
single-mode fibre transmission expts., 2 Gbit/s and 600 Mbit/s using 1.3 μm edge emitting LED 87−56132
single-mode fibre transmission of 140 Mbit/s signals using surface- and edge-emitting 1.3 μm LEDs 85−47505
single-mode fibre transmission system, development 88−7873
single-mode fibre transmission system, WDM expt. using 1.31/5 μm LEDs 88−47142
single-mode fibre transmission systems, development at British Telecom Research Labs. 85−63634
single-mode fibre transmission systems, modal noise 86−11107
single-mode fibre transmission systems, modal noise observation 85−20181
single-mode fibre transmission systems, recent developments at BTRL 86−37868
single-mode fibre transmission systems, signal quality *(German)* 88−35509
single-mode fibre transmission systems refl.-induced power penalties, practical meas. method 87−25947
single-mode fibre transmission using 1.3 μm mesa-structure surface-emitting LEDs 86−49697
single-mode fibres, chirp reduction in intensity-modulated semicond. laser for max. transmission capacity 87−8250
single-mode fibres, cut-off wavelength and mode-field diameter meas. 86−36136
single-mode fibres, RF phase shift depend. on microbending loss 85−46173
single-mode fibres, stimulated Brillouin scattering suppression by acousto-optic modulator 86−42250
single-mode fibres, taper drawing for high efficiency coupling of lasers 85−35446
single-mode grating WDM device based network 88−53082
single-mode lightguide for fibre-optic communication line with carrying capacity of 400 Mbit/s 85−20206
single-mode linearly birefringent fibres with zero polarisation-modedispersion 86−2680
single-mode optical cable production and installation on 39 km route without repeaters, EMI conditions 88−22149
single-mode optical fibre, 34 Mbit/s bidirectional transmission using 1.3 μm LEDs and directional couplers 85−58092
single-mode optical fibre for long distance links *(French)* 88−28904
single-mode optical fibre link, expt. system for narrowband and broadband services *(German)* 86−43824
single-mode optical fibre submarine cable, polarisation fluctuation during and after ocean installation 87−40886
single-mode optical fibre systems, evolutionary potential 85−37066
single-mode optical fibre systems, transmission distance and capacity limitation due to polarisation dispersion 88−41621
single-mode optical fibres, four-wave mixing, system limitations 86−64971
single-mode optical fibres, quasi-matched and depressed-cladding, design and fabrication 88−65239
single-mode pulse compression with amplification 87−18605
single-mode wavelength division multiplexer/demultiplexer for two channel bidirectional transmission 88−47150

CO_2 optical bistability for 10.6 μm digital laser communication 88−53301
$Cd_xHg_{1-x}Te$ diodes, IR electrolum., appl. to RF-modulated communications link 86−42448
GaAlAs laser at 0.85 μm wavelength and direct detection PPM for bidirectional optical ISL 88−67292
GaAlAs laser diode for multichannel video transmission employing multiplexed UHF subcarriers 87−49024
GaAlAs laser diodes for optical space links, specifications and eval. 88−65695
GaAs FET demodulator and down-convertor foroptical-microwave links 86−55182
GaAs MESFET for optical receiver system bandwidth expansion by reducing 1/f noise 87−53562
GaAs Schottky-barrier photodetector for microwave optical fibre links 87−49088
GaAs based optical wideband data transmission system signal processing 88−60150
GaAs circuits for fast fibre optic links *(Swedish)* 88−47043
GaAs digital ASICs for high-speed communications appls. 87−37101
GaAs laser-driver IC operating up to 2 Gb/s data rate 86−35919
GaAs logic IC enables development of ultrahigh-speedoptical communication systems 86−69773
GaAs monolithic optoelectronic receiver for Gbit operation 86−68410
GaAs photoreceiver, monolithically integrated, for high-speed signal processing appls. 86−29016
GaInAsP/InP, planar single mode heterostructures, calculated charact. 87−18983
Ge Hi-Lo APD for 1.5 micron wavelength single mode optical fibre communication 85−50948
H_2 influence on optical fibre loss *(French)* 86−9574
InGaAs photodetectors mounted in MM-wave waveguide 86−54037
InGaAs/InP p-i-n photodiodes for microwave fibre links, high-speed self passivated 87−56129
InGaAs-APDs and DFB-LDs for 4 Gb/s long span transmission expts. 88−67417
InGaAsP lasers, 1.3 and 1.55 micron, lightwave system appls., performance comparison 86−22369
InGaAsP lasers, intermodulation and harmonic distortion 85−56629
InGaAsP/InP DC-PBH LD for long wavelength optical fibre communications 86−3166
InGaAsP/InP DH LED, high speed with wavelength 1.3 μm 86−54051
InGaAsP/InP dual mode laser/detectors in 7.5 km bidirectional single-mode optical-fibre link 85−46395
InGaAsP/InP heterojunction bipolar transistor, monolithic integration for lightwave communication 88−14060
InGaAsP-InP metal-clad ridge-waveguide lasers for optical communications 88−65723
InGaAsP-InP planar buried ridge struct. lasers for long wavelength optical communication 88−65738
InP/GaInAsP long wavelength lasers, design for high reliability 85−35802
$LiNbO_3$ guided-wave devices for single-fibre video and bidirectional voice/data transmission 88−73923
$LiNbO_3$:Ti Mach-Zehnder modulator for 132 km 4 Gb/s optical fibre transmission 88−47172
$LiNbO_3$;Ti broadband travelling wave light modulator using coplanar waveguides 88−72165
Nd:YAG laser diode-pumped option for optical intersatellite link with direct detection 88−67362
Nd:YAG laser for coherent communication 87−76792
PbCdS diode laser for 3.5 micron 100 Mbit/s optical communication expt. 88−67397
PbCdS laser, GHz fibre optical communication expts. modulation performance, electron and photon lifetime 88−2277
Si for integrated optoelectronics *(German)* 88−33907
Si multi-gigabit-per-second bipolar ICs for optical fibre systems 88−60148
Si substrate, for new integrated optics structure, appl. to optical communications and interconnects 88−58224
SiO_2 optical fibres, plastic clad, for short and middle distance optical communication systems *(Japanese)* 87−60938
SiO_2 silica core fibre long lengths, MCVD fabrication and performance 86−22104
SiO_2, silica fibres, gamma irradiated, selective photobleaching, appl. to hardening of digital optical link 88−72053
SiO_2 ultralow-loss 220 km-long single-mode-fibre cable link in 1.5 μm wavelength region 85−1988
SiO_2:GeO_2 high NA multimode fibre made by pressurized MCVD 87−38803
ZrF_4 fibre for 3 micron band 600 MHz signal transmission 85−35439
ZrF_4 fibres, optical transmission expts. using noncryogenic sources and detectors 87−18722
ZrF_4-Ba-F_2 based glass fibres, progress for optical communication 87−60901

optical losses
275 kV line composite overhead earth wire optical-fibre transmission characteristics *(Japanese)* 86−49619
abruptly terminated optical fibre and dielec. planar waveguide, coupling anal. 88−20342

chalcogenide glass optical fibres, loss mechanisms 88−39905
circular lightguides, wave losses by mode scattering by acoustic wave 88−13840
coated optical fibres, IR loss increase phenomenon at high temp. 86−2730
coherent optical communication system capacity with received quantum state control 88−60195
coherent optical fibre transmission systems, chromatic dispersion limitations 87−62944
commercial fibre optic components 88−58130
communication systems, optical gigabit, noise 86−49690
communication transmission systems, testing procedures 88−41690
compound glass fibre with low loss, large core and high numerical aperture *(Japanese)* 87−60936
computerised optical attenuation measurement instrument *(German)* 87−49467
concatenated fibre couplers, mode transmission matrices for total loss/attenuation calc. 85−42579
conjugate resonator, misaligned, natural modes and diffraction losses 88−20696
connected fibres, long-length, baseband bandwidth and transmission charact. *(Japanese)* 87−70105
connector loss and reflection coefficient variations with wavelength 88−39933
connector with spherical-ended fibres *(Japanese)* 87−46494
connectors, low-loss two-channel single probe molded, for optical communication *(French)* 86−9568
connectors for singlemode fibres, manufacturers face up to user demands 85−18693
connectors in LED systems, mode mixing effects 87−12186
Corning glass films, RF magnetron sputtered, optical props. 87−32989
coupler, single-mode fibre, design parameters, determ. from loss meas. 86−2738
couplers, single mode fibre, low loss, fabrication 86−2700
coupling, laser-to-fibre, low loss, lens design 85−50926
coupling loss between semiconductor lasers and single-mode fibre using tapered lensed fibres 86−42241
coupling losses meas. in optical fibres, CCD image sensor appl. *(German)* 86−68250
coupling of laser diodes and LEDs to flat dispersion quadruple clad monomode fibres 86−42345
crossbar N×N switch for quantum confined Stark effect, insertion loss 88−2051
crystalline optical waveguides, volume scattering by micropores 88−26802
curvature loss formula, Huygens-type for rib waveguides 88−26841
cylindrical grooved optical cables, termination 85−58130
delay lines, fibre, diode-pumped recirculating ring 88−65283
delayed laser threshold instability, first passage time distribution 88−65800
DFB laser, second-order, mode selection provided by first-order radiation losses 85−35825
DFB laser resonator, second order, radiation loss, destructive interference 85−35826
DFB lasers, nonlinear operation, parasitic losses 88−65698
DFB lasers with second-order grating, mode selectivity study 86−54141
DFB semiconductor lasers, performance, radiation loss effects 88−34017
dielectric guides for energy transmission, losses problem in optimum design 87−68153
dielectric planar waveguides with step discontinuity, power transmission/loss calc. using beam propag. method 88−40639
diffusion of H_2 in optical fibre cables, causes, effects, possible remedies *(Italian)* 85−56307
digital communications with energy loss, quantum state for attenuation process 87−62996
diode laser transmitter, single-element in free-space optical link, diffraction losses eval. 88−41648
directional coupler, polarisation splitting type, design and anal. 88−65295
directional coupler, polarisation-preserving, appls. 87−1961
directional coupler and connecting device for fibre optic local area networks 85−8393
directional coupler switches, reversed-$\Delta\beta$, crosstalk 88−33721
directional couplers with gain or loss anal. and appl. to semiconductor slab dielectric guides 87−18644
dispersion flattened single-mode fibres, cutoff charact., length dependence and mode attenuation 88−45145
dispersion shifted segmented core fibres, mode field charact. 88−45153

optical losses continued
dispersion shifted single mode fibre at 1.55 μm, splice losses *(Japanese)* 88−51478
dispersion shifted single mode fibre cable, low-loss, performance 87−18636
dispersion-shifted and dispersion-flattened single-mode fibres, microdeformation performances 88−65236
dispersion-shifted optical fiber cable for high-capacity trunk transmission line 88−47112
dual shape core fibres, dispersion-shifted, charact. study *(Japanese)* 88−13894
dual-channel input optical power meter *(Japanese)* 87−56725
dual-fibre optical rotary joint, low-loss, using GRIN lenses and rhomboid prisms 86−22112
duplex optical fibre systems, receiver penalty calcs. 88−4039
duplex transmission, return loss requirements 87−49056
dye laser, synchronously pumped, CW, using low-loss intracavity etalon, transform limited behaviour 85−41358
dye pulsed laser, triplet losses, influence on optical hysteresis 85−24496
dynamic instability in the amplitude of a light beam in a real optical light guide 87−68157
electro-optical modulators, trading coupling loss for modulation efficiency 87−38856
emerald laser, tuned from 720 to 842 nm spectroscopic parameters meas. 87−68416
environmental testing of polarisation maintaining fibre coils for optical sensor systems 88−65253
expanded-beam connector for single mode fibres 86−36195
external cavity stabilised semiconductor laser design 85−35767
Fabry-Perot fibre optic sensor and its appls. 87−26038
fault location and damping study of optical cables using time domain reflectometer *(Swedish)* 85−14262
fiber optic links for data acquisition, communication,and control 86−59920
fibre, modified cladding, light transmission meas., appl. to intensity sensors 86−58738
fibre, modified rod-in tube (MRT), radiation resistance *(Japanese)* 87−74718
fibre, radiation induced time depend. attenuation 87−38808
fibre, single-mode, channel-dropping filter using high-index overlay waveguide 87−38790
fibre, single-mode, chromatic dispersion meas. 85−41140
fibre, single-mode, evanescent coupling with high-index medium of infinite thickness 86−63667
fibre, single-mode, optical time domain reflectometry signatures interpret. 87−68146
fibre, single-mode low-OH-content, fabrication by particle size control sol-gel method 86−15464
fibre, ultralow-loss, scatt. and dispersion-related parameters calc. 86−58778
fibre, UV-curable resin coated, low temp. charact. 86−2723
fibre adsorption loss meas. using poly(vinylidene) pyroelectric tube 86−2745
fibre and component light loss meas., using portable optical power tester 85−41157
fibre bending effects, mode coupling 85−12571
fibre bending loss meas. of LP_{11} mode using heterodyne interferometer 86−9470
fibre cable connection and loss meas. methods *(Japanese)* 87−26049
fibre cable coverage, high-performance, throughout Japan and for INS 86−49667
fibre cable design, environmental effects 88−33637
fibre cable design and charact. for use in subscriber feeder lines 87−8300
fibre cable for long haul large capacity transmission, low transmission loss *(Japanese)* 86−59887
fibre cable integrated OTDR/throughput loss meas. system for environmental testing 87−28604
fibre cable single-mode, ultra-low-loss, in 1.5 μm region, design and performance 85−63666
fibre cable testing 85−8438
fibre cables, construction, splicing and termination methods, optical loss on-site meas. *(Japanese)* 86−59889
fibre cables, hydrogen problems and long term reliability 87−38807
fibre cables, temperature conductivity eval. 86−49651
fibre cables, transmission loss due to H_2, long-term reliability 88−33640
fibre cables made of polymer tubes, structural design 87−8301
fibre cables with H_2 generation due to decomp. of carboxymethyl-cellulose tape in optical cables in muddy water 86−4636
fibre coating structure buckling due to contraction, theoretical study *(Japanese)* 86−15497
fibre communication links, performance improvement using decision feedback and partial response techniques 85−58147
fibre communication system using index nonlinearity, transmission capability 85−29528
fibre connections, multimode, with gap, losses 85−35388
fibre connector, field installable, plastic, for optical subscriber loops 87−7140
fibre connector, low-loss small-size with precision plastic-molded ferrule 87−7138
fibre connector and splices, low-loss, theoretical and exptl. study 87−26060
fibre connectors, factors influencing refl. loss *(German)* 87−25990
fibre connectors, meas. *(German)* 87−25989
fibre connectors using flexible fine ferrules 87−7141
fibre coupler, biconical fused taper low-loss type, fabrication and charact. study 87−26061
fibre couplers, connectors and splice technology, conf., Arlington, VA, USA (May 1984) 85−5626
fibre couplers, radiation losses 85−41139
fibre dispersion and light loss meas., using pulse delay method 85−62383
fibre equilibrium mode distribution development, Corning data broadband fibre transient behaviour and steady state mandrel charact. 87−46521
fibre equivalent-step-index techniques, usage-based comparison 85−41150
fibre excess length effects in multifibre cable 88−13796
fibre fanout connector for 10-fibre ribbon cable termination 87−7139
fibre fusion splice loss meas. using light injection 88−1945
fibre fusion splices, allowable loss in multispliced links *(Japanese)* 86−9527
fibre graded-index-rod components, coupling losses 88−26795
fibre in 1.55 μm wavelength region, loss variation meas. using fibre coupler 88−58080
fibre IR loss increase, influence of Si-H in silicone buffer 86−9565
fibre junction loss, anal. with appl. of phase space diagram *(German)* 85−50945
fibre laser cavities, losses study 88−20691

optical losses continued
fibre light guide, uninterrupted radiation detection, demonstration *(Russian)* 87−68060
fibre lightguides, gradient, matching, optical losses at joining 85−46183
fibre loss increase due hydroxyl group formation with exposure to H_2 gas, time and temp. depend. 85−46194
fibre loss increase due to H_2 from coating resin 85−35527
fibre loss meas., stabilised light sources *(Japanese)* 88−26993
fibre loss meas. by Fourier transform spectroscopy 87−54073
fibre loss meas. by side-illumination technique 85−12575
fibre loss meas. method *(Chinese)* 88−1966
fibre loss meas. system, detector selection for production testing 87−68151
fibre loss meas. using OTDR, launch and receiving conditions 88−51440
fibre loss measurement method 85−29628
fibre loss measuring equipment using comparison method, submarine cable stability/reliability testing appl. 85−20738
fibre loss spectra, meas. set-up with improved repeatability 86−42283
fibre loss testing, calorimeter design and construction *(Hungarian)* 85−37778
fibre measurements, symposium, Boulder, CO, USA (Sept. 1986) 87−43801
fibre mode exciters constructed with alternate concatenation of step-index and graded-index fibres, anal. 86−68241
fibre optic, LAN, design standards 86−37886
fibre optic and laser sensors, conf., Arlington, VA, USA (May 1984) 85−22054
fibre optic cable, single process, optical loss increase at low temp. 87−60949
fibre optic cables, parameters affecting meas. 85−47542
fibre optic cables, resin gas-tight dam, struct. design *(Japanese)* 87−56185
fibre optic cables, splice loss meas. using OTDR 88−41691
fibre optic cables losses meas., using Siemens universal reflectometer 87−49109
fibre optic communication system power and attenuation meas. 86−63657
fibre optic connector extrinsic loss mechanisms, production data and anal. 87−12185
fibre optic connectors for LAN applications; evaluation 88−13871
fibre optic coupler, low-cost fabrication technology and loss performance 88−39923
fibre optic device for simultaneous laser power transmission and temp. meas. 85−7233
fibre optic directional coupler, low loss 85−24286
fibre optic endlessly-rotatable fractional wave device, appl. to lightwave technologies *(Japanese)* 88−7879
fibre optic fanout connector for fibre-ribbon cable termination, struct. design 87−60946
fibre optic fused silica flexible imaging device, optical performance obs. 88−39945
fibre optic industrial networks with short lines, planning and design aspects *(German)* 88−60142
fibre optic LAN system design 87−34581
fibre optic lever transducer anal., three-fibre 85−24281
fibre optic link parameters, calc. 87−28592
fibre optic links for microwave signal transmission 87−49084
fibre optic loss meas. using optical time-domain reflectometer, launching and receiving conditions *(Japanese)* 87−18733
fibre optic low loss tunable coupling ratio multiple tap network perform. 88−47062
fibre optic materials, very low loss, development 85−24259
fibre optic modules, frost-resistant 86−28834
fibre optic passive components, differential mode loss and mode conversion 87−18641
fibre optic passive loop resonator gyroscope, depend. on resonator parameters and light source coherence 85−56321
fibre optic photoelastic press. sensor with fibre-loss compensation 87−38783
fibre optic polariser, low-loss, compact 88−51442
fibre optic sensor, intensity-modulating, loss compensated sensors of ang. position and displacement 88−16167
fibre optic sensor, reflection-type, developments 88−16163
fibre optic sensor, silicone-clad, water penetration into optical cable detection 88−41699
fibre optic sensors, loss charact. 88−36012
fibre optic sensors, referencing methods description and analysis 88−33671
fibre optic shock sensor *(Japanese)* 86−31414
fibre optic splice losses, continuous monitoring 88−26816
fibre optic system, multimode, LED effect on bandwidth 85−37065
fibre optic temperature sensor utilising thermally induced bending loss *(Japanese)* 87−63405
fibre optic transceivers for microwave signal transmission 87−49089
fibre optic transmission systems in terrestrial environment, radiation induced loss 88−33633
fibre optic waveguides, spectral attenuation props. after γ-irrad. up to 32 kGy 85−62339
fibre optic wavelength filter with sharp cut-off charact. 87−74815
fibre optical links, fault location and loss meas. using time-domain reflectometer 85−46148
fibre optical links, radiation resistance and protective measures *(Czech)* 85−14286
fibre optics, high-gain, Raman-gain coeffs. 88−33622
fibre optics, mode transition matrices for differential mode attenuation and dispersion 87−34584
fibre optics, multicomponent glass optical fibres with lowered OH content and reduced loss 85−35484
fibre optics, principles and fibrescope appls. *(Spanish)* 87−7076
fibre optics, radiation-induced losses, temp. depend. 85−7228
fibre optics hazards in medical appl. environment 88−36456
fibre optics in adverse environments, conf., San Diego, CA, USA (Aug. 1984) 85−32880
fibre organisers for optical cable joints, loss change charact. *(Japanese)* 88−41703
fibre OTDR, range and accuracy in backscatter measurements 87−8755
fibre packagings characterisation procedure relative to microbends 85−46136
fibre parameters for 1.3 μm subscriber line 87−7110
fibre polishing with motor-driven abrasive wheel, technique and fibre charact. 88−58082
fibre radiation response in a nuclear reactor environment 85−35412
fibre ring resonator, low loss 85−24291
fibre sensors, single-mode/multimode fibre losses and phase variations, theoretical study and utilisation *(Dutch)* 85−37605
fibre single-mode, step-index, microbending losses, anal. 87−12169

optical losses continued
fibre splices, arc-welded, monomode made using local injection and detection of blue light 87−7134
fibre splices, mechanical, design and performance 87−7136
fibre splices, multimode graded-index and GRIN rod lens couplers, misalignment losses 85−35389
fibre stimulated Raman scattering, distortion-free transmission design 87−7439
fibre submarine cables, effect of hydrogen on transmission loss *(Japanese)* 87−8306
fibre submarine cables, loss stability assurance against H_2 88−35497
fibre subscriber loops, field trial results in Tokyo 85−20239
fibre surface waveguides and communication appls. 86−53963
fibre tapers, single-mode, loss mechanisms 86−63638
fibre tapers, single-mode, performance charact. 87−32966
fibre tapers at 1.3 μm for self-aligned beam expansion and single-mode hardware 88−1942
fibre transmission loss characteristics during drawing, continuous measurement 87−7080
fibre transmission of high power excimer laser radiation 88−7847
fibre transmission systems generations charact., technological developments and system trends *(Czech)* 88−28844
fibre units, manufacture and performance, for installation by viscous drag of air 86−48156
fibre waveguide, graded-index, with extremely low losses, CVD fabrication 85−12610
fibre waveguide with F-doped cladding and pure quartz glass core, fabrication 85−56327
fibre waveguides, low-loss, with polymer coatings solidified by UV radiation 85−35502
fibre Z 85−18687
fibre-optic cable losses, technological defects effect 87−70041
fibre-optic cables, H_2 effects under accelerated conditions 86−42255
fibre-optic cables, H_2 induced effects and possible countermeasures 86−42332
fibre-optic communications systems and their physical limitation effects 86−64989
fibre-optic gyroscopes, Rayleigh backscattering noise, calc. 85−50930
fibre-optic micro-bend dark-field sensor 87−26043
fibre-optic modal coupler using periodic microbending 86−36186
fibre-optic polarizer, D-shaped, with In coating 87−38791
fibre-optic recirculating delay lines, laser phase noise, effect on coupler and loop losses 85−41138
fibre-optic remote gas sensor system, 20 km range, based on low-loss near IR optical fibres 85−62369
fibre-optic rotation sensor, phase noise, coherence length effect 85−24325
fibre-optic sensors, displacement measurements, loss-compensation technique 87−35026
fibres 88−65174
fibres, additional losses induced by microbends due to polymer coating 86−36154
fibres, anisotropic, depressed-cladding profile 87−38788
fibres, arc fusion splicing techniques *(Japanese)* 87−8255
fibres, azimuthally inhomogeneous circularly birefr., modal analysis and design criteria 88−65264
fibres, birefringent, longitudinal coherence props. of light waves 87−54027
fibres, chalcogenide, optical charcts. 88−39860
fibres, connection techniques *(Polish)* 87−12207
fibres, crystalline IR, new develop. 88−39907
fibres, dispersion-shifted, bending charcts. *(Japanese)* 87−74667
fibres, dual-shape core with α-index centre core, charcts. 87−68136
fibres, fabrication by out-diffusion method 88−26788
fibres, Febetron-irradiated effects of test parameters on recovery 88−13853
fibres, frost-resistant noncrystallised silicone coating, loss reduction 85−62298
fibres, Gaussian profile dispersion shifted, VAD 86−36241
fibres, Gaussian-profile dispersion-shifted, VAD manufactured, design and performance 87−7109
fibres, GeO_2 doped, single-mode, dispersion-shifted, splice, microbending and Rayleigh losses, anal. 86−42321
fibres, graded-index, low-loss fusion splices 85−41143
fibres, hermetically coated, loss increase charcts. at high temp. 86−9564
fibres, IR, dispersion and attenuation meas. using Pb-salt laser 85−18670
fibres, IR transparent, low loss, overview 85−18658
fibres, jacketing with ordered thermotropic liq. cryst. polyesters 88−39896
fibres, lossy, Gaussian pulse propag., effect of fifth-order nonlinearity in refractive index 86−48132
fibres, low loss, single mode, zero chromatic dispersion, 1.3 to 1.6 μm 86−9601
fibres, low-loss, containing rare earth ions, fabrication by extended MCVD process 85−62294
fibres, low-loss fluoride for mid-IR communication 88−13826
fibres, mode field diameter definition for splice loss eval. 88−26771
fibres, monomode, splicing techniques, optical losses and technique complexity 85−41118
fibres, multimode, irradiation induced attenuation investig. 88−33693
fibres, multimode and single mode, radiation response at 1.3 μm 85−35429
fibres, multimode for local area networks, system loss prediction using power transfer matrices 85−42569
fibres, multiple clad, dispersion and bending losses 88−13793
fibres, new transparent material for reduced optical attenuation *(Italian)* 88−39856
fibres, nonlinear, with loss, soliton broadening compensation 87−26006
fibres, OH absorption increase, gamma-ray effects 86−48106
fibres, optical losses influence of light reflecting polymer cladding 86−36169
fibres, OTDR, fault location accuracy, reflective vs. nonreflective faults 87−7104
fibres, phase velocity and loss coefficient investig. 85−29618
fibres, phosphorus effects on low temperature radiation response 88−45160
fibres, PICVD, pure SiO_2 core, influence of preform collapse process 88−20356
fibres, plastic high density connectors *(Japanese)* 87−8256
fibres, polarisation-maintaining, low-loss, low-crosstalk, design and fabrication 87−7120
fibres, polarisation-maintaining long-length low-loss 88−13813
fibres, polycrystalline, micropores, expt. obs. 88−39902
fibres, polymer coatings, influence on low-temp. optical losses 86−2748
fibres, power loss, modal noise and distortion due to microbending 85−56277
fibres, precision-wound 88−39920
optical losses continued
fibres, quasi-single-mode operating region, meas. of LP_{11} mode loss length depend. 86−48134
fibres, radiation from bend of step-index single-mode fibres 87−53967
fibres, radiation losses, surface roughness effects 86−28827
fibres, radiation-induced attenuation, steady-state exposures, interlaboratory comparison 88−33635
fibres, radiation-induced loss, drawing condition depend. 86−22088
fibres, reliability issues and telecomm. appls. 87−74782
fibres, short wavelength loss edge caused by hydrogen 86−9567
fibres, single mode, microbending loss calculations 85−35487
fibres, single mode, precision cleaving and fusion welding 86−36196
fibres, single mode low-loss low-OH, VAD fabrication 86−9555
fibres, single-mode, coated, microbending effects at low temp. 88−1941
fibres, single-mode, curvature depend. of effective cutoff wavelength 87−32964
fibres, single-mode, dispersion-shifted and dispersion flattened, splice loss, comparison 87−12134
fibres, single-mode, flat mass splicing technique 86−42343
fibres, single-mode, low loss dual window with low bending sensitivity 86−42320
fibres, single-mode, nonlinear pulse propag. dynamics, influence of optical losses 86−63652
fibres, single-mode, radiation response prediction 88−13849
fibres, single-mode, radiation sensitivity charact. 86−42311
fibres, single-mode, self-imaging offset measurements 86−42323
fibres, single-mode, soliton evolution from chirped and noisy pulses 87−46462
fibres, single-mode, splice loss related to fusion time, temp. and index profile alteration 86−42342
fibres, single-mode graded-index triple-clad for 1.55 μm system operation, transmission props. 85−62314
fibres, single-mode low-dispersion graded-index, numerical method for anal. 86−2734
fibres, single-mode multiple-clad dispersion flattened low loss, long lengths for cables and links 86−37915
fibres, single-mode operating at few-mode wavelengths 88−65201
fibres, single-mode splice loss, effect of eccentricity 87−74693
fibres, single-mode with high numerical aperture, bend loss meas. 86−28818
fibres, single-mode with step-index profiles, microdeformation losses 86−48112
fibres, SiO_2 core, radiation induced light emission 85−35427
fibres, spectral attenuation meas. using cut-back method 87−46448
fibres, spectral charactn. 88−51533
fibres, splice loss meas. using local launch and detect technique 88−26770
fibres, step-index, radiation-resist., optical characterisation 85−35409
fibres, step-index used for point source scanning, lateral offset power loss meas. 87−68129
fibres, stimulated Raman scattering with nonconstant losses, two-wavelength model 86−58959
fibres, stress-applied polarisation-maintaining, vectorial wave anal. *(Japanese)* 86−42302
fibres, tetrachloroethylene-filled fused-quartz IR optical transmission loss meas. 85−35488
fibres, total spectral loss, rapid modelling and estimation 87−7124
fibres, transient radiation effect meas. method, nanosec. timescale 85−35408
fibres, transmission quality, factor affecting, review 88−51452
fibres, ultra low loss, scattering and other parameters 85−18659
fibres, UV coated, transmission loss, effect of high strain proof test 86−9544
fibres bending loss formula explaining bends on loss curve 88−1969
fibres containing low rare earth ion levels, fabrication, low loss charcts. 86−36222
fibres exposed to H_2 atm., loss increase 85−50924
fibres for pulsed laser radiation, transmission, attenuation, damage thresholds *(German)* 87−54017
fibres H_2-induced loss, drawing condition dependence anal. 86−36146
fibres having distorted refractive index profile cladding loss 87−74721
fibres monomode, bend loss formula, expt. modification 86−9546
fibres single-mode, high-strength long-length synthesised by vapour axial deposition 87−7117
fibres single-mode, microbending loss approx. formulas 87−54028
fibres testing, single-mode, standard meas. procedures 87−14583
fibres weakly guiding, curvature effects on leaky modes 86−36175
fibres with scatt. loss, Fourier analysis of complex envelope of echos in optical freq. domain reflectometer 86−44443
filter, prism based spectral filtering, for ultrashort pulses, low losses 87−18791
flat bunch fibre format, fundamental studies 85−42584
flexible fine ferrule for optical fibre connectors 88−58161
fluoride fibre glasses, absorpt. loss due to Fe ions, reduction using oxidation technique 85−56299
fluoride fibres, crystallisation free, core-clad composition 85−62313
fluoride glass fibre links for 2.5 μm wavelength, performance 87−8265
fluoride glass fibres, reduction of impurities by starting material purification 85−12533
fluoride glass fibres for infrared transmission systems, optical and mech. props. 88−58149
fluoride glass IR fibres for light transmission up to 5 μm, numerical aperture meas. 85−18663
fluoride glass optical fibre, low OH and low loss, fabrication 85−12552
fluoride glass optical fibres, scattering loss peaks 86−58770
fluoride glass single-mode fibre, preform fabrication technique and transmission loss charcts. 87−7087
fluoride glasses, complex ions elimination by NF_3 processing 86−28775
fluoride glasses, transition metal impurities, absorpt. losses and redox states 86−22061
fluoride glasses for optical fibres, reduction of OH absorpt. 85−12534
fluoride optical fibres, 0.5 μm photoluminesc. 86−63651
fluoride optical fibres, elevated NA, preparation 86−63650
fluoride optical fibres, removal of Fe, Co, Ni and Cu from Zr to reduce absorption losses 85−18633
fluoride optical fibres, scattering characteristics 87−38731
fluoride optical fibres, scattering loss and O content 86−22137
fluoride-glass single-mode fibres, ultralow-loss, design 87−7142
fluorozirconate glass preforms and optical fibres, manufacturing processes 88−45071
frame transfer CCD image sensor, reflection losses reduction 87−14196
Fraunhofer interference of dielectric interface with travelling wave radiation, dielectric waveguide bending loss reduction 86−16013
frost-resistant fiber-optic cable 88−65195

optical losses continued
fusion-spliced fibres, Zeiss-Linnik interferometric exam. 87−18592
gamma-ray irradiation induced loss in optical fibres, estimation 88−45159
Gaussian beams through off-axis circular apertures, loss 88−45502
geodesic lenses, perfect imaging requirement 87−74832
glass:Tb_4O_7 Faraday rotator low loss single mode fibres, MCVD fabrication 87−18694
glass, ultralow-loss, development, book contrib. 87−12103
glass fibre, radiation sensitivity, effects of defect modification and reduction techniques 88−477
glass fibre cable tester for 1300 nm waveguide system *(German)* 85−8401
glass fibre lightguides, ageing effects 85−35520
glass fibres, UV-radiation induced colour centres 87−7065
glass ion-exchanged channel guides, thermal tapering 88−33745
glass porous layers for optical waveguides, CO_2 laser processing, low propag. loss 85−29530
glass waveguides fabricated by Tl ion exchange, optical loss and index profile *(Chinese)* 85−29565
gradient index lens for low-loss coupling of laser diode to single-mode fibre 87−18585
gradient index rod lens appl. to low loss coupling of laser diode to single mode fibre 86−42344
gradient optical fibres, splice attenuation *(German)* 87−1959
gradient-index channel waveguide, modal conversion due to boundary perturbations 85−41151
GRIN fibre cables, radiation resistant 88−22152
GRIN rod lens coupler, angular tilt misalignment loss 86−58741
guided-wave multi/demultiplexer using embedded gradient-index ion exchange waveguides 88−67408
hard clad silica fibres, props., advantages, appls. 85−29567
heat-treated optical fibres in H_2 atmosphere, visible-region loss rel. to photobleaching 85−41134
heavy metal fluoride glass, crystallisation kinetics, comp. for optical fibres with low scattering loss 85−18628
heavy metal fluoride glass systems for optical device technology, radiation effects 87−18574
heavy metal fluoride single-mode mid-IR fibres for telecommunications, design 88−58112
heavy metal halide glass fibre lightwave systems, extrinsic and intrinsic losses 87−18630
heavy metal halide glass fibres, IR materials, dispersion shifted fibre designs with low bending losses 87−18703
heavy metal halide glass fibres, single mode, at long wavelengths, ultra low microdeformation loss predictions 87−18702
heavy metal halide glasses as optical fibre material 87−74659
heterojunction injection laser with distributed Bragg mirror, thermally stable output wavelength 86−29165
HF fibre optic links, fundamental gain/bandwidth limitations 87−49085
high capacity hydrogen absorber, optical cable losses 88−67388
high capacity optical fibre systems, tolerant WDM 87−40977
high fibre density optical connector for use in electronic packaging systems 88−33670
high lateral-load resistance ofliquid-crystal-polyester-jacketed optical fibers 86−68285
high- and low-loss fibres, sorting out their roles 88−7865
hollow dielectric waveguides, loss calc. 88−26857
hollow waveguides, excitation depend. losses and temp. increase at 10.6 μm 87−74723
image fibre, radiation resist. characts. 85−35523
image fibre bundle, radiation resist. characts. 85−35525
image guide transmission props., irrad. effects 85−35522
image propagation through heterogeneous aerodynamic flows, wind tunnel expts. 88−40580
infrared optical materials and fibres, conf. Los Angeles, CA, USA (Jan. 1986) 87−16254
injection laser, homogeneously broadened, analytic model, waveguide scatt./absorpt. loss 85−7448
integrated optical circuits, waveguide modes, coupling techniques and fabrication 86−15514
integrated optical components for fibre sensors, splitting loss 87−12242
integrated optical waveguides, attenuation meas. using fibre probe 85−62398
integrated optical waveguides, mode propagation losses, simple meas. method 85−24332
integrated optics devices, bend losses reduction 86−9613
integrated optics dielectric rib waveguide, curvature radiation loss, scalar Helmholtz eqn. calcs. 85−35477
integrated optics theory and technology, book 86−19721
ion-exchanged optical waveguides, out-of-plane scatt. 85−50919
IR fibre developments, medical needs 88−7866
IR fibre optics materials, review 87−60873
IR fibre technology, promise and status 86−28883
IR fibre waveguides, optical characts. 87−74709
IR fibres, crystalline, scattering effects 88−58100
IR fibres, manufacture and loss reduction *(Japanese)* 85−29575
IR fibres, spectral loss meas. methods 2 to 11 μm *(Chinese)* 85−62288
IR fibres and materials, review 85−35468
IR hollow glass fibre, evaluation 86−36124
IR lightguide, scattering and absorpt. loss meas., calorimetric method 86−9521
IR optical fibres in Japan, development for telecommunication appls. 87−18701
IR transmitting fibre optics, spectral props. 87−18705
IR-optics materials, optical losses determ. by laser optoacoustic method 86−28777
laboratory meas. of optical fibre communication parameters for MSc students 86−58766
LAN, low loss optical fibre system and cost optimisation 88−67436
LAN links, loss measurement methods 87−34582
LANs, loss evaluation using mode transfer matrices 87−34585
large-diameter multimode optical fibres, accurate charactn. of transmittivity 88−7849
laser, optically pumped FIR waveguide, pump absorption and losses *(Chinese)* 88−2313
laser, soliton, model, analytic theory 86−3003
laser amplifiers, excess spontaneous emission factor 85−29828
laser array, phase locking 88−58410
laser cavity, losses, radiation spectrum locking, phase polaris. method 87−7414
optical losses continued
laser Cw single-mode, influence of thermally induced anisotropy of active element on diffraction losses 85−7408
laser diode, separated multiclad-layer, rigorous waveguiding anal. 87−12430
laser diode and polarisation maintaining fibre coupling by gluing *(German)* 88−45090
laser fibre tails, high temperature stabilised, improvements in laser package reliability 86−42307
laser infinite strip unstable optical resonators, power loss calc. 88−2326
laser resonators, ultralow loss, gain and loss meas. 85−51210
laser unstable resonators with spherical mirrors, misalignment sensitivity 88−34068
laser with delayed-response active medium under periodic loss modulation, multistability and autostochasticity 85−41304
lasers, unstable resonators with spherical mirrors, losses and mode structure 88−34067
lasers with saturable gain and distributed loss, 1D model 87−61057
leaky wave spatial spectrum generated by guided wave scatt. from acoustic wave 87−18658
LED-based lightwave systems, high-bit-rate, dispersion and loss, temp. effects 86−23848
light wave conductors, connection technology *(German)* 87−68118
lightguide connectors, losses minimisation 86−23935
lightwave splicing and connector technology 87−62928
$LiNbO_3$:Ti waveguide resonators, integrated low finesse, loss 85−35532
link, installed, attenuation meas., insertion loss modification method 87−74765
load-carrying cable, attenuation, influence of fibre fabrication process 86−36170
long fibers with periodically compensated loss, soliton propag. 86−42260
long fibres, soliton propag., loss compensated by Raman gain 85−46168
long wavelength systems, ultra low-loss optical fibres fabrication 86−4621
long-haul single mode fibre attenuation meas., laser and LED source effects 87−26026
long-span optical fibre transmission systems, 2 to 4 μm wavelength 87−40976
long-wavelength optical links, fibre materials for low losses in mid-IR region *(Spanish)* 88−3997
low loss bends for planar optical waveguides, theoretical study 88−65293
low loss optical connectors to be used in fiber-optic measurements *(German)* 88−51448
low-loss joints between dissimilar fibres by taperingfusion splices 86−36147
low-loss single-mode fiber with reduced inner cladding 87−53959
low-loss single-mode fibres for use in 1.55 μm wavelength region, optimisation 87−74674
Mach-Zehnder low-loss modulator using mode coupling Y-branch waveguide 88−47129
macrobending losses and cutoff wavelength in dispersion-shifted segmented core fibres 86−53947
materials with absorpt. loss and amplification gain, SHG *(Chinese)* 86−9939
MCVD graded-index fibres with various glass comps., IR loss stability 86−2822
measurement of optical cables, time-domain reflectometer appl. *(Japanese)* 86−30750
measurement using two photodiode-operational amplifier pairs 85−20741
mechanical connectors for optical fibre cables 87−8290
mesh waveguide star coupler, loss reduction 88−65316
metal-clad graded-index optical waveguides, ohmic loss 86−42257
metal-clad optical slab waveguides, step- and graded-index type, absorption loss study 86−42266
metal-clad planar optical waveguides produced by diffusion, guided mode characts. 87−53996
metal-clad ridge-waveguide laser, proper waveguiding condition 86−54132
metal-clad ridge-waveguide laser modes, calc. by mode coupling technique 86−63646
metallic tube IR waveguides with inside dielec. coating, low attenuation 88−20379
microbending losses, calc., pseudomode and radiation mode methods 86−28800
microbending losses analysis in single-mode fibres 87−7077
microbending losses in single-mode fibres, anal. 86−53951
microlenses formed by electrostimulated diffusion method, near IR performance 85−41203
mid-IR fibre ultralow-loss communications 87−8310
mid-IR fibres from cryst. materials, chalcogenide, heavy metal oxide and fluoride glasses 86−48176
mirrors in Orsay storage ring FEL, diagnostic techniques and UV-induced degradation 86−3192
modal noise due to short-wavelength transmission, single-mode fibres 88−26751
mode coupling in optical fibres used for laser spot welding 88−58758
mode transducers utilising coupling effects of multi-mode coupling system, appl. to optical cct. components *(Japanese)* 87−68163
modes of phase-locked diode-laser arrays of closely spaced antiguides 88−65683
modulation instability, optical loss effects in PSK modulated coherent fibre systems 85−12600
monomode attenuator with permanent power transmissioncontrol *(French)* 86−9576
monomode fibre cut-off meas. method 86−2832
monomode fibre splicing techniques, comparison 85−18734
monomode fibre waveguide dispersion meas. from spot size 86−2833
monomode fibres, cut-off wavelength meas. method 85−12548
monomode fibres with loose tube jelly filled jacket, loss mechanisms 87−38810
monomode optical fibre cables with low losses at 1.55 μm, manufacturer, laying and splicing 85−58145
monostatic balanced Doppler velocimeter using high birefringence fibre 88−36014
multi-fibre connector, single-mode, demountable, plastic-molded 87−7137
multi-fibre ribbon connectors, plastic moulded, design, fabrication and loss characts. *(Japanese)* 85−46192
multichannel demultiplexer for optical communication lines 85−8435
multichannel resonators with wavefront-reversing mirrors, inter. loss suppression 85−18978
multifibre connector for ribbon-to-single fibre fan-out, low loss 86−28812
multilayer slab waveguide characts. determ. method 88−2002
multilayered coupler for optical guided-wave devices 86−953i

optical losses continued
multimode, degradation due to H_2, model 86−42256
multimode and singlemode fiber splicing in BellCanada 86−2836
multimode cabled coated optical fibres, graded-index, losses at low temp. 87−25927
multimode fibre, power transmission limits 86−2674
multimode fibre, source power distrib. charactn. by splice offset technique 86−48107
multimode fibre attenuation meas., interlaboratory comparison in China 87−26029
multimode fibre connections, attenuation and interference calc. 87−46436
multimode fibre directional coupler using GRIN-rod lenses, coupling loss anal. 86−68229
multimode fibre graded-index couplers, coupling ratio depend. on physical charact. of fibre 85−29541
multimode fibre lightguides metric, meas. standardisation 85−18706
multimode fibre links with distributed mode-selective losses, modal noise 85−20176
multimode fibre loss, automatic meas. of spectral depend., cutback method and system *(Czech)* 87−12202
multimode fibre manufacturing tolerances specification, systematic approach 85−29622
multimode fibre source power distrib. charact. by splice offset technique 87−46523
multimode fibre splice loss, relating system and laboratory meas. 88−20351
multimode fibre splices, loss, noise and distortion due to tilt misalignment, modal analysis 85−7224
multimode fibre-optic network, loss behaviour characterisation using mode transmission matrices 85−42579
multimode fibres, CVD fabricated, effect of OH content on spectral charact, in 1.2-1.8 μm range *(Polish)* 85−35453
multimode fibres, splice loss anal. for multiple misalignment 87−68164
multimode fibres bandwidth concatenation, review 87−68069
multimode graded-index fibres, spectral attenuation charact, WDM transmission line design appl. *(Japanese)* 85−18727
multimode gradient index fibre microbent into arbitrary shape, power loss *(Korean)* 88−45077
multimode lightguides, losses caused by microbends 86−36210
multimode optical fibre connector losses *(Czech)* 88−58150
multimode optical fibre with lossy cladding, attenuation meas. *(Czech)* 86−63625
multimode optical transmission lines, planar microoptical multiplexer/demultiplexer 87−40920
multimode optical waveguides, fibre losses meas., *(Czech)* 86−4675
multimode SMA connector, ultra-low-loss 88−13876
multimode variable directional coupler using electrostrictive element 88−58159
multiple clad fibres, dispersion-flattened type, bending losses of higher-order modes 88−13799
multiple quantum well coupling element with losses 88−1962
multiple-clad fibres, microbending loss 86−42319
multiplexed bidirectional optical fibre links *(French)* 86−30832
multiplexer, low cost two-channel, for LAN, low insertion loss 86−49681
MW910A portable OTDR, high performance *(Japanese)* 87−53945
nonlinear directional couplers, saturation and loss 87−53953
nonlinear film guided waves, propag. 87−74742
nonlinearity limits of transmission through optical fibres 88−65245
nonregulated optical fibres, power loss calcs. *(Croatian)* 87−12205
nuclear optical fibre penetration 85−35413
nuclear reactor thermal neutrons, induced loss of optical fibres 88−51491
one-dimensional image fibre, transmission charact. for strong-coupling case *(Japanese)* 85−18728
open laser resonators with tilted mirrors, losses 87−33235
optical fibre loss cancellation, semicond. laser pumped Brillouin amplification at 1.5 microns 86−54205
optical fibre splice loss, local meas. by light launching at spliced point 85−46174
optical fibres, fusion neutron damage, induced loss meas. 88−58096
optical fibres, hermetically coated, anti-thermal and high strength coating development 87−18621
optical fibres, loss increases due to H_2 chemical reactions 86−22121
optical fibres, with distorted refr. index profile, tunnelling loss 85−7265
optical thin film waveguide polariser with a-Si:H clad, realisation and charact. study *(Japanese)* 88−39979
organic materials for integrated optics, loss props. 87−12099
OTDR for optical fibre cable meas. 87−8304
passive components for multimode fibre-optic networks, manufacturing technique 86−42328
passive fibre optic components using dispersion shifted fibre, biconical fusion technique fabrication 87−38843
passive integrated optics components for fiber opticscommunication in moldable glass, fabrication 86−36240
PCS fibres, attenuation temp. dependence *(Czech)* 88−58086
PCVD fibres, transmission loss behaviour in H_2 atm. 86−2675
pentafluorotrideuterostyrene plastic optical fibers for near-infrared transmission 86−42237
phosphate laser glass of absorption loss of 10^{-4} cm^{-1} 88−26742
photothermal deflection for waveguide loss measurement 88−65288
photovoltaic concentrator technologies, design requirements, energy-cost model 86−19495
physical contact connectors, low insertion and high return loss, with spherically convex-polished end 86−22090
planar and channel optical waveguides fabrication on Si substrates 85−46126
planar metal-clad optical waveguides, TM mode-attenuation reson. 85−46205
planar structures, leaky absorbing, for polarisers, loss coeff. and perturbed propag. const. 87−68190
planar waveguide losses meas. using coherent fibre bundle 87−26064
planar waveguides with leaky modes, propag. consts. of TE modes 87−74711
plastic clad SiO_2 fibre terminations, real world optical system usage 85−7225
plastic fibre using polycarbonate core, development and charact., communication appls. 88−26765
plastic optical fibres, influence of H_2O adsorpt. on losses 86−22065
plastic optical fibres, light scattering loss *(Japanese)* 88−13893
plastic-clad silica fibres, attenuation props., modelling 87−68122
PMMA: benzil(benzildimethylketal), optical waveguide fabrication and loss meas. 86−2766

optical losses continued

PMMA plastic optical fibres, absorption losses 86−28831
polarisation holding directional couplers using D-fibres, low insertion losses 85−7215
polarisation maintaining, PANDA fibres, low loss and crosstalk charact. for communication appls. 86−2681
polarisation maintaining optical fibres, long length and low loss, charact. 88−65225
polarisation-maintaining fibre, 26-km length 87−32937
polarisation-maintaining fibre, spliced, 100 km long, crosstalk charact. 88−53250
polarisation-maintaining fibre couplers with low excessloss 87−1945
polarisation-maintaining fibres, loss and dispersion charact. 87−38746
polarisation-maintaining single-mode fibre/semicond. laser optical coupling technique 87−38737
polarising anisotropic fibres and their leaky modes 86−15459
polished glass surfaces, ellipsometric obs. rel. to losses in laser cavity 87−12531
polished single-mode fibre couplers, loss analysis; 86−2824
poly-vinylidene fluoride copolymer poled guest/host composite for freq. doubling and waveguiding structs. 87−53933
polycarbonate core optical fibre, automotive appl. 88−39922
polycrystalline fibres, light scattering by voids 88−58122
polymer clad silica optical fibres, γ-irrad., transmission losses 87−38831
polymer coatings for optical fibers 87−7164
polymer films, acousto-optics charact., waveguide appl., loss calc. *(Russian)* 85−41105
polymer films, optical, waveguide and acoustooptic props. 85−35490
polymer optical fibre development, loss mechanisms and fabrication 87−46446
polymer strip waveguides, charactn. by leaky-mode spectroscopy 88−7911
polymers, optical waveguides, fabrication by ion implantation 88−65308
polystyrene, plastic optical fibres, for near IR transmission, prep. 87−38771
power transfer matrices used in system loss prediction, parabolic and step index fibres 87−25954
prism coupling of IR EM surface waves by Gaussian light beams 86−53969
programmable optical demultiplexer using 32-element Si photodiode array *(Japanese)* 88−60194
programmable optical devices for automatic measurement *(Japanese)* 87−53946
pulse dispersion, asymptotic linear, in pressure of fibre nonlinearity and loss 85−56335
pulse lasers, short period loss modulation anal. *(Russian)* 87−26357
pulsed lasers, gain determ. by maximum loss method, suitability 86−22434
quartz glass fibres with losses below 1 dB/Km 88−20367
Raman amplification of recirculating pulses in reentrant fibre loop 85−29926
reflectometric fibre optic hydrophones improvement 87−29986
resin coatings, UV curable, for optical fibres, attenuation and buckling props. *(Japanese)* 88−26793
resonant optical fibre microbend sensors, coupled power equations reformulation 85−35396
resonators, symmetric stable spherical-mirror, loss formulae 88−27228
resonators with Gaussian reflectivity mirrors, hard aperture effects on mode props. 87−39159
rhodamine 6G, concentration dependent laser threshold 86−68484
rigid contact between a channel $LiNbO_3$:Ti waveguide and single-mode fiber waveguides 87−68113
ring cavities, losses of counterpropagating modes, eigenvalues and eigenfunctions 85−18972
ring cavities, losses of counterpropagating modes, eigenvalues and eigenfunctions 85−18973
rod lenses, GRIN, optical fibre sensing appl. 88−42117
ruby pulse lasers, short period loss modulation anal. *(Russian)* 87−26357
Selfoc microlenses, radiation response at 1.3 μm 85−35429
semiconductor laser dynamics, self-modulation, nonlinear losses and mode chirping 88−8229
semiconductor laser mixer for RF signal down-conversion process, losses and operating props. study 85−46464
semiconductor laser with composite cavity structs., longit.-mode stability and wavelength tunability 85−29809
semiconductor lasers, pulsation current depend. due to photon induced modulation of optical loss 85−12863
semiconductor optical waveguide loss meas. using Fabry-Perot interf. technique 86−9595
semiconductor optical waveguides, loss and facet reflectivity meas. technique 87−54051
serial microbending sensors, backscatter meas. 85−12580
shock waves of ultrashort light-pulse envelopes in optical fibres 85−24652
silica glass optical fibres, H_2 molecules diffusion and solubility 85−41129
silica glass single-mode optical fibres, high-speed drawn, 1.53-μm optical losses 86−2667
silica optical fibre, long wavelength region, anal. *(Japanese)* 86−2714
silica waveguides, hollow-core 87−32944
single mode fibre, length dependence of cutoff wavelength, bending loss 86−68242
single mode fibre characteristics 87−68065
single mode fibre optic connectors and splices, insertion losses 85−7218
single mode fibre splicing, axis misalignment and splice loss estimation using direct core monitoring 85−46146
single mode fibre splicing techniques, statistical anal., splice loss per fibre-span meas. 87−26028
single mode fibre structures, mode field diameter definitions, splicing losses prediction 87−26022
single mode fibres, bend-optimised dispersion-shifted designs 86−22108
single mode fibres, bending loss charactn. 88−58071
single mode fibres, bending loss charact. 88−45164
single mode fibres, bending losses determ. from spot size meas. 88−39929
single mode fibres, chromatic dispersion 86−48158
single mode fibres, cutoff wavelength, upper limits based on modal noise approach 88−65249
single mode fibres, dispersion flattened and dispersion shifted, worldwide status 88−65244
single mode fibres, GeO_2-doped, in submarine cables, H_2 influence on loss 85−35434
single mode fibres, length depend. of effective cutoff wavelength 85−12572
single mode fibres, microbending loss eval. 87−32931
single mode fibres, OH-ion content in statistical distrib. of losses in repeater sections 88−41682

optical losses continued
single mode fibres, relative meas. of scatter levels, new technique 86−55866
single mode fibres, self core alignment arc fusion splicer, cladding mode leakage light power monitoring method *(Japanese)* 87−8307
single mode fibres, self-imaging offset meas. 86−15452
single mode fibres, step-index core and dispersion-shifted segmented core, in loose tube cable designs, bending resist. 86−43857
single mode fibres for land cables, design, fabrication and characterisation 85−18733
single mode fibres for undersea cable, high strength low loss flame fusion splicing 85−7220
single mode fibres with 'W' profiles, bending losses insensitivity 86−28788
single mode high NA plasma CVD fibres, F doped, loss reduction 86−36233
single mode optical fibre, microbending theory, implications 88−65238
single mode optical fibre cable, field splicing system 85−20237
single mode optical fibre cables for 1.3 μm region, design and transmission characts. 85−20236
single mode optical fibres, bending losses 88−58076
single mode pushin connector development *(German)* 88−15460
single mode splices, automatic fabrication and meas. *(German)* 88−45089
single mode step index fibres, bending and microbending loss sensitivity 85−29612
single mode waveguides, propagation loss measurement technique 88−20414
single-mode, microbending losses, combined analytical and numerical methods for calc. 86−63636
single-mode 5-fibre plastic connector, loss anal. 86−55308
single-mode fiber loss meas., light detection technique *(Japanese)* 85−31612
single-mode fibre, depressed-clad triangular-index-profile, with dispersion minimum at 1.55 μm 85−29555
single-mode fibre, F_2 added VAD fabricated, characts. 86−2820
single-mode fibre, low OH content, fabrication by particle size control sol-gel method 86−36220
single-mode fibre, low-loss dispersion-shifted, manufactured by OVD process 86−22103
single-mode fibre, noncircular field, mode-field radius, splice loss, and waveguide dispersion 88−51446
single-mode fibre, periodically deformed, radiation losses 87−32971
single-mode fibre array permanent attachment to waveguides, insertion loss 86−2726
single-mode fibre bonded splice, thermal stresses, finite element analysis 85−46171
single-mode fibre cables at 1300 nm, optical and mechanical properties 85−58146
single-mode fibre characts. beyond LP_{11} mode cutoff freq. *(Japanese)* 86−22174
single-mode fibre connector, low loss, design and fabrication 85−7217
single-mode fibre connectors, design consideration, insertion loss 85−7216
single-mode fibre devices, aberration of GRIN-rod lenses *(Japanese)* 88−51483
single-mode fibre directional coupler, polished, automatic manufacture 86−2673
single-mode fibre directional coupler with strong coupling, mode excitation theory and expt. 86−48105
single-mode fibre spectral attenuation precision meas. 87−46481
single-mode fibre splices anal., spectral loss characts. eval. 88−65220
single-mode fibre systems, effective cutoff and modal noise 86−9547
single-mode fibre transmission characts. prediction from mode field dia., splice loss 86−42324
single-mode fibre waveguides for low-loss Y-type directional couplers 86−28833
single-mode fibre-laser diode coupling with ball lenses 88−65189
single-mode fibres, bending losses 86−9497
single-mode fibres, depressed index substrate tubes to eliminate leaky-mode losses 86−22105
single-mode fibres, dispersion-modified, review 88−26797
single-mode fibres, dispersion-shifted, characts. 87−68083
single-mode fibres, dispersion-shifted convex-index 86−15467
single-mode fibres, fabrication of tapers by controlled core diffusion 88−33606
single-mode fibres, fusion splice loss 85−7219
single-mode fibres, GeO_2 doped, H_2-induced loss increases 85−18685
single-mode fibres, mass fusion splice method 87−60951
single-mode fibres, microbending loss, upper and lower limits 86−28813
single-mode fibres, microbending loss eval. 88−65234
single-mode fibres, mode field diameter eval. by transmitted field pattern methods *(Japanese)* 87−68161
single-mode fibres, one-end splice loss meas. method using OTDR 86−50234
single-mode fibres, RF phase shift depend. on microbending loss 85−46173
single-mode fibres, self alignment effect in V-groove method, splice characts. study *(Japanese)* 88−39949
single-mode fibres, self-imaging transverse offset meas. 86−28797
single-mode fibres, small-core, high refr. index anisotropy for efficient nonlinear optical effects 86−63618
single-mode fibres, step index, radiation from circular bend, theoretical anal. 87−53961
single-mode fibres, step-index, radiation from circular bend *(Japanese)* 86−15500
single-mode fibres, stuffing-pulling mass fusion splice techniques *(Japanese)* 87−68159
single-mode fibres exposed to H_2, loss increase over long term *(French)* 87−25919
single-mode fibres in ribbon, optimum number determ. *(Japanese)* 88−39948
single-mode fibres jacketed with loose jelly-filled tube, loss mechanisms 87−7130
single-mode fibres with index well profiles, leaky-mode loss of second propag. mode 85−50903
single-mode fluoride fibres, dispersion-flattened, design for optimum performance from 1.5 to 2.9 μm 88−65178
single-mode helical fibres, losses 88−1968
single-mode integrated-optical polarizers in $LiNbO_3$ and glass waveguides 85−24336
single-mode lightguide systems, modal noise probability 86−63644
single-mode limit of optical fibres from spotsizeparameters 86−28787
single-mode multiple-clad fibres with dispersioncompensation and low microbending loss 86−2670
single-mode optical fibre, pure silica core, struct. and characts., transmission cable appl. 87−46545
single-mode optical fibre, spectral loss and cut-off wavelength meas. by variable wavelength *(Korean)* 86−53965
single-mode optical fibre cable splicing and jointing techniques *(Japanese)* 86−2689
single-mode optical fibre cables with fibre density of 1.5 fibres/mm^2 87−49039
single-mode optical fibre splice loss measurement methods, comparison 88−26826
single-mode optical fibre switch *(Japanese)* 86−28876
single-mode optical fibre tapers for self-alignedbeam expansion 86−53956
single-mode optical fibres, matched and depressed cladding, fabrication, CVD 87−38766
single-mode optical refl. bending and intersecting waveguides 86−9464
single-mode optical-fibre ribbon cable 85−31029
single-mode step-tapered waveguide section design, power loss 87−38760
single-mode weakly guiding bent fibres, scalar field theory and 2D ray theory 85−56323
single-mode-fibre fused coupler, propagating-beam model 87−46461
single-mode-fibre optical time domain reflectometer using 1.5 μm semicond. laser 86−43816
single-polarisation single-mode fibre, 3 km long 86−9465
SiO_2:Ge fibres, gamma irrad. and heat treated, OH loss increase mechanism, EPR study 85−35519
SL undersea lightwave system, mechanical optical switch for regenerators 85−37042
slab waveguide, fundamental mode, tilt, offset and end-separation loss 87−18642
small diameter cables, relation between sheath thickness and lateral load characts. *(Japanese)* 86−55306
solar cells, electrical and optical losses anal. 86−13045
solar cross-compound parabolic concentrators, losses 86−33696
solar photoelectrochemical cells, optical losses calc. and meas. 87−43447
solid-state ring laser, magnetooptic feedback loop for beat regime stabilisation 86−54175
spectral analyser design, with high resolution and stability *(Japanese)* 86−31278
spinor formalism and guided waves 87−1957
splice, multimode mechanical, low-loss for field environments 86−11099
splice loss in optical fibres from one-way OTDR measurements, probability model 88−26815
star coupler, fibre, small loss-deviation, for LAN, design and fabrication 85−62312
star coupler, ion exchanged, for multimode fibre communications, low losses 86−9598
star coupler and optical accessor composed of planar gradient-index glass waveguide 86−42361
step-index fibres, effective cutoff freq. of LP_{11} mode, theoretical study 88−13797
step-index single-mode fibres, radiation from circular bend, theoretical study *(Japanese)* 85−50971
stress-induced birefringence fibres with lossy stress-applying sections, single-polarisation single-mode guidance 87−46456
submarine cable production using arc fusion splicer with profile alignment system 87−7132
submarine cable splicing using self-core-alignment arc-fusion splicer 87−7133
submarine cable system, universal jointing 88−47186
submarine optical fibre cables, long-term loss stability *(Japanese)* 87−28615
submarine optical fibre cables, water propag. blocking props. *(Japanese)* 87−13739
subscriber cables, measuring equipment *(Japanese)* 87−8258
subscriber optical fibre transmission system, statistical design method for loss compensation *(Japanese)* 86−49628
synthetic single mode fibre develop. with high dimensional accuracy *(Japanese)* 88−51477
tactical multichannel fibre-optic connector design and optimisation *(French)* 88−41714
taper splice method for subscriber single-mode fibre cables 87−18591
tapered fibre star coupler with mixer rod, small loss deviation 85−7232
tapered-beam expander for single-mode optical-fibre gapdevices 86−22087
telephone junction network, WDM system 88−46479
temperature dependence of signal loss in precision-wound optical fiber 88−45116
thin film components, absorpt. losses, meas. by photothermal deflection spectroscopy 88−45266
thin-film optical waveguide fabrication by ion exchange *(Japanese)* 86−48090
thin-film optical waveguides, transmission loss meas. using rectangular glass probe 86−2750
tight structure cable, fibre strain finite element anal. 86−4684
TM-pass polariser using metal-clad waveguide with high index buffer layer 88−33714
transatlantic optical fibre cable link with repeaters, Bell TAT-8 system, performance and losses *(German)* 85−14271
transient attenuation in connectors to PCS fibers and in glass-on-glass fibers induced by pulsed X-rays 85−35423
transmission engineering for lightwave premisesapplications 86−55319
transmission line, long, optimum cable length *(Japanese)* 87−13740
transmission loss of liquid-crystal-polyester-coated optical fibers at liquid-nitrogen-temperatures 87−38839
transmission losses in Tsuruga experimental optical fibre cable system *(Japanese)* 86−11087
transmission subsystem, multimode four-channel, using wavelength division multiplexing 85−42581
transmission systems characts., operational experiences with 8 and 34 Mbit/s systems *(Czech)* 86−43842
transmitter pointing loss calculation for free-space optical communications link analyses 87−62924
triple-clad step-index single-mode fibres, with dispersion compensation, macro-bending loss study 86−42240
UHF analog optical communication systems, intensity noise sources 87−13713
uncoupled stacking of parallel ARROWs for 3-dimensional optical wiring 88−65339
unstable resonator containing randomly inhomogeneous medium, laser radiation field coherence function 86−54173
unstable resonator semiconductor lasers, theory 87−33227

optical losses continued
UV curable resin-coated optical fibres, transmission characteristics at low temperature 88−26828
V-type fibre-optic couplers with low losses for duplex communication lines 87−68041
VAD single mode fibres in mass production performance charact. 85−56352
vertically installed premise optical fibre cable, cable-clamp struct. anal. *(Japanese)* 87−28616
water ingress in fibre cables 87−74672
waveguide, multimode branching, optimum length for mode depend. reduction 86−22072
waveguide, TM-mode selective filter using a high refractiveindex lossy layer cladded optical waveguide 87−7144
waveguide attenuation measurement, compensatory method 87−74773
waveguide corners, transmission charact. 86−2756
waveguide devices, loss and phase shift measurement 88−7916
waveguide fabrication, planar and channel, by N^+ implantation in fused SiO_2 85−29546
waveguide laser, self-focusing parallel-plate, modes, numerical calc. 88−1980
waveguide laser resonators, spherical mirror misalignment effects 86−68579
waveguide loss calc. based on Green's function determ. in paraxial approx. 86−9467
waveguide loss meas. by scattered radiation detection 87−18602
waveguide loss measurement by scatt. radiation detect. at visible and near-IR wavelengths, optimum conditions 87−54050
waveguide loss measurement method 87−8752
waveguide loss measurements by three-prism method 86−42293
waveguide losses at corner bending, in situ meas. method 85−7203
waveguide propagation losses, measurement method 88−51520
waveguide resonator with wavefront-reversing mirrors, waveguide and resonator losses 85−41434
waveguide with linear refr. index distrib., bending losses improvement *(Japanese)* 86−9529
waveguide Y-branch structures, radiation loss 85−62323
waveguide-bend configuration with low-loss characteristics 87−18673
waveguides, bending losses, numerical matrix calc. 87−38793
waveguides, circular hollow, loss evaluation, ray-optical treatment of attenuation constants 85−50927
waveguides, curved, integrated optical circuits appls. 87−54042
waveguides, metal-clad GRIN, guided wave charact., analytical results 87−46468
waveguides, metal-clad GRIN single-mode, attenuation charact. 86−63673
waveguides, nonlinear, TE waves, power-depend. attenuation 88−20403
waveguides, planar, GRIN, numerical anal. using matrix method 87−60914
waveguides, planar dielectric, low loss Y-junctions 85−7261
waveguides, production by solid state diffusion, examination of props. 88−20420
waveguides, single-mode slab with truncated parabolic profiles, energy losses at junction 85−62871
waveguides, spectral charactn. 88−51533
waveguides metal-coated, dispersive props. 86−48120
wavelength division multiplexers/demultiplexers using fused taper couplers, insertion loss and isolation 88−45098
wavelength flattened 8×8 single-mode star coupler 88−65241
WDM optical fibre with minimised insertion loss 86−65000
weakly guiding fibres, power loss calc. using far-field method 87−74804
wide Y-junctions with low losses in three-dimensional dielectric optical waveguides 85−35469
YAG:Nd optical quality single crystal fibres, laser assisted growth 85−29542
AG halide IR fibres, optical absorption by free carriers 85−18661
AgBr, IR single crystal fibres fabricated by travelling-zone melting 85−18668
AgBr polycrystalline waveguides, IR, preparation and props. 86−68222
AgCl IR fibre bundles, production by plastic deformation methods 85−29574
AgCl, IR single crystal fibres fabricated by travelling-zone melting 85−18668
AgCl polycrystalline waveguides, IR, preparation and props. 86−68222
AgCl-AgBr IR fibre, fabrication, charact. and appls. 87−46549
AgCl-AgBr crystalline fibres, appls. 88−58127
AgCl-AgBr polycrystalline waveguides, IR, preparation and props. 86−68222
$AgCl_{0.95}Br_{0.05}$, IR transmitting fibres, optical props. 87−18711
$AgCl_xBr_{1-x}$ fibres, optical and mechanical props. 88−58121
AgX (X=Cl,Br), extruded fibres, optical and material props. 87−18710
Al coated optical fibres, mech. and optical props. 87−38813
Al waveguides, planar dielectric coated for 10.6 μm radiation, attenuation charact. 86−58776
Al-GaAs-AlGaAs asymmetric metal-clad waveguides, optical charact. anal. and mode selection 88−65330
Al-coated fibre, high-temp. effects 87−7128
AlF_3-based glasses, IR fibres, prep. and props. 87−18708
AlGaAs DH based injection lasers with narrow strip contact, spectral and noise charact. 86−36501
AlGaAsSb-GaSb heterojunction laser, optical amplification 88−58554
AlN plane optical waveguide prod. by reactive magnetron sputtering *(French)* 88−20423
Al_2O_3 optical quality single crystal fibres, laser assisted growth 85−29542
Al_2O_3 optical waveguides, low loss, reactive deposition by modified DC planar magnetron sputtering 85−12553
Al_2O_3 planar optical ridge waveguide low-loss bends 88−65348
Al_2O_3, ruby, single cryst. fibre growth and nonlinear optical use 87−39246
α-Al_2O_3 sapphire single crystal optical fibres, low loss, charact. 87−18713
Al_2O_3:Cr optical quality single crystal fibres, laser assisted growth 85−29542
ArF_4 based fluoride glass single-mode fibre fabrication, transmission loss 85−12569
As-Ge-Se-Te chalcogenide glass fibres for thermal IR transmission 87−18719
As-S fibres, optical losses at 0.8 to 1.6 μm 86−28837
As-S glass IR fibre, Teflon clad, optical loss due to water diffusion 87−32923
As-S glass IR fibre, Teflon-clad, low-absorption losses 86−42269
As-S glass fibre, Nd:YAG and CO laser beams, simultaneous delivery 88−20336
As-Se and As-Se-Te IR chalcogenide tube waveguides 87−18720
As-Se chalcogenide glass optical fibres, IR range, plasma-chemical deposition 86−36137
As_2S_3 fibres, IR, optical and mechanical props. 88−33643
As_2S_3 glassy fibres, radiation absorpt. charact. in 1 to 8 μm range 85−24321
As_2Se_3 fibres, IR, optical and mechanical props. 88−33643
$As_2Se_{3-x}Te_x$ chalcogenide glass system, mech. and optical props. 88−20322
BeO ceramic waveguide, losses in 10.6 μm region, IR refl. and Raman spectra 85−7274
$Bi_{0.8}Gd_{2.2}Fe_{4.9}Al_{0.1}O_{12}$ epitaxial garnet film, optical isolator charact. meas. 86−9485
$(BiLuGd)_3Fe_5O_{12}$-$(BiGd)_3(FeGa)_5O_{12}$ composite film, temperature-stabilized optical isolator for collimated light 88−45255
(BiLu)IG LPE garnet film, low loss 0.8 μm band optical isolator 88−51596
BiRIG garnet based optical isolator for 0.8 μm wavelength, insertion loss 88−65399
CO gasdynamic laser, optical losses in resonant self-absorption 88−20535
CO laser, mutual enhancement obs. of stimulated emission lines 88−65572
CO waveguide laser with distributed losses, gain and saturation parameter 86−22306
CO_2 DFB laser, small cross-section design for 1.06 μm 88−27231
CO_2 Model 143 pulse-periodic laser, emitted radiation parameters optimisation 88−65570
CO_2 high-pressure laser, direct optical pumping with pulsed HF pump laser, low-loss resonator 87−26275
CO_2 intracavity laser, working state *(Chinese)* 88−65550
CO_2 laser resonator with diffraction grating operated in autocollimation regime, frequency-selective loss 85−41433
CO_2 lasing charact., effect of waveguide statistical surface roughness 87−26309
CdS_xSe_{1-x} integrated optics waveguides, fabrication, Se diffusion conditions 86−28890
CsBr IR fibre waveguides, optical charact. 87−74709
CsBr-CsCl two-layer single-crystal fibre waveguides, fabrication, optical loss reduction 86−48121
CuCl, IR single crystal fibres fabricated by travelling-zone melting 85−18668
F doped glass optical fibres, new materials could supersede quartz glass *(German)* 88−53259
GaAlAs integrated-optic waveguides exposed to ionising radiation, transmission loss meas. 86−58791
$Ga_{1-x}Al_xAs$-Ge-Si monolithic tandem solar cells, detrimental optical props. of intermediate Ge layer 85−60440
GaAs BH waveguides with high coupling efficiency for single-mode fibres 87−60942
GaAs based waveguides, integrated guided-wave optics 88−58209
GaAs directional coupler optical waveguides, long-term γ-ray effects on propagation characteristics 88−58190
GaAs electro-optic Y-branch broadband waveguide interferometer, 1.3 μm operation 85−29647
GaAs, electro-optic travelling-wave modulator *(French)* 88−20446
GaAs electroabsorption waveguide modulator loss, Goos-Hanchen shift effect 88−65380
GaAs, laser-induced aqueous etching, waveguiding effects 86−35571
GaAs lossy nonlinear directional coupler, numerical study 88−26860
GaAs monolithic integration, guided wave device design and fabrication 85−29732
GaAs optical waveguides, $SiCl_4$ reactive ion etching 86−22127
GaAs optical waveguides, low loss, MOCVD growth 85−56283
GaAs optical waveguides, low loss for integrated optics 86−28807
GaAs photodetector effectiveness improvement *(Slovak)* 86−31430
GaAs rib waveguide totally refl. mirrors, low loss 86−9594
GaAs, waveguide interferometers and couplers for high-speed electro-optic modulation and switching 87−38818
GaAs/AlAs multiquantum-well optical waveguide, fabrication by diffusion disordering 88−1993
GaAs/AlGaAs guided-wave devices, processing and performance 85−29644
GaAs/AlGaAs rib waveguides, low-loss, scattering props. 88−7912
GaAs/GaAlAs waveguide fabrication techniques 85−46196
GaAs-AlAs semiconductor waveguide bends, low-loss 88−45193
GaAs-AlGaAs, double heterostructures, passive waveguiding props. charact. *(German)* 85−35438
GaAs-AlGaAs optical waveguides, bend losses 87−74828
GaAs-AlGaAs single-mode miniature optical waveguide with low transmission loss coeff. 87−60943
GaAs-GaAlAs heterostructure waveguide electro-optic devices 85−41218
GaAs-GaAlAs high-NA optical waveguides with low losses 87−46451
GaAs-Ge-Si monolithic tandem solar cells, detrimental optical props. of intermediate Ge layer 85−60440
GaInAsP/InP electro-optic modulators using passive rib waveguides 87−38864
GaInAsP-InP electro-optical modulators using buried single mode waveguide struct., MOCVD fabrication, charact. 88−33770
GaInAsP-InP lasers, 1.5 μm, OMVPE grown, gain and loss coeffs. 86−9872
GaSb-AlSb multiquantum well heterostructures, enhanced T_0-values, laser appls. 87−68489
$Gd_{3-x}Bi_xFe_5O_{12}$ fibre-embedded micro-Faraday rotator for IR 85−35385
GdIG:Bi, Ca LPE films for low-loss optical waveguides, sputter etching effects 88−20422
GdScGG:Nd,Cr crystals for high-average-power slab lasers, Czochralski growth and charactn. 88−65621
$(GdSc)_3Ga_5O_{12}$:Cr,Nd, short-lived absorpt. rel. to solid-state laser efficiency 87−75057
Ge coated circular metallic hollow waveguides for IR radiation, electrodeposition prep. *(Japanese)* 87−18734
Ge-As-Se IR fibre waveguides, optical charact. 87−74709
Ge-As-Se-Te chalcogenide glass fibres for transmission in the 8 to 12 μm range 87−18718
Ge-Sb-Se IR chalcogenide tube waveguides 87−18720
Ge-Se chalcogenide glass fibres, IR, low loss, fabrication 85−7210
Ge-Se chalcogenide glass optical fibres, low loss IR, fabrication 86−9542
Ge-coated IR waveguides, fabrication and transmission props. 86−63631
GeO_2:Sb glass optical fibre prepared by VAD, loss values 85−12570
GeO_2-SiO_2 single-mode fibres with depressed claddings, interplay between GeO_2 and Fl concentrations 86−9545
H diffusion in glass optical fibres: effects, long term behaviour and preventive measures *(German)* 86−59905
H_2 diffused into optical fibres, loss increase charact. 86−9563
H_2 influence on optical fibre loss *(French)* 86−9574

optical losses continued
H_2 reversible diffusion in optical fibres, expt. determ. of time constant 88−58073
H_2CO discharge-pumped laser, far IR, small-signal gain meas. 86−58874
HF CW chemical laser, Fabry-Perot and stable resonator performance 87−61197
HfO_2-SiO_2, multilayer coatings, damage thresholds and optical losses meas. 85−12694
$In_{0.52}Al_{0.48}As$ electro-optic directional coupler grown on InP by MBE 87−74866
InGaAlAs/InP low loss ridge optical waveguides using MBE techniques 88−20399
InGaAlAs-InP ridge optical waveguide grown by MBE, low loss 87−74810
InGaAs monolithic integrated waveguide photodetector 87−46724
$In_{0.2}Ga_{0.8}As$-GaAs superlattices and $In_{0.012}Ga_{0.988}As$ MBE layers, low-loss optical waveguides fabrication 86−58745
InGaAsP/GaAs laser, internal loss and gain factor 87−46891
InGaAsP/InP self-aligned waveguide mirrors for optical integration 88−45208
InGaAsP/InP waveguides, narrowband grating resonator filters 86−68362
InGaAsP/InP(GaAs) injection heterolasers, optical confinement, coupling out losses, threshold current density calcs. 85−62560
InGaAsP-InP laser amplifier, 1.3 μm with integrated passive waveguides 87−68184
InGaAsP-InP material, waveguide struct. by epitaxial techniques 87−74811
InGaAsP-InP waveguide mirrors, self-aligned low-loss totally reflecting *(German)* 87−74813
InP based waveguides, integrated guided-wave optics 88−58209
InP/InGaAsP antiresonant reflecting optical waveguides, chemical beam epitaxy and propagation losses 87−32929
InP-InGaAsP optical waveguides, MOVPE grown, low-loss, single-mode, fabrication, props. and appls. 87−53984
KH_2PO_4 two-cryst. superradiant parametric light source, high-energy subnanosecond pulse pumping 87−19046
KH_2PO_4-KD_2PO_4 mixed cryst. optical waveguide grown on {101} plane of KD_2PO_4 cryst., charact. 87−54067
$KZnF_3:Cr^{3+}$ laser, Cr^{3+} excited ion absorpt. in tuning region 88−51783
KrCl excimer laser, unsaturated losses and saturation intensity 86−54073
KrCl laser, gain and loss meas. in He and Ne based gas mixtures 85−51122
KrF amplifiers, dynamic absorption effects 87−26265
LiF colour centre lasers with extremely low lasing threshold, miniature active elements 88−65642
$LiIO_3$, angle-tuned SHG with low losses due to index matching 88−8279
$LiNbO_3$, double proton exchange for low loss and quasi-embedded waveguides 87−74807
$LiNbO_3$ films for integrated optics appls., MBE growth 86−419
$LiNbO_3$ guided-wave Mach-Zehnder interferometric modulator fabrication by Ti-indiffusion and proton exchange, characterisation 85−29548
$LiNbO_3$ high quality waveguides fabricated by dilute melt proton exchange, optical props. 86−36228
$LiNbO_3$ low-insertion-loss channel waveguides fabricated by proton exchange 87−38743
$LiNbO_3$ mode extinction modulator, planar waveguide analysis 86−68312
$LiNbO_3$ optical quality single crystal fibres, laser assisted growth 85−29542
$LiNbO_3$ optical waveguide fabrication by Ti in-diffusion and proton exchange 85−46129
$LiNbO_3$ proton exchanged waveguides, y-cut, anomalous attenuation and depolarisation 86−68253
$LiNbO_3$ proton-exchange slab optical waveguides, charactn. 86−42254
$LiNbO_3$, single cryst. fibre growth and nonlinear optical use 87−39246
$LiNbO_3$ waveguide fabrication by $^4He^+$ implantation and transient annealing 86−2669
$LiNbO_3$ waveguides, high index low loss, fabrication 87−46512
$LiNbO_3$ waveguides, proton-exchanged, light propag. calc. 86−2744
$LiNbO_3$ waveguides, single-mode fibre attachment 85−7231
$LiNbO_3$:Ti channel waveguides, low-loss, efficient modulator operation at 1.3 μm 88−7975
$LiNbO_3$:Ti directional coupler switches, miniaturisation, theoretical and expt. charact. study *(Japanese)* 88−7991
$LiNbO_3$:Ti electro-optic Mach-Zehnder waveguide modulators, 1.51 μm operation, optically induced drift effects 87−12247
$LiNbO_3$:Ti guided-wave optical switch, 1×16, polarisation-independent 87−18749
$LiNbO_3$:Ti integrated stripe waveguides, locating and coupling fibres, insertion loss 86−2699
$LiNbO_3$:Ti, low loss optical waveguides 88−51523
$LiNbO_3$:Ti, low-loss high-extinction polarisers fabricated by proton exchange 88−33762
$LiNbO_3$:Ti, optical charactn. for integrated optical devices 88−51556
$LiNbO_3$:Ti optical waveguides and directional coupler switches for 1.56 μm, low insertion loss 86−68258
$LiNbO_3$:Ti travelling wave interferometric modulator, 1.3 μm, low insertion loss 87−54118
$LiNbO_3$:Ti, travelling-wave 1.3 μm interferometer modulator with high bandwidth low drive power and low loss 86−68327
$LiNbO_3$:Ti waveguide, acoustooptic conversion of guided mode into leaky wave 86−9606
$LiNbO_3$:Ti waveguide coupling to fibre, Ti/Mg double diffusion method 86−68246
$LiNbO_3$:Ti waveguide electro-optic polarisation controller, low loss, wavelength tunable, for λ=1.32 μm 86−15517
$LiNbO_3$:Ti waveguides, greatly reduced losses for small-radius bends 86−9597
$LiNbO_3$:Ti waveguides, high index low loss, fabrication 87−46512
$LiNbO_3$:Ti waveguides with angled interfaces, coupled to polarisation-maintaining fibres 88−51509
$LiNbO_3$:Ti:MgO waveguides, bend loss reduction through double diffusion 87−60962
$LiTaO_3$ optical waveguides, fabrication by H^+ exchange 87−46488
$LiXO_3$ (X=Ta, Nb), ion implanted optical waveguides, thermal stability 88−58196
MgF_2, optical film, scattering losses, rel. to deposition parameters 86−48075
N_2O high-pressure laser, direct optical pumping with pulsed HF pump laser, low-loss resonator 87−26275
Nd,Cr:$Gd_3Sc_2Ga_3O_{12}$ laser materials, crystal growth 87−44304
Nd:YAG fibres, clad for laser appls., performance 87−60913
Nd:YAG laser cavities; losses due to optical isolators 86−54182
Nd:YAG single crystal fibre lasers, at 1.064 and 1.32 μm, development 86−48372
Nd^{3+}:YAG laser mode locking in case of loss modulation 86−58904
optical losses continued
Nd^{3+}:YAG laser with resonator loss modulation, chaotic regimes and stability of peak output power 87−68417

SiO_2 core fibers, radiation induced losses 88−13848
SiO_2 core fibre and DFB laser, 420 Mb/s transmission through 203 km 86−11123
SiO_2 core fibre exposed to H_2, opt. spectra, drawing induced defects and chem. peaks 88−2024
SiO_2 core fibre, silicone clad, induced loss charact. under gamma irrad. 85−35526
SiO_2 core fibres, radiation response at 1.3 μm 85−35429
SiO_2 core optical fibres effect of Cl on radiation resistance 86−9541
SiO_2 core optical fibres, radiation resist., effect of impurities 85−35524
SiO_2 core optical fibres, triple clad, with zero total dispersion at wavelengths of 1.3 and 1.55 μm *(Japanese)* 87−26051
SiO_2 core single mode fibre, γ-ray irradiation charact. and lifetime estimation 88−58151
SiO_2 core single-mode fibre, charact. 88−33619
SiO_2 core triple-clad optical fibres, design method for zero total dispersion at wavelengths of 1.3 and 1.55 μm 88−26757
SiO_2 fibre, intrinsic transmission loss, temp. dependence 88−45148
SiO_2 fibre prepared by VAD, control of radiation induced defects 88−476
SiO_2 glass, ultrapure, prep. from autoclaved gels, drawn fibre optical losses 88−43950
SiO_2 glass:H_2 fibres, IR optical loss 87−7125
SiO_2 multimode channel waveguide for minimising fibre-waveguide-fibre coupling loss 86−48109
SiO_2 optical fibre aerial cable in 1.55 μm repeaterless transmission system 88−60183
SiO_2 optical fibre, spectral attenuation, temp. depend. 88−1944
SiO_2 optical fibres, charact., influences of drawing conditions 87−68131
SiO_2 optical fibres, drawing-induced defect centres and radiation-induced loss, influence of O_2 86−42248
SiO_2 optical fibres, radiation sensitivity, effects of impurities and H treatment 88−33632
SiO_2 optical waveguides, low-loss planar, fabrication using thermal nitridation and charactn. 87−12233
SiO_2 pure silica core matched cladding single mode fibres, performance 86−36232
SiO_2 reflection bending optical waveguide, loss meas. and anal. 88−33722
SiO_2 silica core single mode optical fibres, γ-ray and neutron irradiation props., induced loss lifetime estimate 88−58095
SiO_2 silica fibre, absorption peak at 1.52 μm 88−65209
SiO_x film waveguides for integrated optics, losses 87−54084
SiO_2:F glass core fibres, radiation resist. and induced loss 86−48174
SiO_2:F graded index optical fibres, radiation hardness 88−45121
SiO_2:Ge core fibres, radiation response at 1.3 μm 85−35429
SiO_2:Ge optical fibre loss increase due to H_2 and long-term loss stability 87−53966
SiO_2:GeO_2, F optical fibres, loss increases due to H_2 chemical reactions 86−22121
SiO_2:GeO_2 fibres, H-induced IR transmission loss *(Japanese)* 88−51482
SiO_2:GeO_2 fibres, hydrogen interaction, EPR study 88−7845
SiO_2:GeO_2 fibres, plastic-coated, optical loss increase after heat treatment due to OH^- ion prod. 85−29556
SiO_2:GeO_2 high NA multimode fibre made by pressurized MCVD 87−38803
SiO_2:GeO_2, loss increase induced by OH and radiation 88−39952
SiO_2:GeO_2 optical fibres, loss increases due to H_2 chemical reactions 86−22121
SiO_2:Sb_2O_3 fibres fabricated by VAD method 87−68082
SiO_2:SbO_x optical fibres, hydroxyl loss increase 86−28877
SiO_2-F cladded dispersion-shifted single mode fibres with dual shape core, VAD method 88−45141
SiO_2-F glass single-mode fibre, radiation induced loss reduction by P addition 86−42312
SiO_2-GeO_2 fibre, H_2 reduction effect by synthetic silica cladding 86−9566
SiO_2-GeO_2 fibres, heat treated in H atmosphere, fluoresc. at 657.7 nm, expt. study 85−18676
SiO_2-GeO_2 glass fibres, hydroxyl loss increase, Ge dopant effect 86−42271
SiO_2-GeO_2 graded index fibre, intrinsic loss, relative-refractive-index-difference depend. 86−9530
SiO_2-GeO_2, influence of impurities on loss increase, expt. study 87−25942
SiO_2-GeO_2 optical fibre, impurity diffusion from jacketing material 87−60947
SiO_2-GeO_2, optical fibre loss increase due to Hz, expt. study *(Japanese)* 86−2803
SiO_2-GeO_2:F(Cl) optical fibres, radiation induced loss 86−2737
SiO_2-P_2O_5 optical fibres, γ-irradiated, phosphorus oxygen hole centres 87−7066
SiO_2-Si multilayer structures as antiresonant reflecting optical waveguides 86−63605
SiO_2-SiO_2:F, pure silica core fibre with doped cladding, VAD fabrication technique and charact. 87−53964
SiO_2-based optical fibres, long-term transmission loss increase in H_2 atm. 88−33641
SiO_2-core single-mode fibres, VAD fabrication *(Japanese)* 86−9528
$Si_xO_yN_z$ film waveguides for integrated optics, losses 87−54084
SiO_xNy dielectric waveguides, optical props. 87−32927
SiO_xNy low loss optical waveguides fabricated by thermal nitridation of SiO_2 86−2668
Te-based chalcogenide glass optical fibres, low-loss, fabrication 86−63606
Ti^{3+}:Al_2O_3, Verneuil grown single crystals, optical props. and tunable laser action 88−65633

organic photomemory materials, charact., appls., review *(Japanese)* 88−51430
organic polymer films for nonlinear optics , for telecom. networks 88−71992
organic polymeric waveguides, nonlinear 88−51517
organic-inorganic double halides, SHG meas. 87−26526
oxide coating materials, laser damage threshold meas. with KrF laser pulses 85−7500
oxide crystal, melt growth of large crysts., review 86−34288
oxide solid solution, cryst. growth and electro-optic props. 86−36117
passive solar material research in Canada 85−29518
pentafluorotrideuterostyrene plastic optical fibers for near-infrared transmission 86−42237
perinaphthothioindigo dye, cis-trans photoisomerisation, photo-imaging sensor appl. 85−37473
phase change optical disc materials, laser recording/erasure *(Japanese)* 87−38717
photochromic fulgides, bistable optical switching and logic elements, single-wavelength illum. 87−46965
photochromic media for bit-oriented optical memories, simple model 85−12530
photon-mode image recording media, recent advances in Japan 88−45035
photonic material developments 87−12102
photopolymers, dye-sensitised, real-time holographic interferogram appls. 86−36605
photopolymers, holographic record self-amplification, diffusion effects *(Russian)* 88−34172
photorefractive crystals, light-induced scattering 86−42649
photorefractive materials, appl. to optical processing, overview 85−30481
photorefractive materials, introduction and appls. 87−68014
photorefractive materials for optical computing and image processing 88−65120
photorefractive materials for optical processing 87−46435
photosensors and optical recording materials *(Japanese)* 88−13778
photothermoplastic material, high spatial frequency limit 88−7843
photothermoplastic recording, use for visualisation of transparent media inhomogeneities 88−20782
plasmon optical discs, volume production 86−42216
plastic lenses, fabrication methods and properties *(Japanese)* 85−35378
plastic optical fibres, recent developments, review 88−20344
plastic substrate for optical memory disk 86−42217
plastics and polymers as optical fibre materials 87−74657
PLZT wafers, phase deformation recording for holographic and spatial light modulator applications 86−48514
PMMA, laser damage resistance improvement 85−19002
PMMA, plastic optical fibres, for near IR transmission, prep. 87−38771
PMMA, plasticized, laser damage 86−48072
PMMA, real time laser damage detect. by Strehl intensities 86−29218
PMMA laser damage resistant plastics, appls. 85−35376
PMMA plastic optical fibres, absorption losses 86−28831
polar molecular crystal Pockels effect obs. 88−58658
polishing of optical components for CO_2 lasers *(Japanese)* 86−29203
poly-N-vinylcarbazole as holographic recording material 87−12605
poly-vinylidene fluoride copolymer poled guest/host composite for freq. doubling and waveguiding structs. 87−53933
polyalkyl-d-cyanoacrylates, two-photon four-level hologram recording 86−54221
polycarbonate magneto-optical disc substrates, birefr. change under operating environments 88−45038
polycarbonate substrate for magneto-optical disc, optical anisotropy effect on CNR 87−38725
polydiacetylenes, intensity dependent refractive index, appl. to nonlinear ultrafast signal processing systems 86−3304
polydiacetylenes as nonlinear waveguide materials 87−12581
polyimide II, optical waveguiding 88−1920
polyimide planar optical waveguides, fabrication 87−54094
polymer glasses for nonlinear integrated optics, thin film processing 88−1919
polymer optical fibre development, loss mechanisms and fabrication 87−46446
polymer recording media, diffusion processes studied by holographic relaxometry 87−19061
polymer strip waveguides, charactn. by leaky-mode spectroscopy 88−7911
polymer substrates for optical discs 88−45036
polymer waveguides, nonlinear 88−58204
polymeric nonlinear optical waveguides 88−51518
polymeric optical waveguides, loaded with nonlinear organic materials 88−39978
polymers, doped amorphous, second harmonic generation 88−58682
polymers, imaging props. of static and Doppler 3D holograms 87−26574
polymers, laser-induced damage, accumulation effect 85−7507
polymers, modified, use in laser optics, stability, thermooptic parameters 88−26741
polymers, optically nonlinear for optoelectronic appls. 88−58054
polymers, VUV absorpt. coeffs., 240-170 nm 86−36112

optical materials continued
polymers and charge-transfer complexes, elec. cond., electronic and optical device appl. 87−53222
polymers for optical and electronic appls. 88−65119
polymers in electronics 87−52222
polystyrene, plastic optical fibres, for near IR transmission, prep. 87−38771
polyvinyl carbazole material for HOEs 87−12604
probe-beam microanalytical techniques for electronic and optical materials and device research 85−23610
quartz, ion implanted optical waveguides, refractive index profiles 87−12199
quartz, optoelectronic material, ion beam effects 88−7943
quartz single crystal, multiple pulse laser-induced bulk damage 85−7489
radiation effects in optical materials, conf., Albuquerque, NM, USA (Mar. 1985) 86−45905
rare earth-transition metal amorphous alloys for erasable optical storage, mag. props. 85−50822
recording disc using organic dye medium 86−42213
recording films, pulsed laser beam induced temp. profiles, latent heat effects 85−12928
recording materials, recent trends *(Japanese)* 88−13779
recording materials used in holography, general review 87−12603
recording medium, overcoated organic dye-binder, laser recording sensitivity 85−12527
reflectance characteristics of selected materials for reference targets for 10.6-μm laser radars 88−65116
reflection-based optical recording *(Dutch)* 88−1917
reflectors, combination of oxide and fluoride coating materials, laser damage threshold meas. with KrF laser pulses 85−7500
refractive index measurement, materials for optical sensors 87−68007
requirements for optical processing and computing devices 85−46896
reversible optical recording, phase change media and magneto-optics comparison 85−50892
reversible optical storage, theory and new materials 88−45068
reversible optical storage developments *(Czech)* 87−60876
review of new materials 87−18576
review of optical materials for variety of appls. 87−60875
N-salicylidene-2-thenylamines, solid state photochromism and thermochromism 87−46428
sapphire crystal growth, by gradient solidification method 88−43858
sapphire IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
scratch standards, improper use for damage threshold prediction 85−7494
semiconductor compounds, laser induced phase transition, possible reversible optical disc use 85−50896
semiconductor materials and structures, electro-optical device development 86−2857
semiconductors, photoelectrochemical etching of holographic gratings 87−12606
p-Si, damage due to Nd^{3+} laser pulses 85−2388
silica based materials for mid infrared optical fibres *(Danish)* 87−68033
single crystal fibres, laser-heated pedestal growth method 85−16903
single crystal growth via gradient solidification method 88−11953
single crystal optical fibres, growth and appls. 86−68301
single-photon materials for spectral hole-burning, search 85−46117
solar application material testing and evaluation 85−28272
solar conversion devices using advanced optical materials 88−33587
solar energy conversion and lighting technology, materials and optics conf., San Diego, CA, USA (Aug. 1986) 87−65041
solar thermal technology, material priorities and appls. 85−29519
Southwest optics conf., Albuquerque, NM, USA (March 1985) 86−26479
spatial light modulators and appls., conf., Los Angeles, CA, USA (Jan. 1984) 85−10307
spectrally selective surfaces for heating and cooling 88−33586
storage, effect of incident angle on readout 87−54135
storage media, conductive polymers as active technology 87−60882
storage media, production of erasable magneto-optical types 87−60877
storage media, Verhulst model analyses of technological growth in optoelectronics 85−24436
surface defect charact. using pulsed laser damage methods 87−26497
surface pulsed laser induced damage threshold 85−7496
surfaces and composite materials, nonlinear optical props. 87−46994
synthetic nonlinear media developments for freq. conversion of solid laser sources 87−39244
TCNQ copper salt, semicond. laser marking studies on thin films, SEM, Raman spectra and DSC obs. 88−51425
TCNQ salt, CuTCNQ, optical recording media, reversible write-erase props. 86−53936
textured optical storage media, dynamic S/N meas. 85−12529
textured optical storage media, writing mechanism 85−24253
thermal fracture in nonlinear optical materials 88−20751
thermoplastic film imaging, recording technique for real-time coherent light valve 85−29938
thermoplastic materials, information recording procedures, review *(German)* 85−7549
thermosetting resin substrate for computer-useoptical memory disks 86−42218
thin films, optical data storage 85−56265
thin films for holographic recording, grating formation 85−56885
thin films with form birefringence, deposition, characterisation and simulation 85−35577
trans-thioindigo dye for solar collectors 85−60433
transparent, optical breakdown and laser failure mechanisms 86−68605
transparent dielec. material, inclusion response to laser radiation, statistical inspection 88−70389
tungsten bronze family photorefractive crystal progress, growth and appls. 86−36113
UV coating materials for highly refl., antirefl. coatings, laser damage thresholds 85−29517
UV filtering material for lasers, UL coating *(Chinese)* 86−22445
waveguide materials for CO_2 laser, IR optical consts. 86−28772
waveguide of polymethyl methacrylate doped with benzophenone and coumarin 88−45190
wavelength-multiplexed optical recording, materials research in Japan 88−33581
window materials for I laser operating at 1.315 μm, effective optical absorpt. and thermo-optic coeffs. meas. 85−7479
WO_3 electrochromic films, amorphous, reactively evaporated, solar transmittance determ., for energy efficient windows 85−18639
WORM media modelling, unified theory 88−65162

optical materials continued
write and read many times optical media, unified theory for sensitivity function 88−51428
YIG magneto-optic sensor development, magneto-optic props. meas. of IR transparent materials 85−3928
AG halide IR fibres, optical absorption by free carriers 85−18661
Ag diamond turned mirror, single and multiple pulse catastrophic damage at 10.6, 1.06 and 0.532 μm 85−7498
Ag-Zn alloyed film for optical recording, vac. evaporation preparation *(Japanese)* 88−31848
Ag-Zn film for optical recording, magnetron sputtering prep. *(Japanese)* 88−31847
AgBr polycrystalline waveguides, IR, preparation and props. 86−68222
AgCl polycrystalline waveguides, IR, preparation and props. 86−68222
AgCl:AgBr polycrystalline fibres, absorption spectrum 85−2017
AgCl-AgBr polycrystalline waveguides, IR, preparation and props. 86−68222
$AgCl_{0.95}Br_{0.05}$ fibres, IR optical props. 86−68231
Al-polymer-Al trilayer optical disc, high performance 85−14465
AlN/GdTbFe/AlN/Al magneto-optical disc 87−38881
Al_2O_3 microwave windows, TiN coated, opt. props. *(Japanese)* 86−14809
Al_2O_3:Ti sapphire laser crystal growth 87−36691
$Al_{23}O_{27}N_5$ IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
$Al_{23}O_{27}N_5$, optical measurements on advanced performance domes 85−35372
As-Se glass, IR optical materials, production 87−18575
a-As_2S_3:Sb_2S_5 films, hologram recording 87−68643
As_2S_3-Ag-As_2S_3 photosensitive semicond.-metal recording media based on photostimulated diffusion *(Russian)* 86−48071
As_2Se_3-Ag-As_2Se_3 photosensitive semicond.-metal recording media based on photostimulated diffusion *(Russian)* 86−48071
As_2Sn_3 thin films for hologram recording, temp. effect on diffr. efficiency 85−19055
β-BaB_2O_4 SHG crystal, charact. in femtosecond region 87−54412
β-BaB_2O_4, nonlinear optical material, linear electro-optical effect 88−58232
β-BaB_2O_4 single crysts., flux growth, SHG appl. 87−31483
BaClF:Sm^{2+} for photon-gated optical holeburning storage 86−58732
$BaTiO_3$, altering photorefractive props. by reduction and oxidation at 650°C 86−36114
$BaTiO_3$, beam coupling at 442 nm 85−50891
$BaTiO_3$ charact. for electro-optic devices 88−7840
$BaTiO_3$ photorefractive crystals, growth, processing and charactn. 88−1923
$BaTiO_3$ photorefractive materials for optical processing 87−46435
$BaTiO_3$:Fe, photorefractive effect, microscopic origins due to Fe impurities 86−36115
$BeAl_2O_4$:Cr alexandrite laser crystal growth 87−36693
BeO ceramic waveguide, losses in 10.6 μm region, IR refl. and Raman spectra 85−7274
Bi/Se multilayer thin films, optical recording 87−38720
$Bi_{12}GeO_{20}$, electrogyratory and electrooptic coupling 87−12100
$Bi_{12}GeO_{20}$, optical storage photoelectrochemical memory, charge fields and flat-band potentials 88−65126
$Bi_{12}GeO_{20}$ photorefractive materials for optical processing 87−46435
$(BiLuGd)_3Fe_5O_{12}$-$(BiGd)_3(FeGa)_5O_{12}$ composite film, temperature-stabilized optical isolator for collimated light 88−45255
$Bi_{12}SiO_{20}$ crystals, dynamic beam deflection using photorefractive gratings 86−36116
$Bi_{12}SiO_{20}$ large single crystals, development 86−52428
$Bi_{12}SiO_{20}$ light amplifier, mode form. and competition in optical resonators 86−36568
$Bi_{12}SiO_{20}$ photoconductive electrooptic crystals, physical props. and appls. *(Chinese)* 85−18634
$Bi_{12}SiO_{20}$, photorefractive, hologram recording, real-time defect enhancement using inversion props. 87−12621
$Bi_{12}SiO_{20}$ photorefractive materials for optical processing 87−46435
$Bi_{12}SiO_{20}$ 87−12100
$Bi_{12}TiO_{20}$, spatial light modulation 86−15521
a-C:H diamond-like coating on Ge, rain erosion resistance improvement obs. 87−18794
CO_2 pulse laser effects on optical materials, production technology influence obs. *(Czech)* 85−7485
CS_2-Te optical disk, high-density recording 87−74648
CS_2-Te optical films, for direct-read-after-write optical discs, fabrication materials and processes *(Japanese)* 85−58385
CaF_2 and other fluorides, possible solarisation related impurities 86−28778
CaF_2 crystal growth, by gradient solidification method 88−43858
$CaLa_2S_4$ optical ceramic, powder synthesis 87−18578
$CdGeAs_2$, high efficiency SHG, wavelength dependence 85−19017
$Cd_xHg_{1-x}Se$ optical filter, spectral transmission distrib. 86−2907
CdHgTe thin films for holographic recording, grating formation 85−56885
CdS crystals for holographic grating recording photochemical reaction 85−56883
CdS microcrystallite-doped sputtered thin film glass waveguide charact. 88−33720
CdS, single cryst. growth by modified vapour technique, high resist., transmission meas. 85−54433
CdS waveplates for IR lasers, reproducible volume manufacture 87−19017
CdTe, IR optical materials, production 87−18575
CdTe phase-transformation-based optical storage using multilayer metal film and mW laser 85−41463
CdTe:In, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
$Cd_{1-x}Zn_xS$, single cryst. growth by modified vapour technique, high resist., transmission meas. 85−54433
CsBr-AgBr fibres, growth by Stepanov's method 87−18628
Cu diamond turned mirror, single and multiple pulse catastrophic damage at 10.6, 1.06 and 0.532 μm 85−7498
Cu salt thermally sensitive films, optical recording of data 85−1953
Fe-Tb multilayers, magnetic properties and structural charactn. 87−60878
$FeBO_3$:Ni photoinduced linear optical anisotropy study, optical data storage appls. 87−1932
Ga-Se-Te/parylene system 86−2651
$Ga_{1-x}Al_xAs$ optical filters, thermo-optical effects 87−38728
GaAs, photorefractive beam coupling with picosec. pulses 87−19040
GaAs photorefractive materials for fast updatable optical correlators 88−65406
GaAs:Cr, photorefractive behaviour using two-beam coupling 87−19041
GaAs-GaAlAs MQW material, nonlinear optical props., phenomena and appls. 86−3299

optical materials continued
$Gd_3Sc_2Al_3O_{12}$:Cr and $Gd_3Sc_2Al_3O_{12}$:Nd,Cr laser crystal growth 87−36691
$Gd_3Sc_2Ga_3O_{12}$:Nd,Cr codoped garnet cryst. growth for laser use 87−36689
$Gd_3Sc_2Ga_3O_{12}$:Nd,Cr laser crystal growth 87−36693
$Gd_3Sc_2Ga_3O_{12}$:Nd,Cr laser crystal growth, comparative studies 87−36692
Ge, Czochralski technique grown large diameter crystal, IR optics appl. 88−45040
Ge laser window, laser induced damage threshold 85−7488
Ge, optical absorption coefficient meas., surface and bulk absorption, appl. to IR laser windows 85−7194
Ge, properties and appls. 88−7836
Ge:P crystals, seeded growth in soft lined crucible, dopant distrib. 87−23604
Ge-Sb-Te-Se erasable phase-change optical discs, review 88−65155
GeTe-Sb_2Te_3 amorphous films, high speed overwritable phase change optical disc material 88−45046
H_2 generation by materials related to submarine optical cables 86−63664
$HgIn_2Te_4$, linear and nonlinear properties in mid infrared 87−68628
In-Sb, optical disc medium, write-erase mechanism 88−13787
In-Se phase-change optical recording film, crystn. kinetics, effect of Tl and Co additions 88−45047
$In_{0.52}Al_{0.48}As$ as waveguide material lattice-matched to InP, refr. index 87−74656
InGaAsP-InP material, waveguide struct. by epitaxial techniques 87−74811
InP:Fe, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
KCl, polycryst. IR laser windows, hot forging prep. and charact. *(Chinese)* 85−62274
KCl single crystals for exit windows, damage threshold conditions under CW CO_2 laser irrad. 85−46448
KCl:Ca(Pb), effect of dopant on TEA CO_2-laser bulk damage threshold in superpure crystals 85−7490
KH_2PO_4 and isomorphs, electro-optical, linear and nonlinear optical props., devices, research areas, review 87−60872
KH_2PO_4 crystal, laser-induced bulk damage, effect of organic impurities 88−40292
KH_2PO_4 crystals, bulk laser damage threshold improvement by UV irradiation 86−48070
KH_2PO_4 crystals for freq. doubling components, fine diamond turning 86−58731
KH_2PO_4 isomorphs, bulk and surface damage thresholds at 248 nm 85−7495
KH_2PO_4 single crystal, internal laser damage threshold, struct. defects influence 85−51230
$KNbO_3$ photorefractive materials for optical processing 87−46435
$KTiOPO_4$, KTP, cryst. growth from tungstate melts 86−57419
$KTiOPO_4$, KTP, prep. and use as harmonic generator for Nd:YAG lasers 86−15777
$KTiOPO_4$ SHG crystals, hydrothermal growth technique 87−36690
$KTiOPO_4$, cryst. growth phase relations and solubility 86−40700
LaF_3 for fluoride optical fibres, synthesis, ultrapurification and anal. 87−74660
α-$LiIO_3$ crystals, optical strength, defects influence 85−51231
$LiMO_3$ (M=Nb,Ta), ion implanted optical waveguides, refractive index profiles 87−12199
$LiNBO_3$, early history, personal reminiscences 85−29379
$LiNbO_3$, He^+ implantation, lattice disorder, refractive index changes 87−12201
$LiNbO_3$ and III-V semiconductor comparison for integrated optics appls. 85−29643
$LiNbO_3$ boules for integrated optics appls., testing/charact. techniques 86−53935
$LiNbO_3$, cation vacancy content. Curie temp. and lattice consts. 88−31862
$LiNbO_3$ crysts., anisotropic optical information recording 85−24256
$LiNbO_3$ integrated optical substrates, refractive index meas. by TIR, prism coupling method 87−68006
$LiNbO_3$ integrated optics technology under Joint Opto-Electronics Research Scheme 88−33761
$LiNbO_3$, optoelectronic material, ion beam effects 88−7943
$LiNbO_3$, optoelectronic material, radiation effects 87−12336
$LiNbO_3$ photorefractive crystals, light-induced scattering 86−42649
$LiNbO_3$ planar waveguides, He^+ ion implantation, transient annealing 87−12200
$LiNbO_3$, plate homogeneity, SHG anal., optical substrate appls. 87−68602
$LiNbO_3$, props. considerations for integrated optic and SAW device appls. 85−50803
$LiNbO_3$, sputter etching characts. and techniques 86−42205
$LiNbO_3$, stoichiometric single cryst. fibres, vapour transport prep., nonlinear optical appls. 88−13810
$LiNbO_3$:Fe, Czochralski growth and holography appl. 87−31478
$LiNbO_3$:Fe crystal, white-light information processing, coupled wave theory 87−13119
$LiNbO_3$:He^+ optical waveguides, ion implanted, damage profiles, propag. const. and attenuation var. with annealing temp. and time 87−46495
$LiNbO_3$:MgO for higher power optical applications 85−35878
$LiNbO_3$:MgO, melt growth and charactn. 87−31475
$LiNbO_3$:MgO proton-exchanged waveguide, fabrication and characterisation 85−46169
$LiNbO_3$:MgO single crystals, growth for optical applications 87−53939
$LiNbO_3$:Nd, thermally induced optical damage under laser radiation influence 85−56767
$LiNbO_3$:T indiffused optical directional couplers at 1.3 μm, photorefractive effect. 86−68313
$LiNbO_3$:Ti, indiffused, optical waveguides, in-plane scattering 85−1976
$LiNbO_3$:Ti integrated optical devices, domain inversion effects 86−48204
$LiNbO_3$:Ti integrated optical devices, domain inversion effects 86−48205
$LiNbO_3$:Ti waveguides, photoinduced light extraction and polarisation rotation 85−41177
$LiNbO_3$:Ti waveguides, single-mode, for collinear acousto-optic interaction, optimal parameters 85−50933
$LiNbO_3$:Ti, ion-implanted, solid-phase epitaxy, optical waveguide fabrication 87−54004
$LiTaO_3$, Czochralski grown with modulated struct., periodic laminar ferroelec. domains, SHG 87−31479
Li_xWO_3, crystalline and amorphous, electrochromic solar attenuation 87−18580
Li_xWO_3-$LiClO_4$-Nb_2O_5 electrochromic cells, electrochromic window development, materials and devices 87−26086
$MgAl_2O_4$ spinel, optical measurements on advanced performance domes 85−35372
$MgAl_2O_4$ spinel, preparation and IR optical applications 87−18577

optical materials continued
$MgAl_2O_4$:Ni^{2+}, Czochralski growth and optical props. 87−31480
$MgOAl_2O_3$ spinel IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
Mo laser mirrors, Mo, Au and Ni ion implantation effects, multiple angle of incidence spectroscopic ellipsometry 86−68591
$NH_4H_2PO_4$ crystals for electro-optical appls., growth 88−1921
NaCl:Ca(Pb), effect of dopant on TEA CO_2-laser bulk damage threshold in superpure crystals 85−7490
Nd^{3+}:$La_3Ga_5SiO_{14}$ nonlinear laser crystals 85−18892
$Nd_3Ga_5SiO_{14}$ nonlinear laser crystals 85−18892
PLZT ceramics for optical shutters, electro-optic charact. *(Korean)* 88−33585
PLZT electro-optic material props. and appls., review 87−68197
PLZT transparencies contrast increase, using electrically controlled light scattering 87−18570
PLZT-PZN electro-optic ceramics, elec., opt. and switching props. 87−1804
PbSSe, refractive index calc., injection laser appl. 85−29521
PbSe, refractive index calc., injection laser appl. 85−29521
PbSnTe, HWE grown films, nucleation, growth and struct., optical props. 85−39763
PbSnTe, refractive index calc., injection laser appl. 85−29521
Ph_4X compounds for optical second harmonic generation 85−7526
Sb_2Se_3 film with amorphous-crystalline transition, optical disc recording medium *(Chinese)* 88−26743
SbTe erasable optical storage media amorphous mark crystn. 88−45045
Se-In-Sb alloy film for erasable optical disc media 85−50894
SeInSb alloy film for erasable phase change optical disc 88−65156
Si appls. in optics, fibre optic sensors 88−33584
a-Si film, erasable medium for optical recording 88−45037
Si, highly optically-excited cryst., dynamic picosec. refl. rel. to melting threshold 86−29245
SiO_2 amorphous optical fibers, material dispersion study over IR region 87−1931
SiO_2, fused silica, CO_2 laser polishing for increased surface damage resistance 85−7563
SiO_2, fused silica, damage threshold at 1.06 μm, surface finishing effect 85−7198
SiO_2, fused silica, float polishing and defects 85−7197
SiO_2, fused silica, multiple pulse laser-induced bulk damage 85−7489
SiO_2, optoelectronic material, radiation effects 87−12336
SiO_2 polymer oxide coatings on fused silica, laser damage studies at 350 nm 85−41232
SiO_2, refractive index changes formed by N^+ implantation 87−12101
SiO_2 silica transparent microporous fibres by sol-gel process, gel preform geometry, bulk density 88−6536
SiO_2-gel optics, processing and properties 88−65118
SiO_xNy low loss optical waveguides fabricated by thermal nitridation of SiO_2 86−2668
Sn-Te-Se amorphous-cryst. phase change recording film for optical discs 85−50895
$SrBaNb_2O_6$:Ce, broadband photorefractive props. and self-pumped phase conjugation, use as mirror 88−20734
Tb-Fe-Co amorphous thin films, prep. by plasma-free high rate sputtering, struct., mag. characts., saturation Kerr rot. meas. 87−67700
TbFeCoTi films, high corrosion-resistant magneto-optical recording media 87−60871
Te, thin films, optical data storage 85−56265
a-Te:H RF sputtered films as optical recording medium 85−12528
Te-Ge-Sb erasable phase-change optical discs, review 88−65155
Te-TeO_2:Pd write-once media for optical discs 87−38718
Te-based materials, reversible optical data storage appl. 87−25914
Te-based thin films, crystn. rate, thermal stability, erasable optical recording appl. 87−25915
TeO_2, thermal conductivity meas. 1.5K to 100K, appl. to electro-optic devices and transmitting materials for high power lasers 85−7193
$Te_{80}S_{19}As$ overcoated trilayer struct., laser writing mechanism, microscopy studies 87−12097
Tl halide IR fibres, optical absorption by free carriers 85−18661
Tl halide KRS-5 and KRS-6 crystals for polycryst. optical waveguides 85−2025
TlBr-TlCl fibres, growth by Stepanov's method 87−18628
TlBr-TlI (KRS-5) fibres, with low optical losses, fabrication 85−18665
TlBr-TlI, KRS-5 crysts., optical losses minima meas. 85−24255
TlBr-TlI bulk and extruded fibres, optical aging effects study 88−58048
TlBr-TlI crystals for IR fibres, optical loss minima evaluation 85−50914
TlBr-TlI fibre for high power CO_2 laser beam 87−18629
TlCl-TlBr, KRS-6 crysts., optical losses minima meas. 85−24255
TlCl-TlBr crystals for IR fibres, optical loss minima evaluation 85−50914
VO_2 film, thermooptic bistability and nonlinear switching waves 85−51261
W bronze family crystals for optical device appls. 85−12531
WO_3 based electrochromic windows, recent R&D 87−18763
YAG:Nd laser crystal growth, comparative studies 87−36692
$YBa_2Cu_3O_7$, superconducting ceramic prepared using sol-gel process 88−63388
ZnS IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
ZnS(Se) and ZnS/ZnSe laminates, IR windows, impact on FLIR system performance 86−58807
ZnSe IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
ZnSe, bidirectional scatt. distrib. functions, 0.63 to 10.6 μm 87−60874
ZnSe electro-optic crystal use in optical compensators and angle-meas. devices 86−22063
ZnSe optical fibre for CO_2 laser medical appls. 87−41997
ZnSe:Na, Cu, In, surface and free carrier absorption processes 85−7196
ZrO_2, partially stabilised as IR dome material 85−35374
ZrO_2−SiO_2 multilayer dielectric coatings, damage by nanosec. laser pulses 85−62647

optical microscopes

confocal laser microscope for submicron structure measurement, VLSI cct. appl. 87−33347
confocal scanned laser imaging system design criteria for IC metrology 87−11862
differential confocal optical ranging for distance meas. 87−63510
digital optical profiler, three-dimens. noncontact, development and applic. to mag. media 86−65120
dimension measuring, automated, development and analysis 88−9874
distance meas. using television microscope 88−16492
electroluminescence obs. in concentrator solar batteries 86−51908
fibre-optic scanning differential interference contrastoptical microscope 86−22086
fibres, single-mode, refractive-index profile meas. by propagation-mode near-field method with microscope and vidicon camera 85−52881
Fourier transform IR microspectrophotometry, advances and appls. 85−49346
gaps meas. magnetic heads, automated image sharing microscope development 87−18522
high contrast microscope reticle for CCTV inspection system appl. 85−26060
holographic microscope, projection type, for microcircuits assembly and QC 87−33345
holographic microscope, with Q-switched ruby laser illuminator, dust phenomena recording 85−56869
holographic microscope with Q-switched ruby laser illuminator 86−3381
IC electrical overstress obs. by IR microscope 87−53670
IC manufacturing, guidelines for optical microscopy 86−1922
image processing and image anal., light microscope appl. *(German)* 87−69266
image processing in medical microscopy, blood smear analysis automation 87−35408
industrial inspection microscope design *(Hungarian)* 88−11777
JENATECH-inspection, erect incident-light microscope for microelectronics industry 85−54163
laser coagulator, argon type, use in ophthalmic therapy 87−8943
laser coagulator, LAK argon type, for ophthalmic therapy 87−8942
laser microscope, prototype 85−56903
laser scan microscope, characts. and appls. 85−53035
Laser Scan Microscope, use of IC and semicond. electronic props. visualisation 87−11863
laser scanning system, design and performance, appl. to video cameras and UV microscopes 85−29970
LCD optical projection system with a copper-laser brightnessamplifier 85−64210
lens array screen for stereoscopic microscope 88−16294
leukocyte analysers, high-resolution: retrospective and prospective review 87−77615
magnetic disc surface buffering monitor microscope and photometer head 85−1845
magnetic recording head dimensions, meas., optical microscope design 87−70799
minority carrier lifetimes meas. in semiconductors, using scanning laser microscope 88−42250
multispectral microscope, automated, use in a high performance pathology workstation 87−77619
nonactinic wavelength microscope, target alignment accuracy 88−1587
noncontacting optical probe with optical microscope and dual chopper 87−56647
Nova laser, target plane imaging system 87−39184
objective lens aberration effects 87−77395
phase sensitive scanning optical microscope, interferometer-based design with submicron resolution 87−14541
photolithography, alignment wavelength optimization for wafer stepper microscope 87−11547
planar structures fabrication of micron size, meas. microscope attachment 86−28394
projection type holographic microscope with double projection objectives and holographic screen *(Chinese)* 88−58704
scanning differential microscope, preliminary experimental results 86−2881
scanning laser microscope, acousto-optic modulation and scanning 87−38885
scanning laser microscopy for semicond. appls. 86−1923
scanning optical fibre microscope for laser beam current image obs. of semiconductor defects 86−9495
scanning optical microscope using sequential imaging 87−28952
selection for electronics inspection appl., military standards 88−37992
semi-automatic schistosome eggs detection system, image processing technique 87−29758
semiconductor industry appls., development trends 86−1936

10 MHz fibre-optic transmission system for HV meas. *(Chinese)* 87−50889
100 ps waveguide multiple quantum well optical modulator 85−57207
A/D convertors, video-bandwidth, extended precision using optical techniques 85−2091
acoustic fiber-optic modulators 86−2891
acousto-, electro- and magneto-optical devices, conf., Los Angeles, USA (Jan. 1987) 88−37810
acousto-electro-optic light modulation 85−24348
acousto-electro-optic light modulation and deflection 85−12683
acousto-electro-optic modulation of coherent light in SAW devices 87−53859
acousto-optic Bragg cell, 32 channel for optical computing 88−40024
acousto-optic Bragg cell, wideband, efficiency enhancement techniques 86−36283
acousto-optic Bragg cell techniques, performance improvement techniques 86−36282
acousto-optic Bragg diffraction by deep bulk acoustic waves, appl. in optic spectrum analyzer 87−12275
acousto-optic cells for optical ambiguity function processor 85−30485
acousto-optic deflector/modulator using single-mode crossed channel waveguide and transducer, optical gyroscope appl. 85−2107
acousto-optic devices, development *(Japanese)* 88−40018
acousto-optic devices, materials selection 85−35568
acousto-optic EW receiver, dynamic range improvement 86−36285
acousto-optic frequency shifter, beam deflection cancellation by self-pumped phase conjugating mirror 86−2882
acousto-optic frequency shifters appl. to Sagnac fibre optic sensors 88−40028
acousto-optic loss modulators for laser mode-locking characts. 87−18777
acousto-optic mode locker, appl. to Ar ion laser 87−19018
acousto-optic modulation in the far-infrared 85−35565
acousto-optic modulation of freq. mixers, power supply *(Chinese)* 85−29660
acousto-optic modulator, in illumination system for quantitative fluoresc. microscopy 88−23038
acousto-optic modulator, laser frequency stabilisation on Fabry-Perot cavity *(French)* 88−20699
acousto-optic modulator as electronically selectable unidirectional device in ring laser 87−74895
acousto-optic modulators, deflectors and Q-switches, basics 87−26110
acousto-optic modulators, diffr. efficiency calcs., integral eqn. approach 86−68355
acousto-optic modulators, for single mode fibres, design and performance 87−68229
acousto-optic nonreciprocal phase element 86−28929
acousto-optic phase modulator for single mode fibres using cylindrical ZnO transducers 88−51611
acousto-optic phase modulators using ZnO films on glass fibre 88−65257
acousto-optic polarisation coupler and intensity modulator for birefringent fibre 86−28930
acousto-optic SAR processor, real-time, development advances 86−37942
acousto-optic signal processor, heterodyne, sensitivity, noise and opt. crosstalk 86−36284
acousto-optical computing techniques for analogue and digital processing *(Dutch)* 86−2888
acousto-optical correlators possible appls. in radiointerferometry 87−34690
acousto-optical devices, holographic filtering use 87−12279
acousto-optical devices, material selection 85−12679
acousto-optical method using leaky SAW device 86−48233
acousto-optical modulation with large bandwidth and angular aperture 87−68227
acousto-optical modulator crystal for laser printer, beam alignment technique 85−29662
acousto-optical modulator crystal testing using Bragg angle meas. technique 85−31610
acousto-optical modulator with opposed acoustic beams in a single-axis optically active crystal *(Russian)* 85−2103
acousto-optical modulators, HF, as fiber optic couplers 88−39903
acousto-optical modulators for laser beams 88−26902
acousto-optical spectrum analyser, transmission dynamics of freq. modulated signals 87−68224
acoustoelectrooptic multichannel spectrum analyzer 87−26105
acoustooptic, polarisation-independent with large angular aperture 88−40017
acoustooptic devices for analog and digital data processing 88−40955
acoustooptic light modulator, dynamic range 87−46620
acoustooptic modulators for linear displacement meas., VLSI applications 85−43106
acoustooptical Bragg diffraction, devices and appls. 87−26107
acoustooptical compression filter for LFM, output signal acoustic attenuation 86−27435
acoustooptical modulators, dielectric joint props. *(Polish)* 87−60998
acoustooptical modulators, technology and props. *(Polish)* 86−48236
adaptive Fourier optical processor, using liquid-crystal-over-silicon spatial light modulator 88−52565
adaptive optics, conf., Arlington, VA, USA (Apr. 1985) 86−45906
ADC with electro-optic travelling-wave modulators, response time 88−38593
AM laser system for distance and displacement meas. 87−39272

optical modulation continued
AM optical signals, quasioptimal reception, superheterodyne optical receiver 87−49096
AM-FM generator, anal. 86−29231
amplitude spectrum modulation technique for analogue data processing in fibre optic sensing 88−39939
analog microwave fiber optic communications links 85−20243
anisotropic crystals, surface-charge induced elec. fields 87−7180
anisotropic modulators, improved coupled-mode theory 88−45178
area-modulated recordings for one-dimensional optical signal processors 88−65815
array-type twist-effect space-time light modulator, liquid crystal fast relax. study 88−26897
ASK heterodyne optical receivers with tuned front ends, theory 88−60145
ASK heterodyne systems, bit error rate eval. using lasers 88−47157
ASK modulation in optical fibre data transmission systems *(Chinese)* 88−41652
ASK multiport optical homodyne receivers 88−67402
astronomical polarimeter with 2-D detector arrays 86−17818
axially strained few-mode optical fibres, mode-mode interference effects obs. 88−39946
baseband video signals using analog high-performance transfer-stabilised fibre-optic transmission system 85−3438
beam freq. modulation, SAW delay line oscillator 86−42391
BH DFB lasers, 1.55 μm, optical spectra and system performance 86−15712
BH DFB lasers, 1.5 μm, low-pressure MOVPE growth and low-threshold operation 87−39090
BH distributed feedback laser emitting at 1.3 μm for high-bit-rate systems 87−40893
BH laser, analytic model for modulation response 85−2327
biaxial UHF light modulator using dispersed crystals *(Russian)* 87−3183
bidirectional fibre optic links using refractive modulation, design 88−67389
bidirectional fibre-optic link using reflectivemodulation 86−49583
bidirectional fibre-optical transmission using amultiple-quantum-well (MQW) modulator/detector 86−49584
bifurcation structure of pump modulated laser 88−51892
binarisation procedure generating 2D pulse density modulation 87−62174
binary multiplication by optical convolution, improved system 86−59331
binary phase-only correlation, appl. to machine vision 88−59232
binary phase-only filters in real-time coherent optical correlation system 88−40046
binary spatial light modulator at Fourier plane, joint transform image correlation 88−33804
bipolar transistor carrier-injected optical modulator/switch 87−18756
birefringent fibre gyroscope, polarisation cross coupling, bias drift reduction 87−38781
birefringent single mode fibres, nonlinear pulse propag., modulational instability 87−38759
bistable device, hybrid, driven by light polarisation 87−26530
bistable device using switching by incident angle 86−9961
bistable LED, self-excited oscillation and monostable operation *(Japanese)* 85−12739
bistable system with delay, effect of modulation 86−58972
Boolean logic gates using microchannel spatial light modulator with liquid-crystal televisions 88−13986
Bragg cell, multichannel acousto-optic, design and fabrication 87−46612
Bragg cells, multifrequency acousto-optic interactions 88−40026
Bragg electrooptic modulator, transfer curve linearisation using harmonic correction 86−54004
Bragg modulator modules, integrated, electrooptic, for matrix-vector and matrix-matrix multiplications 88−51541
brain models and neural networks, optical processing *(Dutch)* 88−13976
Brewster-angle cut doubled light shutter 88−26886
broad band source, electro-optic phase modulation, TV appl. *(French)* 85−18752
broadband optical transmission systems, linearisation by adaptive predistortion 85−3455
broadband travelling-wave integrated-optic modulator 86−2846
broadband travelling-wave type electro-optical modulators, crosstie overlay slow-wave structure 88−39995
bundle-integrated-guide dynamic single-mode lasers, direct modulation props. 86−68556
carrier density mediated intermodulation distortion meas. of optical amplifiers 88−15458
carrier-injected bipolar transistor optical modulators and switches 87−26243
CATV systems, FDM using high radiance 800 nm LEDs 85−37064
character display capability of CRT monitors 86−31249
chirp free transmission conditions with directly modulated semiconductor lasers 88−67400
chirp production of saturable absorber, colliding pulses, influence 88−14261
chirp-induced penalty in optical fibre systems 87−76750
chirped optical pulses, amplification and recompression 86−22530
chirped semiconductor laser pulse propag. in monomode fibres 86−22066
chirped ultrafast pulses, phase modulated, effects of filters 86−58809
chirping model of modulated DFB LD 88−65733
chirping of laser pulses shorter than 100 fsec in saturable absorber 86−42616
chromatic dispersion induced distortion of modulated monochromatic light employing direct detection 85−7450
cinematic IR scene simulator based on VO_2 spatial modulator 85−14639
cleaved-coupled-cavity channelled-substrate BH lasers, direct frequency modulation 85−12893
cleaved-coupled-cavity laser, frequency modulation 85−7468
coaxial fibre sensors, design 86−22120
coded phase reversal modulator for optical freq. domain reflectometry 88−67721
coded phase reversal traveling wave modulators, spread spectrum frequency response 88−20442
coherent 1 Gbit/s bipolar optical FSK transmission experiment over 121 km of fibre 88−28830
coherent and incoherent optical processing architectures 88−8858
coherent heterodyne systems, integrated-optic phase modulator, signal fading elimination 88−41696
coherent light communication system *(Japanese)* 88−67371
coherent lightwave communications 86−30752
coherent lightwave communications, modulation and detection 86−64978
coherent lightwave technologies 88−35489
coherent multiplexed interferometric fibre sensors, reduction of excess noise 88−67818

optical modulation continued
coherent optical communication systems 87−56190
coherent optical detection of laser signals 87−40894
coherent optical image correlation system, behaviour of binary spatial light modulators 87−47956
coherent optical processor for circular antenna array *(Russian)* 86−37119
coherent optical receivers, performance analysis and laser linewidth requirements 86−59907
coherent optical transmission system using robust PSK method 86−23934
coherent reception of a frequency-modulated signal, object distance and velocity meas. 88−8759
coherent transmission insensitive to laser phase noise 88−60132
coherent WDM using injection lasers, fibre optic link, crossphase modulation meas. 85−14248
coherent-optical correlator with spatial carrier combined modulation 87−39957
coherent-optical spectrum analyzer of low-frequency electrical signals 88−22499
collinear integrated acousto-optic signal processor, config. and matrix multiplication appls. 88−20472
color image correlation using a magneto-optic spatial light modulator 88−58276
color optical processing using a microchannel spatial light modulator under white light 88−46205
combined optical mixer-preamplifier for 1.3 μm lightwave subcarrier systems 88−28832
communication, properties of error correcting code using photon pulse 87−20573
communication system technology *(Japanese)* 85−20199
communication systems, coherent, switches and modulators 88−60176
communication systems, laser frequency chirping, effect on performance 86−49600
communications in deep space, development program 87−70080
communications satellite transponder, electro-optical 86−37905
composite cavity waveguide complementary semiconductor lasers, low threshold current, large output power 87−33182
concave-convex stable resonator, annular-coupled, for large-volume high-quality energy extraction 88−40262
continuous phase FSK transmission system, modulation and detection characts. 87−56154
coplanar waveguide resonant electrode design for guided-wave light modulators 88−58245
correlation filters, rotation invariant, iteratively designed, expt. use 87−75852
correlator, real-time coherent using binary magnetooptic spatial light modulators at input and Fourier planes 86−37114
correlator using thin-film travelling-wave light modulator 86−16500
correlators, spatial-light modulation, phase correction 88−27997
Costas loop self-homodyne experiment for a diode laserreceiver 86−55290
coupled stripe laser diode array, FM characts. 86−42562
coupled-cavity semiconductor laser, modulation speed enhancement, freq. modulation suppression and phase noise reduction by detuned loading 85−46378
coupled-stripe laser array, injection locking bandwidths and FM characts. 86−48426
coupled-waveguide interferometers and directional couplers, modulation diagrams 88−51528
cross modulation effect, sample and hold technique for serial to parallel digital optical data conversion 88−33827
cross-phase modulation in optical fibers 87−68134
crossbar signal processor, design 87−13093
crossing channel switches, low switching voltage, design considerations 88−72162
crossphase modulation in optical fibres, generation of short pulses from CW light 87−74683
crosstalk in optical amplifiers for two-channeltransmission 86−69769
crystalline modulator and Q-switch specification tables 86−9907
CW laser light, AM using mechanical chopper 86−36367
cyanobiphenyls+cholesteric additive, liquid-crystal modulator, construction 86−28912
data processing, transverse, offset for Petermann strange mode field diameter eval. 88−51465
deformable mirror device, for spatial light modulation 88−58237
deformable mirror device for optical crossbar switch 88−60171
deformable mirror device for phase encoding and filtering, optical correlation 88−59268
deformable mirror device spatial light modulator, uses in freq. excision and optical switching 88−45253
deformation meas. using spatial frequency modulation of holographic interferometry, moire method *(Japanese)* 87−35192
degraded optical PPM channel, coding options 85−30212
demodulation of AM/FM optical signals in the picosecond domain 85−58114
depletion edge translation, anal. 88−72158
device developments for optical information processing 88−59329
DFB diode lasers, 1.5 μm, antirefl./high-refl. facet config. with high-output-power 86−36478
DFB double channel BH laser diode, flat FM response by direct modulation of injection current 85−35752
DFB graded-index-rod coupled-cavity laser, 1.5 μm, direct high FM, dynamic linewidth props. 86−9841
DFB laser, 1.3 μm, directly modulated, for 8 Gbit/s transmission over 76 km of optical fibre 88−47033
DFB laser, spectral characts. under high-speed direct modulation 85−2317
DFB laser, two-electrode type, fabrication and charactn., optical fibre communication appl. 88−65674
DFB laser diode, 1. 5 μm, chirp obs. using streak camera 86−22377
DFB laser diode, gain switched, 1.3 μm, ps optical pulse compression through highly dispersive single-mode fibre 86−3144
DFB laser diode, gain-switched, transform-limited 5.6 ps optical pulse generation using pulse compression technique 87−18960
DFB laser spectrum, meas. using gated delayed self-homodyne technique 88−51804
DFB lasers, 1.3 μm, linewidth enhancement factor meas. by modified direct FM method 88−58533
DFB lasers, flat-surface BH operating at 1.5 μm with low chirp 88−20634
DFB lasers, high-power 1.5 μm, design and performance *(Japanese)* 87−61165
DFB lasers, λ/4 phase-shifted corrugations fabrication using positive and negative photoresists 87−46856
optical modulation continued
DFB lasers, modulation-induced wavelength shifts 87−39137
DFB lasers, phase tunable type, 1.5 μm operation, FM and spectral characts. study 87−26393
DFB lasers, quarter wavelength shifted type, gigabit/s performance study 88−47032
DFB lasers, single-longitudinal-mode condition, spectral dynamics theoretical and expt. study 85−35763
DFB lasers at 1.5 μm, transient laser chirp reduction by modulation pulse shaping 86−42545
DFB lasers under high-speed direct modulation, fine structures in broadened line 85−7421
DFB LD, directly modulated, sub mode oscillation influence on long span transmission systems 88−45455
DFB ridge waveguide lasers, 1.5 μm, dynamic linewidth red. by modulation pulse shaping 85−24631
DFB semicond. lasers, 1.5 μm, FM spectra distortion by weak optical feedback, expt. study 88−40201
DFB semiconductor lasers, optimum operation study under chirped pulse transmission 85−46390
DFB semiconductor lasers, vapour phase transported, direct freq. modulation 86−48386
diaphragms, controllable apodizing, based on Pockels effect, transmission spatial distrib. calc. 85−46214
dielectrics for optoelectronic device applications on the III-V compounds, review 88−57307
differentiating spatial light modulator based on nematic liquid crystal, for optical preprocessing and pattern recognition 87−68218
digital demodulator for modem-type optoelectronic devices 88−16036
digital fibre optic systems, modal dispersion charactn. by baud rate response 88−51454
digital optical adder based on spatial filtering 87−7193
digital power drivers for a liq. cryst. light modulator, clinical image processing appl. 85−4272
digital system, modulation-induced modal noise, bit error ratio prediction 86−11106
diode composite-cavity lasers, high power single freq. operation under CW and modulated conditions 85−46427
diode DFB laser, intrinsic bandwidth meas. utilising satellite mode induced by far end refl. 87−61128
diode DFB laser, single mode fibre coupling module with optical isolator for high bit rate modulation 86−42568
diode laser, injection-locked, mm wave signal generation 86−48428
diode laser, multilongitudinal mode, electro-optical modulation at 850 nm with coherence multiplexing 87−68578
diode laser, Q-switched, 14 GHz operation 86−36498
diode laser, single quantum well, wavelength switching by injection-current control 87−26383
diode laser array, coupling with optical fibre 86−22083
diode laser arrays, coupling with photorefractive passive phase conjugate mirrors 87−61134
diode laser charactn. by elec. noise meas., parasitic elements influence 88−8210
diode laser for high-speed optical links, GaAs encoder/decoder and driver IC design 87−63000
diode laser modulation bandwidth, chirp reduction, narrow-linewidths, high output powers, latest advances 85−24565
diode laser pulsed single-mode, temporal coherence props., meas. 85−56891
diode laser to fibre coupler, construction and investig. for a modulation range up to 400 MHz *(German)* 85−46387
diode lasers, cleaved-coupled cavity, FM, AM and above threshold operation, anal. 85−62624
diode lasers, instabilities by optical feedback, modulation, and mode-hopping 87−75116
diode lasers, modulated, subharmonic bifurcations and irregular pulsing 85−56615
diode lasers at microwave freq., dynamics anal. 86−54144
direct detection optical communication receiver, anal. 86−69767
direct-detection optical communication systems, frame synchronisation 86−43110
direct-detection optical communication systems, symbol and frame synchronisation 87−40895
direct-detection optical PPM channel, convolutional codes performance 87−40949
directional coupler modulators designed for analog modulation of large signals at 810 nm 88−7986
directional coupler modulators for high speed diagnostics 88−58223
directional couplers, WKB anal. and appl. to optical switches 88−72104
directional couplers, Y-fed multisection switching characts. and broadband modulation 88−58205
directly modulated semicond. lasers, gain nonlinearity effects calcs. 87−12449
discharge lamp flicker threshold assessment involving ocular temporal MTF *(Japanese)* 86−52027
discriminator based on saturated absorption for laser freq. stabilisation 85−46474
dispersive optical bistability, nonlinear control 86−22483
dissector systems for optical emission search with subcarrier frequency intensity modulation *(Russian)* 85−14651
distributed feedback laser radiation, two-photon modulation *(Russian)* 85−12934
Doppler and Zeeman modulator for laser frequency stabilisation 88−65540
double Pockels cells at 10.6 μm, development and performance *(Chinese)* 86−15519
double-contacted injection lasers, Q-switched, sync. bandwidth eval. using large-signal model 86−29152
double-modulation of the laser line 88−27262
DPSK demodulation using in-place and quadrature detect. 86−4634
DPSK heterodyne detection using DBR laser diodes with external optical feedback 86−17366
drilling by pulsed laser with disc-rotor modulation *(Chinese)* 88−40425
dual-frequency modulation for coherent optical communication 87−49063
duplex transmission over single-mode fibre using electro-optical modulator, system config. 86−43818
dye absorbing jet, degenerate four-wave mixing of femtosec. pulses, intracavity meas. 86−48488
dye DFB laser, picosec. pulse lasing due to Q self-modulation 86−15654
dye femtosecond pulse amplifier, self phase modulation with subsequent compression 88−58479
dye laser, electro-optically tuned, wavelength bistability 85−24499

optical modulation continued
dye laser, external frequency stabilizer 85−12827
dye laser, femtosecond pulses, dispersion compensation using high-index prisms 87−61203
dye laser, high-power pulses by cascaded controlled transient oscillation 88−27093
dye laser, mode-locked ring, anal., chirped-solitary-pulse solutions 85−41423
dye laser, multimode, pulsed, intensity autocorrelation meas. and spontaneous FM phase locking 86−58895
dye laser, passively mode-locked, chirped and chirp-free femtosecond pulses 85−35712
dye laser, picosecond pulse compression by saturable absorber, real-time obs. 85−2402
dye laser, rapid tuning, appl. to signal transmission by wavelength modulation *(French)* 86−15661
dye laser, single longitudinal mode, freq. tuning and intensity stabilisation *(Korean)* 85−62528
dye laser femtosecond pulse, chirp-compensation technique using cavity mirror incident angle changes 88−27220
dye laser picosecond pulse generation with self-modulated Q-switching 86−36441
dye laser pulse strong compression by single-pulse picosec. excitation 85−24640
dye laser pumped by compressed laser pulses 87−61106
dye laser radiation, polarisation modulation using intracavity method 87−33253
dye laser radiation interaction with atomic Ba vapour two-level system 85−46352
dye lasers, excimer pumped, pulse modulation 86−3101
dye lasers, FM, comparison on standing-wave and ring configuration 86−63770
dye lasers, multimode, temporal smoothing of pulses 87−54267
dye lasers, pulse-amplified phase-modulated CW, interference between broadened sidebands 86−58894
dye lasers, pulsed, pulse compressor 88−20590
dye lasers, synchronously pumped, phase-modulation effects 86−9781
dye lasers, tunable subpicosecond pulse generation with single-mode fibre compressors 86−63771
dye passively mode-locked laser, ultrashort pulse shape control and meas. with femtosec. accuracy 85−46438
dynamic holography of ultrashort light pulses 87−33339
dynamic-single-mode semiconductor lasers, directly modulated, large signal anal. 85−12886
elasto-optic loss modulation on side-polished fibre 88−58084
elasto-optical modulator with quartz transducer and liq. interaction medium *(Romanian)* 88−72175
electrically controlled modulator using tunnelling-assisted absorption modulation in GaAs sawtooth struct. 88−67351
electrically induced strip waveguide modes 88−65325
electro-optic beam splitter/modulator, planar, with pair of parallel electrodes 85−24338
electro-optic Bragg cell, noncollinear travelling wave 88−40001
electro-optic devices, Pockels cell, review 87−26084
electro-optic light modulator, high speed, design and performance 86−2861
electro-optic light modulator, prism coupler performance 88−58242
electro-optic materials for guided-wave optical devices 87−18760
electro-optic materials for guided-wave optics 87−38861
electro-optic materials for guided-wave optics, desirability analysis 88−7839
electro-optic modulator, standing wave electrode, design and characterisation 86−28901
electro-optic modulator for forming ultrashort optical pulses 88−20444
electro-optic modulators, control of characteristic curve form by internal electro-optic feedback 86−9617
electro-optic modulators, design and performance for microwave and MM wave fibre optic systems 86−69796
electro-optic modulators anal., method of lines 88−26891
electro-optic modulators spatial-temporal, for optical information processing systems, review 85−56369
electro-optic monomode fibre devices with liquid crystal overlays 88−65221
electro-optic phase modulators using III-V semicond. multilayer slab waveguides, efficiency study 86−48213
electro-optic phase screen with anisotropic inhomogeneities 86−2859
electro-optical, integrated, using optical/voltage sensor and optical waveguide cct. *(Japanese)* 85−18751
electro-optical frequency modulator as optical heterodyne, operation analysis 88−2053
electro-optical intensity modulation of near-surfacelight for optical signal processing applications 85−50998
electro-optical interference modulator, optical bistability polarisation depend 86−28894
electro-optical light modulator using long-range surface plasmons 88−40002
electro-optical materials for optical electronics *(Spanish)* 87−60974
electro-optical modulator, vacuum-tube, for Q-switching in solid-state lasers 87−38863
electro-optical modulator array for coherence multiplexing 88−20440
electro-optical modulators, total internal reflection, with multimode strip lightguides 87−26090
electro-optical modulators, trading coupling loss for modulation efficiency 87−38856
electro-optical modulators, using KDP, DKDP and $LiNbO_3$ monocrystals *(Czech)* 86−58798
electro-optical serrodyne freq. translator 85−35546
electro-optical shutter for generation of highly coherent nanosecond radiation 85−35839
electro-optical technique for intense microwave meas. 85−52853
electro-optical waveguide modulator for resonant phase modulation 86−2868
electro-optical waveguide modulators for high speed diagnostics 88−7985
electroabsorptive CCD spatial light modulator 85−12647
electrocapillarity based modulators 85−12648
electrocapillarity modulators and large screen projection displays 88−7981
electrogyration modulator with centrosymmetric $Pb_5GeO_4(VO_4)_2$ and $Pb_5SiO_4(VO_4)_2$ crystals 86−42363
electrogyratory communication device 87−12250
electromechanical laser-beam modulator with high-frequency stability 87−19012
electron-beam-addressed microchannel spatial light modulator 85−35548
electrooptic cubic crysts., unpolarised light phase modulation 86−15520
electrooptic device for measuring laser-beam wavelengths 88−58620
optical modulation continued
electrooptic ferroelectric materials, desirability for guided-wave optics 87−46558
electrooptic grating modulators, planar integrated optical matrix-vector and matrix-matrix multipliers 85−2092
electrooptic integrated modulator, intermodulation distortion and compression 88−2049
electrooptic integrated waveguide modulator for picosecond optical pulse generation 88−2050
electrooptic modulator, CW laser power stabilisation 87−2221
electrooptic modulators, digital and quasi-linear, synthesized from directional couplers 87−26080
electrooptic phase modulator, surface profiling by phase-locked interferometry 86−70214
electrooptic travelling-wave modulators, broad-band, transmission line aspects of design 87−46589
electrooptic waveguide modulator, two-dimens. propagating beam analysis 85−2087
electrooptical Bragg modulator based on diffusion $LiTaO_3$:Ag waveguide 85−18754
electrooptical modulator IC in optical link used for voltage sensor isolation 86−5192
electrooptical passive matrix displays, addressing crosstalk and disuniformity effects 86−2865
electrooptical photographic arrangement for quasi-real time image recording 86−48219
EPOS space-time modulator 88−20445
exciton bleaching based single quantum well optoelectronic devices 88−8082
expert system, real-time probabilistic using spatial light modulators 88−33823
expert systems, optical, spatial light modulators appl. 87−54833
external waveguide Bragg reflector laser with direct FM, 1.5 μm coherent transmission expt. 87−56133
external-coupled-cavity graded-index rod laser, single freq., spectral linewidth study 85−35843
Fabry-Perot cavity response to phase modulated light 87−68559
Fabry-Perot modulator, refl. mode integrated optical 87−74872
Fabry-Perot phase modulator, high freq., using KDP cryst. 87−54101
Fabry-Perot semicond. laser amplifier, high-speed all-optical gate switching expt. 87−75230
Fabry-Perot-type semiconductor lasers, modulation capabilities 87−46894
Faraday effect light modulator, with closed magnetic cct. 88−65393
Faraday effect light modulator for digital/optical computing 88−8020
Faraday rotator materials for laser systems 88−72170
fast frequency-tunable external-cavity laser, FSK modulation, 100 Mbits/s 87−33225
fast gain switching in size-effect modulation diode laser 86−42578
fast modulators, for 1.5 μm single-mode fibre links, design *(French)* 86−9621
fast-switching light valves using liquid crystals 85−51223
FDM comb generation using synchronous travelling-wave phase modulators 88−58243
femtosecond light pulses form. having freq. modulation in lasers with passive mode locking 86−15751
femtosecond pulse generation in nonlinear quadratic media 87−75235
femtosecond pulse ring dye laser, design and operating characts. 86−42595
femtosecond spectroscopy with high-power tunable optical pulses, pulse generation 85−41458
ferrimagnetic film, optical mode conversion with magnetostatic forward volume wave 88−51597
ferrite-garnet films, optical waveguide mode conversion by ferromagnetic resonance 88−33748
ferroelectric liquid crystal spatial light modulator 87−60982
ferroelectric liquid crystals, mol. origins of polarisation 88−58253
ferroelectric liquid-crystal and fast nematic spatial light modulators 88−7995
ferroelectric single crystal devices based on electro-optical effect 86−54008
few-mode fiber devices 88−65255
fiber optic analog video transmission using semiconductor laser diodes 85−25893
fiber optic gyroscope, phase-modulated, coherent backscatter 87−38821
fiber-optic crossbar switch with broadcast capability 88−58128
fiber-optic sensor, interferometric Michelson-type, phase-modulation and frequency-modulation detection, comparison 85−35462
fibre, birefringent, nonlinear mode coupling, optical pulse reshaping 85−7208
fibre, modulation instability, optical loss effects in PSK modulated coherent fibre systems 85−12600
fibre, single-mode, parametric interaction of modulated wave 86−68272
fibre communication system using index nonlinearity, transmission capability 85−29528
fibre communications, present and future 85−42600
fibre compensation, grating compressor with positive group velocity dispersion 87−32945
fibre couplers, long tapered type, polarisation modulation study and propag. 85−46143
fibre CPFSK differential detection, linewidth requirement eval. and 290 km transmission expt. 86−63612
fibre diagnosis using optical-frequency-domain reflectometry 85−29601
fibre digital data link, 4 Gb/s transmission expt. over 117 km using $LiNbO_3$:Ti external modulator 86−23872
fibre digital PPM system, expt. 88−22077
on-fibre electrooptic modulator/switch 86−68225
fibre fault location using freq. modulation techniques 85−41188
fibre grating compressor of laser pulses in Raman regime 88−72038
fibre gyroscope with integrated optical freq. modulator 86−2774
fibre image transmission zig-zag reflection interferometric light modulator *(Japanese)* 85−3441
fibre intensity modulated transducers, balancing technique 85−62354
fibre interferometer technology and hydrophones 88−7893
fibre interferometer/amplitude modulator, two-mode 87−25928
fibre modulator, with polarisation-desensitised liquid-crystal overlay 88−51466
all-fibre modulator for signal processing appls., based on Mach-Zehnder interferometer 86−48202
all- fibre modulators for fibre optic systems, review 86−2772
fibre nonlinear refr. index meas., direct interferometric meas. by crossphase modulation 87−74673
fibre nonlinear refr. index nondiagonal component determ. using optic Kerr modulation 88−13801

optical modulation continued
fibre optic audio link 86−49601
fibre optic birefringent temperature sensor, with passive multiplexing 88−36033
fibre optic displacement sensor, based on light intensity modulation 88−36027
fibre optic distributed sensors and sensor networks 87−26032
fibre optic gyroscope, closed-loop, with sawtooth phase-modulated feedback 85−46175
fibre optic gyroscope, coherent Rayleigh backscatter noise, phase modulation effect 88−10006
fibre optic gyroscope, noise due to birefringence modulation 87−18615
fibre optic gyroscope, open-loop, using intensity-modulated source and phase modulation 88−60748
fibre optic gyroscope prototype for missile guidance appls. 88−54820
fibre optic gyroscope with electro-optic phase modulation 88−10004
fibre optic gyroscope with gated two-harmonic phase modulation, effect of second harmonic and duty cycle 88−53709
fibre optic gyroscopes, serrodyne modulated, coherent backscatter-induced noise *(Japanese)* 87−68160
fibre optic intensity modulated sensors 88−7895
fibre optic interferometer using FM laser diodes 87−18593
fibre optic interferometers, phase modulation 87−46513
fibre optic interferometric sensor arrays, sensitive 88−16157
fibre optic interferometric sensor length limitations due to distributed phase modulation 88−16166
fibre optic interferometric sensors, TDM using passive phase-generated carrier interrogation 88−1997
fibre optic interferometric tunable switch using the thermotropic effect 85−41186
fibre optic microbend sensor, optimisation 88−16140
fibre optic modulator and logic gate using nonlinear refr. and absorpt. 87−18676
fibre optic passive gyroscope 85−24293
fibre optic phase modulator, polarisation-insensitive 88−33687
fibre optic photoelastic press. sensor with fibre-loss compensation 87−38783
fibre optic piezoelectric phase modulator for laser Doppler-difference velocimeter 85−41161
fibre optic point sensors, intensity modulated, FDM system 87−68105
fibre optic polarimetric strain sensor, extended range 87−74741
fibre optic pressure transducer using wavelength modulation sensor 86−36207
fibre optic remote transducers, intensity modulated, self-compensating technique 86−36209
fibre optic ring resonators, nonlinear phase modulation 88−72003
fibre optic rotary position transducer 88−42143
fibre optic sensing methods and advantages 87−18597
fibre optic sensing systems, intensity modulation, time domain referencing 87−68144
fibre optic sensing using chromatic modulation, industrial appl. 88−29423
fibre optic sensor, intensity modulating, self-referencing multiplexing technique 88−16158
fibre optic sensor, intensity-modulating, loss compensated sensors of ang. position and displacement 88−16167
fibre optic sensor, modal power distribution modulation based 88−33682
fibre optic sensor, passive ring resonator, effect of reflections on drift characts. 88−67869
fibre optic sensor modulating techniques, review 87−32950
fibre optic sensors, amplitude-modulated and phase modulated, overview 85−46167
fibre optic sensors, conf., Erice, Italy (May 1986) 88−6125
fibre optic sensors, extrinsic, for remote meas., impact on meas. techniques 87−7148
fibre optic sensors, intensity, freq. and wavelength modulated sensors using incoherent light 85−24274
fibre optic sensors, intensity modulated, concepts and applics. 88−16139
fibre optic sensors, intensity modulation 87−54036
fibre optic sensors, multimode, RF band FMCW for passive multiplexing 86−48184
fibre optic sensors, multiplexing by FM, cross-term considerations 86−36187
fibre optic sensors, multiplexing using FM source 87−68095
fibre optic sensors, noninvasive industrial testing appl. 85−29639
fibre optic sensors, overview 85−24279
fibre optic sensors, piezoelectric copolymer jacketed single-mode fibers forelectric-field sensor application 87−3578
fibre optic sensors for automobiles, modulation type, design and operation 86−52023
fibre optic sensors for position meas., principle and limitations *(German)* 85−42968
fibre optic sensors fundamentals, classification into two main categories *(Czech)* 86−50060
fibre optic temperature sensor based on light amplitude modulation 87−25967
fibre optic temperature sensor light amplitude modulation based 86−68294
fibre optic temperature sensor using spectral modulation 88−42139
fibre optic temperature sensor using spectrum-modulating SiC etalon 88−42136
fibre optical electric field sensor using $Bi_{12}SiO_{20}$ crystal 85−46186
fibre optical sensors, FDM using FM laser source 87−7149
fibre optical sensors, multiplexing system using FM laser source 86−48185
fibre optics, analog communication by PWM 87−40921
fibre optics, conf., London, England (April 1987) 88−18303
fibre optics, picosecond pulses generation, nonlinear Schrodinger eqn. 86−58788
fibre optics, pulse compression and MW picosecond pulse generation 87−53952
fibre optics, subpicosecond solitonlike optical pulses generation by induced modulational instability 86−68230
fibre optics temperature sensor, pulse modulated, using quartz resonator 88−36035
fibre phase modulator, design and appl. 88−58168
fibre phase modulator for heterodyne optical time domain reflectometry 85−41187
fibre phase modulator with enhanced modulation efficiency 88−53707
fibre pulse compression at 1.319 μm using fibre-grating 86−36132
fibre pulse compression using grating pair and soliton effect 86−48078
fibre Raman laser, synchronously pumped with self-phase modulation 87−75052
fibre Raman lasers, chirp from cross-phase modulation 88−2205

optical modulation continued
fibre ring resonator, dynamic response 88−51467
fibre self-phase modulation, review 88−65187
fibre sensing technique, investig. of fibre mechanical props. 88−67845
fibre sensors, intensity modulating with time domain generated reference signal 85−12592
fibre thermal modulator for optical fibre interferometer 88−13817
fibre time domain reflectometry using FM CW ranging technique 86−22111
fibre transmission properties, dynamical model parameter identification 87−74666
fibre transmission signals, coherent, modulation instability 85−7264
fibre-optic ASK heterodyne receiver sensitivity measurements. 86−11067
fibre-optic closed-loop gyroscope, phase modulation approach, scale factor stabilisation 85−2047
fibre-optic current sensor using Faraday effect and laser-diode frequency modulations 86−63642
fibre-optic gyroscope with integrated-optic phase modulator and spectrally broad light sources 85−62379
fibre-optic gyroscope with pseudo-heterodyne detection 85−62380
fibre-optic interferometer, multimode double-arm with phase modulation of one arm, output signal stabilisation 85−50938
fibre-optic modulator and link for antennas 85−52344
fibre-optic receivers for acoustic field active optical meas. and quantum noise problem 86−15440
fibre-optic sensing devices, modulation, materials and specifications 86−9500
fibre-optic two-channel heterodyne-type transmission experiment 85−20184
fibres, birefringent, modulational polarisation instability 88−72040
fibres, Brillouin gain spectra meas. of longitudinal acoustic modes 88−65199
fibres, cross phase modulation meas. 88−1960
fibres, elliptical core, two-mode, mode charact. under perturbation 88−65251
fibres, frequency broadening by self-phase modulation 85−62329
fibres, induced phase modulation of stimulated Raman pulse 88−2359
fibres, mid-IR, soliton generation, laser beam modulation 85−18662
fibres, modulational instability, theory 87−54021
fibres, multimode, polaris.-modulated signals transmission and holographic multiplexing 87−18735
fibres, multisoliton pulse interaction, FM influence 87−25985
fibres, nonlinear, single-mode, picosecond steps and dark pulses 87−60923
fibres, parabolic graded-index, self-focusing and self-phase modulation 88−65197
fibres, PM-AM conversion of CW laser light 86−42247
fibres, polarisation dispersion, pulse compression and broadening 88−33661
fibres, polarisation-maintaining, mode couplings due to external forces, eval. 88−26750
fibres, polarisation-preserving, with stress-induced birefr., nonlinear optical effects 88−45556
fibres, polarization charact. of fundamental mode 88−72035
fibres, self-phase modulation and optical pulse compression influence by stimulated Raman scatt. 88−34113
fibres, self-phase modulation and SRS, combined 85−51264
fibres, SELFOC, longitudinal, inhomogeneous, anal. of axisymmetric modes 88−72030
fibres, signal conversion, frequency-modulated to amplitude-modulated by Brillouin-induced phase change 88−34128
fibres, single mode, picosec. stimulated Raman generation, pump pulse fragmentation and fragment compression 87−26513
fibres, single-mode operating at few-mode wavelengths 88−65201
fibres, stimulated four photon spectra generated by picosecond pulses, intensity effects 88−27295
fibres, stimulated Raman scattering and self-phase modulation numerical study 87−12136
fibres, temporal pulse compression through spectral windowingof chirped pulses 86−53988
fibres, vibration mode effects on transverse spatial coherence 88−58106
filters, optical fibre, pulse compression 85−35391
FIR laser beams, precision broadband attenuator 87−26501
flexible disc signal reproduction by domain-modulation-type optical readout head 87−53888
FM subcarrier method for optical frequency meas. and synthesis 86−68421
FMCW of optical source envelope modulation for passivemultiplexing of frequency-based fibre-optic sensors 86−63615
formic acid molecular laser, singularities in emission spectrum with multimode source optical pumping 88−72384
free electron lasers, self-modulation onset mechanism 86−3231
Free-electron laser amplifiers, stimulated head-on scatt., self-modulation study 87−26451
frequency chirping in external modulators 88−33774
frequency chirping of external modulation and its reduction 86−10240
frequency modulation of optical beam using ultrasonic diffraction grating 87−12276
frequency translators, electro-optic, coherent optical fibre system appls. 87−54117
frequency-chirped pulses, coherent stacking for stable generation of controlled pulse shapes 86−58857
frequency-shifted local oscillator produced by rotating radial grating for heterodyne detector 85−52776
fringe rate demodulator for fiber optic interferometric sensors 88−42146
FSK heterodyne detection system, long span transmission experiment 88−67404
FSK heterodyne transmission experiment over 100 km single-mode optical fibre 88−67403
FSK signals, demodulation and amplification using AlGaAs lasers, expt. study 88−35476
FSK single-filter detection transmission using phase-tunable DGB laser diode 86−23849
full-color electron-beam-addressed light-valve projector 87−8686
full-color single-projection-lens liquid-crystallight-valve projector 87−8545
GaAlAs 11-GHz window laser, room temperature operation 85−46404
GaAs optoelectronic mixer operation at 4.5 GHz 85−18808
gain-guided triple stripe lasers, self-consistent anal. 87−33207
gain-switched semicond. injection lasers, PPM, theoretical and expt. study 86−29153
garnet films, thin, as light signal convertors 86−28925
gas laser with high-gain active medium, intracavity magnetooptical control of radiation 86−42492
gas lasers, relative excitation determination, modulation method appl. 85−35696

optical modulation continued
gas ring laser with intracavity nonlinear absorpt., freq. modulated reson. in radiation *(German)* 87−68553
Gaussian beam divergence meas. using SAW modulation 87−12538
gigabit range modulation produced by direct phase modulation of DFB laser diode 88−47031
gigahertz-bandwidth optoelectronic differential amplifier, design 88−63542
glass series, active material selection for acousto-optic mode-lockers 87−32922
glass single-mode waveguides, thermo-optic phase modulation 85−2074
glass waveguide, electrooptic Kerr-effect light modulation with a-Si:H cover layer 88−33775
grating compressor, freq.-modulated optical pulses, spectral windowing 85−56282
gratings, analysis and applications of dielectric planar and surface relief types 85−50988
gratings, light induced, in medium exhibiting two-photon absorpt., ultrashort pulse interaction 85−24671
gray scale operation of a multichannel optical convolver using the Semetex magnetooptic spatial light modulator 88−58303
GRECC multimode semiconductor laser, single mode operation and linewidth reduction 88−65739
GRIN waveguide modulator using guided-to-radiation mode coupling 86−63686
guided wave modulation in dielec. thin film waveguide on semiconductor substrate *(Japanese)* 85−62381
guided-wave, high-speed, integration *(Japanese)* 86−15493
guided-wave intensity modulators using amplitude-and-phase perturbations 88−39997
guided-wave optical modulators and switches, polarisation independ. 86−42373
guided-wave optical modulators and switches, polarisation independent, design 86−28808
guided-wave phase modulators in $LiNbO_3$ waveguides, design tradeoffs 86−36260
gyroscope, all-fibre optic, modulation index stabilisation by dual core fiber sensor 86−68282
gyroscope, fibre optic, pseudo heterodyne type, stabilisation 86−68283
gyroscope, fibre optic, with linear scale factor using phase detect. 85−24295
gyroscope, heterodyne all-fibre, feasibility, source frequency modulation 86−2695
gyroscope, integrated optic fibre, with on-chip modulator and harmonic feedback operation 86−2775
HDTV, solid-state driven deformable light modulator 88−15806
heterodyne communication, phase noise influence on performance *(German)* 86−37907
heterodyne detection, signal/nose ratio, effect of beam splitter thickness *(Japanese)* 85−18765
heterodyne interferometric temp. sensor using transverse He-Ne Zeeman laser and polarisation maintaining fibre 87−18692
heterodyne reception for glass fibre communication system *(German)* 85−47507
heterodyning schemes having diffraction optical mixer 85−51722
heterodyning versus homodyning, comparison 85−41827
heteroepitaxial-ridge-overgrown distributed feedback lasers, microwave intensity and freq. modulation 85−24554
heterojunction injection laser, DC modulation, picosecond optical pulse generation and detection 86−36496
heterojunction laser, two-component, spiky emission control, self-modulation bistability 86−9858
high-definition TV signal transmission, optical fibres, analogue intensity modulation 85−47694
high-power optical pulse compression 88−51929
high-speed optical modulators, semiconductor laser direct modulation *(Japanese)* 86−49593
high-speed semiconductor lasers, modulation properties 88−8234
holograms, 3D phase, small diffr. efficiency values meas. using phase modulation 86−15809
holographic correction of polarisation at exit from opt. fibres 85−12613
holographic gratings, surface and index modulation measurement *(Spanish)* 86−36606
holographic imaging, real-time, 3D, based on multiplexing techniques and optoelectronic holograms 88−40370
holographic interferometry, small deformations measurement 88−72431
holographic registration and spectroscopy of a modulated laser radiation 88−40394
holographic shutter modulator in fibre-optic pressure sensor 85−62372
holographic stereograms generated with liquid crystal spatial light modulator 88−74534
homodyne receiver for phase-modulated laser radiation at 10.6 μm 87−56168
hybrid bistable optical devices, integrated optical oscillators and multivibrators 85−50990
hybrid image processing *(Japanese)* 87−69287
hybrid optical system for linear transformation processing 87−55302
III-V semiconductor electrooptic waveguide modulator, microwave performance prediction 87−26077
III-V semiconductors, electro-optic modulation at microwave freqs. 87−74867
III-V semiconductors, heterojunction and quantum well structures, electro-optical devices and optical waveguides 88−51513
III-V semiconductors for spatial light modulation, electro-optical props. 88−2063
image correlation using deformable mirror device 88−41052
image plane modulator, monolithic, optimisation algorithm and fabrication 88−58238
image resolution limits resulting from mechanical vibrations 87−13141
induced-frequency shift of copropagating ultrafast optical pulses 88−58649
information processing, conf., Orlando, FL, USA (April 1986) 87−43746
inhomogeneous media, nonlinear light scatt., appl. in lasers 86−15768
injection heterostructure laser, Q-switched, picosecond pulses 87−61164
injection laser, external resonator equipped, frequency capture of semiconductor laser 87−46902
injection laser, frequency-modulated, with interferometer, high-frequency amplitude beat signal generation 87−46893
injection laser, single freq., error-free external modulation using $Ti:LiNbO_3$ directional coupler 85−2322
injection laser, two-section, with coupled resonator, freq. modulation 85−35787
optical modulation continued
injection laser modulation and signal regeneration up to 2 Gbit/s by monolithic Si bipolar IC 86−11111
injection laser with periodic modulation of the parameters parallel to the mirrors 88−65703
injection lasers, chirping, intersymbol interferences and pulse shaping 86−48425
injection lasers, chirping and intersymbol interference reduction by pulse shaping 87−39131
injection lasers, mode selection and line narrowing using fibre Bragg reflector 86−29135
injection-laser modulation measuring apparatus 87−7421
integrated acoustooptic modulator, chaos, optical bistability and regenerative oscills. 85−41228
integrated and guided-wave optics, conf., Kissimmee, FL, USA 85−26

integrated electro-optic modulators with high sensitivity for remote voltage sensing 87−26089
integrated electro-optic phase modulator, active pulse compression 88−45212
integrated electro-optical components using dielec. substrates 85−56371
integrated electro-optical modulators, linear dynamic range 86−68333
integrated electrooptic A/D converter 88−38592
integrated electrooptical modulator as amplifying device 87−46574
integrated modulator, operating at 1.3 μm 88−47053
integrated optic electrooptic device electrode analysis, buffer layer influence 86−42355
integrated optic frequency shifters with SAWs 87−54140
integrated optic waveguide-field overlap, polarisation insensitive modulator design appls. 87−54096
integrated optical acousto-optic switching, SAW devices and Bragg cell 85−51013
integrated optical analog-digital converter, characts. investigation 85−18747
integrated optical components, developments *(German)* 87−26068
integrated optical directional couplers, modulation behaviour 85−18742
integrated optical modulator with high extinction ratio employing resonant absorption 88−67427
integrated optical modulators for high-speed signal processing technology and designs 85−56357
integrated optical oscillator consisting of acoustooptic modulator and SAW delay line 85−12643
integrated optical single-sideband Bragg modulator with tapered monomode waveguides 88−51603
integrated optical spatial light modulator, electrooptic grating based, for analogue computation 85−12652
integrated optical spectrum analyser, intermodulation effects, obs. 86−31293
integrated optical three-wave-mixing config., optical bistability 86−22514
integrated optics, overview 87−68187
integrated optics analog to digital convertor, three digit Gray code, characts. 85−35538
integrated optics interferometric modulators 88−58222
integrated optics single-band modulator 87−74858
integrated optics theory and technology, book 86−19721
integrated optics travelling-wave modulators, expansion of bandwidth, flat freq. charact. 88−72150
integrated optics use in telecommunications *(German)* 87−26070
integrated total internal reflection modulator, bistability and blocking oscillations 85−29916
integrated-optic device for high-speed databuses 85−46294
integrated-optic modulators, travelling-wave using phase reversals, anal. and optimisation 86−68320
integrated-optical Bragg modulator with variable-period inclined electrodes 85−12685
integrated-optical crossing-channel waveguide electrooptic modulators 86−68317
intensity modulated fibre sensor, RF phase detection 87−26036
intensity modulated radiation for use in holography 85−51302
intensity modulation−direct detection, optical communication techniques *(Japanese)* 88−41645
intensity-modulated semicond. laser, chirp-reduction for max. transmission capacity over single-mode fibres 87−8250
interconnects, optical and elec., comparison based on power and speed 88−51693
interdigital circuit struct., waveguide mode diffraction, gap effects 87−32954
interferometric laser rangefinder using FM diode laser 88−16474
interferometric sensors based on integrated optics, using $LiNbO_3$ 88−60699
intermodulation distortion in optical amplifiers from carrier-density modulation, theoretical model 88−15457
intersatellite PPM communication links, spatial and temporal tracking errors, loss factors 87−40947
intracavity femtosecond-pulse compression with the addition of highly nonlinear organic materials 88−27266
intracavity liquid-crystal spatial modulator, laser optical signal conversion 86−36533
IR CO_2 laser modulator of ridge-type optical waveguide structure, free carrier absorption effect 86−68331
IR dynamic background/target simulator 88−75021
IR dynamic scene generation, requirements and comparative display device design 88−72196
IR laser light modulator of ridge-type optical waveguide struct. using free carrier absorpt. effect *(Japanese)* 87−38852
IR light modulator using free carrier absorpt. effects *(Japanese)* 87−7175
IR packet transmission, time division pulse modulation 87−3181
joint transform correlator, real-time, using programmable magneto-optic spatial light modulator with liquid crystal light valve 85−57448
Kerr modulation of signals at 1.3 and 1.5 μm in polarisation-maintaining fibres pumped at 1.06 μm 88−13800
large-signal modulation of semiconductor lasers with optical feedback for millimeter wave applications *(Japanese)* 87−75130
laser, high power, optical beam shaping for uniform target illumination 85−29885
laser, injection single-frequency radiation, AM by harmonic current signal 86−9861
laser, multimode CW, transient thermal self-interaction, partially coherent beam spatial statistics 85−24639

optical modulation continued
laser, semiconductor, DFB injection locked, chirp-free transmission over single-mode fibres 85−41395
laser 1.7 Gbit/s direct and external modulation for long haul fibre installed link 86−49675
laser addressed liquid crystal light modulators for colour electronic imaging with Mead paper 88−16355
laser and optical delay line system, radio signal generation, self-modulation oscills. 85−14288
laser arrays, far-field analytical model 87−7332
laser beam, backward transient stimulated Brillouin scatt. for optical pulse narrowing 86−29230
laser beam, fibre grating pair pulse compression 87−39250
laser beam, first order diffracted, emerging from acousto-optic modulator, quality anal. 86−3273
laser beam, phase modulation, spectral filtering for ultrashort pulse formation 87−33283
laser beam acousto-optic modulation of micrographic image generator 85−35936
laser beam active tracking of specular objects, beam width modulation 85−56890
laser beam apodisation with graded random phase window 87−19028
laser beam apodization with graded random phase window 88−65779
laser beam electro-optic modulator, grating-based, switching efficiency 85−56368
laser beam modulation, parallel channel acousto-optic, systems design and fabrication 85−35561
laser beam modulation for recorded image quality improvement 87−47879
laser beam modulation in IR region using InSb plasma *(Russian)* 85−41327
laser beam modulator and pulse former using electro-optic spectral hole burning 87−12533
laser beam power modulation device, halftone images reproduction appl. 86−9910
laser beams, plasma compressor, stimulated scatt. and self-modulation in plasma waveguide 85−41446
laser beams, pulse tailoring with phase control 85−12939
laser coherence modulation with Raman-Nath standing-wave acousto-optic effect 88−27261
laser diode, direct modulation system, elec. problems *(Japanese)* 85−35765
laser diode, directly modulated, period doubling and chaos 85−24540
laser diode, equivalent circuit model for small and large signal modulation up to Gigahertz range 88−45459
laser diode, low-frequency square-wave modulation for generation of RF and microwave signals 86−63828
laser diode intersatellite links, communications subsystem 88−67301
laser diode laser diode wavelength-division demultiplexers 86−15725
laser diode linewidth measurement techniques 86−63858
laser diode modulation, high-speed, using optoelectronic integration 86−68409
laser diode modulation for high frequency signal generation 86−29283
laser diode modules, SPICE simulation 87−46858
laser diode noise reduction by superimposed pulse modulation, theory 85−46413
laser diode PCM and appl. to high-speed electrooptical time multiplexer 88−20656
laser diode phase-locked array, intensity and wavelength fluctuations, duty cycle effects 87−26416
laser diodes, FM sideband injection locked optically induced modulation 88−2235
laser diodes, high-speed communication applications 85−18920
laser diodes, modulation charact. 88−65712
laser diodes, variable freq. picosecond optical pulse generation by elec. feedback 85−46380
laser discrimination charact. profile and freq. shift stabilised by saturated absorption 88−20722
laser distance-measuring instrument, microwave electro-optic modulator 88−27352
laser electro-optic phase modulation, residual amplitude modulation 85−62646
laser FM measurement technique, suppression of residual AM 87−12642
laser freq. stabilisation, Lorentzian lineshape, phase-sensitive detection calcs., Fourier expansion and residue theorem. 86−48313
laser frequency division and stabilization by dual freq. modulation method 87−12544
laser frequency modulated fiber optic interferometric sensors *(Portuguese)* 87−68175
laser frequency selectors based on electro-optic modulators 86−68599
laser frequency stabilisation and meas., dual-freq. modulation interferometric technique using RF standard 85−35846
laser frequency stability analysis by heterodyne meas. 86−48314
laser heterodyne bias frequency-locking for coherent optical communication *(Chinese)* 87−34532
laser injection modulation sensors 88−7906
laser light interference modulator, angular charact. 86−22188
laser light modulation using acrylic plate Faraday rotator, educational use 87−56148
laser machining and microscope systems, acousto-optic modulation and scanning 87−38885
laser measurement system for fast, precise positioning 88−45604
laser modulator controller based on resonator Q-control 86−68597
laser phase comparison and noise suppression 88−14248
laser phase noise insensitive coherent transmission, polarisation modulation and differential detection 88−47165
laser printers with solid-state light modulators for rapid output scanning 87−26581
laser probe resolution improvement, 3/2-order PLL design 86−31364
laser projection system for high resolution TV 86−49820
laser projector, IR, high resolution, for use with IR spatial modulators 85−35935
laser pulse compression, scientific appls., picosec. and femtosec. sources 87−39201
laser radar, principles, possibilities and limits *(German)* 85−14371
laser radiation, AlGaAs injection laser, modulation in travelling-wave amplifier 85−2338
laser radiation intensity, sweep modulation using electro-optic Kerr effect, photoreceiver model study 85−35848
laser radiation parameters control in IR region *(Russian)* 86−48471
laser rangefinder with AM and double heterodyne demodulation 85−20272
laser resonator Q-factor modulation using methods of adaptive nonlinear optics *(Russian)* 87−26461

optical modulation continued
laser system instabilities, noise and modulation effects, overview 85−24425
laser weak picosecond pulse in glass, induced spectral broadening by intense picosecond pulse 87−19029
laser with active mode synchronisation, efficient HF loss modulator 86−58950
laser with delayed-response active medium under periodic loss modulation, multistability and autostochasticity 85−41304
laser with nonlinear mirror resonator, single subnanosecond pulse prod. 88−14269
laser-pulse propagation, temporal and spatial modulation 88−51912
lasers, CW freq. stabilisation techniques *(Chinese)* 88−27007
lasers, high power, modulation for printing industry appls. 88−40312
lasers, multimode, regular and chaotic behaviour 85−24433
lasers, passively mode-locked with nonlinear complex-propagation coeff. 85−46299
lasers with modulated parameters, chaos, comparative anal. 85−62648
laterally coupled ridge waveguide laser, improved dynamic single-frequency low-chirp operation 86−48381
LCD full-color video projector 87−8544
LCD spatial light modulator, low-cost, with high optical quality 86−54012
LED degradation rate and modulation charact. relation from heterostruct. radiation 85−46292
LED modulation charact. for optical data transmission *(Czech)* 86−2986
light crystal TV spatial light modulator, modulation depth charact. 88−65383
light freq. shift in single-mode optical fibre 86−22163
light modulator for distance meas. *(Japanese)* 85−64287
lightwave technology, implications for microwaves 85−234
$LiNbO_3$ interferometric modulators, evaluation of drift and nonlinearities 88−51572
linear algebra processors, Lanczos and conjugate gradient algorithms realisation 88−28074
linear thin-film Bragg modulator 85−7282
liquid crystal bared modulator 87−74878
liquid crystal based visible to IR dynamic image convertor 85−12663
liquid crystal cells, thin nematic, electro-optic behaviour 87−12269
liquid crystal devices, optical cell design for sub-millisecond switching 87−38876
liquid crystal displays, technological developments and optical processing appls. 87−49852
liquid crystal ferroelec. spatial light modulators for optical interconnection 3D gate array 87−74876
liquid crystal laser tuner 88−27234
liquid crystal light modulator, optical multistability 87−38873
liquid crystal light valve, binocular pseudostereo representation of intensity images, clinical processing appl. 85−35556
liquid crystal light valve, Fourier-plane charact. 88−13948
liquid crystal light valves, optical computing appl. 87−12271
liquid crystal light valves for medical imaging 87−8928
liquid crystal modulator, optical logic gates, multiple-valued, complement and literals 87−74880
liquid crystal modulator using smectic A phase, submicrosecond switching 88−2066
liquid crystal modulators, optimal operation temp 88−51587
liquid crystal modulators, optimal operation temp. 87−74875
liquid crystal space-time light modulator, high resolution 88−72166
liquid crystal spatial light modulator, a-Si FET addressed 87−18769
liquid crystal spatial light modulator, a-Si photoconductor 87−26093
liquid crystal spatial light modulator, holographic recording of data using a time-dependent object beam 85−2441
liquid crystal spatial light modulator, nMOS addressed 85−29655
liquid crystal spatial light modulator, symm. pattern recognition 85−36436
liquid crystal spatial light modulators, high speed, photoaddressing 88−33785
liquid crystal spatial phase modulators, image formation, overfocusing effects 86−9632
liquid crystal television display as spatial light modulator for optical processing 87−46600
liquid crystal television spatial light modulator appl. to computer-generated holography 87−19065
liquid crystal TV as spatial light modulator, optical data processing props. 86−22189
liquid crystal TV as spatial modulator for optical data processing 87−12270
liquid crystal TV based joint transform correlator for adaptive real-time pattern recognition 87−54121
liquid crystal TV spatial light modulator, distortion correction with real-time joint transform correlator 87−75244
liquid crystal-organic polymer photoconductor struct., space-time modulation of light 86−15527
liquid crystals, rotary power, birefr. and optical modulation 85−12662
liquid-crystal differentiating spatial light modulator 87−12268
liquid-crystal light valve with RGB color stripes 87−8687
liquid-crystal spatial light modulator, coupled to image converter, expt. investig. 87−28973
liquids, unsteady induced Mandel' shtam-Brillouin scatt., subnanosec. laser pulse generation 86−15773
local-oscillator isolation using multiple acousto-optic modulators and frequency diversity 87−68234
logic based spatial light modulators 88−65438
logic gate based on magneto-optical spatial light modulator 87−74886
logic gate using spatial light modulator and interference fringe shifting 87−26078
low-mode lightguides, modulation frequency charact. 85−18712
LV optical modulator and self-biased self electro-optic-effect device 87−26067
Mach-Zehnder interferometer with coupled waveguides, investig. 88−26885
Mach-Zehnder low-loss modulator using mode coupling Y-branch waveguide 88−47129
Mach-Zehnder modulators and optical switches on III-V semiconductors 88−72139
Mach-Zehnder nonsymmetric interferometers used as low-drive-voltage modulators 88−73929
Mach-Zehnder optical modulator, config. for telecommunications appl. *(French)* 88−15485
machine vision, role of optical filtering 87−47992
magneto-optic binary spatial light modulator for optical image correlation 85−25170
magneto-optic light modulators appl. to advanced avionic displays 86−12107

optical modulation continued
magneto-optic modulator, highly efficient low field *(French)* 87−1994
magneto-optic modulator for microcomputer-based correlator 86−59336
magneto-optical multilayered media, direct overwrite by light power modulation 88−45239
magneto-optical space-time light modulator *(Russian)* 85−62413
magneto-optical spatial light modulator for microcomputer-based programmable optical signal processor 86−65153
magneto-optical spatial light modulator use in optical processors 85−12673
magneto-optical spatial light modulators, digital-optical matrix multiplication 88−8004
magnetooptic spatial light modulator, edge enhancement of coherent images 86−43285
magnetooptic spatial light modulator appl. to white-light optical processing 85−12672
magnetostatic wave optical Bragg cell devices 86−36274
materials requirements for optical processing and computing devices 85−46896
maximum likelihood symbol synchronization for the direct-detection optical on-off-keying channel 87−61540
membrane spatial light modulator, optically addressed, incoherent to coherent image conversion 85−12649
metal-cladded ridge waveguide laser diodes, double-contacted type, synchronized optical pulsations 86−29151
microchannel spatial light modulator, bistable configurations 88−65413
microchannel spatial light modulator, electron-beam-addressed 85−12650
microchannel spatial light modulator, optical transfer charact. 88−65439
microchannel spatial light modulator, response time consideration 88−33777
microchannel spatial light modulator, vacuum-demountable, X-ray imaging charact. 86−44613
microchannel spatial light modulator for image processing use 86−2855
microchannel spatial light modulator for optical information processing 88−67368
microchannel spatial light modulator having the functionsof image zooming, shifting, and rotating 86−68326
microchannel spatial light modulator under white-light illumination, operating charact. and appls. 87−74854
microchannel spatial light modulator with improved resolution and contrast ratio 87−12257
microchannel spatial light modulator with white light processing 87−74859
micromechanical light modulators for data transfer and processing 85−12686
micromechanical light modulators on silicon 85−35534
microwave, 1.3 μm DFB and multimode lasers under deep microwave modulation, linearity with optical feedback 87−75131
microwave applications of optical fibre technology 86−68287
microwave applications of optical technology, conf., Arlington, USA (Apr. 85) 86−33905
microwave fibre optic links, transmitter and receiver components, S/N limitations 86−37903
microwave fibre-optic links, 2-18 GHz, 0.83 and 1.3 μm systems using directly modulated laser sources 88−73952
microwave optical link in 10-18 GHz range by direct modulation of injection laser diode 86−37904
microwave signal generation, 35 GHz, with injection-locked laser diode 85−61439
microwave techniques appl., overview 87−6147
microwave wideband laser diodes spark new designs in optical links 85−42574
microwave-multiplexed wideband lightwave systems using optical amplifiers for subscriber distribution 88−67343
microwaveguides, integrated optical components, acoustooptical and electrooptical diffraction based 87−46575
millimetre-visible wave mixing system for testing HF devices 86−35105
mirror double phase conjugate, optical information processing appls. 87−62176
MIS-liquid crystal space-time light modulator, refocusing effects 85−56373
MIS-liquid crystal structure, spatial modulation of light, control signal parameters influence 85−12669
MNA crystal TIR spatial light modulator 88−51588
modal power distribution modulation appls. to fibre optic sensing and switching 88−45105
mode conversion device using magnetostatic surface wave 88−13955
mode-filter type intensity modulator using zincblende crysts. *(Japanese)* 86−42357
mode-filter type optical modulator using, ZnS crystals, propag. charact. study 87−54104
mode-locked, synchronously pumped, spectral behaviour and pulse train instabilities 88−51896
modulated semiconductor laser diode for optical fibre transmission, spectral chirp reduction *(Japanese)* 87−54331
modulator for integrated optics, based on electric capillarity *(German)* 87−68195
modulator for motion picture camera, field standard facilities and requirements *(Czech)* 87−68239
molecular devices, electrically modulated optical signals 85−41216
molecular gases used as optical modulators and bistable devices 85−56839
monomode active fibre devices, effects of overlay index 86−9582
monomode and weakly birefringent, optical fibres, nonlinear transmission *(French)* 86−42225
monomode fibre lasers, Nd^{3+}-doped, mode locking 86−29097
monomode fibre modulators, frequency and polarisation state control 88−13887
monomode waveguide, light pulses compression by self-phase modulation *(French)* 88−58065
MQW optical modulators, high speed operation 87−38860
MQW pin modulator, photocond. response time 88−60141
MQW props. and appls. in high-speed detectors and modulators 88−51548
MQW waveguide modulators , reviews 88−72156
multi-beam light modulator for laser film plotter 85−56917
multi-channel external modulation using acousto-optic diffraction 88−13967
multi-quantum well laser, modulation doped, high speed capability (>30 GHz) 88−45468
multichannel electrooptical modulators for digitaldata-recording and processing systems 86−28895
multichannel optical amplifier for multifreq. lightwave systems, nonlinear interactions 88−53254
multichannel optical correlator/convolver utilizing the magnetooptic spatial light modulator 87−60987
optical modulation continued
multichannel optoelectronic processor with correlation-function processing 87−20983
multilayer interference laser light modulator, optical bistability 87−12244
multilayer interference laser light modulator, polarisation effect study 85−50995
multilayer metal-dielectric absorbing coatings as electro-optical laser light modulator 85−56755
multimode fibre-optic modulators, freq. mixing 85−24318
multimode optical-fibre data-telemetry system for use inremote or hazardous locations 86−30835
multimode picosecond dynamic laser chirp, model based on transmission line laser 88−40298
multimode two TV channel fibre link using multimode laser diode and path-difference multiplexing 87−13694
multiple access channels with point-process obs., optimum demodulation 87−13711
multiple object recognition and tracking techniques 87−70300
multiple quantum well-based spatial light modulators 88−7990
multiple quantum well-based spatial light modulators 88−58236
multiplexer/demultiplexer construction for signal transmission in white light *(French)* 86−17119
n-i-p-i doping superlattices, potential for novel semiconductor devices 85−55865
n-i-p-i superlattices for electro-optical applications 88−58240
N-type differential negative resistance, optical bistability and radiation automodulation due to electrooptical effects 88−65373
Nd:glass laser with electronic control of emission kinetics and spectrum 86−9806
near IF semicond. lasers, props. and high modulation appls. *(German)* 87−12470
nematic liquid crystal, nonlinear optical processes in ns regime, optically-induced mol. reorientation 87−39211
nematic liquid crystal film, self-phase modulation and optical limiting of CO_2 laser 88−65783
nematic liquid crystal film, spatial self-phase modulation of laser beam, field-curvature effect on diffr. ring pattern 85−19003
nematic liquid crystal modulators based on field effects 88−26896
nematic liquid crystal spatial light modulator 88−51586
nematic liquid crystal surface alignment, use for high speed light modulation 88−7996
nematic liquid crystals for spatial light modulators 86−36262
neural net, optoelectronic analogue, self-organization and stochastic learning architectures and methodologies 88−58314
neurocomputer implemented using deformable mirror arrays 88−58321
neuromorphs, optical, using spatial light modulators 88−58300
NMOS laser diode driver, 1.7 Gb/s 88−65740
NMOS laser driver, 2 Gb/s, optical communication appls. 87−19019
NMOS VLSI array for adaptive liquid-crystal spatial light modulator, evaluation 86−28490
NMR laser, modulated near to bifurcation used as small signal detector 87−12636
nonlinear all-optical logic gate and modulator for fibre optic communication systems 88−33805
nonlinear distortion produced by an injection-locked laser 87−76746
nonlinear light propagation, spinor theory, optical beam self-steepening and self-modulation 85−35879
nonlinear optical waveguide devices 87−46561
nonlinear optical waveguides, conf., London, England (May 1986) 86−52154
nonlinear optics, conf., Los Angeles, CA, USA (1986) 87−10003
nonlinear periodic structures in guided wave optics 85−51273
nonlinear propagation of phase-modulated optical pulses in optical fibres 85−41172
nonlinear waveguides, beam propagation anal. of modal props. 88−72119
nonlinear waveguides, optical soliton formation, initial phase modulation influence 88−26854
notch filter, narrow-band electro-optic tunable 87−26133
online classification using hybrid digital integrated optical processor 86−15522
optical control and generation of microwave signals, conf., London, England (Jan. 1986) 86−26521
optical fibers clad with liquid crystal 88−13864
optical fibre thin-film thermooptical switches *(Polish)* 86−59897
optical fibres, self-phase modulation, stimulated Raman scatt., pulse walk-off effect 87−54013
optical fibres, stimulated Raman scattering and self phase modulation, pump and Stokes spectra, pulse walk-off influence 88−20753
optical fibres, stimulated scattering, line broadening and pulse narrowing 85−12944
optical light modulators, optically addressed, for coherent optical systems 85−57427
optical path difference meas., interferometric, using sinusoidal freq. modulation of diode laser 88−53902
optical pattern recognition system, automatic, real-time 87−38879
optical pulse self-action phenomena and femtosecond laser pulse generation, review 87−54425
opto-electronic signal processing, spatial light modulators and bus systems *(German)* 87−69268
optoelectromagnetics, microwave appls. 86−8449
optoelectronic devices for computing 87−38894
optoelectronic digital processor using spatially discontinuous discharge sections, structure *(Russian)* 85−26246
optoelectronic fog detectors with continuous sinusoidal modulation, signal backscatter *(Polish)* 87−56273
optoelectronic integrated circuits, demand 88−20520
optoelectronic mixers using avalanche photodiodes or Schottky-N^+ diodes 86−27164
optoelectronic resonator neural networks, associative memory using hologram 88−20328
optoelectronic single quantum well devices based on electron bleaching of exciton absorpt. 87−61051
organic molecules, spatial light modulation via optically induced absorption changes 88−65411
organic nonlinear optical materials *(Japanese)* 86−3308
organic photochromics for spatial light modulation 86−29975
organic polymeric waveguides, nonlinear 88−51517
orthogonality relation for TE- and TM-modes in guided-wave optics 88−72110
oscillation established using acousto-optic Bragg angle diffraction 88−8252

optical modulation continued
oscillator, optical, with instability and short feedback 88−51605
oscillators, optical injection locking, laser diode nonlinearity appls. 88−71035
oscillatory and chaotic output of an induced absorber in a ring cavity 88−40276
parallel interconnections, N^4 weighted 88−58317
parallel logic gate using Pockels effect modulators, fundamental components for optical digital computing 87−26076
parallel logic gate using spatial light modulators, PROM device implementation 86−42362
parallel logic operation with microchannel spatial light modulator 87−12260
parallel multiprocessing systems, development 87−38959
parallel-channel acousto-optic modulation device design and fabrication 86−42392
parametric oscillations in semiconductor lasers 87−26544
passband calc. of acoustooptical modulator with cylindrical piezoelectric transducer 86−22196
passive all-optical Fabry-Perot resonator, bifurcation to chaos, HF optical modulator 85−41490
passive modulation laser of resonator Q-factor *(Russian)* 87−26459
passive optical self-limiter using laser-induced transverse self-phase modulation in nematic liquid crystals 86−42638
passive ring-resonator gyro, Kerr effect, anal. 86−63643
pattern code modulation and optical decoding, code-division multiplexing for multifibre networks 86−23186
PCM transmitter design for multigigabit systems using relaxation oscillation technique 88−20655
phase and polarisation modulators, all-fibre, review 85−24278
phase conjugation for removing dispersive self-phase-modulation effects 85−2410
phase conjugation with transversally modulated pump fields 86−68628
phase correction of light modulators by holographic technique 86−58801
phase deformation recording on PLZT wafers for holographic and spatial light modulator applications 86−48514
phase detection in modulated signals subject to ideal Rayleigh fading 87−20625
phase distortion, signal depend., in spatial modulator, effect on optical correlator performance 87−62142
phase modulation techniques for fibre-optic gyroscopes *(Japanese)* 85−7260
phase modulator, electro-optic in phase stabilisation system for holographic data processing 85−57459
phase modulator using electric-field sensitive fibre with coaxial electrodes 87−68094
phase modulators, electro-optic, waveguide PIN junction, anal. and design criteria 85−56364
phase reversal traveling wave modulators, design and performance 88−72144
phase reversal travelling wave integrated optic modulators, time-domain anal. 87−7172
phase-dominant spatial light modulators 88−52507
phase-modulated holography for detection of phase and absorpt. gratings 87−54431
phase-reversal travelling wave modulator, optimisation *(German)* 87−74873
phase-sensitive detection of digital image, video lock-in amplifier appl. 85−64339
phosphate glass laser, actively mode-locked and Q-switched, picosecond pulse generation by self-phase modulation 86−3112
photo-emitter membrane spatial light modulator 87−18761
photocarrier appl. to photoelasticity, holography and speckle 88−51968
photochromic conversion effect in case of light modulator *(German)* 87−33003
photoconducting organic polymer-twist-effect liquid crystal space-time light modulator 88−20452
photoconductor-liquid crystal structures, optically controlled transparencies switching by S-effect 86−28915
photoconductor-liquid crystal type transparencies, optically controlled, basic characts. 86−22190
photodetector frequency response meas. without RF interference, heterodyne technique 86−44322
photodetector light fluctuation compensation, based on PWM as divider cct. 87−3621
photodetectors frequency characts. meas., using sweep generator of optical signals 86−5324
photodiode time constant meas. equipment, using piezo-optical effect in GaAs 86−42438
photoelastic all-fibre polarisation modulator for birefringent monomode fibres 87−68022
photoelastic modulator, for optical fibre birefr. meas. 85−41147
photoemitter membrane light modulator, information processing capabilities 88−8838
photoemitter membrane light modulator, structure, operational theory and performance 86−42437
photomultipliers, one-electron characteristics, modulator operation effects 87−24727
photonic switching technology applications 88−3965
photonics high bandwidth analog appls., conf., Honey-in-the-Hills, FL, USA (Apr. 1986) 88−55787
photorefractive crystals, optical beam equalisation using degenerate two-wave mixing 85−12948
photorefractive crystals as adaptive elements in acoustooptic filters 88−26905
photorefractive laser oscillation with intracavity image and multimode fibre 86−58947
photorefractive wave mixing, spatial light modulation, filtering effects 87−39204
photosensitive waveguides, planar, mode selection 88−20419
photothermal wavelength modulation of a diode laser 88−34090
picosecond and femtosecond Fourier pulse shape synthesis 88−20728
picosecond and femtosecond white laser pulse generation, effects of self, induced and cross phase modulations, review 88−20729
picosecond IR radiation pulse shortening feasibility in semiconductors 86−36552
picosecond laser pulses, generation using Q self-switching 87−61059
picosecond laser pulses, optical freq., intermodulation 86−42611
picosecond light pulses, self-contraction due to electronic nonlinear susceptibility 85−62665
picosecond light switch, design *(Japanese)* 87−3185
optical modulation continued
picosecond optical oscilloscope, real-time, for low-voltage picosecond signal meas. 87−41564
picosecond optoelectronics for microwave applications 85−62464
picosecond pulse amplification by Cu vapour laser 86−9727
picosecond pulse generation by laser-controlled loss modulator 86−9714
picosecond pulse generation in fibre waveguides due to self-modulation instability, dispersion effects 88−51460
piezoelectric films with waveguides appl. 85−2385
piezooptic modulator 88−58325
PLL, stabilised PSK transmitter with negative electricalfeedback to a semiconductor laser 85−56626
PLZT optical fibre switch, low power, insertion loss reduction 88−3996
Pockels capacitively coupled cell, high voltage fibre-optical meas. system 88−10016
Pockels cell modulator, cooled for laser fusion appls. 86−48217
Pockels light modulator, fast, using guided wave resonance 85−56365
Pockels readout optical modulator X-ray imaging detector, high efficiency 86−18269
pockels type phase modulator controller for voltage-controlled optical/RF phase shifter 86−22848
polarisation control scheme using optical heterodyne detection for coherent transmission 85−20185
polarisation modulation ellipsometer for complex dielectric function meas. 86−24703
polarisation PSK, coherent transmission technique with differential heterodyne detection 88−53255
polarisation state control using fibre optic techniques 87−26035
polarisation-maintaining fibres, alignment by temp. modulation 88−26753
polarised singlemode laser light phase modulation in monomode fibre by transverse pressure 88−51488
polarising optical-fiber modulators 86−2768
polysiloxane elastomer, acousto-optic modulator at 20 MHz *(French)* 88−33802
polyvinylidene fluoride film based fibre-optical modulator 88−51580
PPM optical channel, optimum joint slot and symbol synchronisation 87−61541
PPM optical channels, stretched pulse, pulse spreading estimation and decoding 85−62953
PPM optical communication, simultaneous slot and symbol synchronisation 87−40946
pre-detector optical signal processing technique, optical transform. image modulation 85−30482
PRIMO: programmable real-time incoherent matrix multiplier for optical processing 87−54839
PRIZ, conducting, spatial light modulator, memory and dynamic imaging 86−42369
PRIZ conducting spatial light modulators, fabrication and props. 87−46592
PRIZ modulator for hologram recording 88−65915
PRIZ modulators, data storage and reproduction using rasters 85−35551
PRIZ space-time light modulator spatial noise characteristics study 88−40005
PRIZ space-time light modulator transmission function 87−38865
PRIZ space-time light modulators, linear operation 85−35550
PRIZ space-time modulator, nonlinearity mechanism 85−62408
PRIZ spatial light modulator, conducting, construction and operation 86−9619
PRIZ spatial-temporal light modulator with fibre-optic input 86−42371
processing system based on LD and spatial light modulator 88−35886
programmable electrooptic system for laser radiation modulation, optical bistability study appl. 88−65774
programmable masks written on spatial light modulators, suppression of selected diffr. orders 88−65412
projection TV systems, resolution requirements 87−8409
pseudocolour image enhancement, real-time large screen display 88−60840
PSK homodyne system with balanced phase locked loop 88−41651
PSK optical homodyne receiver with a six-port fibre coupler 88−3973
pulse amplification in picosecond range in single mode fibres 87−39216
pulse compression, optical, using high-frequency electrooptic phase modulation 88−39994
pulse compression and separation using optical fibre and Gires-Tournois interferometer 86−68632
pulse compression by holographic method 88−40374
pulse compression in fibre grating, peak power fluctuations 88−40299
pulse compression in parametric interaction and appl. in development of high-power tunable subpicosecond solid lasers 86−63861
pulse compression inside and outside laser cavity, advantages and limits 86−15741
pulse compression of Raman-depleted ps pulses and spectrally windowed self-phase modulated pulses at 1.06 μm 87−54406
pulse compression together with pulse reshaping in optical fibre 86−42622
pulse generation, 170 fs, by optical pulse compression at 308 nm, hybrid excimer-dye laser set up 88−58619
pulse generator for a solid-state light modulator 85−6224
pulse lasers, short period loss modulation anal. *(Russian)* 87−26357
pulse selector for mode-locked lasers 88−72359
pulse-modulated semiconductor lasers, propagation delays, transition times 86−63795
pulse-shape determination of intracavity compressedpicosecond pulses by two-photon fluorescence analysis 86−63743
pulsed laser radiation with stationary PM during thermal blooming, coherence and intensity fluctuations 88−2347
pulsed laser with optoelectronic control, synchronisation system 86−15747
pulsed power for repetitively pulsed high-power discharge lasers 88−24053
push-pull liquid crystal modulator for electronic stereoscopic display 88−74529
PWM for electrically isolated analogue transmission 86−16112
quadratic nonlinearity media, parametric amplification of spreading optical pulses 86−29238
quadratically nonlinear crysts., parametric FM of picosec. light pulses 86−29236
quadrature demodulator for phase detection in fibre optic interferometric sensors 86−68298
quantum channel with noncoherent radiation source, potential noise immunity 88−72715
quantum well lasers−gain, spectra, dynamics 87−7364
quantum well structures, electro-optic props., device applications *(Japanese)* 87−12252
quantum well structures, electroabsorption, physics and applications 88−7988

optical modulation continued
quantum well structures, linear optical props. elec. field depend. waveguide electroabsorpt. and sum rules 87−7178
quantum wells, lattice matched and strained, optical modulation due to transverse electric fields 88−20437
quantum wells for optical processing applications 88−58239
quantum wells for photonics 85−46217
quartz fibre waveguide, phase self-modulation, Nd:YAG laser picosec. pulse effective shortening 85−19006
quasistatic carrier induced frequency chirp in semiconductor laser diodes 87−54304
rainbow holography of 3-D stationary objects with no slit, modulation achieved by translational motion of lens 85−2432
Raman Doppler velocimetry, single-pulse, with FM or AM CW laser beam 87−47024
range finders, optical, eikonal fluctuation averaging effect on accuracy 85−8960
range finding using frequency-modulated laser diode 86−55828
real-time correlator employing US light modulator *(Japanese)* 86−28927
real-time pattern recognition using modified liquid crystal TV in coherent optical correlator 86−37115
real-time performance 86−70092
regenerative hybrid optical bistable device *(Romanian)* 88−72398
regenerator with DFB-LD direct modulation and dispersive fibre transmission expts. 88−47136
relaxation method of compensation in an optical correlator 88−21301
remote pyrometer with variable optical bandwidth *(German)* 85−64156
remote sensing systems, pre-detector processing technique 85−48497
remote sensors using hybrid phase-conjugator/modulators 88−20767
resonant optical waveguides cavities as electro-optic modulators 85−41213
resonant-loop optical fibre phase modulator 88−65256
resonator matrix for closely spaced carrier system 86−4667
resonators, phase conjugate, orthogonality props. of transverse eigenmodes 88−20732
reticle and background 88−16188
RF Fabry-Perot-type filter for intensity modulated sensors 86−48161
RF fibre optic links, 10 GHz laser modulation 87−8325
RF fibre optic links, direct and externally modulated, system characts. 87−49061
RF radiation spectrum of semiconductor laser, optical communication line wave reflection 87−68507
rhodamine 6G laser, hybridly mode-locked CW, self-phase modulation 85−29785
rhodamine 6G laser wavelength modulation with low voltage device, signal conversion and ADC appls. 86−68335
rhodamine 6G lasers, FM, operation 86−36432
rhodamine 6G ring laser, broadband CW, Ar^+ laser pumped 88−72289
ridge waveguide DFB lasers, 1.5 μm, high modulation capabilities 85−29831
ring dye laser, pulse compression at high repetition rate 85−24626
ring gas laser with circularly anisotropic resonator, dynamics 85−18861
ring gas lasers, two-isotope active medium, effect of population modulation on beat freq. 88−58640
ring laser, acoustooptic nonreciprocity rel. to Fizeau effect 87−75171
ring laser, random freq. modulation operation 85−56747
ring laser, self-modulation regime, use in optical nonreciprocity measurements 85−56736
ring laser dynamic frequency characteristic, Floquet theory 87−26465
ring laser with modulated freq. nonreciprocity, freq. characts. 88−2325
ring laser with nonlinear element, regular and stochastic self-modulation 85−35835
ring lasers, periodic loss modulation, influence of broadening and detuning 88−51855
ring lasers, unidirectional device using acousto-optic modulator 88−51862
ring resonator sensor, phase modulation investig. 88−67840
ring system formed by laser and fibre-optic delay line, self-modulation oscillations, parametric stability 87−54408
ring-laser gyroscope, random dither modulation 87−33231
robust detector of optical radiation intensity modulated by subcarrier frequency 87−35081
ruby, Q-switched, mode-locked and cavity dumped laser for plasma diagnostics 85−51147
ruby laser, acoustic intensity modulation using rocking resonator mirror 85−2269
ruby laser, passively mode-locked, pulse compression 85−51151
S-diode nanosecond pulse generators for modulationof semiconductor generators 86−40964
SAW device, leaky, for analogue external modulation of optical transmission *(Japanese)* 88−51606
scanning architectures for electronic printing appls. 88−40040
Schottky SEED device, optical optoelectronic, and elec. bistability and multistability 87−33073
Scophony spatial light modulator 85−35567
second harmonic generated signal, induced phase modulation 88−20741
self-biased 1×2 modified directional coupler modulator 88−26875
self-diffraction for intrinsic optical modulation evolution measurement in photoresists 88−58696
self-electro-optic effect, optoelectronic bistability and oscillation, and self-linearised modulation 86−22499
self-electro-optic-effect device, for spatial light modulator and optical dynamic memory 88−45219
self-electrooptic effect devices for optical modulation and logic gates 85−41215
self-homodyne DPSK transmission at 1 and 2 Gbit/s over 86 km of fibre 88−3977
self-linearized modulator using quantum-well self-electro-optic effect device 85−18753
self-phase modulation for pulse compression to 8 fs at 5 kHz repetition rate 85−56783
self-phase modulation in optical fibers 88−58143
self-referencing FDM technique for fibre optic sensors 88−45127
semiconductor 1.5 μm single-freq. laser with external waveguide Bragg reflector, performance characts. 88−40213
semiconductor chirped laser, appl. to fibre gyroscope 88−65934
semiconductor compact single-frequency laser package with 1 MHz linewidth and ±10 MHz frequency stability 88−8209
semiconductor DFB and multimode lasers, optical feedback effect on linearity performance under microwave intensity modulation at 1.3 μm 88−34088
semiconductor DFB laser, multielectrode, FM 87−54333
semiconductor DFB lasers, spectral chirping suppression 87−12461

optical modulation continued
semiconductor diode laser, FM by bulk acoustic waves, theoretical and expt. study 85−29820
semiconductor diode laser, FM equalisation with passive network 85−41390
semiconductor diode laser, frequency chirp to modulated power ratio rate eqn. anal. 86−22390
semiconductor diode laser, large signal modulation characts. study *(Korean)* 86−58930
semiconductor diode laser actively mode-locked by gain modulation, computer model 86−29154
semiconductor diode laser nonlinear gain, standing-wave induced dielec. grating as origin 88−40203
semiconductor diode lasers, current modulated, frequency chirp 86−68533
semiconductor diode lasers, effect of spurious intensity modulation on performance of optical FSK communications systems 86−64985
semiconductor diode lasers, formulas for direct FM response 88−14198
semiconductor diode lasers, transform-limited optical pulse generation in ps and sub-ps regions 86−42564
semiconductor distributed reflector laser progress, dynamic single mode, resonator config. 85−2341
semiconductor doping superlattices, physics and applications 87−24901
semiconductor Fabry-Perot lasers, mode competition 88−45436
semiconductor homojunction laser, single-mode, modulation of emission frequency by injection current 86−68542
semiconductor injection laser, directly modulated, intermodulation distortion 85−18915
semiconductor injection laser PCM at 2 Gbit/s using Si monolithic bipolar IC multiplexer 85−24572
semiconductor injection lasers, high speed modulation 85−2352
semiconductor injection lasers, microwave-frequency intensity and gain-switching, characts. 85−12840
semiconductor injection lasers, narrow-band direct modulation at MM-wave freqs. 88−65660
semiconductor injection-locked laser, locking bandwidth and relax. oscills. 88−40214
semiconductor integrated etalon interference lasers, high-speed modulation 85−2354
semiconductor junction DFB laser direct FM characts. meas. using delayed self-homodyne technique 87−7352
semiconductor junction Z 86−63823
semiconductor laser, chaos in directly modulated laser 88−51894
semiconductor laser, chirping reduction for improved single-mode fibre transmission capacity 86−15702
semiconductor laser, current-modulated coupled-cavity, chirp minimisation and optimum biasing 85−24580
semiconductor laser, directly modulated, freq. deviation meas. by Michelson interferometry 88−58565
semiconductor laser, directly modulated, wavelength chirping 85−12854
semiconductor laser, dual-wavelength oscillation in external cavities *(Chinese)* 86−36528
semiconductor laser, dynamic line broadening due to HF modulation 85−29812
semiconductor laser, dynamic-single-mode, dynamic spectral width, transmission bandwidth of single-mode fibres 85−51164
semiconductor laser, FM noise and spectral linewidth 87−61169
semiconductor laser, frequency response and bandwidth, effect of nonlinear gain 85−62552
semiconductor laser, frequency stabilised, automatic phase control of returned light 85−29819
semiconductor laser, gain-switched, pulse-code-modulated light generation with high bit rate 85−2328
semiconductor laser, HF current injection driven, coherence characts. 88−20670
semiconductor laser, modulated, intrinsic lineshape and FM response 86−22376
semiconductor laser, modulated, parametric sideband amplification study 86−58939
semiconductor laser, modulated, self-pulsing, frequency locking, quasiperiodicity and chaos 86−36469
semiconductor laser, multimode rate-equation anal. appl. to longitudinal mode modulation 87−12476
semiconductor laser, optical freq. modulation depend. on bias current *(Japanese)* 88−45531
semiconductor laser, optoelectronic switching based on mode-hopping phenomenon 88−20672
semiconductor laser, single mode, FM and dynamic lineshape props., time averaged electric field autocorrelation function meas. 86−48430
semiconductor laser, stripe DH, behaviour under step and sine current modulation *(Chinese)* 86−15695
semiconductor laser, synchronous modulation by sinusoidal current and light 87−26405
semiconductor laser, ultrafast, large-signal dynamics under digital modulation 85−56609
semiconductor laser, water vapour stabilised, absolute stability study 87−39046
semiconductor laser AM and FM noise *(Chinese)* 88−40294
semiconductor laser amplifier, crosstalk between intensity-modulated WDM signals 88−34015
semiconductor laser amplifier for multiplexed coherent systems 87−39133
semiconductor laser amplifiers, resonantly enhanced two-wave mixing via population pulsations 88−51803
semiconductor laser coupled to external high-Q resonator, modulation performance 88−40212
semiconductor laser diode, external-cavity, synchronous FM modulation *(Japanese)* 88−45532
semiconductor laser diode progress, conf., Cambridge, MA, USA (Sept. 1986) 88−6088
semiconductor laser diodes, nonlinear distortion performance, influence of coherent reflected waves 86−29161
semiconductor laser dynamics, self-modulation, nonlinear losses and mode chirping 88−8229
semiconductor laser FM by SAW 85−57204
semiconductor laser in short external cavity, optical signal detection and rate eqn. anal. 87−61171
semiconductor laser intensity fluctuations, effect on communication system performance, error probability 87−34570
semiconductor laser mixer for RF signal down-conversion process, losses and operating props. study 85−46464
semiconductor laser modulation by chip bonding to SAW device 86−22378
semiconductor laser modulator, operating above 565 Mbit/s 87−75195

optical modulation continued
semiconductor laser negative feedback statistical FM, for coherent optical communication systems 86−3179
semiconductor laser output, lateral phase uniformity under sine current modulation *(Chinese)* 87−39085
semiconductor laser parametric modulation, lateral carrier diffusion effect 87−61173
semiconductor laser picosecond pulses, modulation amplitude dependence of time-bandwidth product 86−48427
semiconductor laser ultimate bandwidth, HF modulation 88−8206
semiconductor laser with lateral field coupling control, modulation characts. anal. 85−18933
semiconductor lasers 86−63818
semiconductor lasers, bifurcation and chaos, simulation studies 86−48384
semiconductor lasers, constant-amplitude wavelength-swept, for distance sensing 88−65932
semiconductor lasers, coupled-cavity, modulation characts. 85−41425
semiconductor lasers, directly-modulated, second harmonic distortions due to spatial filtering 87−54344
semiconductor lasers, dressed reson, freq. and damping parameter 88−45414
semiconductor lasers, dynamic behaviour Auger recombination, simulation 87−61144
semiconductor lasers, dynamic response under direct modulation *(French)* 88−20668
semiconductor lasers, dynamic single mode condition 86−3122
semiconductor lasers, external-cavity, direct modulation, instability threshold resonances 88−33991
semiconductor lasers, FM characts. model 88−40205
semiconductor lasers, frequency and intensity modulation phase relationship, influence of carrier nonuniformity 88−45506
semiconductor lasers, frequency modulation noise and linewidth reduction 85−24534
semiconductor lasers, frequency stabilisation, review 88−65706
semiconductor lasers, gain-guided, linewidth enhancement, FM and instabilities 86−15699
semiconductor lasers, HF modulation effects and oscillation suppression *(Chinese)* 85−12847
semiconductor lasers, high freq. modulated, feedback induced spectral narrowing 86−48413
semiconductor lasers, high speed modulation performance 86−29157
semiconductor lasers, injection locked, freq. chirping, small signal analysis 87−26403
semiconductor lasers, intrinsic freq.-response meas. using optical modulation 88−72315
semiconductor lasers, mode-locked, travelling wave treatment 88−45429
semiconductor lasers, modulated, intrinsic lineshape and FM response meas. 86−3265
semiconductor lasers, modulation and spectral penalties control 86−29172
semiconductor lasers, modulation limit for parametric modulation schemes 86−3170
semiconductor lasers, modulation props. and optical feedback characts. of laser diodes stabilised by external cavity or injection locking 85−35768
semiconductor lasers, modulation-induced spectral penalties in high bit-rates-ingle mode systems 86−48423
semiconductor lasers, nonlinear system modeling based on Volterra series 87−12486
semiconductor lasers, picosecond charactn. techniques, review 88−2278
semiconductor lasers, pulsation current depend. due to photon induced modulation of optical loss 85−12863
semiconductor lasers, rapidly-modulated, transient time-averaged spectra 85−29834
semiconductor lasers, rate equation models and wavelength modulation 87−68577
semiconductor lasers, single frequency, modulation induced transient chirping 85−62573
semiconductor lasers, single mode, interferometric intensity noise and freq. modulation 86−48420
semiconductor lasers, single-mode directly modulated, power spectrum, chirp-induced fine structure 85−62589
semiconductor lasers, sinusoidally modulated, phase inhomogeneity effect of light output *(Chinese)* 88−20713
semiconductor lasers, subharmonic modulation with optical feedback 85−56631
semiconductor lasers, travelling-wave rate eqn. anal. 87−33206
semiconductor lasers, ultra-high speed, bandwidth >10 GHz 85−35772
semiconductor lasers, unlocked optically driven, output spectrum 86−48409
semiconductor lasers high-speed directly modulated, freq. chirping/dynamic linewidth reduction by injection locking 85−18924
semiconductor lasers oscillation and chaotic behaviour obs., under DC modulation 87−46901
semiconductor materials, light cross modulation in elec. field presence 85−62651
semiconductor multielement laser, dynamic response analysis, modulated cavity amplitude and phase 86−22389
semiconductor multiple quantum wells, optical modulation 85−35545
semiconductor multiple quantum wells, optoelectronics for optical modulation and bistability 87−12334
semiconductor quantum well lasers, dynamic props., review *(Japanese)* 87−39138
semiconductor quantum well structures for optoelectronic devices *(Japanese)* 86−48405
semiconductor quantum wells, optical modulators and bistable devices using self-electro-optic effect 87−2237
semiconductor self-pulsing lasers, quasiperiodic route to chaos under large signal current modulation 87−33215
semiconductor single-mode lasers, cavity resonators, injection locking, tuning and modulation, review *(German)* 88−58572
semiconductor size-effect modulation laser, three-terminal, gain-switching characts., fast transient response 87−7365
semiconductor travelling-wave absorption modulator, optical rise time and frequency chirping predictions 86−68305
semiconductor-clad optical waveguide devices, periodic coupling 86−28857
serrodyne modulator in fibre optic gyroscope, behaviour 86−2694
serrodyne phase modulator, integrated optical frequency translators 85−41204
serrodyne phase modulators for fibre optic sensor 88−45125
shaped laser pulses, synthesis by time domain modulation in a fibre-grating compressor 88−51879
optical modulation continued
shearing heterodyne interferometry using acoustoopticlight modulators 86−2881
SHG, high efficiency, phase matching limitations 85−7525

spatial light modulators and appls., conf., Los Angeles, CA, USA (Jan. 1984) 85−10307
spatial light modulators and their applications 88−2064
spatial light modulators for optical computing, conf., Incline Village, NV, USA (March 1985) 86−47
spatial light modulators for optical information processing 87−54838
spatial light modulators in optical symbolic computing architectures 88−58299
spatial light modulators using ferroelectric liquid crystal devices 88−58251

optical modulation continued
spatial light modulators with MIS-liquid crystal structure 87−12266
spatial light modulators with Pockels effect for optical parallel logic gate 85−56366
spatial spectrum, scale change, modulation by obliquely set periodic structure 85−30353
spatially modulated beams counterpropagating in nonlinear medium, interaction 85−41509
spatially modulated optical signals commutation, laser-generated beam array 87−54457
spectrum anal. using Babinet compensator 88−42015
spectrum analyser based on pre-detector optical signal processing 87−14243
SSB acousto-optic FM in single-mode birefringent fibre 86−68358
SSMA in-house digital wireless optical link, design 87−76727
stable pulsations of semiconductor lasers by optoelectronic feedback with avalanche photodiodes 87−46870
Stark-induced birefringence and dichroism, turnable optical filters, modulators and limiters appl. 86−36255
stimulated Brillouin scatt., light pulse compression with phase modulation 85−12962
subcarrier multiplexed optical fibre communication system, 20 channel config. for video distrib. 88−67341
subharmonic entrainment of avalanche oscillationsthrough optical terminals 86−46610
superluminescent diodes, high frequency modulation 87−33203
surface wave electro-optic modulator 87−46594
surface-emitting-type optical threshold device, operation anal. *(Japanese)* 87−61168
switch, all-optical, using interaction between low power light beams in liquid film 87−12578
switch using interaction between low-power light beams in liq. films 86−9931
switch/modulators based on two-state systems, three-space representation 86−68315
switches, reflection-type with intersecting waveguides 88−72108
switching network for minicomputers using optical spatial light modulator and optical fibres 85−35554
telecommunications using integrated optics including wave conductors and electro-optical couplers *(German)* 87−26069
temporal coherence transformation, under wind refr. influence of randomly modulated laser radiation 86−29212
TeO_2 paratellurite multifrequency acoustooptic modulator 86−22194
theodolite, KERN DKM 3A, laser-diode distance meter 85−4107
thermo-optic waveguide interferometric modulator/switch in glass 85−2063
thermoplastic film imaging, recording technique for real-time coherent light valve 85−29938
theta-modulation decoder based on the Lau effect 86−69149
thin-film travelling-wave light modulator, diffraction efficiency 87−1995
third harmonic stabilised laser, emission freq. shifts due to refr. index saturation 85−24660
three plane optical correlation for high speed target recognition 88−73382
threshold light modulator for A/D image conversion, using photoconductor and electrooptic medium 85−12659
time compression of light pulses for stimulatedbackscattering 86−15769
time delay detection utilizing a Bragg cell in a joint transform correlator 88−40025
time-dividing optical power divider using electrooptic light modulators *(Japanese)* 86−23891
time-domain beam former, optical implementation using 2D spatial light modulator 87−27602
total internal reflection 1-D electrooptic lens 85−46211
total-internal-reflection electrooptic deflector/modulator 87−46596
tracking, FM reticles, anal. 88−66273
tracking, FM reticles, parameter anal. 88−66274
transducer, optically-powered, with optical-fibre data link 85−25865
transform techniques for electro-optical pre-detectorsignal processing 87−2663
transient optical pulse formation and mode lockingthrough parametric traveling-wave modulation 86−42571
transimpedance measurement receivers for modulated optical power in optical fibre systems 87−28551
transistor, optical, dynamic theory 86−15782
transmission expt., 8 Gbit/s over 68 km of fibre using $LiNbO_3$:Ti external modulator 88−22089
transmission system, high dispersion multi-Gbit, 1.53 μm DFB laser evaluation 87−40969
transmission system at 2.4 Gbit/s, experimental system 88−35529
transparencies, optically controlled, employing liquid crystals 85−18760
travelling wave integrated optic modulator, with phase reversal electrodes, theory 87−54114
travelling-wave modulator, bandpass response with transit time difference compensation scheme 85−41209
travelling-wave modulators, ultrafast, with reduced vel. mismatch 87−26091
travelling-wave modulators, velocity mismatch compensation using pseudorandom switched electrode patterns 87−54109
travelling-wave wideband modulator design 87−54113
triac firing and performance, use as electronic light variator *(French)* 85−1114
tunable multilayer interference laser light modulator 85−46213
TV lens specifications, development 87−26132
twin-stripe semiconductor lasers, compensation of line-broadening factor and improved modulation 86−54139
twist-effect liquid crystal light modulator with organic polymer photoconductor, holographic characts. 88−26898
twisted nematic liquid crystal cell, bright area modulative 87−46601
two-channel ASK heterodyne detection system, crosstalk and prefiltering without laser phase noise 88−73927
two-channel electro-optic light modulator 85−18755
two-dimensional light scanning by waveguide acoustic modes of a plate 87−18778
two-dimensional membrane spatial light modulator, optically addressed 85−35535
two-dimensional rectangular gratings, natural modes 88−40582
two-photon-excited thermal index gratings, diffraction 85−29929
two-section cleaved-coupled-cavity lasers, chirping depend. on cavity separation 85−46428
ultimate optical communication speed, anal. 87−20517
ultra high frequency electric field sensing 87−74862
optical modulation continued
ultra-high speed semiconductor lasers with bandwidths above 10 GHz 86−48438
ultrafast event measurement techniques with mode-locked dye laser, phase modulation role 85−62705
ultrafast light-controlled optical-fiber modulator 87−46440
ultrafast supercontinuum laser source uses, self-phase modulation 85−29958
ultrafast supercontinuum white laser source 87−61242
ultrashort IR pulse generation via electron-density waves 87−68583
ultrashort laser pulse propagation, self-, cross-, and induced-phase modulation 88−40300
ultrashort laser pulses, coherence props., study by nonlinear method 85−51249
ultrashort pulse generation by laser balancing self-phase modulation, group-velocity dispersion, saturable absorption and gain 85−29874
ultrashort pulse generation by laser mode locking using stimulated Raman scattering filter 86−54179
ultrashort pulses, phase modulated for relaxation time meas. 85−41474
ultrashort synchronised independently tunable light pulse generation using antiresonant ring cavity 86−42607
unstable resonator continuous flow laser, output radiation modulation 85−56769
US, disc transducer, radiation field, laser probe investig. with tomographic scanning 87−73173
US diffraction grating using IDT at liquid-solid interface 85−29663
valve based on photoinduced space charge fields in BSO crystals 88−2065
Vander Lugt three plane correlator for optical signal processing 88−66697
variable optical filter optimisation in hybrid optical correlator 88−8019
vector multiplier, integrated optic, for phased array antennas 88−51576
VHF and UHF range wireless H-fieldprobe with laser as optical transmitter *(German)* 86−10074
video signal transmission by optical link, intensity modulation of LED light carrier 85−47522
viscoelastic control layers for solid-state light valves, deformation behaviour 88−7978
VLSI, optical modulator for global optical interconnect network 87−68200
VLSI based spatial light modulator development 88−20454
Walsh function spectrum analyzer using programmable magnetooptic spatial light modulator 88−59189
wavefront determination in optical reception system with multichannel phase modulation 87−75450
waveguide, TM wave control by TE guided waves 88−27543
waveguide devices, normal mode anal. appl. to device output and crosstalk 88−72100
waveguide gratings, local normal mode anal. of guided mode interactions 88−72101
waveguide lasers, nonlinear conversion of CW radiation into short pulses 87−61223
waveguide phase modulator, highly efficient, for integrated optoelectronics 86−54052
waveguides, acousto-optical modulation by surface waves 86−2885
waveguides, electrooptic light modulation by fringing field of Gunn domain 87−33008
waveguides, liquid crystal cladded, power depend. transmission characts. 86−42308
waveguides, multi-layer, for integrated optical magnetostatic-wave signal processing devices 88−40013
waveguides, soliton formation, influence of regular phase modulation 87−74706
waveguides, tapered, intrinsic modes investig. 88−65302
waveguides, uniaxial, dielectric, planar, hybrid guided modes 88−72102
wavelength division multiplexer, technological trends 88−9606
white light optical signal processing with programmable magnetooptical device 86−15529
wide band laser with strong absorpt. lines in the resonator, self-modulation of output intensity 86−48368
wide-band laser intensity stabilization system 86−29204
wide-band semiconductor lasers and optical modulators for communications 88−73947
wideband power amplifier, LF cut-off reduction 87−52397
wireless communications for office information networks 85−57178
(Al,Ga)As-GaAs MQW DH optical waveguides as electroabsorpt. modulators 87−74869
Al-GaAs Franz-Keldysh optical modulators in waveguides 88−2012
Al-GaAs-AlGaAs asymmetric metal-clad waveguides, optical characts. anal. and mode selection 88−65330
AlGaAs CW laser coupled to external cavity with intracavity Fabry-Perot etalon, instabilities 85−7427
AlGaAs DH injection laser with narrow stripe contacts, multimode emission mechanisms, self-modulation 85−56653
AlGaAs QW laser, gain, modulation response and spectral linewidth theory 86−22387
AlGaAs diheterostruct. lasers, equivalent circuit parameters, effective time const. determ. 86−3156
AlGaAs frequency stabilisation of semiconductor laser using atomic absorption line under direct FSK 88−27140
AlGaAs laser diode, 0.78 μm, ultrashort optical pulse generation, expt. study *(Japanese)* 88−8219
AlGaAs lasers, FM characts., stripe-structure dependence 86−9844
AlGaAs lasers, linewidth enhancement factor estimation by correlation meas. between FM and AM noises 85−62587
AlGaAs lasers modulated at 90 Mbit/s, intermittent light output and switching behaviour 86−48406
AlGaAs lasers under pulse-position-modulation, average power constraints 86−22406
AlGaAs modulated laser, freq. stabilisation 88−2237
AlGaAs monolithic lasers and modulators fabricated by impurity induced disordering 88−72138
AlGaAs vertical guided-wave nonlinear coupler, all-optical modulation 88−45175
AlGaAs/GaAs MQW reflection modulators, MBE grown on Si substrates 88−65368
AlGaAs/GaAs depletion-edge-translation optical waveguide modulators, design 88−7972
AlGaAs/GaAs optical waveguide phase modulator using carrier depletion, design and characts. 86−36246
AlGaAs/GaAs waveguide phase modulators, wavelength depend. 87−25951
$Al_xGa_{1-x}As$/GaAs superlattices, infrared devices, waveguide and surface plasmon coupled 88−33740

optical modulation continued
AlGaAs-GaAs MQW CCD spatial light modulators using electroabsorption effects 87−12255
AlGaAs-GaAs epitaxial Fabry-Perot resonator, optical bleaching 88−13929
AlGaAs-GaAs lasers grown on Si substrate by MBE, high-frequency modulation 88−34084
AlGaAs-GaAs lasers on Si, microwave modulation and CW operation 88−40242
AlGaAs-GaAs optical waveguide phase modulators with high figures of merit 88−33899
n-AlGaAs-GaAs quantum wells, carrier induced change in refractive index 88−19726
AlGaAs-GaAs quantum wells, elec. field effects on excitons, appl. to optoelectronic devices 88−33760
AlGaAs-GaAs spatial light modulators using charge-coupled device addressing and electroabsorption effects in multiple quantum wells 88−33901
AlGaAs-GaAs tunable multilayer interference optical modulators, MBE growth 88−51561
$Al_{0.3}Ga_{0.7}As$-GaAs optically-pumped multiple quantum well laser 87−2113
Ar laser, fast frequency stabilisation to optical resonator using extra-cavity electro-optic modulator 85−41305
Ar laser intensity stabilisation using electro-optic modulator 86−36539
Ar laser radiation modulation by broadening of exciton level in CdS 85−56510
Ar laser with stable phase mode locking, mode composition and time characts. 86−36398
Ar^+ laser steady-state passive mode locking, self-modulation in resonators 86−22308
$BaTiO_3$ 0°-cut and 45°-cut crysts., hybrid phase conjugator/modulator props. 87−12555
$BaTiO_3$ characts. for electro-optic devices 88−7840
$Bi_{12}GeO_{20}$ crystal light modulators, physical aspects of operation 88−26879
$Bi_{12}GeO_{20}$, space-time modulator appls., optical information writing 86−58799
$(BiLu)_3Fe_5O_{12}$ film, TM-TE optical mode conversion induced by magnetostatic waves 88−72171
$(BiNdLu)_3(AlFe)_5O_{12}$ thin film waveguides, optical birefringence 86−9483
$Bi_{12}SiO_{20}$ MIS-liquid crystal structure, dynamic image processing 87−33009
$Bi_{12}SiO_{20}$ PRIZ modulator, write-beam induced damage 87−68201
$Bi_{12}SiO_{20}$ PRIZ space-time light modulator, pulsed readout of image 87−38862
$Bi_{12}SiO_{20}$ cryst. appl. as voltage sensor in optical fibres 87−68043
$Bi_{12}SiO_{20}$ crystal spatial light modulator 86−48218
$Bi_{12}SiO_{20}$ crysts., transverse electro-optical effect, MTF and time characts. study 85−35547
$Bi_{12}SiO_{20}$, doping effects on electron beam spatial light modulator 85−62407
$Bi_{12}SiO_{20}$ grating modification in degenerate four wave mixing 85−29918
$Bi_{12}SiO_{20}$ signal modulator operating on longit. transverse electrooptical effect 87−68194
$Bi_{12}SiO_{20}$ spatial light modulator appl. to stereo vision, optical parallel implementation of Marr-Poggio algorithm 85−57453
$Bi_{12}TiO_{20}$, spatial light modulation 86−15521
$Bi_{12}TiO_{20}$:Fe optical waveguides, photoinduced nonlinear transmission 88−72128
$Bi_{12}XO_{20}$, X=Si, Ti, PRIZ space-time light modulation dynamic image selection, electron injection mechanism study 88−51579
CO_2 CW laser based optical-signal amplifier, transfer characts. 88−58442
CO_2 TEA laser, AM mode-locked, line broadening 86−29070
CO_2 TEA laser, AM mode-locking, transient evolution 86−22286
CO_2 TEA laser, high-power modulation by injection-locked mode-beating 87−33089
CO_2 TEA laser, intrapulse freq. stabilisation using electro-optic modulator 85−29762
CO_2 bistable bidirectional ring laser, spontaneous self-modulation and mode-switching 85−41431
CO_2 continuous-flow laser with unstable resonator, acoustic vibrs. 87−12385
CO_2 laser, CW, low power, high frequency modulation using semiconductor laser 87−75012
CO_2 laser Doppler rangefinding, with heterodyne detection and chirp pulse compression 87−20629
CO_2 laser acousto-optic modulators, optical radar and information carrying appl. 85−29884
CO_2 laser behaviour near threshold, pump and loss modulation 88−65803
CO_2 laser dynamics by optical modulation of inversion 88−65817
CO_2 laser, electronic current source, power modulation capability *(German)* 87−26477
CO_2 laser, freq. modulated, obs. of chaos 86−9928
CO_2 laser, hybrid AM mode-locking, pulse forming 86−58881
CO_2 laser light, modulation by intracavity acousto-optic devices *(Chinese)* 88−72375
CO_2 laser light modulation, liquid crystal cell, cholesteric-nematic phase transition 87−33013
CO_2 laser, modulated parameters, chaos study 88−14116
CO_2 laser, modulated, single-mode, dynamic behaviour and dimens. chaos 87−2084
CO_2 laser modulation in IR region using freq. modulation *(Russian)* 86−48471
CO_2 laser power modulation 88−72263
CO_2 laser pulses, all-optical power limiting using InSb cascaded optical bistable elements 86−42620
CO_2 laser radiation modulation, by optical and electron pumping in CdS and GaAs crystals 86−29214
CO_2 laser, swept dynamics near threshold, two- versus four-level model 88−20561
CO_2 laser with feedback on intracavity modulator, self-pulsing and deterministic chaos 87−39016
CO_2 laser with internal modulation, chaotic phenomena 87−75011
CO_2 laser with modulated parameters, chaotic transients 88−65814
CO_2 laser with saturable absorber, sinusoidal self-modulation 88−27257
CO_2 laser with vibration proof Q-switch, modulation by interferometer 86−3045
CO_2 pulsed amplifier, intensity modulated laser beam propag. 87−68588
CO_2 tunable waveguide laser with expanded tuning range, Fabry-Perot type modulator use 87−18885
CO_2 waveguide laser, RF excited, structure and performance 85−51124
CO_2 waveguide laser, appl. of $La_{0.7}Sr_{0.3}CoO_{3-\delta}$ ceramic catalyst cathode 88−72276

optical modulation continued
CdS liquid crystal light valve, current status and performance for optical data processing 88−7998
CdS, self-electro-optical device, modulation and optical bistability, 514 nm 88−27280
$CdS_{1-x}Se_x$, semicond. layers, waveguide, index and depth profiles determ. 87−68167
CdS_xSe_{1-x} crystal waveguide Bragg light modulators 87−1975
Co_2 pump laser stabilisation using external CH_3OH Stark cell modulation 85−46322
Co:MgF_2 laser, mode locking and Q-switching by loss-modulation freq detuning 87−33131
Cu vapour image amplifier, light beam-active medium interactions 85−19005
Er doped fibre laser, gain modulation using pulse pumping 88−58644
GaAS fast turnoff in optical switching low-finesse etalons operating in refl. mode 88−40328
GaAlAs BH laser, dynamic intensity noise and gain compression phenomena 86−42536
GaAlAs BH window lasers, 11 GHz direct modulation bandwidth 85−2282
Ga(Al)As CSP laser, current modulated, linewidth enhancement factor and excess chirp determ. 88−58522
GaAlAs DH lasers, enhanced modulation bandwidth in high mag. fields, quantum wire effects 86−15689
GaAlAs buried heterostruct. laser, high speed digital modulation 87−68573
GaAlAs diode laser, modelling of FM response 88−58542
GaAlAs diode laser, wavelength stabilisation in high-speed modulation using Rb-D_2 absorpt. line 87−61147
GaAlAs diode lasers, FM, magnitude and phase characts. 86−22402
GaAlAs diode lasers, SL series with GHz direct modulation operating bandwidths 86−22404
GaAlAs diode lasers, wide freq. modulation operation using composite-optical cavity *(Japanese)* 87−61166
GaAlAs heterojunction laser diode, carrier-to-intermodulation perform. of multiple FM/FDM carriers 85−35773
GaAlAs heterojunction laser, picosecond radiation pulse generation 88−51901
GaAlAs high-freq. travelling wave electro-optic modulator at 0.82 μm 88−72164
GaAlAs injection laser, ultrafast, analog, digital and short pulse modulation 85−62607
GaAlAs laser at 0.85 μm wavelength and direct detection PPM for bidirectional optical ISL 88−67292
GaAlAs laser diode for multichannel video transmission employing multiplexed UHF subcarriers 87−49024
GaAlAs laser diodes for optical space links, specifications and eval. 88−65695
GaAlAs laser diodes, self-coupling effects and appls. 87−33204
GaAlAs laser diodes, stripe geometry, directly modulated in microwave range, freq. response study 87−7383
GaAlAs laser diodes under microwave intensity modulation, linearity charactn. 87−7385
GaAlAs laser, self-sustained picosecond pulse generation at electrically tunable repetition rate, self-sustained picosecond pulse generation at electrically tunable repetition rate 85−2353
GaAlAs laser, single mode dynamic coupled-cavity, power and frequency modulation characts. 85−62568
GaAlAs laser wideband FM operation using composite-optical cavity 88−47028
GaAlAs lasers, wide-band electrical noise and modulation response, parasitic element influence 87−68498
GaAlAs leaky waveguide, modal bistability 88−72118
GaAlAs, low threshold quantum well laser, ultimate limit 88−27135
GaAlAs monomode lasers, linewidth, influence of FM noise 86−36491
GaAlAs multiple quantum well lasers, direct modulation bandwidth 86−42584
GaAlAs multiquantum well lasers, high relaxation oscillation freq. 86−54157
GaAlAs optical amplifier, high speed modulation and switching 85−24533
GaAlAs semiconductor diode laser 4-ary frequency shift key modulation at 100 Mbit/s 85−18925
GaAlAs single-mode LD, large signal nonlinear distortion prediction under microwave intensity modulation 87−46889
GaAlAs strip waveguides, all-optical switching and modulation 88−65878
GaAlAs superluminescent diode for fibre sensor appl. 88−65933
GaAlAs traveling wave Mach-Zender electro-optic modulator 88−51566
GaAlAs ultrahigh speed lasers, direct modulation and active mode locking up to 18 GHz 85−29802
GaAlAs/GaAs surface-emitting laser, directly modulated, single longitudinal mode operation 87−61172
GaAlAs/GaAs two and three terminal microwave devices, RF modulated optical signals detection 88−25515
GaAlAs-GaAs distributed feedback lasers, modulated stripe width struct. appl. 88−27132
GaAlAs-GaAs guided wave devices, growth by MBE 85−49560
GaAlAs-GaAs photoexcited quantum well laser, 140 ps optical pulse generation 87−39115
$Ga_{0.7}Al_{0.3}As$-GaAs-AlAs quantum well-etalon struct., electro-optic modulator 88−7989
GaAs DH and MQW lasers, gain modulation, ultrashort light-pulse generation 86−42565
GaAs, Franz-Keldysh electro-optic modulation, analysis 88−51565
GaAs IMPATTs, optical modulation and switching 86−62843
GaAs MESFET laser-driver IC, 4 Gbit/s 87−2043
GaAs MIS light modulator, Franz-Keldysh effect, field relax. 86−28899
GaAs PIN electro-optic travelling-wave modulator at 1.3 μm 87−1973
GaAs, PIN electrooptic modulator, high-throughput, 3 dB bandwidth of 9.6 GHz at 1.3 μm 87−54102
GaAs acousto-optic modulator devices, GHz frequencies 88−26908
GaAs based spatial light modulators 88−58250
GaAs biased semi-insulating, cross modulation effect 87−26545
GaAs directional-coupler electrooptic modulators, integration with MESFET drivers 87−74939
GaAs electro-optic Y-branch broadband waveguide interferometer, 1.3 μm operation 85−29647
GaAs, electro-optic travelling-wave modulator *(French)* 88−20446
GaAs electro-optical interferometric modulator 85−2093
GaAs electroabsorption waveguide modulator loss, Goos-Hanchen shift effect 88−65380

optical modulation continued
GaAs electrooptic waveguide modulator, 10.6 μm, microwave study 88−58246
GaAs, high purity, electroabsorption and waveguide device optimisation 88−26880
GaAs, integrated electro-optic modulators for high-speed diagnostic systems 88−33766
GaAs integrated electrooptical phase modulator, low drive voltage, 10.6 μm appls. 87−54119
GaAs integrated optical components for optical fibre communications *(German)* 86−2845
GaAs inverted rib, phase modulators grown by VPE, optical and electrooptical anal. 87−18758
GaAs inverted rib waveguide Mach-Zehnder modulators with three-guide couplers 88−45223
GaAs laser diodes, double contacted BCRW type, self-pulsating operation with high repetition rate 87−68447
GaAs laser diodes, double-contacted, controlled generation of optical pulse trains 85−2316
GaAs laser, fundamental frequency response, parasitic-free meas. by active-layer photomixing 88−40196
GaAs laser, ultrafast, design and development 85−29823
GaAs laser-driver IC MESFET for 1.7 Gbit/s lightwave transmitter 88−41649
GaAs, micro-optical modulators, ultra high speed 86−54011
GaAs modulator for fibre-optic link 86−42317
GaAs modulator, high frequency guided-wave electrooptic interferometric 85−29649
GaAs modulators, electro-optic waveguide at 1.3 μm 88−72157
GaAs modulators, travelling wave integrated optic, optimisation 87−74860
GaAs multiquantum well phase-locked laser arrays using pulsed current injection, high-power picosecond pulse generation 85−12862
GaAs nonlinear electroabsorption cell for artificial neural works 87−60969
GaAs optical waveguide electrooptic modulator 88−33769
GaAs, photorefractive, index grating lifetime meas., real-time spatial light modulator use 88−51951
GaAs quantum well DH waveguide-type optical modulator using exciton absorpt. 85−62404
GaAs quantum wells, below-gap photoexcitation dynamics 87−45676
GaAs quantum-well waveguide modulators, electroabsorption 87−74856
GaAs, semi-insulating, light cross modulation in elec. field presence 85−62651
GaAs, waveguide interferometers and couplers for high-speed electro-optic modulation and switching 87−38818
GaAs:Cr, semi-insulating, elec. domains, visualisation, appl. as electro-optic 2D light modulator 88−72152
GaAs/AlAs MQW structures, life-time-free switching of luminescence by elec. fields 87−24881
GaAs/AlAs, electrically tunable multilayer interference filter, light modulation 88−20434
GaAs/AlGaAs MQW optical modulator, fabrication and charact. 86−48245
GaAs/AlGaAs electrooptic modulator with voltage controlled bandwidth *(French)* 88−20447
GaAs/AlGaAs laser diode, vertical integration with vertical JFET 88−45324
GaAs/AlGaAs multiple quantum wells, spatial light modulators using CCD addressing and electroabsorption effects 88−45211
GaAs/AlGaAs multiquantum well heterostruct., electro-optical light modulation 85−50236
GaAs/AlGaAs multiquantum well laser, active Q-switching with intracavity monolithic loss modulator 86−36467
GaAs/AlGaAs quantum well laser, picosecond pulse generation 88−8176
GaAs/AlGaAs quantum well waveguides, electro-optic phase modulation 88−39988
GaAs/AlGaAs quantum well waveguides, polarisation-sensitive electroab sorpt. 86−15518
GaAs/AlGaAs quantum-well optical waveguide LV phase modulator 88−21056
GaAs/GaAlAs MQW lasers diodes with low threshold, high-speed zero-bias modulation *(Japanese)* 88−65714
GaAs/GaAlAs double-well superlattice, ultra-fast optical modulator 87−24889
GaAs/GaAlAs, quantum well DH, monolithic integration of laser diode and optical waveguide modulator 86−28887
GaAs-$Al_xGa_{1-x}As$ double heterostruct. phase modulators, performance comparison 88−14053
GaAs-$Al_xGa_{1-x}As$, p-n junction waveguide, phase modulation, orientation depend. 87−32928
GaAs-AlAs MQW optical modulators with integrated dielectric reflectors 88−58648
GaAs-AlGaAs DH coupled-waveguide optical modulators and their HF modulation charact. *(Japanese)* 88−66275
GaAs-AlGaAs FET guided-wave optical modulator based on free-carrier induced bleaching 88−14052
GaAs-AlGaAs MQW, bistability from increasing absorpt., self electro-optic device 85−41480
GaAs-AlGaAs MQW, elec. field effects, appls. in digital optics 88−20448
GaAs-AlGaAs MQW electroabsorpt. modulator for non-resonant optoelectronic logic gate 87−26092
GaAs-AlGaAs MQW modulator, 4 μm thick, amplitude and phase modulation 88−51560
GaAs-AlGaAs MQW modulator, integrated optoelectronic logic devices for digital optics 88−20475
GaAs-AlGaAs MQW modulators for optical processing 88−72160
GaAs-AlGaAs MQW, nonlinear propagation charact. of optical waveguides 88−51942
GaAs-AlGaAs MQW spatial light modulators, high-speed 2×2 electrically driven config. 88−2140
GaAs-AlGaAs SCH-QW structure, photolum. switching charact. by elec. field 88−19725
GaAs-AlGaAs broadband travelling-wave type electro-optical modulator 88−26890
GaAs-AlGaAs coupled quantum well waveguides, electroabsorption 87−53954
GaAs-AlGaAs double-heterostruct. phase modulators, effective refractive index variation, band-filling effects 88−33773
GaAs-AlGaAs full beam asynchronous laser heterodyne 85−29967
GaAs-AlGaAs guided-wave FET optical modulator based on free-carrier bleaching 88−45221

optical modulation continued
GaAs-AlGaAs heterostructure waveguide Bragg diffract. modulators 88−72159
GaAs-AlGaAs integrated optoelectronic logic devices, dynamic response 88−8009
GaAs-AlGaAs multiple quantum well reflection modulator 87−54103
GaAs-AlGaAs multiquantum well modulators, photoluminesc. linewidths and energies 86−54005
GaAs-AlGaAs quantum-well CCD, appl. to MQW spatial light modulators 86−54059
GaAs-AlGaAs spatial light modulators with CCD addressing, MBE growth 88−72163
GaAs-AlGaAs waveguide MQW optical modulator/phototransistor config. as high-contrast optoelectronic logic device 87−38891
GaAs-GaAlAs MCRW lasers on semiinsulating substrate, modulation charact. 85−56647
GaAs-GaAlAs MQW optical modulators, effect of residual doping on optimum structure 87−47466
GaAs-GaAlAs Y-branch interferometric modulator 86−9622
GaAs-GaAlAs device light modulation by tunable interference filter 88−33900
GaAs-GaAlAs electro-absorption modulators 85−18756
GaAs-GaAlAs heterojunction as electronic-optic Mach-Zehnder interferometric modulator 85−18749
GaAs-GaAlAs heterostructure single-mode channel-waveguide cutoff modulator and modulator array 88−20438
GaAs-GaAlAs heterostructure waveguide electro-optic devices 85−41218
GaAs-GaAlAs heterostructures, electro-optical waveguide modulators and switches 86−9624
GaAs-GaAlAs laser diodes without lateral carrier confinement, common intensity modulated, freq. chirp study 88−65669
GaAs-GaAlAs multiple quantum wells, enhanced electroabsorption, optical modulator appl. 86−15524
GaAs-GaAlAs optical waveguides for microwave frequency electro-optic modulation 86−28886
GaAs-GaAlAs system, electro-optic modulation at microwave freqs. 87−74867
GaAs-GaAlAs unbiased V-groove laser, avalanche generator triggered psec. light pulses. 85−41409
GaAs-GaAlAs waveguide high-speed electro-optic modulator 88−20443
GaAs-InGaAs spatial light modulators with CCD addressing, MBE growth 88−72163
GaAs-based semiconductor coupled-waveguide optical modulators, high frequency modulation charact. 85−2039
GaInAs/GaAs strained layer MQW electroabsorption optical modulator and self-electro-optic effect device 88−33896
GaInAs/InP high-freq. multiple quantum well buried mesa electroabsorption modulator 88−33898
GaInAs-InP MQW optical modulator grown by OMVPE, electroabsorption effect 88−58233
GaInAs-InP, phase and amplitude modulation by free carriers injection at 10.6 μm 87−74868
GaInAs-InP waveguide MQW optical modulator, metalorganic MBE fabricated, struct. and charact. study 87−76755
GaInAs-InP waveguides, amplitude and phase modulation by free-carrier injection 88−13942
GaInAsP DFB lasers, 1.3 μm, single-mode, realisation and charact. *(German)* 87−33152
GaInAsP buried channel electroabsorption modulator for 1.3 μm fibre links 88−13937
GaInAsP laser diode ps optical pulse generation at 1.54 μm in single mode 88−41623
GaInAsP lasers, multichannel intermodulation distortion 88−14196
GaInAsP optical waveguide phase modulator using depletion edge translation 88−45203
GaInAsP p-type substrate mass-transported diode laser, sinusoidal and digital high-speed modulation 87−46888
GaInAsP strip-loaded planar waveguide for high-speed electroabsorpt. modulator 87−18757
GaInAsP/InP 11.5-GHz bandwidth buried crescent laser with high output power 88−20635
GaInAsP/InP electro-optic modulators using passive rib waveguides 87−38864
GaInAsP/InP semi-insulating blocked planar BH laser, high power and bandwidth 88−27143
GaInAsP-InP BH optical intensity modulator with semi-insulating burying layers 88−7974
GaInAsP-InP DFB laser, VPE transported, with blue-shifted FM response from DC to 2 GHz 88−58528
GaInAsP-InP DFB lasers at 1.5 μm on material growth by MOCVD 85−62563
GaInAsP-InP VPE transported BH lasers with passive external cavity, lasing characteristics 88−65824
GaInAsP-InP electro-optical modulators using buried single mode waveguide struct., MOCVD fabrication, charact. 88−33770
GaInAsP-InP lasers, DBR dynamical single mode bundle-integrated-guide, 1.5 μm, spectral behaviour 87−68468
GaInAsP-InP lasers at 1.3 μm, high speed dynamics 87−68530
GaInAsP-InP p-substrate mass-transported lasers, small-signal modulation 88−8207
GaP epitaxial Raman laser, charact. 86−68494
GaSb, Franz-Keldysh electro-optic modulation, analysis 88−51565
GaSb-AlGaSb MQW laser diode, high-speed modulation charact. 87−39089
GaSb-AlGaSb MQWs, electroabsorption effect and high-speed waveguide optical modulator fabrication 87−54106
Ge acousto-optic modulators, thermal design 87−46606
Ge acousto-optical modulator at 10.6 μm, figure of merit 85−56381
Ge_xSi_{1-x}/Si strained-layer superlattice, linear electro-optical effect 86−63688
HCN gas laser, flashlamp pumped, laser oscills. and transition 85−18849
He-Cd laser, self-pulsing modulation 85−35693
He-Ne laser, 3.391 and 3.392 μm, intensity modulation for differential absorpt. meas. 86−3013
He-Ne laser at 0.633 μm, frequency stabilisation, using polarisation modulation 87−12408
He-Ne laser frequency stabilisation using polarisation modulation 88−14085
He-Ne laser, optical distance measurement using intermode beat 86−29267
He-Ne laser, piezomodulator nonlinearities meas. 88−27238

optical modulation continued
He-Ne laser, pulse generation with an acousto-optic freq. shifter in a passive cavity 87−61072
He-Ne laser, with coupled cavity, mode locking, phase modulation *(Rumanian)* 86−3055
He-Ne lasers, design for optical cable transmitter appls. at 1523 nm *(German)* 85−46305
He-Ne/methane laser radiation, frequency resonance of saturated methane transition with resonator length modulation 86−48335
He-Ne/methane ring laser, competition between counterpropagating waves, axial mag. field effect *(Russian)* 87−46962
He-Ne/methane ring lasers stabilised using FM resonances, frequency reproducibility 87−2075
He-Sr plasma laser, radiation modulation due to modulation of pumping at microwave freqs. 85−24482
HgCdTe, carrier lifetime and interf. effect meas. using optical modulation absorpt. *(Chinese)* 88−40050
$Hg_{1-x}Cd_xTe$ detector heterodyne evaluation at 2 GHz by resonant-cavity electro-optic laser frequency modulator 88−19377
I photodissociation laser, acousto-optic modulation for active mode locking 85−29778
In GaAsP lasers, high speed design and performance 87−33205
In GaAsP/InP BH laser diode, monolithic integration with heterojunction bipolar transistors 85−35662
$In_{0.52}Al_{0.48}As$ electro-optic directional coupler grown on InP by MBE 87−74866
InAs, Franz-Keldysh electro-optic modulation, analysis 88−51565
InGaAs 1.3 μm BH laser, vapour phase regrown, 17 GHz direct modulation bandwidth and impedance characts. 86−36497
InGaAs PIN photodiode, freq. response charactn. by heterodyne meas. 86−42535
InGaAs ultrahigh-frequency optical detector bandwidth meas. using interferometric FM sideband technique 88−22595
InGaAs/InAlAs M efficient MQW waveguide phase shifters 87−38950
InGaAs/InAlAs MQW optical modulator and InGaAsP/InP DFB laser monolithic integration using hybrid LPE/MBE technique 86−36245
InGaAs/InAlAs MQW optical modulators, chirp modulation 88−13940
InGaAs/InAlAs multiple-quantum-well optical modulator, long-wavelength, with 30:1 on/off ratio 86−68329
InGaAs/InGaAlAs multiple quantum-well structs., electroabsorpt. study 85−34570
InGaAs/InP multiple quantum wells, self-electro-optic device and modulation converter 88−26878
InGaAs-GaAs multiquantum-well electroabsorpt. modulator with integrated waveguide 88−2060
InGaAs-GaAs spatial light modulators using charge-coupled device addressing and electroabsorption effects in multiple quantum wells 88−33901
InGaAs-InAlAs MQW long-wavelength optical modulator 86−2858
InGaAs-InAlAs MQW optical modulator integrated with DFB laser 87−68183
InGaAs-InAlAs MQW structure, anisotropic electroabsorpt. and optical modulation 87−7179
InGaAs-InAlAs long wavelength optical modulators 88−20439
InGaAs-InAlAs modulation doped quantum well FET, absorpt. modulation 88−33255
InGaAs-InAlAs multiple quantum wells, long wavelength optical modulation, electro-optical effects 87−1979
InGaAs-InAlAs waveguide MQW optical modulators with high on/off ratio and low drive voltage 87−60968
InGaAs-InP MQW optical modulator, buried-mesa electroabsorption type, MOCVD grown, struct. and characts. 87−54108
InGaAs-InP electroabsorption modulator and DFB laser, monolithic integration 88−7954
InGaAs-InP multiple quantum well optical electroabsorption waveguide modulator 88−2052
InGaAsP 1.3 μm diode laser, ultra-high-speed modulation 87−7361
InGaAsP BC injection lasers, 1.3 and 1.51 μm, with semiinsulating current confinement layer, modulation performance 88−8208
InGaAsP BH laser, 1.55 μm, fabrication using hydride VPE regrowth technique 85−2319
InGaAsP BH laser with 22 GHz bandwidth and high modulation efficiency 87−75079
InGaAsP BH lasers, 1.3 μm, vapor phase regrown, 12.5 GHz direct modulation bandwidth 85−29804
InGaAsP BH lasers, vapour-phase regrown, 1.3 μm CW operation with 15 GHz direct modulation bandwidth 85−51162
InGaAsP CW high-frequency constricted mesa lasers 85−56608
InGaAsP DBR diode laser, 1.3 μm wavelength, RF modulated, single-longit. mode optical pulse generation 87−13695
InGaAsP DBR diode laser, strongly RF modulated, ps optical pulse compression using Gires-Tournois interferometer *(Japanese)* 88−45530
InGaAsP DFB BH lasers, FM modulation characts., rate eqn. anal. 86−58921
InGaAsP DFB diode laser, Fourier transform limited single mode picosec. pulse generation 85−7425
InGaAsP DFB laser at 1.5 μm coupled to fibre resonator, FM noise and linewidth reduction 88−45520
InGaAsP DFB laser diode FM, freq. response charactn. by heterodyne meas. 86−42535
InGaAsP DFB laser, freq. stabilisation with external freq. modulator 86−15684
InGaAsP DFB lasers, 1.3 μm, FM noise, AM noise and field spectra meas. 86−22391
InGaAsP, DFBL, 1.3 μm multiquantum well, fabrication, performance characts. 86−58912
InGaAsP DH lasers, gain modulation, ultrashort light-pulse generation 86−42565
InGaAsP buried channel waveguide for electroabsorption modulation 88−26889
InGaAsP buried crescent injection lasers, hybrid growth and 1.3 μm operation 87−68439
InGaAsP carrier injection modulator integrated with DFB laser diode, struct. and characts. 87−38948
InGaAsP channelled substrate lasers, cleaved-coupled-cavity, microwave direct frequency modulation 85−2355
InGaAsP constricted mesa laser, 8 Gbit/s return-to-zero modulation by gain switching 87−18959
InGaAsP constricted mesa laser with 1.3 μm wavelength, high-speed large-signal modulation at 16 Gbit/s 86−3139
InGaAsP constricted-mesa lasers, 1.3 μm, MM-wave response 86−15710

optical modulation continued
InGaAsP, directly modulated 1.5 micron DFB laser, meas. of dynamic photon fluctuations 85−62551
InGaAsP directly modulated ridge waveguide and BH lasers, HF modulation characts. 85−7439
InGaAsP double-channel BH lasers, improved HF response 86−22372
InGaAsP, gain switched injection lasers, linewidth broadening factor meas. 86−3146
InGaAsP gain switched single mode injection lasers, chirp, picosecond meas. 88−8178
InGaAsP high-speed constricted-mesa lasers, small-, large-signal modulation characts. 86−68532
InGaAsP high-speed laser diodes. -freq depend. and independ. nonlinear characts., expt. study 88−72330
InGaAsP high-speed laser, optical correlation meas. of switching transients 86−42527
InGaAsP laser, 16 Gbit/s direct modulation 87−61152
InGaAsP laser, 2.2 Gbit/s directly modulated, freq. chip red. by CW injection 85−18932
InGaAsP laser, DFB, 1.3 μm, generation and control of bandwidth-limited single-mode ps pulses by RF modulation 85−62571
InGaAsP laser, PSK subcarrier modulation at 3-16 GHz 87−8274
InGaAsP laser diode, antirefl. coated facet, for fibre optic wideband analogue modulation 86−42583
InGaAsP laser diodes, 1.5 and 1.3 μm, ultrashort optical pulse generation, expt. study *(Japanese)* 88−8219
InGaAsP laser, gain-switched, picosecond dynamics 87−68497
InGaAsP lasers, 1.3 μm, dynamic spectra under pseudorandom word modulation 85−51180
InGaAsP lasers, 1.3 μm, high-freq. modulation 86−63834
InGaAsP lasers, 1.3 μm, reson. freq. depend. on doping level 86−22393
InGaAsP lasers HF modulation, review 86−48434
InGaAsP layers, single-longitudinal-mode short-coupled-cavity, temporal and spectral characts. under multi-GHz direct modulation 85−2315
InGaAsP optically controlled modulators for parallel optical data processing 88−46301
InGaAsP ridge guide laser, ps gain-switched optical pulses, streak camera obs. 85−29817
InGaAsP semiconductor lasers with integrated semiconductor amplifier-modulators at 1.3 μm wavelength 85−2347
InGaAsP short-cavity DCPBH lasers, 1.3 and 1.5 μm, direct 4 Gb/s modulation 86−9874
InGaAsP single-longitudinal-mode laser, freq. chirping fine struct., FM sidebands 85−24537
InGaAsP three-channel buried crescent lasers, 1.51 μm, high-speed analog and digital modulation 85−2281
InGaAsP vapour-phase transported lasers, 1.52 μm, FM, modification for bandwidth improvement 85−41393
InGaAsP vapour-phase-transport DFB laser, 1.55 μm, chirping under ps gain switching and 4 GHz modulation 86−3143
InGaAsP vapour-phase-transported lasers, 1.52 μm, HF modulation 85−35754
InGaAsP wideband semicond. lasers, limitations on switching speed 87−7384
$In_xGa_{1-x}As_yP_{1-y}$ lasers, generation and detect. of 15 ps light pulses in visible range 86−36455
InGaAsP/InP electroabsorption light modulator, dynamic spectral width 86−68336
InGaAsP/InP electroabsorption light modulator dynamic spectral broadening 86−36257
InGaAsP/InP electroabsorption optical modulators *(Japanese)* 88−7977
InGaAsP/InP laser diodes, 1·3 μm, modulation props. meas. 88−8185
InGaAsP/InP laser transistor, emission power control 86−54152
InGaAsP/InP lasers, modal and relative intensity noise under VHF modulation, effect of degradation 85−7483
InGaAsP/InP multiple quantum well waveguide phase modulator 87−33006
InGaAsP-InP DB laser emitting at 1.3 μm for gigabit communication systems 87−68515
InGaAsP-InP DFB laser, 1.5 μm λ/4-shifted, direct modulation and life tests results 88−20657
InGaAsP-InP DFB laser, 1.55 μm, transmission performance impairment due to optical spectrum degradation 86−42529
InGaAsP-InP DFB lasers, 1.53 μm, VPE fabricated, very low-threshold design 87−54321
InGaAsP-InP DFB lasers and electroabsorption modulators, integrated, electrical and optical interactions 88−72137
InGaAsP-InP DH surface-emitting LEDs for optical fibre communications *(Japanese)* 86−58844
InGaAsP-InP DH with strip-loaded planar waveguide, 1.6 GHz electroabsorption light modulation 86−15511
InGaAsP-InP Fabry-Perot and DFB lasers, VPE transport fabrication 87−12506
InGaAsP-InP high-efficiency electro-optical phase modulators 86−9623
InGaAsP-InP high-speed electroabsorption modulator, monolithically integrated with DFB lasers 88−65375
InGaAsP-InP laser, injection locked, stability props. 85−62606
InGaAsP-InP laser, single-mode, 1.3 μm, analog FM 87−18975
InGaAsP-InP metal-clad ridge-waveguide lasers for optical communications 88−65723
InGaAsP-InP quantum well modulators, MBE grown 87−60898
InGaAsP-InP ridge-waveguide stripe structure bistable DH laser, expt. characts. *(Chinese)* 87−39087

solid lasers, phase conjugation by stimulated Brillouin scatt., review 88−65836
spatial light modulators, conf., San Diego, USA (Aug. 1987) 88−55785
spectral analyser, two-dimens., of oscillating object field, using voltage-controlled $Bi_{12}SiO_{20}$ 85−12940
statistical indeterminacy of received signal, meas. and phase conjugation 88−66645
stimulated Brillouin backscattering of multiple pulses in highly transient regime 86−63859
stimulated Brillouin scatt., phase conjugation disruption by incoherent optical radiation 85−12961
stimulated Brillouin scatt., phase conjugation of a laser beam in an opticalfiber 86−3312
stimulated Brillouin scatt. excitation by plane and speckle inhomogeneous light, phase conjugation quality 86−36575
stimulated Brillouin scattering holograms, angular selectivity 85−24661
stimulated Brillouin scattering lasers, self-pumped, field structure 87−46933
stimulated Brillouin scattering mirrors made of capillary waveguides 87−75238
stimulated Brillouin scattering phase-conjugate fidelity meas. 88−2374
stimulated Brillouin scattering saturation at high values of pump energy above threshold 88−14274
stimulated Mandelstam-Brillouin scattering, Stokes pulse compression and wavefront inversion 87−54410
stimulated Raman scattering and stimulated Brillouin scattering energy saturation in quasi-stationary regime and phase conjugation 85−29921
strongly scattering anisotropic media, distortion correction by phase conjugation 88−2367
subsurface defect detect. using phase conjugate waves and forced vibr. 88−6538
surface plasma waves 85−12942
surfaces, optical spherical, measured using holographic phase conjugate compensation 88−40413
switching effect, optical triggered, observed in backscatter in phase conjugation experiment 85−7533
tetrachlorides of group IV elements, refl. by stimulated Brillouin scatt. mirrors 86−48495
thin inhomogeneous method, phase conjugation resolving power 87−39217
three-level atoms, degenerate four-wave mixing 85−7532
transient wavefront reversal in four-wave interactionin resonant media 85−56801
transversally modulated pump fields, effects on phase-conjugate signals 86−68628
turbulence in phase-conjugate resonators 88−51932
ultrashort light pulse reversal and reconstruction of profile 85−51260
wave front reversal in reson. four-wave interaction, time-separated reference pulses 85−35871
wavefront control by nonlinear phase conjugation 87−46981
wavefront distortion correction by phase conjugate mirror 85−12949
wavefront inversion mirrors based on hypersound, for adaptive laser systems 86−15770
wavefront reconstruction by stimulated scattering, review 88−2391
wavefront reversal, degenerate four-wave interaction, efficiency study 87−33278
wavefront reversal and nanosecond and microsecond laser pulses in optical fibres 86−3271
wavefront reversal fraction determ., optical data processing method 86−29235
wavefront reversal in four-photon parametric interaction with rotation, quality 85−56800
optical phase conjugation continued
wavefront reversal in four-wave interaction in moving slow-response media 85−35891
wavefront reversal in optical signal amplifier, negative image production 85−41508
wavefront reversal in scatt. excitation, optimum energy and geometrical conditions 85−19015
wavefront reversal of laser radiation with intermediate frequency conversion to a different wavelength range 85−46491
wavefront reversal of microsecond radiation in fiber waveguides 87−74705
wavefront reversal of multifrequency radiation by four-wave interaction, quality 85−51262
wavefront reversal of optical radiation using feedback in four-wave interaction 85−19029
wavefront reversing mirrors for lasers in intermediate IR range 86−9904
wavefront self-reversal of high-power radiation in resonant light-induced four-wave interaction 86−3293
wavefront sensor error, Cramer-Rao lower bound 86−58808
wavefront-reversing mirror in Nd:YAG laser 85−56741
waveguide, distributed feedback by four wave mixing 85−41471
waveguide, pump-correlated Stokes fields in stimulated Brillouin scattering 88−20410
waveguides with boundary nonlinearity, TM wave propag., soliton waves 85−18720
weak space-inhomogeneous fields, phase conjugation and amplification 87−33289
Wiener filter construction using phase-conjugate filter 86−54024
Wigner distribution and ambiguity function for complex signals and images 88−59226
Wigner distribution function of complex signals, generation by spatial filtering 86−37136
AlGaAs-GaAs, CW degenerate four wave mixing 88−72426
$Ba(NO_3)_2$, phase conjugation of focused beams by stimulated Raman scatt. 85−24651
$Ba(NO_3)_2$, stimulated emission and radiation amplification under stimulated Roman scatt. conditions 85−41502
$Ba_2NaNb_5O_{12}$ crystals, wavefront reversal 87−75243
$Ba_2NaNb_5O_{15}$, crystal, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
$BaTiO_3$ 0°-cut and 45°-cut crysts., hybrid phase conjugator/modulator props. 87−12555
$BaTiO_3$ IR photorefractive passive phase conjugate mirror 86−3285
$BaTiO_3$, cryst., vol. holographic grating and optical phase conjugation, parametric studies 86−63879
$BaTiO_3$, crystal, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
$BaTiO_3$ crystal, phase conjugation for distortion correction in liquid crystal television 87−75244
$BaTiO_3$ crystal, self-pumped phase conjugating, photoinduced voltages and frequency shifts 86−63711
$BaTiO_3$ double phase conjugation mirror, anal., demonstration and laser appl. 87−26533
$BaTiO_3$ imaging threshold detector using phase-conjugate resonator 87−3444
$BaTiO_3$ nonlinear phase conjugation, coherent coupling of pulsed dye oscillators 87−46964
$BaTiO_3$, optical phase conjugation by backscattering 85−56827
$BaTiO_3$ phase conjugate mirror master-oscillator power amplifier using AlGaAs semiconductor diode laser 87−39206
$BaTiO_3$, phase-conjugate resonator, optical chaos observation 85−12967
$BaTiO_3$ photo refr. cryst., four-wave mixing, real-time complex field imaging through fibre bundles 85−35883
$BaTiO_3$ photorefractive crystal, self-pumped, self-pulsation and optical chaos 86−3297
$BaTiO_3$ photorefractive crystals, phase conjugation with depleted pumps 85−56821
$BaTiO_3$ photorefractive passive phase conjugate mirror for coherent coupling of diode lasers 86−54127
$BaTiO_3$, photorefractive phase conjugation, dancing modes and frequency shifts 87−39227
$BaTiO_3$ photorefractive phase-conjugating mirror for laser phase-locking 86−36561
$BaTiO_3$, self pumped phase-conjugate ring resonator, optical bistability 88−20746
$BaTiO_3$ self-phase-conjugation appl. to dynamic holographic method of imaging phase objects 87−46998
$BaTiO_3$ self-pumped phase conjugate mirror, instabilities 87−33330
$BaTiO_3$ self-pumped phase conjugate mirror, regular oscillations and self-pulsating 86−68624
$BaTiO_3$, self-pumped phase conjugation 87−46986
$BaTiO_3$, single crystal, self-pumped conjugator, grating evolution 88−20764
$BaTiO_3$, stimulated photorefractive scattering 88−58685
$Bi_{12}GeO_{20}$ electro-optic photorefractive crystals, degenerate four-wave mixing via shifted phase holograms 85−29922
$Bi_{12}GeO_{20}$, photorefractive, two-wave and four-wave mixing for real-time intensity inversion 85−51239
$Bi_{12}SO_{20}$, photorefractive, real-time differentiation 88−46178
$Bi_{12}SiO_{20}$ 2D optical temporal bandpass filter using four-wave mixing, dynamic schlieren imaging system 87−54392
$Bi_{12}SiO_{20}$ crystal, phase conjugate signal at elevated temps. 87−26504
$Bi_{12}SiO_{20}$ electro-optic photorefractive crystals, degenerate four-wave mixing via shifted phase holograms 85−29922
$Bi_{12}SiO_{20}$ grating modification in degenerate four wave mixing 85−29918
$Bi_{12}SiO_{20}$, moving photorefractive gratings, applications 87−68631
$Bi_{12}SiO_{20}$ photorefr. crystals, moving grating erasure, expt. study 87−7437
$Bi_{12}SiO_{20}$ photorefractive amplifier, self-induced coherent oscillations 85−29928
$Bi_{12}SiO_{20}$ photorefractive crystals, amplified phase-conjugate reflection by four-wave mixing 85−19026
$Bi_{12}SiO_{20}$ photorefractive crystals, frequency shifting 86−22476
$Bi_{12}SiO_{20}$ photorefractive crystals, hologram recording, interferometry, wavefront conjugation and nonstationary image processing 85−29948
$Bi_{12}SiO_{20}$ photorefractive crystals, wave mixing and appls. 86−3302
$Bi_{12}SiO_{20}$, photorefractive, real-time optical logic 88−58296
$Bi_{12}TiO_{20}$ photorefractive crystals, hologram recording, interferometry, wavefront conjugation and nonstationary image processing 85−29948
$Bi_{12}TiO_{20}$, photorefractive cubic cryst., degenerate four-wave mixing 85−24658
CO_2 double-pass amplifier with wavefront inversion mirror, radiation form. 85−29888

optical phase conjugation continued
CO_2 laser, single-mode, wavefront reconstruction principle based, system calcs. and surface treatment use *(French)* 88−45353
CO_2 lasers, phase conjugation of laser emission, book 88−55809
CO_2 pulsed laser emission, phase conjugation investig. 88−58692
CO_2 round-trip amplifier with wavefront-reversing mirror, energy characts. 87−26294
CS_2 liquid, phase conjugation using pulsed CO_2 laser 88−65860
CS_2 phase conjugation by self-pumped Brillouin-induced four-wave mixing 88−2373
CS_2, picosecond Raman-induced phase conjugation in liquids and solids 88−2358
$CaCO_3$, calcite, phase conjugation of focused beams by stimulated Raman scatt. 85−24651
$CaCO_3$, calcite, picosecond Raman-induced phase conjugation in liquids and solids 88−2358
CdS, self-induced changes in refractive index at λ=532 nm 87−68632
CdTe:In, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
Cs vapour, four-wave difference mixing, effects of phase matching on efficiency *(Japanese)* 88−8300
Cu vapour laser, four-wave mixing obs. 87−12556
Cu vapour laser with self-pumped wavefront reversing mirror 87−2076
Cu vapour laser with wavefront-reversing mirror induced in active medium 87−2216
CuCl, optical phase conjugation via degenerate four-wave mixing 85−41488
GaAlAs laser with phase-conjugate mirror, self-induced frequency scanning and distributed Bragg reflection 86−63831
(GaAl)As semiconductor laser, intracavity nearly degenerate four-wave mixing 86−9826
GaAs, CW degenerate four wave mixing 88−72426
GaAs, combination-type, third-order nonlinear susceptibility at 10.6 μm, phase conjugate signal 87−61243
GaAs:Cr, phase conjugation with picosecond pulses 85−29936
GaP monocrystals, conjugate wavefront generation at 1.06 μm 85−35862
Gabor dynamic volume phase holograms, contrast inversion 87−68650
$GdAlO_3:Cr^{3+}$, phase conjugation by degenerate four wave mixing, saturation effects 87−68625
HF laser, optical wave phase conjugation in case of degenerate four-wave interaction 88−65806
He-Ne transverse Zeeman laser, nonlinear freq. mixing *(Chinese)* 88−27276
InGaAsP semiconductor laser, nondegenerate four-wave mixing, spectral hole burning 87−68598
InP:Fe, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569

optical polarisers
beam splitter using surface plasmon waves 88−65277
broadband near-infrared polariser for laser appls. 88−27240
circular polarization image selection for timeplex stereoscopic video display 88−29551
circulator, YIG spherical lens/PANDA fibre polariser/fibre optic beam splitter construction 85−56305
cockpit display reflections suppression, using linear polariser 88−30106
coil and taper fibre-polariser comparison 86−2781
composite metal/glass fibre polarisers, high-performance, fabrication 88−65218
coupling integrated optical polarizers to optical fiber sensors and systems 88−7870
diode DFB laser, single mode fibre coupling module with optical isolator for high bit rate modulation 86−42568
diode lasers, conf., Los Angeles, USA (Jan. 1987) 88−24318
directory of optical sensor components 86−36111
disk drive flat optics, design factors in manufacturing and volume cost 88−33833
EHF/THF quasi-optical polarization rotator 88−71010
electro-optical polariser with several parallel electrodes on one surface, effect of relative dimensions 87−60971
electro-optical switch, laser radiation depolarisation 85−50996
endless polarisation controller using electro-optic waveplates, coherent optical fibre communication system appls. 88−39991
fiber optic polarisation controlled recirculating delay line filter and its phase induced intensity noise 88−65272
fiber tapering for polariser fabrication *(French)* 86−15507
fibre elliptical jacket polarisation type, used in polarisers and sensing coils 88−65270
fibre optic, single-mode, in-line, design, testing and performance 87−12170
fibre optic endlessly-rotatable fractional wave device, appl. to lightwave technologies *(Japanese)* 88−7879
fibre optic polariser, low-loss, compact 88−51442
fibre optic polariser and polarising couplers, theoretical/expt. study and realisation 88−65175
fibre optic system advanced components 87−68143
fibre polarisation components, birefringent, for sensor appls. 87−12167
fibre ring interferometer, selection of light polarisation state 86−42288
fibre taper, parabolic model for shape 86−2658
fibre-optic isolator, YIG spherical lens and PANDA-fibre polarisers 85−18681
filter, birefringent using two polarisers, for switching of emission wavelengths of Cu vapour 85−51222
filters, interf. polarisation spectrally tunable, for near-IR spectral region 86−22204
grating beam splitter and polariser, 2-D 86−2844
integrated optic variable polarizer 88−51550
integrated optical modulator with high extinction ratio employing resonant absorption 88−67427
isolator for single mode fibre, high performance polariser 88−65243
liquid crystal laser tuner 88−27234
metal thin film surface plasmon resonances for optical fibre devices 88−65265
multilayer thin film waveguide polarizer with metal-clad *(Japanese)* 87−68162
multiwavelength thin-film polarisers for high-power laser systems, design 85−7472
optical thin film waveguide polariser with a-Si:H clad, realisation and characts. study *(Japanese)* 88−39979
passive integrated optical anisotropy-based devices 88−65349
planar structures, leaky absorbing, for polarisers, loss coeff. and perturbed propag. const. 87−68190
polarization converter for the short-wave part of the millimeter and submillimeter wavebands 88−14379
polymer film waveguide polarisers with a-Si:H film clad 87−60944
polymer light filters with specified spectral characteristics for circular polarisers 85−24355
positive contrast coloured liquid crystal display with and without polariser 88−22706
resonator with variable-refl. output coupler using standard grating and polarising components 87−61187
semiconductor-clad optical waveguide devices, periodic coupling 86−28857
short W-tunnelling fibre polarisers 88−45074
smooth junctions in optical waveguides with conducting boundary medium, polariser construction appl. 86−28835
spectrum anal. using Babinet compensator 88−42015
thin film polariser for optical waveguides, design 86−2815
thin-film cubic-type polarisers for high power lasers, design parameters 87−61200
TM-pass polariser using metal-clad waveguide with high index buffer layer 88−33714
twisted-nematic LCDs using polyester film substrates 87−49849
two-dimensional image direct switching matrix using liquid crystal polarization controllers 88−45229
vector nature of light use in imagery and image processing 87−62191
waveguide grating polariser, improvement of characts. 88−20413
InP integrated-optic polarisation TE/TM convertor 86−68304
$LiNbO_3$, proton exchanged, high quality integrated optical polarisers 88−65366
$LiNbO_3$ waveguide polarisation convertor, struct., operation and performance study 88−20435
$LiNbO_3$:Ti, H^+ polarisers, monolithic, low-loss, high extinction 88−51549
$LiNbO_3$:Ti dual wavelength integrated optical polarizers 88−65363

optical polarisers continued
$LiNbO_3$:Ti, integrated optical polarisers 88−51555

$LiNbO_3$:Ti, low-loss high-extinction polarisers fabricated by proton exchange 88−33762
$LiNbO_3$:Ti single mode channel waveguide polariser 86−9596
$LiNbO_3$:Ti three-waveguide polarisation splitter 87−26066
$LiNbO_3$:Ti waveguide thin-film polarisers, 1.3 μm wavelength 86−58792
$LiNbO_3$:Ti directional coupler polarisation splitter, design, operation and characts. 87−54107
$LinbO_3$:Ti waveguides, integrated optical polarisers using surface plasma waves and ion milled grooves 85−12640

optical prisms
2/3 inch separating prism for colour TV camera, geometry and spectral characts. *(Czech)* 88−4173
achromatic prism beam expanders for pulsed dye lasers 88−58630
acousto-optical interferometer using Kosters prisms for RF direction of arrival meas. 87−26083
angle digitisers, precision accuracy-checking method based on multifaced prisms 87−29287
anisotropic media, prism-waveguide coupling anal. 86−42277
apodised apertures for laser systems 87−54377
beam expander in dye laser, picosecond, high power, synchronously pumped by Q-switched mode-locked Nd:YAG laser 85−56573
beam expanders, achromatic multiple prism 85−41439
beam expanders for pulsed dye lasers, comparative study of performances 86−3255
beam splitters, variable-reflectance thin-film polarisation-independent, for 0.6328 and 10.6 μm laser light 85−29683
bistability by resonant excitation of nonlinear guided wave 88−40354
boresight module, temperature stability 87−46630
broad-passband width optical filter using diffr. grating and retroreflector prism, multi/demultiplexer appl. 85−47502
chromostereoscopic CRT-based display 88−74530
commutation of light signal using right-angle trapezoidal prism 86−28854
conference, optical metrology and optical component manufacture, Delhi, India (Feb. 1985) 86−13257
couplers in guided-wave optics, design 87−60893
coupling efficiencies by direct meas. of coupling gap in integrated optical structures 87−1972
coupling into planar waveguides, self-pulsing 87−60927
coupling of IR EM surface waves by Gaussian light beams 86−53969
coupling with waveguide having cubic nonlinearity 87−46552
CRT colour projection display beam-combining schemes 88−47649
differential optical position detector for magnetic suspension systems 85−64133
directory of optical sensor components 86−36111
dispersion and appl. to pulse compression and travelling-wave excitation 85−51267
distributed feedback in optical waveguide, theory 87−32982
dual-fibre optical rotary joint using GRIN lenses and rhomboid prisms 86−22112
dye laser, 200 ns narrow-linewidth flashlamp pumped, multiple-prism grating Littrow config. 87−61111
dye laser, femtosecond pulses, dispersion compensation using high-index prisms 87−61203
dye laser, flashlamp pumped wide-band tunable, with dispersive Brewster prism expander *(Chinese)* 85−29784
dye laser, N_2 laser pumped, optimised for narrowband operation, anal. and performance 86−58897
dye laser, pulsed single-mode, cavity of prism-grating-mirror combination, spectral linewidth 85−2356
dye laser, Quasimodal pulsed tunable at 440 nm using prism beam expander and gratings 87−46931
dye laser, synchronously pumped femtosecond CW, variable intracavity spectral windowing 87−19007
dye laser oscillator, diffr. limited single longit. mode multiple prism flashlamp pumped, linewidth anal. 87−61102
dye laser oscillator, single-mode flashlamp pumped, multiple-prism beam expander 86−36429
dye laser telescope, consisting of prism and diffraction grating 86−58956
dye lasers, colliding-pulse mode-locked, phase fluctuations and chirp compensation 86−68610
dye lasers, distributed feedback, wavelength tuning using prism system 85−41357
dye lasers, multiple-prism pulsed, narrow linewidth 88−58487
dye tunable compact laser on KDP prism using guided-mode selective amplification *(Japanese)* 88−65608
electro-optic light modulator, prism coupler performance 88−58242
electro-optical prism for Fabry-Perot polaris. interferometer 86−54010
excimer laser oscillators, spectral narrowing techniques 85−41307
fibre optic prism configuration internally referenced temperature sensor 87−68050
fibre optic sensor readout, wavelength division multiplexer appl. 87−68015
fibres, single-mode and few-mode, phase velocity meas. using prism output coupling 86−28849
filter, prism based spectral filtering, for ultrashort pulses 87−18791
frequency mixing, collinear, technique for laser beam separation 88−51881
Gaussian refractive index profiles meas. of diffused planar waveguides, M-line method *(German)* 88−51499
hologram formation, multiplex, using afocal cylindrical lens or prism systems 85−35922
image relays, hard optic, fibre optic and electro-optic comparison in ground combat vehicle sighting system 85−56389
injection heterolasers and diffuse planar optical waveguides, coupling methods 87−38765
intensity-dependent guided wave phenomena 87−12582
intracavity prism selector for single-freq. lasing 85−12905
IR linescan configuration optimisation technique 85−58610
Kosters prism time-integrating acousto-optic correlator 88−33797
laser beam expanding prisms, design *(Chinese)* 88−27237
laser light anal. and polarisation using SHG 87−33261
lenses and prisms, camera performance optimisation 87−74899
Meoplan laser transmitter of illuminated plane , optical design *(Czech)* 88−72362

optical prisms continued
multicomponent velocity meas. of rotating solid surfaces, using opto-electronic sensor *(German)* 86−5539
multiple-prism beam expander for variable linewidth high-power TEA CO_2 laser 85−24440
multiple-prism dispersion theory for pulse compression in ultrafast dye lasers 87−75033
multiport optical fibre switch using a new hexagonal prism design 85−29554
negative group-velocity dispersion using refraction, structures to provide adjustable group-velocity dispersion 85−7292
nonlinear distributed prism couplers, pulsed excitation 88−33731
nonlinear film-guided wave prism excitation, optical bistability obs. 88−51917
nonlinear guided-wave phenomena, review 87−33314
nonlinear integrated optics, review 86−48504
nonlinear optical waveguide, prism coupling theory, difference freq. generation 85−50977
nonlinear prism, laser pulse self-deflection for femtosec. pulse prod. 86−15792
nonlinear prism coupler, optical bistability 87−60910
nonlinear prism coupling into waveguide 85−18648
nonlinear prism output coupler, theoretical study 87−39207
nonlinear waveguide couplers 87−32995
offset laser system for the alignment of antennas 88−34179
planar waveguides, prism coupling, photothermal displacements, optical bistability 87−38784
polarising prism in magneto-optical 2×2 switch for single-mode fibres 85−2100
polarization independent coupling in prism- and grating-loaded optical waveguides 88−7934
Porro prism resonator, misaligned, beam pointing director changes 88−65759
rectangular triangular prism of crystals with symmetry, light scanning on inclined face 87−46588
reference beam optical interferometer for gas dynamics studies 87−70891
reflecting, testing by laser interferometer *(Czech)* 86−10036
rhodamine 6G CW ring dye laser, mirror-free cavity configuration 85−29870
rhodamine 6G dye laser, 580 nm, small line width, cavity arrangement 87−39165
rhodamine 6G laser, picosecond with double-prism beam expander and grating *(Chinese)* 88−20588
rhodamine 6G laser with Brewster prisms, hybridly mode-locked 87−7287
right angled prism coupler, transmission strip and m-line simultaneous excitation *(Chinese)* 85−29566
ring laser tuning with prism or grating, mirror number depend. 86−63841
ring resonator with continuously irregular layer reflector, FTIR prism, natural oscills. 87−19005
ruby laser oscillator, novel design 87−12422
secondary holograms in dichromated gelatin filters in optical contact with prism 85−12992
spatially modulated optical signals commutation, laser-generated beam array 87−54457
step beamsplitter for laser beams using multiple prism arrangement 86−58952
surface polariton metal-optical waveguide, prism coupling theory 86−36216
surface-plasmon polaritons, retroreflecting spherical-surface coupling prism 85−24263
telescopic-crossed prism resonator, use on repetitive YAG laser 85−56730
tunnel prism coupled to active optical waveguide, EM waves, amplitude, space-time behavior 85−50976
TV camera prism housing, thermal anal. *(Japanese)* 85−8569
unstable ring resonator with an intracavity prism beam expander 87−39162
waveguide attenuation measurements using prism coupler 88−51531
waveguide couplers, nonlinear distributed 85−35533
waveguide loss measurements by three-prism method 86−42293
waveguide-prism coupler, spherically tapered, design 86−9455
windshield wiper control, using optical waveguide raindrop sensor 88−31169
CO laser radiator; selective attachment 87−61083
CO_2, TEA laser, independently controllable multiline emission using nearly concentric resonator with grating or prism at centre 85−7469
CO_2 large-scale lasers, multiple-prism grating techniques for linewidth narrowing 87−61093
CO_2 pulsed lasers, multiple-prism Littrow and grazing-incidence configs. 85−46300
$LiNbO_3$ film waveguide, for electro-optic deflection amplifier 88−51573
$LiNbO_3$ proton exchanged waveguide, extraordinary refr. index, prism coupling temp. depend. 85−41111
$LiTaO_3$ electro-optical double-prism deflector for laser mode locking 88−34087
Nd,Cr:$Gd_3(ScGa)_2Ga_3O_{12}$ laser with prism-resonator and polarisation coupling 87−46822
Nd:YAG laser, freq., selection and mode locking, prisms as dispersion elements in cavity *(Chinese)* 85−46358
Nd^{3+}:YAG laser, frequency tunable with prism dispersive resonator 86−48376
PLZT ceramic prism-type optical deflector 86−48216
ZnO nonlinear waveguides, angular dependence of prism coupling 88−65342
ZnO optical waveguides, pulsed excitation of nonlinear distributed coupling 88−33730
ZnS, ZnSe nonlinear planar waveguides, bistability and self-pulsing using prism couplers 87−33319
ZnS wavelength prism coupling, nonlinear coupler example 87−19039

optical projectors
3 D shape measurement using projected encoded patterns capable of correcting dot-errors *(Japanese)* 88−52589
3D holographic miniprojector, integrated circuits assembly and quality control appl. 87−19092
bilevel active matrix addressed liquid crystal light valve projection system 86−28917
binocular head-up display integration with windscreen, visual difficulties 86−65496
cathodochromic CRT display with automatic self-alignment 87−3476
cinematic IR scene simulator based on VO_2 spatial modulator 85−14639
colour liquid crystal light valve projector, for command and control centres 86−17837
colour projector, high-resolution, with poly-Si TFT array light valves 88−16309

optical projectors continued
colour projector with single liquid crystal light valve 87−77146
computer display projection 88−22701
conference on information displays, New Orleans, LA, USA (May 1987) 88−11595
CRT colour projection display beam-combining schemes 88−47649
CRT projection TV, compact optical systems 87−76979
electrocapillarity modulators and large screen projection displays 88−7981
electronic imaging conf., Arlington, VA, USA (Oct. 1986) 87−72663
equipment for optical projection in entertainment industry 87−68241
filament lamp overall brightness enhancement *(Russian)* 86−40278
film, video and the computer, interrelationships 85−31212
film projector Xe lamp power supplies *(Russian)* 86−26162
film temperature measurement in movie projectors using resistance thermometer 85−52892
focus tracking system for direct projection cameras 86−49970
full-color single-projection-lens liquid-crystallight-valve projector 87−8545
HDTV, display and projection devices 88−41834
HDTV, light valve projector, with 1600 lm light output using 400 W lamp *(German)* 86−4815
HDTV large-screen projection systems in Cosmic Hall at EXPO 85 *(Japanese)* 86−30993
HDTV rear-projection display, 50 inch diagonal 88−60434
HDTV with light valves using large screen projection system *(German)* 87−76968
high accuracy distance and attitude measurement using slit-ray projection method *(Japanese)* 87−35201
high resolution projector, using laser diode addressed liquid crystal valve 87−77143
high-resolution projector and printer, using laser-addressed liquid-crystal light valve 86−31241
holographic microscope, projection type, for microcircuits assembly and QC 87−33345
holographic projection system, lens array, adjustment inaccuracy effect on 3-D image quality 85−13000
holographic screen for viewing colour images at two angles 85−12994
image distortions in video projection 87−77142
image intensified CRTs for brightness and resolution 86−8701
imaging sensors and displays, conf., Los Angeles, CA, USA (Jan. 1987) 87−65043
lamp life extension using cct. to reduce switch-on surge 86−40272
large screen display, projection-type, using laser addressed liq. cryst. light valve *(Japanese)* 87−35145
LCD full-color video projector 87−8544
LCD optical projection system with a copper-laser brightnessamplifier 85−64210
light valve system of TV colour projector, OTF calc. with dark field obs. 87−61001
metal filament lamps for use in slide projectors 85−27756
multicolour projections for flight simulation, raster positional movement control 87−77744
nematic-cholesteric bistable liquid crystal display for projectors 87−77145
neuromorphs, adaptable interconnects, photorefractive projection operator 88−58315
non-contact butt-weld inspection device using computerised image processing 85−204
overhead projection system using active matrix LCD and input pad *(Japanese)* 88−58247
overhead projection system using active-matrix LCD and input pad 88−16310
overhead projector moire fringe patterns demonstrating centrifugal waves *(Japanese)* 85−32961
Panasonic PT-102 colour video projection systems *(Russian)* 87−20705
power supply for slide projectors *(German)* 87−52345
production TVs, super compact projection lenses use 87−13911
projection display technology, review 87−77328
projection lenses for light-valve display 87−26127
raster-type holographic projection of 3-D images in natural light 85−29954
raster/stroke full-colour TV projector for flight simulation 86−17838
SCANAGON dynamic scene projector for visible and IR spectrum 88−71991
servo optical projection system design for helicopter flight simulator 87−77735
single-lens three-CRT crossed dichroic colorprojector for data and video 86−31244
slide fader, computer-controlled design, cct. 85−23063
slide projector controller using antiphase stereo channel recordings *(German)* 88−7002
slide/sound interactive instruction system 87−65101
Sodern visualisation system, geometrical resolution improvement 86−31243
sound synchronization for film and slide *(German)* 85−55060
surface profilometry of 3-D diffuse objects by checker pattern projection *(Japanese)* 87−35202
thermal target projector for MRTD testing and vehicle identification training 87−70460
TV large picture projection using fluid light valve control 85−41210
TV projection lens, wide-angle, design 87−26126
TV projection lens, wide-angle having aspherical surfaces 87−26125
TV projection systems for business and presentation graphics 88−22342
TV projectors for large screens with oil deformed layer *(Russian)* 87−20703
variable focus, single lens, 3 CRT dichroic color graphics projector 87−20950
video projector using PLZT light shutter array 86−54022
VideoShow, graphics presentation unit 88−35715
wide angle high aperture projection system for passive display 87−29205
PLZT light shutter for color viewfinder and video projector appl. *(Japanese)* 87−12263
Xe lamps, power supply units *(Russian)* 87−65840

optical propagation *see light propagation*

BOPBO in gaseous phase, pump wavelength influence on lasing parameters 85−2257
Brillouin amplifier, semiconductor laser pumped with electronically controlled bandwidth, characts. 87−33271
bromomethane, FIR laser stabilisation using Stark effect 87−61076
carbon tetrafluoride, optically pumped molecular gas laser 88−27025
carbonyl fluoride, laser lines, optically pumped, heterodyne freq. meas. 87−18887
carbonyl fluoride, optically pumped FIR laser emissions, freq. meas. 88−2165
cascade Raman soliton fiber ring laser 88−14238
cavities for compact pulsed Nd:YAG lasers, comparative study 86−15736
chemical lasers, pulsed, flashlamp-pumped, F dissociation, actinometry meas. 85−56477
chloromethane, FIR laser stabilisation using Stark effect 87−61076
chloromethane-d_3, ν_2 and ν_5 bands, assignments and predictions of FIR laser emission lines 87−46753
colour centre laser direct UV laser excitation, tunable narrow-band operation 2.2 to 3.2 μm 86−68506
colour centre lasing in near IR at 300K 85−41369
colour centre optical pumped broadly tunable lasers, book contrib. 86−36452
concentrator material selection for optical pumping of UV and VUV lasers 87−53938
coumarin 102 dye laser pumped by 308 nm XeCl laser *(Chinese)* 86−15650
coumarin 47 laser pumped by high-power semiconductor lasers 87−75030
coumarin 504 dye laser, flash lamp pumped at 502 nm 86−63768
coumarin dye lasers, flashlamp pumped, effects of 1,4-diazabicyclo[2.2.2]octane on stability 85−51140
coumarin-4 laser efficiency under coaxial flash-lamp pumping 87−33119
coumarin-analog dyes, lasing characts. of broadband and narrow-linewidth performance 88−27089
15-N cyanogen fluoride FIR laser lines, CW optically pumped 87−18878
DCM dye, flashlamp pumped, laser characts. *(Chinese)* 85−12821
DCM-propylene carbonate dye laser system pumped by XeCl laser, laser and spectral characts. *(Chinese)* 88−65602
degenerate four-wave mixing in saturable-absorbing media, pump-wave propag. 85−56792
DFB dye laser, excimer laser pumped 88−20591
DFB dye laser system pumped by TEA N_2 laser 85−41350
DFB dye laser under N_2 laser pumping, generation of tunable picosecond pulses 86−9783
DFB laser, gain-coupled, time-depend. semiclassical theory 85−7339
DFB laser dynamic, transient regime, theory and numerical anal. 87−46738
DFB laser excited by N_2 laser, tunable ultrashort pulse generation in UV 86−54109
dibromomethane, optically pumped laser, FIR laser line meas. 87−33117
3,3′-diethyloxadicarbocyanine iodide, phase conjugation with enhancement, temporal investigation 85−12957
difluoroethene laser, 889 μm, optically pumped frequency pulling 87−68331
difluoromethane, CO_2 laser pumped, freq. meas. on FIR laser emissions 87−2064
1,1-difluoromethane, optical pumping by CO_2 and N_2O lasers, new CW FIR emissions 85−29754
difluoromethane $^{13}CH_2F_2$ optically pumped laser, wavelength and freq. meas. 86−15619
difluoromethane FIR laser lines pumped by CW waveguide CO_2 laser 85−18853
difluoromethane FIR laser lines pumped by tunable CO_2 laser, optoacoustic meas. 86−15620
difluoromethane optically pumped by CO_2 line, submm. laser line assignment 85−51089
difluoromethane pumped by $^{12}C^{16}O_2$, $^{12}C^{18}O_2$ lasers, submillimetre emission assignment 87−18888
difluoromethane pumped by CW 9R(6) laser line of $^{12}C^{16}O_2$, multiple submillimeter emissions 85−46327
diiodomethane, optically pumped laser, FIR laser line meas. 87−33117
diode laser pumping of solid-state lasers 87−39120
diode laser pumps for solid state lasers, review 88−65693
diode laser-pumped solid-state lasers, historical overview 88−65618
diode-laser pumped fibre laser, near optimum operation 88−45456
disc amplifiers, optimised flashlamp pumping 87−39191
distributed feedback dye laser, picosecond, excimer laser pumped 87−26341
distributed feedback dye lasers, N_2 laser pumped, tuning range 85−29780
double resonance laser pumping, coherence effect 85−2222
DPDO series UV laser dye excited by N_2 laser, spectral and lasing props. 85−56564
dye colliding-pulse mode-locking dye laser, sub ps pulse development 85−24500

optical pumping continued
dye CW laser, pumped by Ar laser, high-power two-freq. lasing regime 85−41360
dye CW laser, synchronously excited, combined mode locking, stability enhancement with saturable absorber 86−9780
dye CW lasers, three state pulse amplifier, Cu vapour laser pump 87−18926
dye DFB laser, subnanosecond light pulse pumping, output pulse compression 85−46355
dye DFB picosec. laser source, excimer laser pumped, for time resolved meas. 87−26337
dye femtosecond pulse amplifier, self phase modulation with subsequent compression 88−58479
dye IR lasers, synchronously pumped, pulse parameter anal. 87−68405
dye laser, 200 ns narrow-linewidth flashlamp pumped, efficient operation 87−61111
dye laser, blue-green, efficiency enhancement by spectrum converter 87−7277
dye laser, blue-green efficiency enhancement using spectrum converter dye 87−26332
dye laser, cavity dumped, pumped by CW mode locked Q-switched Nd:YAG laser, picosec. pulses 87−39028
dye laser, cavity dumped, pumped by Nd:YAG laser, light pulses characts. using streak camera *(French)* 86−3276
dye laser, cavity-dumped, colliding-pulse mode-locked, amplified femtosecond pulses and continuum generation 85−18888
dye laser, colliding pulse mode-locked, synchronously pumped, kilohertz synchronous amplification of 85-femtosecond optical pulses 85−41354
dye laser, coloured noise induced first-order phase transition 87−33123
dye laser, CW, Cu vapor laser pumped dye amplifier 85−18882
dye laser, CW energy transfer, operating around 750 nm, passive mode locking 87−75037
dye laser, CW synchronously pumped, asymmetry of pulse shape 87−61112
dye laser, cylindrical waveguide, skew rays *(Chinese)* 85−18884
dye laser, distributed feedback, picosecond and subpicosecond pulse generation by travelling wave amplified spontaneous emission 85−56574
dye laser, distributed feedback, pumped by laser with low degree of coherence 85−12823
dye laser, double-resonator, TEA N_2 laser pumped, picosecond pulse generation 86−22339
dye laser, efficient narrow linewidth tunable waveguide, pumped by CuCl laser *(Chinese)* 88−40164
dye laser, excimer pumped, output radiation coherence, use in pulse holography 86−63773
dye laser, excimer pumped, with high beam quality 85−24501
dye laser, flash-lamp pumped planar waveguide, tuning characts. *(Chinese)* 86−3096
dye laser, flash-lamp-pumped, untuned, spectral evolution 86−48359
dye laser, flashlamp pumped, active stabilisation of energy and wavelength 88−40166
dye laser, flashlamp pumped planar waveguide, energy transfer 85−2251
dye laser, flashlamp pumped wide-band tunable, with dispersive Brewster prism expander *(Chinese)* 85−29784
dye laser, flashlamp-pumped, in telescopic resonator configuration 86−48458
dye laser, grazing incidence, subnanosecond pulse generation 87−68399
dye laser, high power, synchronously pumped operating at 410 to 550 nm 87−12417
dye laser, high-power high-energy linear flash lamp pumped 87−46803
dye laser, high-power pulses by cascaded controlled transient oscillation 88−27093
dye laser, IR, 1.3 μm, synchronously pumped by mode-locked CW Nd:YAG laser, operation 86−58893
dye laser, IR, action in traveling-wave pumping geometry 87−18919
dye laser, J-series, blue-green, wide tuning range 436 to 500 nm *(Chinese)* 88−65603
dye laser, lamp-excited, diffraction divergence *(Japanese)* 87−68408
dye laser, lamp-pumped, output spectrum narrowing by narrow-band signal injection 88−51770
dye laser, N_2 laser pumped, optimised for narrowband operation, anal. and performance 86−58897
dye laser, nanosecond, excimer laser pumped *(Chinese)* 88−20587
dye laser, Nd^{3+}:YAG pumped, single-mode short cavity, tunable picosecond pulses, amplification 86−22336
dye laser, picosecond, excimer laser pumped 85−56562
dye laser, picosecond, high power, synchronously pumped by Q-switched mode-locked Nd:YAG laser 85−56573
dye laser, picosecond, N_2-laser-pumped, output characts, tuning effects 86−29090
dye laser, picosecond, N_2-laser-pumped. Streak camera anal. 87−39021
dye laser, picosecond, pumped by frequency doubled optically compressed Q-switched mode-locked Nd:YAG laser 86−9784
dye laser, Raman shifted, for water vapour DIAL measurements 87−54256
dye laser, Rhodamine 6G, lamps supply mode effect obs. 85−29786
dye laser, subpicosecond stable 1.3 μm pulses, excitation by compressed Nd:YAG laser pulses 88−20593
dye laser, synchronously excited, with additional ultrathin resonator, picosecond pulse generation 87−19002
dye laser, synchronously pumped, CW, using low-loss intracavity etalon, transform limited behaviour 85−41358
dye laser, synchronously pumped, generation of high-power tunable picosecond pulses *(Chinese)* 87−7278
dye laser, synchronously pumped, periodicity multiplication obs. with cavity length tuning 87−18930
dye laser, synchronously pumped, picosec. pulse characts., mode-locked eqn. gain third order expansion *(Chinese)* 86−68474
dye laser, synchronously pumped femtosecond CW, variable intracavity spectral windowing 87−19007
dye laser, synchronously pumped widely tunable *(Chinese)* 85−12820
dye laser, synchronously pumped with lumped distributed feedback, picosecond pulse generation 85−24503
dye laser, tunable, CW, Ar^+ laser-pumped, spectral props. 87−2093
dye laser, tunable ps pulse generation using ruby laser pump and grating spectrometer 87−39018
dye laser, tunable ultrashort-pulse laser with synchronized Sagnac-arrangement pumping 88−27100
dye laser, turntable, with transverse pumping by powerful N_2 laser, characts. 86−9785
dye laser, two-wavelength operation, independent tuning *(German)* 85−18883

optical pumping continued
dye laser, ultrashort cavity, XeCl laser pumped, ultrashort pulse generation *(Chinese)* 88−27091
dye laser amplifier picosec. system, excimer laser pumped *(Chinese)* 85−12819
dye laser amplifier XeCl laser pumped, high repetition rate amplification of 70 fs pulses 86−68483
dye laser cells, pulsed Cu vapour laser pumped, dye solution flow and refractive index gradients 88−58481
dye laser CW pumped by Ar^+ laser, resonator design and anal. *(Chinese)* 85−62623
dye laser design, single-mode pulsed tunable 85−18881
dye laser DFB, achromatic pumping condition using grating 87−7285
dye laser driven by Q-switched Nd:YAG laser, subnanosecond light pulses amplification 85−35715
dye laser efficiency in travelling-wave pumping system, IR ultrashort pulse generation, review 85−35710
dye laser elements, rapidly varying thermal lens power meas. 85−29789
dye laser injection-locked, flash-lamp pumped, ultranarrow linewidth, spectral anal. 86−63774
dye laser mode-locking under negative cavity detuning *(Chinese)* 88−40296
dye laser model with pre-gaussian pump fluctuations 86−42499
dye laser model with pump and quantum fluctuations, coloured noise 88−2190
dye laser optically pumped, tunability over 217 to 3100 nm light generation characts. 86−54106
dye laser oscillator, diffr. limited single longit. mode multiple prism flashlamp pumped, linewidth anal. 87−61102
dye laser oscillator, single-mode flashlamp pumped 86−36429
dye laser oscillator-amplifiers, high power pulsed, longit. pumped by Nd:YAG laser *(Chinese)* 86−3097
dye laser pulse width, influence of polarising direction of pumping pulse and solvent viscosity *(Chinese)* 88−20586
dye laser pulsed, 550 to 689 nm, YAG laser pumped *(Chinese)* 88−40161
dye laser pulses synchronously pumped, time evolution, ps pulse formation 86−9925
dye laser pumped by coaxial flashlamp with annular electrodes *(Chinese)* 85−62524
dye laser pumped by compressed laser pulses 87−61106
dye laser pumped by Cu vapour laser, effect of laser beam divergence *(Chinese)* 88−72367
dye laser pumped by Cu vapour laser with unstable resonator, background radiation influence 87−12542
dye laser pumped by single pulses, picosecond pulse generation 85−51142
dye laser pumped by XeCl laser, spectroscopic VUV light source using third harmonic *(Russian)* 85−56897
dye laser pumped by XeF laser, radiation in 370 to 760 nm region 85−35708
dye laser pumping by Cu vapour laser for U isotope separation 87−26343
dye laser pumping by inert gas halide excimer lasers, discharge-excited, high repetition, characts. *(Russian)* 85−56490
dye laser pumping by Q-switched YAG laser *(Chinese)* 88−40162
dye laser pumping by Xe ion laser, passive mode-locking 85−62499
dye laser radiation with coaxial lamp pumping, optical distortions of active medium, spatial coherence 88−65606
dye laser spectral condensation in intracavity spectroscopy, steady-state waves 87−26339
dye laser synchronously mode-locked CW, noise and fluctuations 85−56563
dye laser synchronously pumped, picosecond pulse formation 87−12416
dye laser synchronously pumped, picosecond pulse generation dynamics 86−29088
dye laser system, excimer laser pumped, 3 ps pulse generation using gated saturable absorbers 87−46808
dye laser system, high power subpicosecond UV 87−12414
dye laser system, synchronously pumped, for high-intensity picosecond pulses 85−56575
dye laser wavelength tuning in green and red spectral regions 86−68480
dye laser with colliding pulse mode locking, pump rate, DODCI conc. and pulse width 87−61110
dye laser with DFB, biharmonic pumping 85−24497
dye laser with dynamic DFB, output kinetics 88−2191
dye laser with light-induced DFB, using transmitting phase holographic lattice 85−29782
dye laser with quasilongitudinal optical pumping 86−29092
dye lasers 86−58896
dye lasers, DFB, achromatic for subpicosecond operation 87−61105
dye lasers, DFB, picosecond generation, travelling wave pumping method *(German)* 85−12817
dye lasers, DFB, wavelength as function of pump-laser wavelength 86−36439
dye lasers, dual synchronously pumped and synchronously amplified lasers 88−65605
dye lasers, excimer laser pumped, passive mode locking 85−7394
dye lasers, excimer-laser-pumped, series VIL *(Russian)* 85−56565
dye lasers, excimer-pumped, thermal effects *(Russian)* 88−51766
dye lasers, femtosecond, synchronously pumped, cavity-length detuning effects 88−27097
dye lasers, flashlamp excited, review 87−39027
dye lasers, flashlamp pumped, output and lifetime improvement techniques 88−8154
dye lasers, flashlamp-excited, review 88−58486
dye lasers, flashlamp-pumped, pulse duration and angular distribution of submicrosecond radiation 88−51905
dye lasers, high-repetition-rate high-power variable-bandwidth, pumped by Cu vapour laser 85−56561
dye lasers, laser-pumped, phase-polarisation control of emission spectra, spectral and energy characts. 88−58484
dye lasers, N_2 laser pumped, subnanosecond pulse generation 85−12822
dye lasers, photon statistics and pumping fluctuations relation 88−72286
dye lasers, pulsed sources, structureless broadband stimulated-emission spectrum 88−72290
dye lasers, quasilongitudinal pumping 86−54107
dye lasers, single-mode, pumped by Cu vapour laser *(Chinese)* 88−58480
dye lasers, synchronously pumped, high power with diffraction and transform-limited performance 86−68477
dye lasers, synchronously pumped, mode-locked, transient pulse buildup mechanisms 85−35711
dye lasers, synchronously pumped, phase-modulation effects 86−9781
dye lasers, synchronously pumped, picosecond pulse characts. 87−61113
dye lasers, synchronously pumped, picosecond pulse characts. *(Chinese)* 86−68476
optical pumping continued
dye lasers, synchronously pumped, pulse parameters determ., correl. methods *(German)* 85−12818
dye lasers, synchronously pumped, transient emission 85−46353
dye lasers, synchronously pumped by Q-switched mode-locked Nd:YAG laser, high-power picosecond blue pulses 86−63769
dye lasers, synchronously pumped high-power and optically biased, appl. of compressed Nd:YAG laser pulses 86−48361
dye lasers, synchronously-pumped, transient regime, ultrashort pulse generation 85−35713
dye lasers, tunable, pumped by Cu laser with different oscillator structures, output power *(Chinese)* 88−40163
dye lasers, tunable subpicosecond pulse generation with single-mode fibre compressors 86−63771
dye lasers, Z *(Chinese)* 88−72349
dye lasers energy transfer synchronously pumped, subpicosecond pulse generation 86−36433
dye lasers excimer laser pumped, characts. *(Russian)* 85−56567
dye lasers high-power broadband for manufacturing appls. 87−75040
dye lasers pumped by high-power KrF laser radiation 85−18890
dye lasers synchronously pumped by finite picosec. pulse trains, emission dynamics 85−41361
dye lasers using aqueous micellar solns., flashlamp pumped, efficiency and photostability 87−26336
dye mixed solutions, radiative transfer of energy mechanism 87−68401
dye molecule transient absorption meas., coherent interactions between pump and probe pulses, effect of phase gratings 85−41460
dye pulsed laser, triplet losses, influence on optical hysteresis 85−24496
dye ring laser, 580 nm, CW, single-mode, dye circulation system 87−2218
dye ring laser, synchronously pumped, femtosec. light pulse generation, 840 to 880 nm tunable 86−42496
dye ring laser, synchronously pumped colliding-pulse mode-locked, stable operation 85−24615
dye solution, travelling-wave-amplified spontaneous emission shortening by transversal pumping scheme 86−54102
dye solution travelling wave laser with two photon picosec. optical pumping, time characts. 87−33120
dye solutions, excited mol. complexes and near IR exciplex lasers 88−58482
dye solutions excited with picosec. light pulses, amplifier spontaneous emission *(Chinese)* 85−46348
dye tunable compact laser on KDP prism using guided-mode selective amplification *(Japanese)* 88−65608
dye tunable lasers with lamp pumping 86−9788
dye ultrashort ASE pulses generated by transversal travelling wave pumping *(Chinese)* 87−54259
dye-activated polyurethane dynamic DFB laser, tunable ultrashort pulse generation and duration meas. 85−46354
dyes, lasing characts. in green, blue and red spectral regions 86−36436
dyes embedded in polymer hosts, conditions for one- and two-band lasing 88−58483
dyes generating in visible spectral range 85−29792
electroionization lasers based on electronic transitions in inert gas atoms 87−68334
emerald, grown by flux method, used for flashlamp-pumped tunable laser 88−51777
emerald lasers, high efficiency, laser pumped, tuning range 720 to 842 nm 88−14139
ethanol, ethanol-d_1, ethanol-d_2, submillimeter laser radiation generation 86−3035
ethanol laser, optically pumped, FIR laser lines 88−2161
ethyl alcohol, optically pumped, freq. meas. of solitary laser line 86−42480
ethyl iodide, laser lines, optically pumped, heterodyne freq. meas. 87−18887
EUV laser optical pumping scheme in two coupled media using quasi-continuum from rare earth elements 87−12378
excimer laser travelling-wave pumping of X-ray lasers 87−12379
excimer lasers, ultrashort high power pulse generation 85−12770
excimer lasers, wide-band, with optical and electron pumping, comparative analysis 85−51111
excimer picosecond laser amplifier, PSL 4000, pumped by short pulse dye laser 87−39003
F_A(II) colour centre laser at 2.653 μm, synchronously pumped, mode-locked, cavity length meas. 87−2219
far IR CW Raman and hyper-Raman lasers 88−33926
far IR gas lasers, pulsed high-power, performance and spectral survey 87−46745
far IR laser resonators, with optical pumping 88−34073
far IR lasers, optical pumped, collisional energy transfer, numerical simulation 88−20537
far IR lasers, optically pumped, instabilities and chaos obs. 85−24450
far IR low-pressure laser, undamped pulsations obs. compared with simple model 85−24446
far-IR laser excitation by pulsed CO_2 laser, with passive quality modulation 86−48351
femtosecond frequency-tunable pulse generation to optical pulse compression 86−9926
fibre, polarisation-preserving, efficient multiple visible light generation pumped by 1.064 μm Nd:YAG laser 85−7508
fibre, single-mode, laser pumped, stimulated Raman scatt. 88−2377
fibre laser amplifiers and oscillators, optically pumped, theoretical anal. 85−29525
fibre laser using phase-matched four-photon mixing 87−61239
fibre lasers, broadband diode-pumped, pump wavelength effects 88−58494
fibre optic diode-pumped recirculating-ring delay line 88−51443
fibre Raman amplifier module with semiconductor laser pump source 88−45394
fibre Raman laser, synchronously pumped with self-phase modulation 87−75052
fibre Raman laser pumped by a Nd:YAG laser, subpicosecond pulse generation 88−27108
fibre Raman soliton laser pumped by Nd:YAG laser 87−39047
fibres, monomode, with flowing dye system, coherent amplification 87−75063
fibres, parametric amplification under laser pumping, spectral width 86−68622
fibres, single mode, picosec. stimulated Raman generation, pump pulse fragmentation and fragment compression 87−26513
fibres, single-mode, stimulated Brillouin scattering excited by two pump waves 87−74698
fibres, stable CW backward Raman amplification, stimulated Brillouin scatt. suppression 86−42619

optical pumping continued
FIR gas-mixture lasers, pulsed and optically pumped *(Chinese)* 85−46304
FIR laser, optically pumped, conditions for Lorenz chaos 86−42468
FIR laser, optically pumped, freq. stability *(Chinese)* 85−12756
FIR laser, optically pumped, sample tube optimum length calc. 87−68317
FIR laser resonator, pump injection using Al_2O_3 waveguide 87−25932
FIR lasers, Doppler broadened optically pumped, instabilities 88−65564
FIR lasers, high power, review 87−26319
FIR lasers, optically pumped, appl. in plasma diagnostics 87−2089
FIR lasers, optically pumped, saturation effect *(Chinese)* 88−72403
FIR lasers, optimum optical pumping power 86−15621
FIR molecular lasers, optically pumped, freq. meas., 0.1 to 8 THz, review 87−26280
FIR molecular lasers, optically pumped, heterodyne frequency meas. of new lines 86−63749
FIR optically pumped laser, saturation effect and output power 86−15622
flash lamp power supplies for laser pumping 87−64705
flashlamp and arc lamp pumping of solid state lasers, review 87−39188
flashlamp pumping systems for dye lasers 88−2188
flashlamp-pumped laser oscillators, linewidth instabilities investig. 88−40263
flashlamps, linear, for laser pumping, transient arc self-inductance and simmer effects 86−29199
flashlamps and arc lamps, power conditioning, laser pumping appl. 87−39189
flashlamps and arc lamps for laser optical pumping 87−39195
fluoroform, deuterated, optically pumped sub MM laser line prediction using IR, sub MM spectroscopy 86−36391
fluoroform, deuterated, prediction of optically pumped submillimetre laser lines 85−7366
fluoromethane, optically pumped laser, FIR laser line meas. 87−33117
fluoromethane $^{13}CH_3F$ laser millimeter-wave studies, buffer gas effects, laser state spectroscopy 85−29750
fluoromethane $^{13}CH_3F$ optically pumped far IR laser, RF Stark tuning 85−46334
fluoromethane amplified spontaneous emission laser, tuning behavior 88−27080
fluoromethane optically pumped far IR laser, rotational-vibrational excitation and relaxation, time resolved study 88−20536
fluoromethane pumped by CO_2 laser, tunable FIR generation by resonant four-wave mixing 88−2164
fluoromethane Raman laser, FIR superradiant, pump polarisation effect 85−51117
fluoromethane Raman laser, high press. CO_2 laser pumped, tuning characts. 86−63753
formaldehyde-(d_2) FIR laser, pumped by TE-CO_2 laser, superfluoresc. 86−9736
formaldoxime, optically pumped submillimetre laser action 85−7363
formic acid, strip grating coupled optically pumped submillimetre laser, polarisation switching 86−48319
formic acid far IR laser, optically pumped, elec. field effects investig. 86−9735
formic acid molecular laser, singularities in emission spectrum with multimode source optical pumping 88−72384
formic acid single mode far IR laser at 742 μm, undamped pulsations obs. compared with simple model 85−24446
formic acid vapour laser, far IR, CW, optically pumped 88−20539
four-wave phase conjugation using energetically effective sensitive mirrors 85−56832
free electron laser, Raman-type, using TM pump wave, 2D mode anal. 87−54353
free electron lasers, incoherent pumping 85−46424
free electron lasers, nonlinear theory with an oppositely directed signal wave 85−62618
frequency mixing of synchronously pumped CW femtosecond laser 87−39219
frequency stability limitations of optically pumped lasers due to pump laser instability through dispersion effect 85−2211
gamma-ray laser, coherent and incoherent upconversion pumping schemes 87−7291
gas laser, FIR optically pumped, unstable emission 87−46751
gas laser, optically pumped, standing wave, gain saturation 85−41330
gas laser, optically pumped molecular, for 10 μm to 2 mm, review *(German)* 85−12778
gas laser media with high thermal durability, incoherent optical pumping 86−15623
gas lasers, FIR waveguide and DFB, history and development 86−15636
glass:Er^{3+}, lasing props. 87−26350
glass lasers, pumping efficiency increase by radiative energy transfer 85−35719

molecular lasers, optically pumped, instabilities 87−12398
molecular lasers, optically pumped, spontaneous pulsations, parameterisation 88−65563
molecular lasers, optically pumped having Rabi splitting, mode splitting anal. 88−14105
molecular lasers, spontaneous mode splitting and frequency shifting due to coherent effects 87−75008
molecular systems, coherently pumped, two-level laser instabilities 87−74994
monodeutero-acetylene, optically pumped laser action 464.8 to 564.8 cm^{-1} 85−18845
multimode CW dye laser deterministic chaos and dynamical instabilities 86−63775
multimode fibres, image transmission and interferometry, self-pumped phase conjugation 85−24265
multimode lasers, bifurcation successions 87−33078
multimode pump laser, stimulated Raman scattering, weak dispersion effect 85−41366
multiphoton enhancement of optically pumped FIR lasers *(Chinese)* 86−9710
nanosecond current pulse generator for pumping semiconductor lasers 85−7474
Nd:YAG laser, diode arrays for optical pumping 88−27128
Nd:YAG laser glasses, flashlamp-pumped, heating and energy storage 86−42504
NdP_5O_{14} laser, miniature, nanosecond, high efficiency 86−15662
NdP_5O_{14} laser pumped by AlGaAs diode, tunable CW laser oscillation at 1.3 μm 85−12829
near-millimetre-wave lasers, optically pumped, review 85−29775
neutron polarisation with ^3He polarised by laser optically pumped Rb vapour spin exchange 88−61018
nile blue A sulfate-xanthene in ethyl alcohol, laser output under coaxial flashlamp pumping *(Chinese)* 88−65788
noise propagation from pump to secondary lasers 88−2186
noncoherent pump radiation, forward and backward stimulated scattering 85−41510
nuclear properties for gamma-ray laser based on upconversion 87−7297
open laser resonators with tilted mirrors, losses 87−33235
organic compound vapour lasers, spatial, angular and spectral changes of emitted radiation 85−18889
organic compounds, optically pumped, FIR laser lines 86−68440
organic solution lasers, pumping by Ar laser with sectionalised gas discharge tube *(Russian)* 85−41326
oxazine 17-rhodamine 6G two-component soln., flashlamp-excited, lasing props. 85−56570
oxazine 1 laser CW, pumped by He-Ne laser 87−18928
oxazine 9 dye laser, highly efficient, characts. *(Chinese)* 88−72283
oxazine dyes in lasers, photostability increase with lamp excitation 86−9786
oxazolepyridinium derivative halides, water-soluble dyes, lasing props. in blue-green region 85−41359
p-type semiconductor quantum wells, free-carrier absorption and saturation of intervalence-band transitions 88−8295
parametric difference-frequency generation in multimode pumping wave field 88−45553
parametric four-wave amplification in pumping with randomly modulated phase 86−42632
parametric oscillation with aid of dynamic gratings, threshold conditions 87−2234
parametric oscillator, picosecond narrow-band, with injection of frequency-tunable semiconductor laser radiation 85−56797
perfluorobutyl iodides as gain media for a solar-pumped laser amplifier 88−72288
perylene vapour lasing under laser pumping action in wide spectral range 85−62526
phase conjugate mirrors, passive, mode-locked pumping and vibr. resistance 86−15763
phenylbenzimidazole proton-transfer laser dyes, spectral and operational props. 88−14129
phosphate glass, ion exchange strengthened, in high repetition rate active mirror amplifier geometry 88−65115
photodissociation lasers, flash-lamp pumped, working mixture relative stability in presence of stimulated enthalpy scattering 85−51112
phthalimide solutions, amplitude, phase anisotropy, under picosec. excitation 88−40167
picosecond lasers, tunable, picosecond pumping review 86−68418
picosecond pulse generation, bandwidth-limited tunable by injection-locked optical parametric oscillators 86−29240
plastic fibre dye laser characts. *(Japanese)* 87−68406
PMMA, distributed-feedback lasers with active framing medium 86−22343
polarised H^- ion source for LAMPF 88−42405
polarised $\bar{p}$ beam prod. using $\bar{H}$ formation and optical pumping 86−70279
polarized alkali metal beams by laser optical pumping 87−3867
polymethene dyes, fixed struct. effect on lasing efficiency, luminesc. study 85−24498
polymethine dye asymmetric solutions, near IR light generation, efficient lasing 85−7399
optical pumping continued
polymethine dyes, optimum wavefront reversal conditions in p.s. range 85−41465
POPOP in gaseous phase, pump wavelength influence on lasing parameters 85−2257
power sources with controllable pulse duration for laser gas-discharge pump lamps 86−45517
propargyl fluoride FIR laser lines, CW optically pumped 87−18878
propyne optically pumped laser, mid IR and far IR outputs 85−18846
pulse compression by Raman induced cavity dumping of homogeneously pumped oscillator and amplifier 85−56809
pulse generator with controlled-waveform for laser pump gas-discharge lamps 86−40960
pulsed high-power gas lasers excitation 88−40146
pulsed injection laser, watt-current characts. recording apparatus 86−9929
pulsed mode of laser pump action, temp. field of active element *(Russian)* 86−15596
pulsed oscillator, improvement of output characts. 87−75239
pump-lamp firing-pulse generator for solid-state lasers 86−42609
pumping gas lasers, spectral transform. of Sun's radiation by black body 87−26273
pyridine 1 dye laser, synchronously pumped, cavity dumped, picosecond pulse production 85−51144
quantum discrimination, frequency light shift under laser pumping 86−3269
quantum well pump lasers, high-performance, short-wavelength 88−34031
quantum well structures, nonideal, optical gain and emitted light quality 88−8217
radiation emission of dye mixtures pumped by N_2 laser *(Chinese)* 88−65785
Raman amplification of recirculating pulses in reentrant fibre loop 85−29926
Raman amplifier, phase correlation, pump beam temporal struct. effects 87−12568
Raman amplifier gain enhancement, role of transiency 88−72424
Raman amplifiers, multiline dispersion angular compensation 88−72427
Raman dye laser, Nd:YAG pumped, pulsed tunable for spectroscopy *(French)* 87−18934
Raman laser, fibre, N_2-laser-pumped, multimode, multiple-order Stokes pulse generation 86−42501
Raman oscillator, synchronously pumped, picosecond Stokes pulse generation 87−12551
Raman oscillator, synchronously pumped fibre optic 88−2366
Raman oscillator having fibre grating reflector 88−39889
Raman-Stokes waves in focused pump beams, growth 85−51265
relativistic electron beam diodes, electrode design and appls. 87−16065
resonant four-wave interaction in the field of pump wavesof arbitrary intensity 86−9953
rhodamine 4C dye laser with transverse pumping, basic parameter determ. 88−45376
rhodamine 590/water soln, droplet whispering-gallery-mode laser characts. 87−18929
rhodamine 640 laser, N_2 laser pumped at 616 nm, short-cavity, short UV pulse generation 86−36524
rhodamine 6G, concentration dependent laser threshold 86−68484
rhodamine 6G alcohol and aq.-micellar solns. with lamp pumping, radiation angular distrib. depend. on cavity spacing *(German)* 87−68403
rhodamine 6G CW ring dye laser, mirror-free cavity configuration 85−29870
rhodamine 6G dye laser, Ar flashlamp pumping *(Korean)* 87−18924
rhodamine 6G dye laser, mode-locked, pumped by Xe ion laser 85−29790
rhodamine 6G laser, colliding-pulse mode-locked, generation of 85-fsec pulses by synchronous pumping 85−41353
rhodamine 6G laser, femtosecond pulse generation 87−75218
rhodamine 6G laser, flashlamp-pumped submicrosecond development and testing 85−56571
rhodamine 6G laser, picosecond tunable ultrashort cavity *(Chinese)* 88−20585
rhodamine 6G laser, picosecond with double-prism beam expander and grating *(Chinese)* 88−20588
rhodamine 6G laser, semiconductor cryst. cathodoluminescent pumping 85−46356
rhodamine 6G laser, short-cavity and ultra-high pressure using diamond-anvil, tunable picosecond pulse generation 86−9771
rhodamine 6G laser, synchronous mode-locking using optical bias technique 86−22337
rhodamine 6G laser, synchronously pumped, characts. *(Chinese)* 87−7279
rhodamine 6G laser, tunable femtosecond, synchronously pumped by compressed second harmonic of Nd:YAG laser 85−41355
rhodamine 6G laser in aq. micellar soln., quenching rate const., induced absorpt. 88−20592
rhodamine 6G laser pumped by cathodoluminescence from CdS cryst. 85−24504
rhodamine 6G laser pumped by high-power semiconductor lasers 87−75030
rhodamine 6G laser pumped by Nd:YAG laser pulses frequency doubled in glass optical fibre 86−68488
rhodamine 6G laser with Brewster prisms, hybridly mode-locked 87−7287
rhodamine 6G ring dye laser, flashlamp pumped, short pulse generation using colliding pulse mode locking 87−26329
rhodamine 6G ring laser, broadband CW, Ar^+ laser pumped 88−72289
rhodamine 6G soln. lamp-pumped laser, unstable resonators props. 85−56582
rhodamine 6G soln. under coherent pumping, microsecond pulse generation 88−33966
rhodamine 6G solns., stimulated laser emission quantum yield 87−68402
rhodamine 6G solutions in short Fabry-Perot resonator, effect of pumping duration on lasing characts. 86−68481
rhodamine 6G-cresyl violet mixture, synchronously pumped double mode-locking 85−41349
rhodamine 6G-DODCI femtosec. dye laser synchronously pumped by Nd:YAG laser, stabilisation 87−18931
rhodamine 6G-ethanol dye laser, Ar flashlamp pumping *(Korean)* 87−18923
rhodamine 6G-oxazine 17 system, radiative energy transfer and spectral lasing range expansion 86−48358
rhodamine 6G-sulphur rhodamine 101 laser, CW, passive mode locking 87−7280
rhodamine dye laser, high repetition rate, CuCl laser pumped *(Chinese)* 86−9773
rhodamine dye-oxazine 17 mixed solns., generational props. with lamp excitation 85−41356
ring Raman laser, all-fibre low-threshold synchronously pumped 87−33229

optical pumping continued
ruby fibre laser, guided wave monolithic resonator, end pumped operation 86−15742
ruby laser, CW, bistable polarisation switching 88−40345
S-diode nanosecond pulse generators for modulationof semiconductor generators 86−40964
self Bragg matched beam steering using double colour pumped photorefractive oscillator 87−68574
semiconductor face-pumped laser, bimolecular recombination, bistability theory 87−33191
semiconductor injection lasers for space sensor systems 88−68623
semiconductor laser, electron beam pumped, influence of excitation inhomogeneity on output characts. 87−54337
semiconductor laser, generator with tuned transformers and switched ccts. 85−29829
semiconductor laser, inhomogeneously-pumped, bistability, influence of carrier leakage 87−46881
semiconductor laser amplifiers, resonantly enhanced two-wave mixing via population pulsations 88−51803
semiconductor laser with composite cavity structs., longit.-mode stability and wavelength tunability 85−29809
semiconductor lasers, pump fluctuation and amplitude squeezing, high-impedance suppression 87−54339
single mode laser, threshold phenomena, influence of absorbing atoms in laser cavity 85−7338
single-mode laser linewidth, polarization symmetry 87−54251
single-mode optically pumped lasers, stability 87−68316
slab lasers, diode pumped scaling and configuring 88−20621
slab lasers, flashlamp pumping 87−39192
small CW far-infrared laser tunability and dynamics in high press. regime 87−12353
soft X-ray laser experiments at the Novette laser facility 85−7350
soft X-ray laser program at Livermore 87−12369
solar pumped laser technology options for space power transmission 87−39274
solar pumped solid lasers 88−20624
solar radiation pumped lasers, comparison of gas and solid-state lasers 85−2239
solar-pumped laser for space station 86−3121
solar-pumped laser research, progress 87−75019
solid laser, pumping discharge tube radiation intensity distrib. calc. *(Czech)* 88−20600
solid laser, Q-switched, influence of pumping cavities *(Rumanian)* 85−35728
solid lasers, comparative study of pumping efficiency 86−3111
solid lasers, diode pumped, current technology 88−27123
solid lasers, efficiency, elliptical pump cavities effects *(German)* 87−68412
solid lasers, pumping efficiency factors, anal. 87−68431
solid lasers cross-relaxation pumping schemes for reducing Stokes losses 86−9798
solid lasers pumped by semiconductor sources 88−27112
solid state laser pump cavity design 87−39172
solid state lasers, diode laser pumped 88−45393
solid state ring laser with semiconductor pumping, longitudinal mode locking 88−45379
solid state tunable laser crystal host systems 87−39061
solid tunable lasers, conf., Williamsburg, VA, USA (Oct. 1987) 88−18321
solid-laser, high performance developments and prospects 87−68414
solid-state laser, thermo-optic effects in active element in conductive cooling presence 86−42515
solid-state laser efficiency increase, energy parameters 86−15669
solid-state lasers 87−39041
solid-state lasers, pumping systems, thermophysical props., temp. field calcs. 88−14163
solid-state lasers with semiconductor pumping, review 86−15672
spontaneous mode splitting in optically pumped mol. laser, AC Stark effect 86−68463
stimulated Brillouin scatt. in fibre, single-mode excited with multimode pump laser 88−34112
stimulated Brillouin scattering, effect of laser mode structure 87−12559
stimulated Brillouin scattering phase-conjugate fidelity meas. 88−2374
stimulated Raman scattering with tightly focused pump beam 85−29931
stimulated Raman spectra generated by ps-pulses in single-mode fibre 85−56813
stimulated two-photon processes, gain spectrum induced by a focused pump, effects of radiation frequencies ratio 86−58967
Stokes beams coherence props. for incoherent broadband pumps 87−12561
styryl compound dye laser, CW optically pumped tunable from 840 to 1030 nm, ps and fs pulse generation 87−75035
styryl derivative dye laser, Ar-ion-laser pumped, at 875 to 1084 nm 85−18854
submillimeter homodyne transmit and receive system for weak signal detection 88−53265
submillimeter lasers, optically pumped and prospects for constructing space-qualifiable local oscillator systems 88−27028
submillimetre laser emission lines, rapid line search technique 85−12789
submillimetre laser pumped by CO_2 laser, Stark effect appl. to stabilisation 87−46752
subpicosecond pulses, 1.3 μm, from Nd:YAG-laser-pumped dye laser 86−29091
sulforhodamine 101 dye laser femtosecond pulse generation at 675 nm 87−39020
syn-dioxabimanes, lasing under flashlamp excitation 88−14126
synchronous pumping, spontaneous emission role in mode locking dynamics 87−7238
synchronous triple-wave interactions, dispersion spread of short pulses 85−2415
synchronously pumped soliton Raman fibre ring laser, expt study 87−54271
thin film energy transfer dye laser with DFB oscillator-amplifier system *(Japanese)* 87−26344
thin-film energy-transfer dye lasers in spectral region of near ultraviolet to violet pumped by N_2 laser 87−54261
three-level atoms, degenerate four-wave mixing 85−7532
three-level laser model with coherent optical pumping, bifurcations and chaos 88−40111
time separated pulses pumped by DFB laser *(Russian)* 86−3268
transient wavefront reversal in four-wave interactionin resonant media 85−56801
travelling wave masers, 3 mm, use of andalusite as active material 87−61055

optical pumping continued
tunable femtosecond synchronously mode-locked dye laser pumped by Nd:YAG compressed second harmonic 85−62536
tunable laser sideband generation in far-IR region 87−18911
tunable picosecond pulse generation system using Nd:YAG pump and short cavity dye laser 85−62533
tunable Raman far IR lasers, recent advances 88−27078
tunable subpicosecond pulse generation using synchronously pumped dye laser 85−62534
tunable subpicosecond synchronously pumped fiber-optics stimulated-Raman laser 88−20613
ultrafast laser system for subpicosecond pulse generation in mode-locked and Q-switched configs. 85−62535
ultrafast supercontinuum laser source uses, self-phase modulation 85−29958
ultrashort IR pulse generation via electron-density waves 87−68583
ultrashort pulse generation and measurement techniques 88−27252
unstable resonator, spectral selection of radiation 85−56748
unsubstituted rhodamine, lasing efficiency with flashlamp pumping, effects of triplet state 86−48360
urea optical parametric oscillator, widely tunable 85−46457
urea optical parametric oscillator for tunable generation throughout visible and near IR 86−22511
V-V processes effect on threshold conditions and saturation *(Russian)* 88−20532
vinyl bromide far-IR laser action, optically pumped by CW N_2O laser 85−2210
vinyl chloride far-IR laser action, optically pumped by CW N_2O laser 85−2210
vinyl chloride FIR laser lines, CW optically pumped 87−18878
vinyl cyanide, pumped by CO_2 and N_2O lasers, CW FIR emissions 85−41316
vinyl fluoride far-IR laser action, optically pumped by CW N_2O laser 85−2210
vitroceramics, diode pumped, up-conversion, summation of photons by energy transfer effect 85−35868
VUV laser pumping systems 88−20705
wavefront reversal, degenerate four-wave interaction, efficiency study 87−33278
waveguide, distributed feedback by four wave mixing 85−41471
white light generation at 1 KHz using dye laser and regenerative amplifier system 85−62537
X-ray lasers, matched line pumping for population inversion and gain in plasmas 85−7358
X-ray lasers, plasma produced 88−58454
XeCl laser generator of high-power UV picosec. pulses 85−41335
zig-zag slabs, flashlamp-pumped, thermo-optical modelling 88−14142
CO_2 blackbody pumped lasers 85−18830
Ag atomic beam frequency standard, optically pumped 87−14450
Ag atomic beam frequency standard, optically pumped, design 88−16402
$AgGaS_2$ tunable IR detection of CO_2 laser radiation, by frequency upconversion 88−72415
Al_2BeO_4, alexandrite laser rod, average refractive powers 86−42509
$Al_xGa_{1-x}As$:Mg/GaAs:Se quantum well heterostruct., photopumped laser operation 87−12459
$Al_xGa_{1-x}As$/GaAs multilayered heterostruct. DFB surface emitting laser diode 85−35792
AlGaAs-GaAs optically pumped surface-emitting laser with integrated Bragg reflector 88−51801
$Al_{0.4}Ga_{0.6}Sb$/GaSb/$AL_{0.4}Ga_{0.6}Sb$ DH lasers, optically pumped, molecular beam heteroepitaxy on Si 86−36462
$Al_{0.5}Ga_{0.5}Sb$/$InAs_{0.91}Sb_{0.09}$/$Al_{0.5}Ga_{0.5}$ Sb DH laser, optically pumped, MBE grown, 3.9 μm output 86−36461
$Al_{0.4}Ga_{0.6}Sb$-GaSb-$Al_{0.4}Ga_{0.6}Sb$ MBE strained layer DH, optically pumped laser oscill. 1.6 to 1.8 μm 87−7363
Al_2O_3 colour centre laser, continuously tunable in visible region, optically pumped 85−41370
$Al_2O_3:Ti^{3+}$, spectral and lasing characteristics 86−54115
Ar-Xe high press. laser, electron beam pumped, long pulse generation 86−22318
Ba vapour, stimulated electronic Raman scattering, dye laser pumped 85−35859
BaB_2O_4 synchronously pumped optical parametric oscillation 88−65858
$Ba_2NaNb_5O_{15}$, crystal, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
$BaNaNb_5O_{15}$, optical parametric oscillation by pumping with Nd laser 88−45543
$BaTiO_3$, crystal, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
$BaTiO_3$ self-pumped phase conjugate mirror, instabilities 87−33330
Be isoelectronic series, quasi-CW, UV and XUV lasers, design consideration 85−7359
Br_2 laser, $B^3\Pi(0_u^+)\rightarrow X'\Sigma_g^+$, dye laser pumped, spectroscopic and kinetic study 86−36385
C III UV laser at 2177 and 2163 Å, photopumping by Mn VI line radiation 88−14117
C III, resonant optical pumping by XUV radiation from CO_2 laser produced plasma 88−72461
C_2D_2 laser, optically pumped, pulse-periodic 88−20547
CN^-:KBr vibration laser, CW operation at 5 microns 85−29800
CN^-:KI lasers, IR, optical pumping of vibr. overtones at 2.42 μm 88−72300
CO B-A laser, two-photon pumping 88−27040
CO electroionisation laser, pumped, energy, time and spectral characts. 85−41333
CO molecules, excited by electron-beam-controlled discharge, nonlinear absorption and spectral conversion of laser radiation 88−51903
CO pumping by CO laser radiation, anal. 88−27054
CO_2 4.3 μm laser, 15 mJ pulses 85−7347
CO_2, TE laser, two colour oscills., appl. to two photon process of optically pumped FIR laser 88−40128
CO_2 gasdynamic laser, $CO+N_2O$ reacting, effect of H_2 additives on highly nonequilibrium pumping 86−3077
CO_2 high-pressure laser, direct optical pumping with pulsed HF pump laser 87−26275
CO_2 laser, 4.3 μm pulses optically pumped, gain dynamics 85−35670
CO_2 laser behaviour near threshold, pump and loss modulation 88−65803
CO_2 laser, form. of self-maintained volume discharge using compact electrode system 87−33099
CO_2 laser, high-power electric-discharge, with easily ionisable substances added to mixture 85−51103

optical pumping continued
CO_2 laser pump for CH_3OH FIR laser, resonance enhancement of optoacoustic signal 88−33956
CO_2 laser source for pumping CH_2F_2 submillimeter laser, dither-free stabilisation 85−24470
CO_2 laser with unstable resonator, suppression of opposite wave in pumping four-wave wavefront-reversing mirror 86−68583
CO_2 optically pumped lasers, dynamic Stark effect, influence on small-signal gain 85−62491
CO_2, optically pumped mol. lasers for 10 μm to 2 mm, review *(German)* 85−12778
CO_2 optically pumped submillimeter laser, pump absorption efficiency 85−46302
CO_2 solar-pumped laser research, progress 87−75019

Cr^{3+}:$KZnF_3$ laser, Cr^{3+} excited ion absorpt. in tuning region 88−51783
Cr^{3+}:$KZnF_3$ tunable laser with nonselective pumping 87−26356
Cr^{3+}:$KZnF_3$ vibronic laser, room temperature operation, 785 to 865 nm tunable range 85−7402
Cr^{3+}:$Na_3Ga_2Li_3F_{12}$ single crystal, laser pumped, tunable quasi-CW lasing 741 to 841 nm 88−14138
Cr^{3+}:SrAlF$_5$ laser emission tunable from 825 to 1010 nm 87−7314
Cr^{3+}:$ZnWO_4$, broadband emission and laser action at 1 μm 86−22351
Cs, atom, lasing action in Kr gas 87−12383
Cs atomic beam freq. standards, distributed phase shift minimization 87−29235
Cs atomic beam frequency standard, optically pumped, fluorescent light shift calc. 86−38496
Cs atomic clock, microwave Ramsey resonances from optically pumped Cs beam resonator 85−58907
Cs beam atomic clock, optical pumping, fluoresc. freq. standard 86−5460
Cs beam atomic clock with optical pumping *(French)* 87−21262
Cs beam freq. standards, atom transit time effect on stability 87−29234
Cs beam frequency standard, GaAlAs laser diode pumping 88−47393
Cs beam frequency standard, optically pumped, progress 87−29233
Cs beam frequency standard, optically pumped, signal-to-noise ratio meas. 88−47657
Cs beam, laser diode appl., results 85−58815
Cs beam standard laser diode optically pumped 86−24655
Cs frequency standard, optically pumped, NRLM development 88−74549
Cs, optically pumped, freq. standards 86−38488
Cs, primary freq. standards, optical pumping, fluoresc. defection 86−5459
CsCl crystals, vibrationally excited F-centre/CN^- molecule defect pairs pumped in visible, laser operation near 5 μm 86−36447
CsH_2AsO_4, optical parametric oscillation by pumping with Nd laser 88−45543
Cu laser, parameters optimisation during short pulse excitation, Cs admixtures *(Russian)* 86−3033
Cu-vapour laser, optically pumped, stimulated emission 88−14109
D_2 gas-in-fibre Raman lasers, 1.5 μm, single-pass mode-locked or Q-switched pump operation 85−56529
D_2-Ar optically-excited high density mixture, gain meas. 85−51090
DCN, isotopically substituted, optically pumped pulsed laser action 18.1 to 477 μm 85−46321
D_2O 385 μm laser system, for plasma diagnostics, parametric study 86−29082
D_2O FIR laser, 385 μm, optically pumped, buffer gases to increase efficiency 86−3024
D_2O laser frequencies, D_2O improved pumped, line positions and intensities in band ν_2 85−46323
D_2O laser, pulsed, optically-pumped far IR, time-resolved linewidth and lineshape meas. 88−45507
D_2O laser pumped by CO_2 TEA injection-locked laser, plasma ion temp. meas. 86−9734

optical pumping continued
D_2O, optically pumped laser, FIR laser line meas. 87−33117
Er,Yb:glass laser at 1.54 μm, active mode-locking and Q-switching, pumped by Nd:YAG laser 88−40308
Er, Yb:glass laser at 1.54 μm pumped by Nd:YAG laser 87−75064
Er doped fibre laser, gain modulation using pulse pumping 88−58644
Er doped garnet lasers, laser pumping at room temp. 88−65619
Er^{3+}, Yb^{3+}, Cr^{3+}:PbO-BaO-P_2O_5 glass, flashlamp pumped, energy parameters of lasing 85−2264
Er^{3+} doped single-mode fibre laser, AlGaAs diode laser pumped operation 87−75047
Er: GeO_2-SiO_2 fibre laser, 1555 nm, low-threshold CW operation 87−75045
Er:$LiYF_4$, pumping laser transitions, cross relax. schemes 85−7403
Er:YAG laser, flashlamp pumped, power limits 88−27126
Er:YAG laser, quasistationary generation, cross-relax. mechanisms 87−33136
Er^{3+}:$BaYb_2F_8$, stepwise pumping schemes, pot. laser channel anal. 85−24513
Er^{3+}:CaF_2 IR laser, Q-switched, CW operation 87−26348
Er^{3+}:CaF_2 IR lasers, upconversion pumping 87−26354
Er^{3+}:$LiYF_4$, laser, diode-pumped, CW and pulsed 2.8 μm operation 87−54270
Er^{3+}:$YAlO_3$, green Ir-pumped upconversion laser 88−20598
Er^{3+}:fluoroaluminate glass, double sensitized, CW lasing 88−33970
(Ga,In,As,P) optically excited film lasers, single-mode emission and tuning range 85−29796
GaAlAs pulsed semiconductor laser diode for ranging and detection system 88−28978
GaAlAs-GaAs surface-emitting laser diodes, lateral pumping struct. 87−33157
GaAs DFB lasers, optically pumped, variable grating period, design and fabrication 85−56658
GaAs crystals, optical and electron pumping for CO_2 laser radiation modulation 86−29214
GaAs, doping superlattice, photopumped laser operation 86−29131
GaAs:Si optically pumped tunable mode-locked laser 86−68517
GaAs-$Al_xGa_{1-x}As$, single quantum well lasers, MOCVD grown, photopumping 88−58549
GaAs-AlGaAs DFB struct. with multiquantum well for surface emitting laser 87−7368
GaAs-AlGaAs laser diodes, inhomogeneously pumped quantum well, bistability obs. 88−27286
GaAs-GaAlAs inhomogeneity pumped lasers, transient anal. of optical bistability 88−40330
GaInAsP/InP monolithic 2D diode laser arrays 88−27182
$Ga_{0.85}In_{0.015}As_{0.13}Sb_{0.87}/Al_{0.4}Ga_{0.6}As_{0.035}Sb_{0.965}$ DH lasers, MBE grown, 2.07 μm laser oscillation 87−26407
GaSb-$Ga_{1-x}In_xSb_{1-}As_y$ heterostructure, coherent light generation and waveguide confinement 85−56665
H like ions, reson. photoexcitation as pumping mechanism for far UV lasers 85−12800
H, optically pumped polarised ion sources 86−70302
H^- ion source, optically pumped, polarized, development and operation at KEK 87−77507
H^- ion source, polarized, optically pumped, at TRIUMF, status 87−77508
H^- optically pumped polarized source at TRIUMF, status 87−3859
H^- optically pumped polarized source at TRIUMF 86−60513
H^+ ion plasma laser, far-UV, amplification factors of transitions, analytical theory 87−74972
H_2 Raman amplifier, Stokes phase preservation 87−12567
H_2 Raman amplifier, beam cleanup of severely aberrated XeCl pump laser 85−51095
H_2, Raman beam combination of two-line XeF laser sources 87−12562
H_2 Raman cell, XeCl laser pumped, efficient energy conversion 85−41475
para-H_2 Raman laser, CO_2 pumped, second Stokes wave obs. 85−29925
H_2, amplifiers, efficient high-gain, beam cleanup and low-distortion amplification 87−12566
H_2, compressed, stimulated Raman scatt. generation of single picosecond pulses with YAG:Nd laser 85−35894
H_2 high-power forward Raman amplifiers employing low-press. gases in light guides 87−12569
H-like Balmer alpha lines, recomb. and photo-pumping mechanisms for gain prod. 87−12380
^{3}He sources, laser optical pumping, conf., Princeton, NJ, USA, Oct. 1984 86−7360
HCN gas laser, flashlamp pumped, laser oscills. and transition 85−18849
H_2CO discharge-pumped laser, far IR, small-signal gain meas. 86−58874
HCl superfluorescent laser frequency converter, overtone pumped 86−63751
HD laser emission, generation of VUV and XUV radiation by multiphoton absorption of ArF* laser radiation 85−12776
H_2O photodissociation pump mechanism, maser model 86−29022
He optical pumping and magnetic resonance signal recording 87−68426
He-Ar(Ne) lasers, pumping by CO_2-laser induced optical break-down 87−33113
He-Ne laser with HF pumping, coaxial design 86−9766
He-Ne, single frequency lasers with microwave excitation 88−40136
He-Xe optical breakdown plasma, lasing 86−9739
He-Xe optical-breakdown plasma, lasing, pumping regime influence 85−35700
He-Xe, single frequency lasers with microwave excitation 88−40136
^{3}He, nuclear polarization by laser optical pumping 86−11820
^{3}He polarisation by optical pumping, low temp. techniques 86−11822
^{3}He polarised target and source prod. by optical pumping 85−59103
^{4}He resonance magnetometers, optically pumped 87−56819
HeH* excimer optically pumped laser using H_2-He gas mixture active medium 85−2233
Hg halide photodissociation laser pumped by wide-band optical radiation, three-colour emission 87−26290
Hg, laser, optical pumped with UHF excitation 87−18892
Hg laser, quasi-CW pumped by ionising radiation, construction feasibility 88−20549
Hg vapour, seventh harmonic generation of Nd-laser emission, interference effect 86−9957
HgBr laser discharge, transient absorption 88−72272
HgBr optically pumped 502-nm laser, $X^2\Sigma \rightarrow B^2\Sigma$ absorpt. band 86−48320
HgCl laser pumped by wide-band optical radiation emitting at 558 and 559 nm; 87−18900
HgI/HgI_2 laser at 442, 443, 444 nm with wide-band optical pumping 87−18895

optical pumping continued
Ho,Cr,Tm:YAG laser spectroscopic pumping scheme for 2 μm band 87−18944
Ho,Tm:YAG laser, CW operation at 2.1 μm pumped by diode laser 87−75065
Ho doped garnet lasers, laser pumping at room temp. 88−65619
Ho:$LiYF_4$, pumping laser transitions, cross relax. schemes 85−7403
Ho:YAG laser, 2.1 μm, GaAlAs laser diode array pumped 87−2100
Ho:$YLiF_4$, efficiency laser, longitudinally pumped by semiconductor laser array 87−75041
Ho^{3+}: garnet laser, $^5I_7$-$^5I_8$ laser transition, CW double cross pumping 86−58900
I laser amplifier, free running operation mode, slow Xe flashlamp pumping 87−33115
I laser, discharge-pumped, spatial distrib. of inversion population calc. *(Czech)* 88−20543
I laser, solar-pumped, beam profile meas. 87−26482
I laser, solar-pumped, long-pulse amplifier 86−48345
I photodissociation laser, kinetics, optical pumping, time evolution eqns. 85−51088
I photodissociation laser kinetics with slow pumping 88−58416
I photodissociation laser, solar-pumped 87−7253
I photodissociation laser with slow pumping, active-medium perturbation evolution and radiation focusing 87−68360
I photodissociation nanosec.-pulse amplifier with UV slow pumping, optical inhomogeneities 85−41336
I_2 laser, 1.3 μm, instabilities, obs. 86−58880
I_2, laser, VUV excitation, luminesc. quantum yield 88−2172
I_2 laser medium, $B^3\Pi_{ou}^+-X^1\Sigma_g^+$ system pulsed dye laser study 88−8149
I_2 laser, optically pumped, chaotic emission at 1.3 μm 87−38997
I_2 laser, supersonic beam, optical pumping 85−29767
I_2 optically pumped 0.342 μm excimer laser using explosive MHD generator plasma 88−40153
I_2 optically pumped molecular beam lasers 87−7243
I_2 photodissociation laser using $I_2+C_3F_7I$ and I_2+O_3 mixtures 87−26269
I_2, pulsed laser, pumped by tunable laser, anal. 86−29049
ICl photodissociation laser at 11.35 μm, gain and energy 87−26287
IF, $B^3\Pi(0^+)$-$X^1\Sigma^+$ lasing transition, CW optical pumping 85−46324
IF pulsed laser, flow parameters optimisation, intracavity gain detect. 87−7241
$InAs_{1-x}Sb_x$ MBE layers on GaSb, optically pumped 3.82 μm laser oscillation 86−15688
InGaAs film lasers, ultrashort-cavity optically pumped, picosecond pulse generation 86−42596
p-$In_{0.53}Ga_{0.47}As$/p-InP optically pumped films, end-emitting lasing at 1.53 μm 85−56666
InGaAsP film lasers, ultrashort-cavity optically pumped, picosecond pulse generation 86−42596
InGaAsP/InP distributed feedback lasers, optically pumped 85−2335
InGaAsP/InP double heterostructures, spontaneous and coherent radiative transitions 85−35785
InGaAsSb/AlGaAsSb DH laser, optically pumped, room temp. operation at 2 μm 85−56610
InP film lasers, ultrashort-cavity optically pumped, picosecond pulse generation 86−42596
K in hollow cathode discharge, collisional XUV-laser and XUV radiation from autoionising levels 85−7349
K_2, two photon hybrid resonance laser and photodissociation by two photon pumping 85−2220
K-Rb sapphire lamp, efficient source for Nd:YAG laser continuous pumping 85−18990
KCl:Li F_A(II) colour-centre laser, IR emission, pumping light polarisation effect 85−35723
KCl:Li,F_A(II) colour centre laser, synchronously pumped, mode locking 87−33130
KH_2PO_4 parametric oscillator pumped by laser with stimulated Brillouin scattering compressor 88−27301
KH_2PO_4 two-cryst. superradiant parametric light source, high-energy subnanosecond pulse pumping 87−19046
Kr ions, X-ray lasing possibilities by using high-order multiphoton processes 86−42485
Kr-Rb pumping lamps, appl. to Nd:YAG laser pumping 87−61121
KrCl, optically excited, lasing in 223.5 nm spectral range 86−48326
KrF excimer laser excitation, using solid-state magnetic switching exciter 86−15749
KrF laser, pumped by coaxial electron beam, improved operation 85−51128
KrF laser, single mode operation 87−68323
KrF laser system, electron beam pumped, characts. 88−8129
LaF_3:Nd^{3+}, VUV laser emission with incoherent Kr_2* pumping, fluoresc. meas. 85−24505
$La_xNd_{1-x}MgAl_{11}O_{19}$ pumping by diode laser 87−68426
Li II soft-X-ray laser pumped by synchrotron radiation 85−56531
Li^+ pumping by soft X-rays, EUV emission 87−12352
LiF F_2^- laser, lasing characts. for lamp pumping 86−9797
LiF F_2^+ colour centre laser, synchronously pumped, performance characts. 88−8165
LiF F_3^+ centre laser, characts. 87−75060
LiF, F^{2-} colour centre laser, giant pulse generation with gain switching by ultrashort pulses 88−14164
LiF colour centre laser with 100 J output energy, Nd laser pumped 86−9808
LiF cryst. with F_2 centers, bleaching effect, absorpt. and luminesc. study 85−56808
LiF crystal, pulse colour-centre laser using F_3^+ centre at room temp. 88−65613
LiF crystals, F_2^- colour centres lasing behaviour, optical props. and form. conditions 87−39037
LiF, electronic colour centre, laser action and amplification processes 85−24512
LiF flashlamp pumped F_2^- colour centre laser, room temp. stimulated emission 85−35732
LiF flashlamp pumped lasers using F-centre conversion 87−75067
LiF flashlamp-pumped F_2-centre laser 85−12837
LiF:$_2$ colour centre laser pumped by Nd^{3+}:YAG laser, operation *(Chinese)* 86−54113
LiF:OH^- colour centre lasers, flashlamp pumped 88−14156
$LiNbO_3$ crystal, parametric generation of picosecond light pulses 87−19036
$LiNbO_3$, optical parametric oscillation by pumping with Nd laser 88−45543
$LiNbO_3$ optical parametric oscillators, superradiant picosecond, pumped by Nd^{3+}:YAG laser, phase modulation 85−41512
$LiNbO_3$, temperature tuned optical parametric oscillation, coherent light generation *(Korean)* 86−3115
$LiNbO_3$:Fe crysts., biharmonic pumping, photoinduced light dispersion *(Russian)* 87−19050
$LiNbO_3$:Nd, MgO continuous-wave laser pumped by laser diode 88−45391
$LiNbO_3$:Ti channel waveguides, difference-frequency generation of tunable coherent IR radiation 88−40341
$Li_3Nd(PO_4)_2$ laser, semiconductor-pumped, intracavity SHG 88−34123
Li_2O-Nd_2O_3-La_2O_3-P_2O_5 glass, γ irrad., UV filtering of pumping radiation, effect on energy characts. 86−54122
Lif:OH^- F_2^+ colour centre laser, flashlamp pumped, tunable 86−58906
MgF_2:Ni^{2+}, infrared laser material, excited state absorption and energy transfer 86−3120
Mn atom transitions, active media gain parameters, 534.1 and 542 nm 85−12801
N_2 laser pumped dye laser, wavelength control using optogalvanic effect 86−15655
N_2 laser with longitudinal excitation, compact sectional design 86−29077
^{23}Na beam source, spin polarisation using double-resonance technique 87−63617
ND:YAG, laser rods, laser diode side pumping 88−27101
NH_3 CW MIR laser, intensity and half-widths, absorpt. meas. 87−18884
NH_3 CW lasers in 11 to 13 μm region produced by optical pumping 86−29033
NH_3 FIR laser, compact high power, pumped in three mirror CO_2 laser cavity 85−35829
NH_3 Raman FIR laser, broadly tunable, CO_2 laser pumped 88−27027
NH_3 Raman laser, CO_2 pumped, single- and multimode, instabilities and chaos obs. 86−22503
NH_3 Raman laser, FIR superradiant, pump polarisation effect 85−51117
NH_3 Raman laser amplifier, CW, 12 μm, high-power 87−46749
NH_3 Raman laser, continuously tunable, pumped by CO_2 laser 86−22305
NH_3 Raman laser, far infrared, continuously tunable, high power, CO_2 laser pumped *(Chinese)* 88−45338
NH_3 Raman lasers, CW, 12 μm, operation 86−48348
$^{14}NH_3$ and $^{15}NH_3$ laser pumped transversely by CO_2 laser 87−2068
NH_3 far-IR Raman laser-emission, frequency tunable CW laser construction 85−29751
NH_3 high power laser, CO_2 TEA laser pumped 85−29753
$^{15}NH_3$, isotopically substituted, middle IR lasing obs. on optical excitation 85−12810
NH_3 laser, 12.08 μm, pump intensity dependent cavity mode freq. shifting 86−48317
NH_3 laser, 16-21 μm line tunable, two-step optical pumping 85−2194
NH_3 laser, FIR pulsed optically pumped, investig. *(Chinese)* 88−40120
NH_3 laser cavity with zig-zag axis, FIR emissions 88−72261
NH_3, laser, compact high-power finite-impulse-response, pumped in CO_2 laser cavity 87−7258
NH_3 laser, freq. stability 88−14108
NH_3 laser, high-pressure optically pumped 12 μm, modelling 85−51083
NH_3 laser operating in 11-13 μm region 87−68379
$^{15}NH_3$ laser, optical pumping, spectroscopic schemes 87−26298
NH_3 laser, optically pumped 12 μm, self-pulsing and chaos obs. 85−46329
NH_3 laser, optically pumped, output energy and gain, temp. depend. 87−74985
NH_3 laser, single mode homogeneously broadened optically pumped, optical turbulence obs. 85−46330
NH_3 laser, tunable 12 μm CW, dynamics, meas. with tunable-diode laser 85−46318
NH_3 laser, two-frequency excitation under fast rotational relaxation conditions 87−68357
$^{15}NH_3$ laser with two-photon optical pumping 87−26292
NH_3 lasers, FIR, optically pumped, self pulsing props. 87−61070
NH_3 lasers, optically pumped, CW operation in mid-IR 87−26320
NH_3 lasers pumped by CO_2 laser, pulsed 12 μm radiation generation, gain dynamics 85−41312
NH_3, optically pumped FIR pulsed laser line emission *(Chinese)* 88−27008
NH_3, optically pumped, four-wave parametric interaction, expt. evidence 85−51271
NH_3 optically pumped mid-IR laser, dynamics at high pump power, inversion gain 85−2207
NH_3 optically pumped mid-IR laser, dynamics at high pump power, Raman gain and AC Stark shifts 85−2208
NH_3, optically pumped molecular gas lasers, development review 88−27025
NH_3, optically pumped submillimetre laser action 85−7363
NH_3 optically pumped tunable laser in 12 μm band *(Chinese)* 87−74967
NH_3 pumped by continuously tunable CO_2 laser, MIR generation 88−45541
NH_3 single-mode ring laser, instabilities and chaos 85−29769
NH_3 superradiant Raman FIR laser with nonlinear reson. four-wave mixing generation of medium IR emission 87−26527
NH_3 superradiant laser, MIR and FIR emissions, dynamical conflict between Raman and optical pumping 85−56525
$NH_4H_2PO_4$ crystals grown by fast method, parametric frequency conversion, Nd laser pumped 85−35890
NO ultraviolet laser, optically pumped, lasing action at 237, 248 nm 85−24441
N_2O high-pressure laser, direct optical pumping with pulsed HF pump laser 87−26275
Na X-Ne IX system, X-ray lasing by reson. photoexcitation, kinetics 85−46336
Na beams, efficient electro-optic modulator design 87−46595
Na, continuous laser emission by collision assisted two-step excitation 85−51081
Na target, polarized, optically pumped, relaxation rate study, H^- ion source appl. 87−77506
Na thick optically pumped target, radiation trapping 88−54371
Na vapour filled Fabry-Perot, multistability, D1 line, hyperfine and Zeeman pumping 85−46467
Na vapour, four wave mixing characteristics under high reflectivity conditions 88−20762
Na vapour, intracavity resonant degenerate 4-wave mixing, bistability in phase conjugation 85−12941
Na, vapour, optical pumping conversion into IR region under two-photon reson. conditions 85−46473
Na vapour, photoionization-pumping by LLNL Se soft X-ray laser, gain-length product 88−2178
Na vapour, two-phase clock based on transverse-profile Ikeda instability 87−39242

optical pumping continued
Na vapour, ultrashort optical pumping pulse conversion into UV region 85−56835
Na vapour under pulsed excitation, degenerate four-wave mixing line shapes 85−29923
Na vapour-filled Fabry-Perot cavity, period doubling and intermittency in transmission 87−39236
Na_2 excimer laser emission in IR, optical excitation by pulsed dye laser 85−24464
Na_2, optically pumped excimer laser action, expt. obs. 87−33116
Na_2 optically pumped molecular beam lasers 87−7243
NaCl:K colour centre laser, CW stable tunable from 1.42 to 1.76 μm 85−56600
$NaCl:OH^-$ laser, pulsed room temp. operation, tuning range 1.37 to 1.77 μm 88−14157
$NaCl:OH(F_2^+)_H$ colour centre laser tunable from 1.47 to 1.87 μm 87−68428
NaF flashlamp pumped lasers using F-centre conversion 87−75067
NaF laser based on F_2^+ like centres with lamp pumping 88−58505
NaF:Li colour centre lasers, flashlamp pumped 88−14156
$NaNdP_4O_{12}$, broad tuning range lasers, CW operation at 1.05, 1.32 μm 87−75061
$Nd,Cr:Gd_3Sc_2Ga_3O_{12}$ flashlamp-pumped laser, performance and characteris. 87−39073
Nd,Fe^{2+}:YAG crystals, short-lived absorpt. mechanism 86−9809
Nd doped Z 87−33134
Nd lasers, 1.05 and 1.3 μm bands, active materials for miniaturisation *(Polish)* 85−35720
Nd microlasers pumped by miniature flashlamps 85−56592
Nd silicate and phosphate glass laser rods pumped in pseudoelliptic close-coupled cavities, thermal transient effects 86−22360
$Nd^{3+},Cr^{3+}:(Gd, Sc)_3Ga_5O_{12}$ pulsed lasers with increased. 86−9793
Nd^{3+} doped fibre delay lines, diode-pumped recirculating ring 88−65283
Nd^{3+} doped fibre laser, CW, 1064 nm, using all-fibre reflectors 87−61114
Nd^{3+} doped fibre laser operating at 938 nm, diode-laser-pumped 87−76738
Nd^{3+} doped fibre lasers, diode pumped, Q-switched and single polarisation 88−65284
$Nd:La_2Be_2O_5$ laser pumped by laser diode, performance 88−65651
$Nd:LaF_3$, upconversion pumping, violet CW action 88−45378
$Nd:LaLuGa_5O_{12}$ laser rods, laser diode side pumping 88−27101
$Nd:LiNbO_3$ crystals, CW laser oscillations and tuning characts. 88−27109
$Nd:LiYF_{11}$, diode-pumped solid-state lasers, Q-switching at 1.064, 1.047 and 1.321 μm 88−65653
$Nd:LiYF_4$ laser, 1.047 μm, pumped by GaAlAs diode laser, with intracavity doubling to 523.6 nm 86−42511
$Nd:LiYF_4$ laser, flash-lamp-pumped acousto-optically Q-switched, intracavity doubling of 0.527 μm output 87−68607
$Nd:LiYF_4$, two-step excitation and fluoresc. at 587.4 nm under CW pumping 87−12435
Nd:YAG CW laser, Kr lamp pumped, thermal focusing effect 86−42505
Nd:YAG CW laser, diode laser pumped, efficient SHG in $LiNbO_3$:MgO monolithic external resonant cavities 88−65835
Nd:YAG CW laser, operating characts. and power balance in pump cavity 85−12901
Nd:YAG CW mode locked lasers, operating specifications 87−39052
Nd:YAG amplifier, multiple-pass laser-diode-pumped, design 88−2193

Ti^{3+}:Al_2O_3 coherently pumped laser, output characts. 87−18939
Ti^{3+}:Al_2O_3 laser, excitation methods, use in intracavity spectroscopy 87−26373
Ti^{3+}:Al_2O_3 laser, picosec. pulse generation with synchronous pumping 88−33984
Ti^{3+}:Al_2O_3 laser, tunable flashlamp-pumped 88−27127
Ti^{3+}:$BeAl_2O_4$ laser with pulsed coherent pumping, tunable radiation generation at 0.73 to 0.95 μm 88−14153
Tl-He mixture pumped by radiation from recombination He-Ca laser, Tl 535 nm line stimulated emission 85−2238
Tl-Xe mixture, pumped dry laser, optically excited, Raman and atomic resonance lasers 85−29766
Tll vapour pumped with ArF flash lamp, stimulated emission 86−68455
Tm,Ho:YAG, spectroscopy and diode laser pumped operation 88−65620
Tm doped garnet lasers, laser pumping at room temp. 88−65619
Tm^{3+}, Ho^{3+}:YAG laser, diode pumped, CW room-temp. operation at 2.1 μm 87−54272
Xe III Auger laser at 108.9 nm, low-energy pumping 87−54250
Xe flash lamp pumping source for small lasers *(Chinese)* 88−37712
Xe, high power pulsed ionised laser 85−24471
Xe lamp, double discharge, for Nd laser pumping 87−7423
Xe laser-produced plasma, X-ray laser, Auger decay pumping 88−40155
Xe_2 lasers, optical pumping, luminesc. quantum efficiency 88−20554
XeCl, bandwidth limited amplification of 220 fs pulses 87−54247
XeCl excimer laser, discharge pumping and lasing, spatial-time dynamics *(Russian)* 88−51725
XeCl laser, dye laser pumped, single picosecond UV pulse generation by mode-locking 87−2090
XeCl laser radiation conversion to first Stokes at high pump energy 88−72395
XeCl periodic-pulse excimer laser with a magnetic-thyristorpower source 87−2085
Xe_2Cl laser, optically pumped, stimulated emission 86−29065
XeCl-pumped Raman amplifier, gain enhancement 88−72299
XeF laser, blue-green, electron-beam pumped, wideband tuning 85−56478
XeF laser emitting visible light, optical pumping by surface-discharge radiation 87−54239
XeF laser, optically excited, in liquid Ar 86−3102
XeF laser, optically pumped photodissociation, efficiency 85−35699
XeF visible-emitting laser pumped optically by radiation from sectioned surface discharge 85−41341
XeF* laser pumping by Xe_2* excimer emission, photoionisation cross section determ. 87−18909
XeF* pumped by excimer radiation, near UV lasing on electronic-vibr. transitions 87−33093
YAG quasi-CW pumped laser, intracavity freq. doubling 88−14141
$YAlO_3$:Er^{3+} lasers, blue and green using frequency upconversion to generate 550 nm radiation 88−65650
$(Y_{1-x}Er_x)_3Al_5O_{12}$ garnet, electronic vibr. spectra and laser pumping 85−12836
$YLiF_4$:Er^{3+} lasers, blue and green using frequency upconversion to generate radiation at 550 nm 88−65650
Yb, Er:SiO_2 single-mode fibre laser, high-efficiency operation at 1.56 μm 88−72295
Zn III, super Coster-Kronig pumped gain in VUV 88−14111
Zn ions, photoionization lasers pumped by broadband soft-X-ray radiation from laser-produced plasmas 85−7355
Zn_xCd_{1-x} S mixed single crystals, picosec. lasing in external resonator 85−24517
$ZnGeP_2$ crystal, picosecond parametric superluminescence 86−63862
ZnO crystal, simulated emission from streamer discharges at 300 K 88−51775
methanol-d_3, far-infrared laser lines prod. from 42.9 to 1155 μm 88−8095

intersatellite link, pointing error distribution, expt. verification 88−53295
ionospheric species mapping, solid state bistatic lidar for Tethered Satellite System 87−42242
IR background suppression techniques and algorithms 88−47225
IR detectors and systems, conf., London, England (June 1986) 87−38
IR Doppler radar, using CO_2 laser with FMCW cooling 87−3246
IR signature meas., target vs. background discrimination using multispectral channel data 88−47229
IR signatures utilisation, considerations 87−13784
IR target extraction and tracking, motion filtering 88−66669
optical radar continued
IR technology, conf., San Diego, CA, USA (Aug. 1987) 88−43558
IR technology and appls., Cannes, France (Nov. 1986) 87−16260
IR technology and appls., conf., San Diego, CA, USA (Aug. 1985) 87−9998
IR tracking system performance assessment, using dynamic simulator 88−47228
Japanese geodetic satellite for expansion of marine control 88−10471
Kalman-Bucy filter appl. to differential absorption lidar time series data 88−15684
LAGEOS satellite ranging 88−9658
laser, obs. of snow cloud, by depolarisation meas. *(Japanese)* 86−25420
laser agile illumination for object tracking and classification feasibility study 88−60281
laser atmospheric sounding techniques based on nonlinear effects 86−65511
laser cloud mapper and its applications 87−41039
laser docking system radar flight experiment 87−41034
laser Doppler anemometer, atmospheric, use for sounding large single particles 85−4448
laser Doppler displacement measurement 88−2427
laser engineering, current research, developments and future prospects *(Korean)* 85−12758
laser guided weapons, ground laser designator test set 86−43907
laser heterodyne ranging using a mode-locked localoscillator for bandwidth compression 86−49736
laser radar, principles, possibilities and limits *(German)* 85−14371
laser radar cross section of Earth atmosphere objects, theory and numerical results 87−40986
laser radar field processing, optical methods 85−52439
laser radar heterodyne detection efficiency, speckle effects 86−59952
laser radar imagery simulation, using LADAR sensor 87−14182
laser radar images enhancement based on generalised histogram entropy optimisation *(Japanese)* 86−69840
laser radar technology, conf., Quebec City, Que., Canada (June 1986) 87−36304
laser radar technology developments 86−4746
laser radar transmitters, pulse generation 88−28968
laser radiation receivers, polarisation effectiveness and scatt. in tropospheric aerosol 85−2581
laser range finder, hand-held eye-safe design *(Japanese)* 86−37949
laser range finder, real-time correction of three-dimens. nonlinearities 86−59951
laser range finder based on synchronized scanners 88−74047
laser rangefinder, optics 87−49192
laser rangefinder with AM and double heterodyne demodulation 85−20272
laser rangefinders developments 87−20628
laser rangefinding, distance computer *(Rumanian)* 85−20273
laser ranger testing, range simulation 85−62706
laser ranging, signal characteristics and noise 88−41753
laser ranging and altimetry, time-resolved speckle effects on laser pulse arrival time estimation 85−46571
laser ranging simulation on ERS-1, retroreflectors design 87−49188
laser ranging system for tracking Experimental Geodetic Satellite 88−15685
laser scanning system, transmitter-receiver parameters 88−41755
laser ship-model track-meter, error analysis and optimum operational area *(Chinese)* 88−60279
laser sounder for US Navy hydrographers, appl. to coastal bathymetric surveys 88−10570
laser sounding of atmospheric parameters 87−61297
laser sounding of disperse media, background influence on characts. of opt. receiver with photomultiplier 85−4449
laser speckle in heterodyne detect., correlation scales 85−51449
laser triangulation range finder available under direct sunlight , robot appls. 88−74049
laser warning receivers, Marconi developments 87−3245
least square method, laser radar images enhancement, gray scales piecewise linear transformations 87−19966
Lidar, coherent range-resolved differential absorption, description *(Japanese)* 85−31102
LIDAR, current techniques and performance reliability enhancement *(Japanese)* 85−14373
lidar, differential absorption and scattering, optimisation of range and scattering *(German)* 88−35592
LIDAR, fluorescence, land and sea remote sensing appls. 87−41043
Lidar, high spectral resolution, optimisation, remote meas. of atm. temp. *(Japanese)* 86−25421
LIDAR, imaging in random media, atmospheric influences 87−75366
LIDAR, Mie diffusion and differential absorption, signal processing *(French)* 86−23094
lidar, range-height indication measurements, data anal. 87−34661
lidar, range-resolved differential absorpt. gaseous pollutant meas., range and sensitivity optimisation 85−59503
lidar, scatt. and propag. in atm., conf., Florence, Italy (May 1986) 86−57093
lidar, ultrashort wave waveguide propagation over sea, conditions detection 86−48584
lidar aerosol backscatter measurements: systematic,modeling, and calibration error considerations 86−18560
LIDAR and lasers for remote monitoring of atmosphere and water pollution *(German)* 88−36661
lidar atmospheric appls., ang. scatt. meas., aerosol backscatter to extinction coeffs. 88−4119
lidar data processing for stratospheric aerosol meas. 88−28955
lidar design, false alarm and detection probability 88−74041
lidar design, false alarm and detection probability factors 88−28983
lidar equation, inversion using recursive technique 88−67488
lidar equation, noise proof inversion 87−26803
lidar in inhomogeneous atm., backscatter/extinction ratio humidity effects 87−19200
lidar in-space technology expt. from space shuttle 87−41041
lidar inversion algorithm, sensitivity to backscatt. and extinction 85−52382
lidar inversion algorithm with variable backscatt.-extinction ratios 85−52383
lidar inversion algorithms, sensitivity analysis 86−65509
lidar inversion with variable backscatter/extinction ratios 86−43905
lidar measurement of turbulence encountered by horizontal-axis wind turbines 87−64493
lidar measurements, multispectral, information content for aerosol size distrib. determ. 85−31080
lidar measurements, visible and near IR, backscattered signal fluctuations due to turbulence 88−60278

optical radar continued
lidar measurements of ozone vertical profiles 86−18561
lidar obs., upper stratospheric, of ozone vertical distrib. 87−4133
lidar obs. of atm. phenomena 87−63965
LIDAR remote sensing of gaseous pollutants *(Italian)* 86−12189
lidar returns, multiply scattered, calc. using stochastic-analytic approach 85−63770
lidar signal fluctuations caused by beam translationand scan 87−3243
lidar studies of atmosphere, ATE for photomultiplier selection 86−44123
lidar system, pulse packet det. 87−70120
lidar system for atmospheric aerosol meas., design aspects 87−9004
lidar system for measuring atmospheric pressure and temperature profiles 88−23185
lidar system optical alignment and its verification 87−56270
lidar technique appl. to laboratory meas. of atmospheric temp. and backscatter ratio 87−4138
lIDAR techniques for search and rescue 86−37950
lidar telescope overlap function and effects ofmisalignment for unstable resonator transmitter andcoherent receiver 87−4124
linear FM-CW laser radar, analysis and expt. results 87−13791
logarithmic amplifier for LIDAR receivers 87−49191
Long Range Infrared Surveillance System 88−22209
long-range laser ranging, techniques comparison 88−28973
luminous object tracking using TV system, accuracy calcs. 87−63025
m-sequence pseudorandom modulation CW LIDAR, response and error meas. *(Japanese)* 88−74045
meteorological, laser radar image enhancement by piecewise linear grey-scale transformations 86−25436
methane gas detection with infrared correlation light detection and ranging (LIDAR) system 88−10597
military aircraft, MMWR/FLIR/ATR sensor fusion proof of concept 86−69841
military appls. of electro-optic sensors and tracking systems 87−26079
Mini Laser Rangefinder, review 87−41033
missile control, eye-safe Raman laser range finder 88−15689
modular hand-held eyesafe laser rangefinder 87−41028
multichannel lidar fluorosensor spectrometer for active-passive airborne ocean colour meas. 86−32550
multifrequency dye-laser lidar 85−42660
multifunctional electro-optical sensors for precision munitions 88−29339
multipixel multidimensional laser radar system performance 88−28975
multiple wavelength differential absorption lidar evaluation 85−14372
multiple-glint targets under laser illumination, statistical properties 85−3513
multiple-target motion detection real-time approach 88−74051
multisensor data fusion of laser data and FLIR, target segmentation and enhancement 88−28964
multisensor information fusion for target detection and classification 88−74043
multisensor target detection and classification 88−74044
multisensory images, deriving 3D structure 86−23097
multispectral imaging simulation, aircraft landing appl. 88−21318
noise immunity when using phased array 87−49189
nonimaging IR sensor, signal processing system 86−4749
ocean and lake depth measurement, scanning lidar bathymeter, airborne hydrographic surveying 87−50566
ocean colour meas. using active-passive airborne lidar 86−32551
oil detection using time resolved LIDAR fluorosensor 88−10598
optical tracking system of moving targets by using linear CCD image sensors 85−42661
optimal reception of partially polarized waves 88−27518
optoelectronic fog detectors with continuous sinusoidal modulation, signal backscatter *(Polish)* 87−56273
parametric laser-reception lidar, anal. and design 87−56269
peak-detecting laser radars, performance anal. 87−41031
phase detection in modulated signals subject to ideal Rayleigh fading 87−20625
phased-array laser transmitter design 87−70141
Photochron IIC streak tube for 300 MHz circular-scanoperation 85−61652
photon detection and timing system for Lidar expt. 88−9917
position meas. using laser beam tracking, expt. 88−47223
pulsed laser diode radar development for suspended particles monitoring *(Japanese)* 88−61665
pulsed two-colour laser-ranging systems, performance eval. 87−56272
radar sensors for automatic process and manufacturing control *(German)* 88−60282
radiative properties of cirrus and cumulus clouds 86−4748
Raman and Brillouin lidar for sea and atm. temp. profiles meas. 85−15421
raman lidar measurements of atmospheric temperatureprofiles 86−17518
Raman lidar system for methane gas concentrationmeasurements 86−65508
range finding techniques for third generation robots 88−67451
range image segmentation using sine wave coding and Fourier transformation 88−73243
range imaging sensor for commercial appls. 88−28979
rangefinder in scattering media, operating efficiency increment 87−70140
rangefinders, solid-state laser, new capabilities 88−28958
reference signal in LIDAR, monitoring device 86−4747
reflectance characteristics of selected materials for reference targets for 10.6-μm laser radars 88−65116
reflective optics, conf., Los Angeles, USA (Jan. 1987) 88−31267
reflective tomography, images from range-resolved laser radar measurement 88−67485
reflector ultralightweight for lidar appls. 86−54020
remote measurements of atmosphere by laser radar *(Japanese)* 86−6106
remote sensing by laser beam, techniques, instrumentation and applications 88−36658
remote sensing from space platforms, advanced laser lidar systems 87−42240
remote sensing of atmosphere from Earth Observing System, NASA plans 88−5176
remote sensing of organic vapours, detection with active and passive sensors, comparison 87−29951
robot cart, autonomous, navigation using optical rangefinder 88−60280
robot parts acquisition, holdsite method using laser rangefinder mounted on robot wrist 88−74046
robot vision and optical fibres *(Polish)* 86−2805
rotating laser range finder and attached data interpretation for use in an autonomous mobile robot 88−74042
RPV appls., optical altimeter design 88−16846

optical radar continued
ruby laser, electro-optically fast tuning, for water vapour sounding in atm. *(Chinese)* 85−62541
ruby laser radar system for atmospheric studies at Syowa Station, Antarctica 85−37113
SAR, coherence and speckle reduction in compound correlated phased arrays 87−20626
SAR appl. of geometric filter for reducing speckle 86−59332
SAR images, speckle suppression and anal. 86−59928
SARS appl. of phase-only image reconstruction from offset Fourier data 86−59333
satellite ranging, Nd:YAG laser transmitter of picosecond pulses *(Czech)* 88−72363
satellite tracking accuracy improvement, using optical obs. 85−58240
satellite tracking with dual-wavelength laser ranging system, feasibility 86−30892
satellite-borne Doppler lidar for global winds mapping 88−4120
scanner, dual-wedge for precision pointing of CO_2 Doppler lidar from airborne platform 85−47607
scanning lidar bathymeter for water depth measurement 88−16923
scanning lidar bathymeter for water depth measurement 87−41040
sea surface, moving, statistical props., laser radar study 88−30182
self-calibrating low power laser rangefinder for space applications 87−41035
semiconductor injection lasers for space sensor systems 88−68623
semiconductor laser radar, ps, with optical amplifier 85−31101
Sense Analysis Simulator for sensor fusion on an autonomous underwater vehicle 87−76866
serial scan FLIR imagery, detector configurations influence 87−20627
shipboard defence systems, simulation of complementary radar and electro-optical systems 88−17004
ships classification and aimpoint maintenance 88−53379
signal detectibility improvement by multiple obs. 85−57504
signal speckle fluctuation, effect on signal detection 88−21184
signal-to-background clutter ratio with two-dimensional spatial filtering 88−21314
snowfall, short-time forecasting using lidar 86−65523
solar-blind effect in ultraviolet lidars *(Japanese)* 88−74978
solid state tunable lasers for differential LIDAR, development 87−39056
space lidar NASA plans, Earth Observing System 87−42224
Space Station communications and tracking system 87−40866
space stations autonomous rendezvous-/docking and proximity operations 87−15009
spaceborne laser ranging systems for Earth Observing System 88−5133
spaceborne lidars for operational atmospheric measurements 88−61651
speckled imagery enhancement, perspective on techniques 88−59295
spectrometric lidar, optimising optical system parameters 85−3514
strategic defense potential of IR systems 88−22208
stratospheric aerosol meas. by laser radar, calibration and error analysis *(Japanese)* 87−42238
surface chemical compounds, optimum detection, coherent opt. scatterometry 85−64729
synthetic aperture imaging with a pulsed CO_2 TEA laser 88−28971
synthetic discriminant functions for target correlation 88−21325
tactical reconnaissance missions, signal direction finding and cueing 88−47230
target imaging with stepped frequency polarimetric radar 88−9659
target signature model 88−28981
target tracking using nonlinear filter based on Pontryagin minimum principle 86−54569
technology and appls., conf., Orlando, FL, USA (May 1987) 88−24329
three-wavelength distancers design improvements 88−74963
time-of-flight laser receiver for moving objects 86−65027
time-to-digital converter with an analog interpolation circuit, laser range finding meas. appl. 87−21018
tomographic lidar for extinction coeffs. meas. of atm. aerosols 85−15417
TOPEX satellite, laser ranging studies 88−53380
tracking, FM reticles, anal. 88−66273
tracking, FM reticles, parameter anal. 88−66274
transmitter/receiver, boresight alignment 87−41027
two-dimensional recognition range model 88−53378
two-frequency lidar inversion technique 87−49187
UK National Scale Modelling Centre, backscatter information, sub-MM wave techniques use 88−28984
ultrafast supercontinuum laser source uses, self-phase modulation 85−29958
video processing in an optical tracking system 86−4004
wavefront determination in optical reception system with multichannel phase modulation 87−75450
wind and turbulence in boundary layer, comparison of meas. techniques 85−26900
CO_2, 10.6 μm laser emission region, comparison of Fresnel rhomb and quarterwaveplate 88−65773
CO_2 CW heterodyne laser rangefinder, remote vibration and imaging analysis appl. 87−3247
CO_2 DIAL meas. of water vapour 87−71291
CO_2 TEA mode-locked lasers, pulse coherence meas. 87−39007
CO_2 compact laser receiver lens for rangefinder, design, interferometric test 87−68570
CO_2 hybrid and injection-locked TEA lasers for lidar and nonlinear optics appls. 85−51092
CO_2 laser Doppler rangefinding, with heterodyne detection and chirp pulse compression 87−20629
CO_2 laser, TEA for differential absorption lidar 88−67490
CO_2 laser acousto-optic modulators, optical radar and information carrying appl. 85−29884
CO_2 laser coherent optical radar 88−35593
CO_2 laser heterodyne systems, precise comparison of expt. and theoretical S/N ratios 85−47606
CO_2 laser, mode control in unstable Cassegranian resonators 88−27232
CO_2 laser pulses, correcting techniques in aerosol-backscattered coherent lidar returns 88−67486
CO_2 laser radar 87−49194
CO_2 laser radar, Firepond, compact and transportable meas. types, technological developments 86−30891
CO_2 laser radar and automatic target recognition technologies 88−22221
CO_2 laser radar, coherent FM CW, signal amplitude distrib. meas. 87−29925
CO_2 laser radar, flight evaluation trials 88−28960
CO_2 laser radar for strategic aircraft missions 86−69842
CO_2 laser radar frequency stable amplifier design 88−27072
CO_2 laser radar, imaging, Q-switched 87−3244

optical radar continued
CO_2 laser radar, imaging, with chirp pulse compression 88−28980
CO_2 laser radar performance, target and atmospheric influence 87−29926
CO_2 laser radar receiver, heterodyne detection 88−53377
CO_2 laser radar waveforms, atmospheric distortion effect 88−28974
CO_2 laser radars, optical resonator design 87−41036
CO_2 laser rangefinder for terrain following appls. 88−28962
CO_2 lidar, incoherent, data reduction and correction function for lidar equation 88−67487
CO_2 lidar systems, design considerations 88−41752
CO_2 lidar systems, high speed tuning mechanism 87−26260
CO_2 pulsed coherent laser rangefinder, performance meas. at 10.6 μm 88−28961
CO_2 ring laser CW, hybrid injection locking, radar appls. 85−51125
GaAlAs pulsed semiconductor laser diode for ranging and detection system 88−28978
GaAs laser rangefinders for industrial appls. 87−41032
H_2O and aerosols profiles meas. from NASA ER-2 aircraft, lidar instrument appl. 87−41042
H_2O ground-based DIAL meas. errors, Doppler-broadened Rayleigh backscattering 86−18562
HgCdTe intermediate temperature detector for 10.6 micron heterodyne rangefinder 87−41037
HgCdTe photodiodes for heterodyne appls. 87−38934
$Hg_{1-x}Cd_xTe$ detector heterodyne evaluation at 2 GHz by resonant-cavity electro-optic laser frequency modulator 88−19377
KrF excimer UV laser radar for image, range and Doppler measurements 88−28969
NH_3, atmospheric laser remote sensing using CO_2 DIAL system 86−6093
NH_3 trace IR spectroscopic device and technique for remote pollutant detection 86−38961
NO_2 remote sensing by ground-based differential absorption and scatt. lidar 86−12197
NO_2-mapping using laser-radar techniques 88−47224
Nd:YAG eye-safe laser rangefinder, Raman wavelength shifting 87−46827
Nd:YAG laser, coherent laser radar at 1.06 μm 87−41026
Nd:YAG laser rangefinder/designator 87−39271
Nd:YAG lidar accommodation on polar meteorological satellite 87−42241
Nd:glass Raman laser, tunable, for DIAL applications 88−20626
O_3 profile meas. by UV DIAL in regions of spatially inhomogeneous aerosols 86−6092
SO_2 remote sensing by ground-based differential absorption and scatt. lidar 86−12197

optical saturable absorption
3,3′-diethyloxadicarbocyanine iodide, passively mode-locked femtosecond dye laser, photoisomer accumulation in absorber jet 88−65782
aerosols, polydisperse, moving, bleaching by laser irradiation 85−56802
alkali halide crystals with Z-centres, self-locking of Nd laser modes 85−2271
amplifier, nonlinear optical type, resolution method for moment eqns. 87−26509
atmosphere bleaching for quasimonochromatic CO_2 laser radiation 86−48600
BDN saturable absorber for laser mode locking *(Chinese)* 87−54397
bistability by self-reflection in saturable absorber 88−51944
bistable Fabry-Perot etalon with local saturable nonlinearity, focusing role 87−54421
bistable laser with saturable absorber, transient bimodality 87−75198
bleachable dye in instantaneous light-controlled optical switch with induced gratings 86−9954
bleachable filters for XeCl lasers 86−68594
cavity, standing-wave, containing saturable absorber, multimode instabilities 85−35873
chirp production of saturable absorber, colliding pulses, influence 88−14261
chirping of laser pulses shorter than 100 fsec in saturable absorber 86−42616
clocks, optical, for optical computing 88−58310
colliding pulse mode locked femtosecond, optical bistability and hysteresis obs. 86−68626
contrast enhancement material, photobleachable cpd. conc. effect on pattern form. *(Japanese)* 88−44722
control of σ^+ beam propagation by a σ^- beam 87−33327
coumarin 6 solution, lasing in bleaching regime 86−68479
cresyl violet saturable absorbers in dye lasers, excimer pumped, pulse modulation 86−3101
CW on-resonance beam reshaping, simple analytical approx. 86−36564
DCM dye laser, CW, passive mode locking 87−2091
degenerate four-wave mixing in saturable-absorbing media, pump-wave propag. 85−56792
dense optical materials with saturated absorption *(Spanish)* 87−61232
detuned ring laser, with saturable absorber, semiclassical anal. 87−46938
3′,3′-diethyloxadicarbocyanine iodide, laser action at room temp. 88−65600
1,1-difluoroethylene laser optoacoustic meas. of absorpt. saturation using CO_2 laser 88−2166
diode lasers, two-segment, bistability theory 85−56825
directional coupler, nonlinear, coherent, with saturable index changes, numerical anal. 88−33733
directional coupler with two level saturable nonlinearity 88−45554
discriminator based on saturated absorption for laser freq. stabilisation 85−46474
dithiene bleachable filter for I laser, Q-switching and decoupling of amplifiers 85−2381
dye absorbing jet, degenerate four-wave mixing of femtosec. pulses, intracavity meas. 86−48488
dye activated polymer laser media, nonlinear photochem. in high intensity light fluxes 86−9779
dye CW laser, synchronously excited, combined mode locking, stability enhancement with saturable absorber 86−9780
dye film, radiachromic, energetic H^+, B^+, N^+, P^+, As^+ ion fluence monitoring using ionisation 85−55665
dye for mode-locking Nd:glass laser, bleaching dynamics 85−62545
dye laser, colliding pulse-modelocked, 47 fs pulse emission, pump power and saturable absorber effect 86−36440
dye laser, mode-locked ring, anal., chirped-solitary-pulse solutions 85−41423
dye laser, picosecond pulse compression by saturable absorber, real-time obs. 85−2402
dye laser frequency stabilisation by saturated absorption on I_2 85−2252
dye laser system, excimer laser pumped, 3 ps pulse generation using gated saturable absorbers 87−46808
dye laser system, high power subpicosecond UV 87−12414
dye lasers, CW under combined mode locking conditions 88−27095
dye lasers, tunable, energy problems 88−40165
dye lasers CW, hybridly mode-locked with saturable absorber, charact. 86−15649
dye lasers synchronously pumped, femtosecond pulse generation by saturable absorpt. 87−75036
dye mixture saturable absorbers in passive switch for laser mode locking 87−75241
dye molecule transient absorption meas., coherent interactions between pump and probe pulses, effect of phase gratings 85−41460
dye saturable absorbers, ultrashort laser pulse generation in mode-locked and Q-switched configs. 85−62535
dye solutions, phase response dispersion when exposed to picosecond excitation 85−24663
dyes, degenerate four-wave mixing, transient phase conjugation 87−33275
dyes, in nematic liquid crystals, bleaching by laser 87−61241
dyes, UV, short pulse saturation props. rel. to XeCl laser mode locking 85−7524

optical saturable absorption continued
dyes in rhodamine 700 laser, CW, passive mode locking in red-near-IR spectral region 86−9901
dyes in ruby laser, passively mode-locked, pulse compression 85−51151
dynamic holograms, stationary recording in saturable amplitude phase media 85−7556
extracavity pulse compressor and intracavity mode-locking, saturable and reverse saturable absorbers 86−68635
FEL self mode-locked oscill., saturable absorpt. mechanism 87−75144
femtosecond pulse ring dye laser, design and operating charact. 86−42595
femtosecond spectroscopy with high-power tunable optical pulses, pulse generation 85−41458
fibre, modified rod-in tube (MRT), radiation resistance, photobleaching effects *(Japanese)* 87−74718
fibres, ionizing radiation effects 88−72049
films, colour, archival storage using white light processing, bleaching process 85−36362
filters, bleachable, as decoupling devices, optimisation for laser radiation contrast improvement 85−41441
formic acid saturable absorber, undamped undulation superposed on the passive Q-switchingpulse of a CO_2 laser 86−29210
gas, IR absorbing, in intracavity cell, CO_2 pulsed laser freq. dynamic tuning 87−33092
gas laser with nonlinear absorption, technical fluctuations anal. 85−12796
gas laser with nonlinearly absorbing cell, statistical characteristics of emission 87−12397
gas ring laser with intracavity nonlinear absorpt., freq. modulated reson. in radiation *(German)* 87−68553
Hankel algorithm, finite, for intense opt. beam propag. in saturable medium 86−36584
heat-treated optical fibres in H_2 atmosphere, visible-region loss rel. to photobleaching 85−41134
holographic recording in green spectral region, emulsion 86−36604
hyperchaos in saturable absorber laser 88−51851
I-O_2 laser, saturation kinetics 85−18876
injection laser Q-switching with ultrashort absorber recovery time 88−20661
intracavity femtosecond-pulse compression with the addition of highly nonlinear organic materials 88−27266
iodomethane saturable absorber for CO_2 laser, Shilnikov dynamics, optical instabilities and chaos 88−58421
laser, periodically driven, with intracavity saturable absorber 88−51853
laser discrimination charact. profile and freq. shift stabilised by saturated absorption 88−20722
laser dyes, photostability in polyurethane under light excitation of different intensities 88−40346
laser intracavity absorption dynamics 85−56742
laser systems with fast saturable absorber, passive mode-locking, transient evolution 85−51216
laser wavemeter, calibrated with saturated absorption of ^{23}Na spectral line *(Chinese)* 86−54065
laser with saturable absorber, dynamic effects in optical bistability 85−41487
laser with saturable absorber, linewidths, Fokker-Planck approach 88−72292
laser with saturable absorber, optical bistability and chaos 88−65845
laser with saturable absorber, optically bistable, stationary, harmonic and pulsed operations 85−7341
laser with saturable absorber, regular and chaotic dynamics 88−72386
laser with saturable absorber and inhomogeneously broadened line, optical instability conditions 88−34125
laser with saturable absorbers, optically bistable, time depend. of bifurcation diagram 85−7342
logic gate, light triggered, high-speed config. with laser diode, optical computer appl. 85−29733
malachite green, Rayleigh-type optical mixing, high-order effects 86−3309
metal vapours, resonance atomic media, holographic pattern recognition applications 87−39257
methane, propagation of saturating laser beam 88−27258
methane 3.39 μm system, twofold critical cavity laser, symm. saturated absorpt. peak 85−12899
methane stabilised He-Ne laser, frequency meas. of methane hyperfine line 87−14449
methane/He-Ne laser frequency standard accuracy improvement 87−14447
methanol CW FIR laser pumped with CO_2 waveguide laser, IR absorption meas. 85−7378
mode-locked lasers containing reverse saturable absorber 86−3004
MQW structure saturable absorber for laser diode mode locking, theory 85−56649
nanosecond to femtosecond pulse generation by passive Q-switching and mode-locking 88−51878
naphthalene solution, passive compression of KrCl laser pulses 85−2221
nonlinear couplers, limitations to all-optical switching in presence of absorpt. and saturation 88−33807
nonlinear external cavity used for improving mode-locking 88−51884
novolak/diazoquinone photoresist, reciprocity failure with 364 nm exposure 88−26111
open resonator with small Fresnel no., saturable absorpt. medium effects on field 85−46469
optoelectronic single quantum well devices based on electron bleaching of exciton absorpt. 87−61051
oscillatory and chaotic output of an induced absorber in a ring cavity 88−40276
p-n junction, optical absorption saturation, Franz-Keldysh effect due to barrier-layer photovoltage 86−28002
p-type semiconductor quantum wells, free-carrier absorption and saturation of intervalence-band transitions 88−8295
passive *Q* switch with an activated absorber, CO_2 laser pulse control 87−54375
passive mode-locked lasers, single pulse solutions, stability criteria 86−29027
passively mode-locked laser, transient evolution and steady-state emission 86−54178
pentacarbocyanine dye saturated absorber, substituent effect influence on relax. time and laser output parameters 86−54215
pentamethylidyne dye saturable absorber, colliding pulse mode locking of Nd lasers 86−68493
pentamethylidyne dye saturable absorber, colliding pulse mode locking of Nd:glass laser 87−61124

optical saturable absorption continued
pentamethylidyne saturable absorber for laser mode locking *(Chinese)* 87−54397
phase conjugation of laser beams 87−12594
photolithography contrast enhanced, appl. of photobleaching processes in microlithography 86−63373
photorefractive crystals, degenerate two-wave mixing, stationary energy transfer intensity depend. 85−62657
photoresists, nonlinear, exposure bleaching 87−74147
planar wave self-focusing instability, saturable amplification influence 88−34132
plane parallel semicond. plate, intense monochromatic light transmission, nonlinear optical conditions 85−62653
plasma masers, passive mode locking with saturable absorbers 86−3001
polymethine dyes, passive mode locking of Nd:$YAlO_3$ laser, optimum regime 85−29799
polymethine laser dyes, in polymer matrix, near IR radiation generation, photobleaching *(Japanese)* 87−68409
pulse shaping in saturable media, calc. with consideration of phase memory 85−12966
pyridine dye laser, synchronously pumped, femtosecond pulse generation using saturable absorber 87−39026
Q-switches, dye-cell, charact. and appls. 87−61209
Q-switching bifurcation in saturable absorber laser 88−51850
radiation resistant, image fibres, photobleaching effect, expt. study 87−46546
reverse saturable absorbers, engineering for desired wavelength 86−58962
reverse saturable absorbers, optical props. and appl. 86−68634
rhodamine 110 dye laser, CW, passively mode-locked, subpicosecond pulse generation 86−48367
rhodamine 110 dye laser, passive mode locking and dispersion compensation 87−33122
rhodamine 6G laser, passive mode locking in yellow region 86−29089
rhodamine 6G laser, tunable femtosecond, synchronously pumped by compressed second harmonic of Nd:YAG laser 85−41355
rhodamine 6G laser with Brewster prisms, hybridly mode-locked 87−7287
rhodamine 6G soln. saturable absorbers, conc. depend. absorpt. recovery time 86−54204
rhodamine 6G-DODCI femtosec. dye laser synchronously pumped by Nd:YAG laser, stabilisation 87−18931
rhodamine 6G-sulphur rhodamine 101 laser, CW, passive mode locking 87−7280
rhodamine 6G/DTDCI laser dye mixtures, undamped relaxation oscillations due to self-gain-switching 87−2059
rhodamine 700 dye laser, CW, hybrid mode locking 86−48365
rhodamine 700 dye laser, CW, passive mode locking 86−48362
rhodamine B dye laser, CW, passive mode locking 86−48364
rhodamine B laser, femtosecond hybrid mode locked 87−2094
rhodamines, aq. micellar solns., flash lamp excitation, photostability, lasing props. 87−33121
ridge waveguide laser array, in-phase coupling using distributed saturable absorpt. in subordinate laser cavities 87−54301
ring cavity, twin photon beam generation, intracavity four-wave mixing 87−33239
ring cavity laser system, externally pumped, multistability, intermittency and remerging Feigenbaum trees 85−41496
ring laser, multimode with saturable absorber, mode intensity and optical bistability, single-mode operation 86−68580
ring laser, multimode with saturable absorber, mode intensity and optical bistability, multimode operation 86−68581
ring laser with saturable absorber, stability, effect of cavity and atomic detunings 88−65804
ring lasers with nonlinear absorbers, mode locking 85−41430
ruby, phase conjugation by degenerate four wave mixing, saturation effects 87−68625
ruby mode-locked laser with chlorophyll d as saturable absorber *(Chinese)* 88−14144
saturable absorber-containing lasers, periodic transverse struct. 88−58610
saturated absorption spectra, effect of saturated beam-probe beam intersection angle 88−58661
self-focusing, small-scale and whole beam, of intense laser beams in saturable absorbers 86−36583
self-focusing in absorptive CW optical beam propag., perturbation theory 85−46466
semiconductor doping superlattices, n-i-p-i crystals 87−6418
semiconductor laser, common-cavity two-section, bistability, computer simulation 87−68620
semiconductor laser, optical stability and chaos with saturable absorber 85−24530
semiconductor laser, saturable absorpt. region, mode locking in colliding pulses 85−62604
semiconductor laser resonators, bistability, semiclassical model 85−35784
semiconductor lasers, bistable, inhomogeneously pumped, saturable absorber length effects 88−2250
semiconductor lasers, nonlinear light-current charact. and anomalous pulse response 88−2230
semiconductor lasers, self-sustained pulsation and bistability conditions 86−3158
semiconductor with induced absorption in ring cavity, optical bistability and chaotic output 87−39239
semiconductor-doped glasses for nonlinear waveguides 88−65333
semiconductors, transient nonlinear optical effects 87−46993
semiconductors, wide gap, two-photon interband absorption of light taking account of extrinsic conditions *(Russian)* 85−41467
single mode laser, threshold phenomena, influence of absorbing atoms in laser cavity 85−7338
single-mode, standing-wave containing saturable absorber freq. tristability 88−51891
solid lasers with passive mode locking, stationary ultrashort pulse theory 87−26364
space inhomogeneity and detuning effects in saturable absorber laser 88−51931
split stripe lasers with saturable absorbing region, bistability 85−18956
straight-band semiconductors, two-photon absorpt., saturation 88−51948
styryl compound dye laser, CW optically pumped tunable from 840 to 1030 nm, ps and fs pulse generation 87−75035
subpicosecond pulse generation in branched passively mode-locked Nd-glass laser using saturable dye 85−51152
surface-emitting-type optical threshold device, operation anal. *(Japanese)* 87−61168

optical saturable absorption continued
third harmonic stabilised laser, emission freq. shifts due to refr. index saturation 85−24660
three-level medium, ultrashort pulse train propag., population trapping and coherent bleaching calcs. 87−26540
two-level system, Rayleigh-type optical mixing, high-order effects 86−3309
ultrashort pulse generation by laser balancing self-phase modulation, group-velocity dispersion, saturable absorption and gain 85−29874
ultrashort synchronised independently tunable light pulse generation using antiresonant ring cavity 86−42607
undecamethylidyne saturable absorber for laser mode locking *(Chinese)* 87−54397
waveguides, ion-exchanged semiconductor-doped, nonlinear optical effects 88−33734
xanthane dyes impregnated into modified PMMA, lasing 85−56568
YAG laser, passive mode locking, optimal saturating absorbers study 86−9820
YAG laser, ultra-short pulse energy stability, saturable absorption by dyes 85−12833
AlGaAs, femtosec. absorpt. saturation of hot carriers 88−40331
AlGaAs laser, mode hopping suppression by saturable absorber 87−33197
(AlGa)As lasers, separately pumped, continuous control 87−12451
AlGaAs, photoexcited carriers, ultrafast relax. dynamics, saturable absorpt. coeff., calc. 85−40442
AlGaAs tandem-type DH laser with colliding pulse mode locking, subpicosec. pulse generation 86−42550
$Al_{0.2}Ga_{0.8}As$, femtosecond hot carrier energy relax., absorpt. spectral hole burning 88−12933
$Al_xGa_{1-x}As$, hot carrier scatt. processes, experimental determ. 87−73995
AlGaAs/GaAs MQW structure, MOCVD grown, nonlinear absorption 87−54395
AlGaAs-GaAs epitaxial Fabry-Perot resonator, optical bleaching 88−13929
Ar^+ laser with nonlinear intracavity absorber, hysteresis 85−56519
$Ba_2NaNb_5O_{15}$, crystal, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
$BaTiO_3$, crystal, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
CO_2 infrared laser with intracavity absorber, static and dynamic nonlinear behaviour 87−75010
CO_2 laser, chaos 88−45355
CO_2 laser passive Q-switching pulsation, deterministic chaos 88−65805
CO_2 laser, pulse shape and phase diagram in passive Q-switching 85−24451
CO_2 laser saturation peaks, absolute frequency determ. observed in external absorption cell 86−58885
CO_2 laser system, four-beam, construction and preliminary expts. 85−51126
CO_2 laser with intracavity absorber, Q-switching and bistability 87−54229
CO_2 laser with intracavity saturable absorber, laser instability and chaotic pulsation 88−51852
CO_2 laser with methanol and methyl fluoride saturable absorbers, bistability and passive Q-switching 85−2200
CO_2 laser with saturable absorber, bistability, dynamic behaviour 87−61219
CO_2 laser, with saturable absorber, homoclinic orbits and cycles in instabilities 88−40138
CO_2 laser with saturable absorber, passive Q-switching pulsation, deterministic chaos 88−51937
CO_2 laser with saturable absorber, sinusoidal self-modulation 88−27257
CO_2 pulsed TEA laser, with CO_2 saturable absorber, passive mode-locking *(Korean)* 87−74990
CO_2, saturation peak absolute freq. meas. 86−55807
CO_2 two-frequency laser, delay control between pulses by passive Q-switch 87−54243
CdS, exciton-related optical nonlinearities 88−51920
CdS, optical nonlinearity and bistability 85−35869
CdS, three types of electronic optical bistabilities 87−26537
Cr^{3+},Nd^{3+}:$Gd_3(Sc,Ga)_5O_{12}$ laser, ultrashort pulse generation by passive mode locking 86−3119
CuBr microcrystallites in glass, exciton-related optical nonlinearities 88−51920
Er^{3+} doped single mode fibre laser, optical bistability 88−65873
GaAlAs DM injection laser with external dispersive cavity, bandwidth limited pulses 85−62625
GaAlAs:Te cladding for mode-hopping noise suppression in semiconductor lasers by saturable absorption 86−3155
GaAlAs-GaAs injection lasers, Q-switched, optical pulse generation, large signal behaviour 86−15719
GaAs, femtosec. absorpt. saturation of hot carriers 88−40331
GaAs, femtosecond hot carrier energy relax., absorpt. spectral hole burning 88−12933
GaAs, photoexcited carriers, ultrafast relax. dynamics, saturable absorpt. coeff. calc. 85−40442
GaAs, pure and In-doped, semiconducting crystals, defect charactn., recovery charact. of bleached absorpt. method 88−58693
GaAs/GaAlAs MQW saturable absorber in external resonator, mode locking of GaAs laser 85−12875
GaAs/GaAlAs, proton-bombarded multiple quantum struct., fast nonlinear optical response 85−41452
GaAs-$Al_xGa_{1-x}As$ MQW, intersubband absorpt., optical saturation 88−65828
GaAs-AlGaAs FET guided-wave optical modulator based on free-carrier induced bleaching 88−14052
GaAs-AlGaAs MQW fabricated by MOCVD, nonlinear measurements 88−65867
GaAs-AlGaAs guided-wave FET optical modulator based on free-carrier bleaching 88−45221
GaAs-AlGaAs quantum wells in waveguides, physics and appls. 87−12235
GaAs-GaAlAs MQW saturable absorber, passive mode locking of GaAs laser, subpicosec. pulses 86−68527
GaAs-GaAlAs MQW structure, saturable excitonic nonlinearities for GaAs laser mode locking 85−56648
GaAs-GaAlAs fast MQW absorber for mode locking of semicond. lasers. 87−26543
GaAs-GaAlAs heterostructure, integrated-optics saturable absorber, Franz-Keldysh effect 88−14270
GaInAs, photo-excited carrier relax. 86−8805
GaSb/AlGaAsSb heterolasers with strip contact, bleaching of passive regions 86−42577
$GdAlO_3$:Cr^{3+}, phase conjugation by degenerate four wave mixing, saturation effects 87−68625
Ge-As-S films, selective solubility 86−28204
He-Ne laser, I_2 stabilised, metrological props. 86−3092

optical saturable absorption continued
He-Ne laser at 633 nm, I_2 stabilised, lens frequency shift calc. 88−27061
He-Ne laser, freq. stabilisation with modular electronic system 85−2229
He-Ne laser stabilised by methane saturable absorption, effects leading to frequency shifts 87−26303
He-Ne laser tunable single-mode using saturable adsorption for mode selection *(Chinese)* 86−36377
He-Ne lasers stabilised with $^{127}I_2$, asymmetry of nonlinear resonances and frequency shifts 86−68448
He-Ne/I_2 laser at 0.63 μm, narrow spectral line acquisition 88−33949
He-Ne/I_2 laser, two-mode, frequency resonances 85−35702
He-Ne/methane lasers, FM resonances and their use for frequency stabilisation 86−68449
He-Ne/methane ring lasers stabilised using FM resonances, frequency reproducibility 87−2075
He-Ne-$^{127}I_2$ laser power profile and absorption in 0.63 μm range 88−20564
He-Ne-CH_4 laser stabilised by saturated absorption, second-order Doppler shift 88−51739
I photodissociation laser, acousto-optic active mode locking, supplementary saturable absorber effect 85−29778
I_2 absorbing cell of He-Ne laser 88−14281
I_2 saturated absorption lines identification, excited with green He-ne laser 87−12549
I_2, saturated adsorption, laser stabilisation, freq. shifts 86−29069
$^{127}I_2$ saturated absorpt. rel. to natural power fluctuations of He-Ne laser 88−14114
InAs, bandgap resonant optical nonlinearities, use in optical bistability 86−22486
$In_{0.53}Ga_{0.47}As/InP$ multiple quantum wells, nonlinear spectroscopy 87−68436
InGaAs-InP MQW excitonic states, nonlinear optical props. and appls. *(French)* 88−8297
InGaAsP-InP DH lasers, spontaneous emission spectra, hole burning obs. 85−7460
InGaAsP-InP bistable lasers, temp. depend. 87−7362
KrF electron beam pumped laser, parametric studies 87−38982
KrF laser, multiplexed short-pulse amplification, transient dynamics 88−58424
KrF laser system, electron beam pumped, characts. 88−8129
LiF colour centre laser, passive mode locking 88−14159
LiF cryst. with F_2 centers, bleaching effect, absorpt. and luminesc. study 85−56808
LiF with F_2^- centres as saturable absorbing filter for laser mode locking 86−48377
LiF:F_2^- crystal as saturable absorber for Nd:YAG laser Q-switching 86−63787
LiF:F_2^- saturable absorber for mode locking of Nd:glass laser 85−35718
Nd:YAG laser colliding pulse mode locking using pentamethylidyne dye saturable absorber 87−12425
Nd:YAG regenerative amplifier with thick saturable absorber, temporal compression of light pulses 85−12956
Nd:YAG ring laser with nonlinear absorber 88−20605
Nd:$YLiF_4$ laser, ultrashort pulse active/passive mode-locking using saturable absorber 87−33133
Nd:glass-fibre amplifier, light pulse shortening 85−46373
Nd:phosphate glass laser colliding pulse mode locking using pentamethylidyne dye saturable absorber 87−12425
Nd:phosphate glass lasers, passively mode-locked, intracavity pulse compression 86−63789
Nd^{3+}:YAG laser passively mode-locked by saturable absorpt. filter, ultrashort pulse generation 87−18940
Nd^{3+}:YAG laser ultrashort pulse generation 87−75207
Nd^{3+}:YAG laser with unstable resonator, short giant radiation pulse form., bleachable dye Q-switch 87−54281
$Ni(OH)_2$ electrochromic films on transparent/conducting substrates for electrochromic windows 88−13944
O_3 saturable absorber for KrF laser 87−12554
OsO_4, nonlin. absorbing medium for CO_2 laser, reson. asymm. and freq. shifts 86−29041
OsO_4 saturated absorption for stabilised CO_2 laser, freq. reproducibility of 10^{-12} 88−58437
Rb D_1 and D_2 absorption lines, appl. as freq. standard for semicond., laser freq. stabilisation 88−40206
SF_6 absorption peak, freq. stabilisation of CW CO_2 lasers 86−42489
SF_6 buffered by C_5H_6OH and Freon 502, 3-ns pulse transmission at 10.6 μm 85−12971
SF_6 saturable absorber in CO_2 laser, Q-switch anal. 85−41306
SF_6 saturable absorbers in CO_2 laser, dynamic behaviour 86−22502
SF_6 solution in liquid Ar as nonlinear cryogenic filter, investigation of processes using CO_2 laser pulse shape 85−29680
SiO_2 optical fibres, step index, photobleaching 88−72052
SiO_2, silica fibres, gamma irradiated, selective photobleaching, appl. to hardening of digital optical link 88−72053
$Sr_{1-x}Ba_xNb_2O_6$, optical phase conjugation in nonresonant and saturable absorptive/resonant systems 88−27284
Ti:sapphire laser crystal, saturation of green absorption 88−51781
XeCl excimer laser, discharge pumped, spectral gain, absorpt. coeff. 85−2217
XeCl excimer laser, generation and amplification of sub-pS UV pulses 87−33098
XeCl excimer laser pulse shortening with saturable absorbers 85−24635
XeCl laser, long pulse, generation of 300 psec pulse by direct mode locking using acousto-optic modulator and saturable absorber 85−2225
XeCl laser, passive mode locking using dye saturable absorbers 85−2197
XeCl laser, short pulse generation and compression 85−7368
XeCl lasers, subnanosecond pulse generation using saturable absorber 85−56744

optical saturation
see also optical saturable absorption
coherent nonlinear coupler, power-depend. switching in presence of saturation 88−2021
coherent nonlinear directional coupler, power depend. switching in presence of saturation 87−68026
coupled lasers with homogeneous gain, saturation effects 87−26254
crystalline powder IR dispersion filters, nonlinear laser radiation scatt. 85−56392
CW-laser spectroscopy, principles, techniques and apparatus 88−27218
DFB diode laser, multielectrode type with saturable absorber, tunable optical-wavelength conversion 87−75096

optical saturation continued
DFB laser with end reflectors, gain saturation approx. anal. 86−42503
diode laser oscillator cavity, injection locking 86−42555
directional couplers with two level saturable media, parameter tradeoffs 87−74727
double-pass amplifier with phase conjugate mirror, finite light beams energy characts. and struct. 86−58966
dye laser, flashlamp pumped, phase conjugation in gain saturation 87−61235
fibres, polarisation-preserving, Raman amplification at 1.4 to 1.5 μm, saturation characteristics 85−41155
FIR lasers, optically pumped, saturation effect *(Chinese)* 88−72403
FIR optically pumped laser, saturation effect and output power 86−15622
four-wave resonant parametric interaction with signal wavefront reversal in nonmonochromatic pump field 86−3292
free electron laser, amplifiers, nonlinear anal. in 3D 86−9887
free electron laser, electron movement, gain saturation *(Chinese)* 88−72335
free electron laser mode propag. at saturation 88−2288
free electron laser saturation, approx. scaling laws 87−46924
free electron lasers, high-gain, saturation onset 86−22424
free electron lasers, quantum theory of large gain, saturation and photon statistics 85−35809
gas laser, optically pumped, standing wave, gain saturation 85−41330
glasses, photochromic, bistable optical device, transmission intensity meas. *(Spanish)* 86−68629
hot electron beam in undulator with transverse mag. field, stimulated emission 88−65754
intensity fluctuations in atmospheric laser propagation, amplifier saturation effects 87−54585
laser amplifier, heavily saturated, pulse propag., laser parameter anal. 86−36551
laser efficiency, effect of resonators and beam quality *(German)* 88−58606
laser mirror using degenerate four-wave mixing in saturable amplifier 87−12535
laser noise-amplifier model, grain saturation, linewidth formula 85−18825
lasers with acoustically distributed feedback, saturated resonant transitions, lasing dynamics 86−63744
lasers with saturable gain and distributed loss, 1D model 87−61057
loaded unstable resonator, EM field distrib., saturated gain effect on mode profile 85−46430
logic operations, optical digital by two-beam coupling in photorefractive material 86−54201
many-level laser media, saturation effect 85−41302
methane/He-Ne laser radiation, frequency resonance of saturated methane transition with resonator length modulation 86−48335
mirrors, four-wave hypersonic reversing in saturation regime 85−24666
non-Kerr-like media, nonlinear slab-guided waves 86−68619
nonlinear couplers, limitations to all-optical switching in presence of absorpt. and saturation 88−33807
nonlinear optical amplifier, strongly saturated, statistical anal. 88−27287
nonsteady induced scattering of light, nonlinear problem, self-similar solutions 88−2365
planar waveguides, guide wave index saturation with power 88−13919
semiconductor active directional coupler, optical switching by saturation-induced phase changes 87−61226
semiconductor electron beam pumped lasers, amplified spontaneous emission 87−39034
semiconductor gain medium carrier-induced refractive index change, saturation effects 87−26418
semiconductor junction laser saturation effects 88−2245
semiconductor laser, constant current driven, obs. of amplitude squeezing 87−39123
semiconductor laser optical amplifiers, analytical model 85−29838
semiconductor lasers, spectral linewidth, injection-current fluctuations effect 88−45434
solitons in optical bistability, saturable or Kerr media 85−41494
spatiotemporal instabilities in a saturable homogeneously broadened ring cavity 88−72412
stimulated Brillouin scattering phase-conjugate fidelity meas. 88−2374
stimulated Brillouin scattering saturation at high values of pump energy above threshold 88−14274
stimulated Raman scattering and stimulated Brillouin scattering energy saturation in quasi-stationary regime and phase conjugation 85−29921
stimulated scattering in amplifying medium, threshold and conversion efficiency 85−56798
surface waveguide nonlinear props. 87−33313
TM-polarized nonlinear slab-guided waves in saturable media 87−19048
two-colour gain saturation in optical amplifier 87−46969
two-photon laser oscillation process *(Chinese)* 87−74951
two-section laser, internal parameters determ. 85−2369
V-V processes effect on threshold conditions and saturation of lasers *(Russian)* 88−20532
wavefront reversal in optical signal amplifier, negative image production 85−41508
waveguide, saturable nonlinear with appls. to broad-area semiconductor lasers 88−13921
AlGaAs-GaAs heterostructure travelling-wave amplifier based on injection laser diode 87−33195
Ar acousto-optically mode-locked ion laser, gain saturation phenomena, discharge current meas. 88−8257
CO gas laser medium, props. probing using optogalvanic effect 85−56486
CO_2 laser oscillator/amplifier systems, beam characts. 88−2173
CO_2 round-trip amplifier with wavefront-reversing mirror, energy characts. 87−26294
CO_2 two-pass amplifier for operation with wavefront reversing mirror 85−41340
CO_2 waveguide amplifier, IR DC-pumped, amplification and saturation 86−3012
CO_2 waveguide laser excited by longitudinal alternating-current capacitance discharge, gain and saturation 86−9749
CdI laser, injection locking and saturation intensity 85−29773
CdS, linear and nonlinear optical props. of free, bound excitons, bistable device appl. 85−56793
Cu vapour lasers, saturation 88−14098
GaAs, combination-type, third-order nonlinear susceptibility at 10.6 μm, phase conjugate signal 87−61243
Ge valence band direct optical transitions inversion, gain saturation 88−2197
HF CW chemical laser, sat. effects 86−9722

optical saturation continued
InGaAsP, 1.5 μm travelling wave semiconductor laser amplifiers, homogeneous gain saturation 87−68445
KrCl excimer laser, unsaturated losses and saturation intensity 86−54073
KrF excimer, subpicosecond gain dynamics, saturation energy density, molecular reorientation 88−27041
KrF, high energy picosecond pulses generated at 248 nm, saturation fluence 88−45362

shutter, electro-optical, sub-microsec. 85−29648
soft X-ray optics and technology, conf., Berlin, Germany (Dec. 1986) 88−18302
SOK-1 laser optical system with television attachment 88−72364
spectral response meas. system for large-area solar cells 88−31018
spectrometric lidar, optimising optical system parameters 85−3514
staircase scanning of light beam, method for optical storage 86−36618
strategic defense potential of IR systems 88−22208
submicron 1:1 optical lithography 86−63384
surface profile transducer, optical 88−47679
telecentric scanner for 3D sensing, triangulation system 86−22200
television camera operation, energy parameter determ. 88−74122
thermal imager using CVROS scanner and SPRITE detector 87−63272
thermal imaging system inflight resolution evaluation 85−47841
thermonuclear reactor, laser focusing optics parameters 85−56907
three-dimensional striped object meas. by binocular stereoscopic vision 85−64295
throughput and coupling in optical fibres 85−1956
time parameters of systems seeking sources of optical radiation 88−53693
triangulation system with expanded range of depth for 3D sensing 86−22199
truncated Gaussian laser beam optical system image quality 85−56754
TV camera connection to computer, linearity and transfer function study *(Spanish)* 86−38060
VLSI photolithographic optical scanning systems, future and potential 85−7028
VUV laser pumping systems 88−20705
wavefront reconstruction from noisy slope ordifference data using the discrete Fouriertransform 86−49014
wavefront reversal of multifrequency radiation by four-wave interaction, quality 85−51262
wavefront sensor error estimation using Cramer-Rao lower bound 86−50237
Wigner distribution function from single object transparency, optical system for efficient display 87−19864
Wigner distribution function of 2-D signals, generation by parallel optical processor 85−7937
X-ray lithography, SR-1 step-and-repeat system, mark detection characts. 85−1615
X-ray mirror testing, computer controlled coord. meas. machine 88−22437
X-ray synchrotron radiation monochromators, diffraction props., optical systems and dynamical theory 87−71067
Zig-Zag Reflection Interferometric Light Switch for a multimode fiber optical communication *(Japanese)* 85−31028

optical systems continued
Ar laser based system, setting up requirements 85−18836

optical telescopes *see telescopes*

optical television recording *see video recording*

optical testing
Used for testing of optical components. For testing by optical means see materials testing or nondestructive testing
see also optical instrument testing; optical workshop techniques
3m 0 Thermovac test facility clean vacuum system design 88−30076
1300 nm single mode laser module, development 88−72332
abraded fibres, static and dynamic fatigue testing 86−2683
acceptance testing for ultra-precision machines 88−42281
acoustic emission, appl. in optical fibre cutting and fibre cut-end inspection 88−65216
acoustic fiber waveguide coupler 88−58163
acousto-optical modulator crystal testing using Bragg angle meas. technique 85−31610
adaptive mirrors, local deform. monitoring using holographic interferometer 87−75257
Advanced Test Accelerator diagnostics 88−36328
Advantest optical spectrum analyser and TQ 8214 meter for laser/fibres testing-meas. *(Italian)* 88−22680
Amid IR fibres, test facility design for propag. characts. meas. 88−58123
Antares laser alignment system operational performance 85−19000
apparatus for measuring the refractive index profile of an optical fibre 87−21267
AQ-6310 optical spectrum analyser, broadband range meas. with speed and accuracy 88−42009
aspheric lenses, precision molded, for camera or compact disk systems 87−26121
aspheric lenses, replicated, for optical recording, moulds and meas. 85−51016
aspheric surface contours, direct phase measurement 87−49926
aspheric surface figure measurement using mechanical profilometry 88−4634
aspheric surface meas., using laser CCD light diffraction analysis 88−53876
aspheric surface testing, automated interferometric system 88−4302
aspheric surface testing with computer-generated holograms, adjustment and shape error anal. 86−3321
aspherical focusing lenses for high-power multi-wavelength laser systems 87−33243
aspherical lenses as high power laser focusing optics 87−46628
aspherical objective lenses for compact disc players, design and measurement 87−46625
asymmetrical elliptical preforms or fibres, index profile meas. 87−25956
attenuation due to H interaction with fibres causing aging 88−39891
automated electro-optical system for production testing, in optical fire control system production 85−31339
Automated environmental simulation model for analyzing wound fiber optic bobbins 88−45117
automatic high precision evaluation system for laser scanners *(Japanese)* 86−44104
automatic laser diode test system *(Japanese)* 87−54290
automatic photoheterodyne interferometric system for control of optical details 88−67666
backscatter diagrams of lightwave conductors, attenuation meas. *(German)* 86−28838
ball-bed mode mixer for fiber evaluation and micro-optic device assembly 87−46533
beat length meas. using non-modulating elasto-optic point perturbation technique 88−39936
bent optical fibre cable, strain meas. 86−28878
biconical tapered couplers, automated manufacture and charactn. overcoupled operation 87−68137
bidirectional scattering distrib. function meas. using computer controlled facility 87−29321
bimodal fibre sensor, linear phase detection 88−47544
birefringent fibre stress location sensor 86−48186
buffer tube cable, performance characts. 88−22158
cable single-ended distance-resolved loss meas. by OTDR 88−35524
calorimetric optical fibre transmission power meter having self-calibration function 88−26759
CCD image sensor coupled to fibre optic faceplates, modulation transfer function concept extension 88−4482
CCD line camera, microcomputer-controlled, light guiding fibre devices meas. appl. *(German)* 87−53990
centering accuracy meas. of cylindrical lens, noncontact interferometric technique 87−12282
channel waveguides, single-mode, coupling constants, nondestructive eval. 88−72149
chromatic dispersion meas. of multimode optical fibre waveguides *(Czech)* 87−7099
chromatic dispersion measurement system using 'n' LD light sources different in wavelength 87−8753
chromatic dispersion measuring instruments, calibration 88−42305
chromatic dispersion of single-mode fibres meas., using GaInAsP lasers *(Czech)* 85−58918
chromatic dispersion temperature dependence of matched-clad, depressed-clad, and dispersion-shifted single-mode fibers 88−39932
CMX solar cell coverglasses and optical solar reflectors, automatic test programmes 88−37457
coatings for high power laser at 1.06 μm 88−26927
coherent optical time domain reflectometry introduction 85−43115
coherent OTDR instrument development for fault location in fibres 87−54003
coherent pattern recognition using a two-stage spatialprefiltering procedure 86−30002
coherent reflectometry with semicond. laser sources, fibre fault location and characterisation 85−43116
collimators for laser diode emission, comparison of microscope objectives and custom lenses 86−3249
communication engineering, Ar laser test light source *(German)* 85−19067
communication equipment and systems, measurement methods and equipment progress review 86−23938
communication systems, test equipment, conf., London, England (May '86) 86−52157
communication transmission systems, testing procedures 88−41690
complementary-correlation OTDR, performance advantages 88−53900

optical testing continued
components for submarine fibre optic communication systems, reliability 87−70055
composite cable containing optical fibre and multipairs, design 88−22155
computer controlled electro-fibre optic system for surface roughness measurement 88−42292
computer generated holograms, distortion-free, for optical element testing *(Japanese)* 87−7457
computer-controlled diagnostic system for discharge laser active media *(Russian)* 88−51724
computerised sensors for roughness evaluation ofsmooth surfaces of optical components 87−3397
conference, optical metrology and optical component manufacture, Delhi, India (Feb. 1985) 86−13257
conference, Quebec City, Canada (June 1986) 87−58513
conference, San Diego, USA (Aug. 1987) 88−43562
conference on test and meas., San Jose, CA, USA (May 1985) 86−13290
connector, high-precision, for test and instrumentation 88−7855
continuous vapour deposited conformed metal films, optical thickness monitor wafer 87−5449
core dopant profiles in weakly fused single-mode fibres 88−26760
cylindrical and spherical part precision, contactless meas. *(Japanese)* 86−24765
cylindrical optics, new test 87−68148
cylindrical surfaces of optical elements, contactless inspection using holographic interferometer 85−12995
cylindrical V-grooved nonmetallic optical fibre cable 85−58138
delay lines for pulse sequence formation 88−65306
design and test results of optical fiber units foroptical submarine cable 85−58139
detector responsivity determination using pinhole diffraction 88−4437
dielectric coatings for laser mirrors, fabrication 87−7194
diffraction grating rhombs, alignment theory and practice 85−18764
digital lock-in techniques for IR detector and fibre optic testing 86−17974
diode laser mode analysis and alignment with precision piezoelectric instrumentation 85−19001
discs, retardation, optical double pass, automated measurement 88−65150
discs and drives testing 87−51854
dispersion characterisation of different single-mode optical fibres 88−65214
distortion-free computer generated hologram, prod., optical testing appl. 86−29257
distributed fibre optic sensor for location of disturbances in Sagnac loop interferometer 88−74465
disturbance in optical fibre location, based on Sagnac loop interferometer 88−39941
dual-mode fibres, intermodal delay meas, technique 86−9468
EBU activity, film and TV camera lens specification development 86−60022
electro-optic sampling technique for testing of fast electronic and optoelectronic devices 86−42665
ellipsometric characterisation of single mode fibres 87−26041
elliptical-core fibre, polarisation mode dispersion meas. by optical heterodyne detection 85−20737
embedded-core structure, optical fibres buckling within elastomers 85−58134
environmental testing of polarisation maintaining fibre coils for optical sensor systems 88−65253
European broadcasting union, specifications for film and TV camera lenses *(German)* 88−35679
fabrication of long length, high strength single mode optical fibres by VAD process 88−65211
Fabry-Perot filters for wavelength demultiplexing, optical monitoring method during growth 87−54150
Fabry-Perot sensor, optical pulse 85−1980
far-field meas. using integrating sphere 87−46531
fault finding and testing in optical fibres, interpretation of results *(German)* 88−65185
fault location in inaccessible cables using semicond. laser amplifying characts. 86−11125
fault location of optical fibres using time-domain reflectometry 86−36141
fault location system based on interferometry for optical waveguide devices 87−53950
fibre, birefringent polarisation-maintaining, mode coupling distrib. meas 87−18668
fibre, chalcogenide glass for IR 85−18664
fibre, modified cladding, meas. and analysis with various input illuminations 88−13881
fibre, optical single-mode, OTDR 85−12587
fibre, quasi-single-mode, sensitive determ. of higher-order modes 87−26004
fibre, single-mode, optical time domain reflectometry signatures interpret. 87−68146
fibre, single-mode, pure-silica-core, transmission characts. and reliability 87−7127
fibre, tolerance checking on diameters during drawing 87−32953
fibre, using Nd:YAG 1319 nm laser 85−18697
fibre adsorption loss meas. using poly(vinylidene) pyroelectric tube 86−2745
fibre and cable, history, props., design and appl., handbook 88−55810
fibre and coupler/connector testing, instruments and techniques 86−15449
fibre and preform refr. index profile meas., error analysis of focusing method 86−2662
fibre axial residual stress measurement 85−18678
fibre axial strain evaluation based on stimulated four-photon mixing process 86−2684
fibre bandwidth measurement using pulse spectrum analysis 86−42231
fibre beat-length meas. through stress-induced scattering 88−58072
fibre cable installation meas. techniques and equipment *(Spanish)* 85−47523
fibre cable integrated OTDR/throughput loss meas. system for environmental testing 87−28604
fibre cable meas. instruments 87−8292
fibre cable testing 88−9581
fibre cable testing 85−8438
fibre cables, construction, splicing and termination methods, optical loss on-site meas. *(Japanese)* 86−59889
fibre cables, fault detection using backscatter technique *(German)* 86−11069
fibre cables, field characterisation 86−53995
fibre characterisation by transmitted near field meas. 87−46522
fibre characteristics and industrial production techniques *(French)* 87−1966
fibre characteristics and standards, conf., Cannes, France (Nov. 1985) 87−36301

optical testing continued
fibre chromatic dispersion, field meas. and laboratory results comparison 88−72079
fibre chromatic dispersion meas. with semicond. source without monochromator *(French)* 86−9577
fibre chromatic dispersion measuring technique 86−63656
fibre components reflection coeff. meas., using dual reflectometer 86−22180
fibre connector design and testing 85−29537
fibre connector dimensions meas., using He-Ne laser and CCD camera 88−45086
fibre connectors, meas. *(German)* 87−25989
fibre couplers, 3×3 type; meas. method for optical phase shift determ. 88−33608
fibre couplers, connectors and splice technology, conf., Arlington, VA, USA (May 1984) 85−5626
fibre coupling losses meas., CCD image sensor appl. *(German)* 86−68250
fibre cut-end inspection method using acoustic emission sensor *(Japanese)* 87−7156
fibre diagnosis using optical-frequency-domain reflectometry 85−29601
fibre diameter monitoring during pulling using dual edge diode beam of light 87−54020
fibre dispersion and light loss meas., using pulse delay method 85−62383
fibre dispersion measurement using only two wavelengths, field-usable method 86−31684
fibre end evaluation before splicing using spatial freq. analysis 87−38815
fibre environmental performance and reliability, standards issues 88−45113
fibre equilibrium mode distribution development, Corning data broadband fibre transient behaviour and steady state mandrel charact. 87−46521
fibre fatigue, cable design 88−51479
fibre fault location by time domain reflectometry 86−53940
fibre fault location technique using pulse reflection *(German)* 88−13830
fibre fault location using freq. modulation techniques 85−41188
fibre fault location using He-Ne laser 87−18732
fibre fault location using optical frequency domain reflectometry 86−48110
fibre fault location with optical time-domain reflectometer performance parameters 86−15450
fibre geometrical parameters meas. using array CCD camera *(French)* 86−9578
fibre light guides diagnosis using He-Ne laser 88−33749
fibre lightguide damage sites and lengths, meas. facilities certification 86−22100
fibre links fault detection method 85−1989
fibre loss meas. by Fourier transform spectroscopy 87−54073
fibre loss meas. by side-illumination technique 85−12575
fibre loss meas. method *(Chinese)* 88−1966
fibre loss measuring equipment using comparison method, submarine cable stability/reliability testing appl. 85−20738
fibre loss spectra, meas. set-up with improved repeatability 86−42283
fibre loss testing, calorimeter design and construction *(Hungarian)* 85−37778
fibre manufacturing processes and testing *(German)* 87−46445
fibre measurement, conf., London, England (May 1987) 87−51750
fibre measurement devices *(Hungarian)* 87−54018
fibre measurements, phase shift techniques, current developments 88−72077
fibre measurements, symposium, Boulder, CO, USA (Sept. 1986) 87−43801
fibre measuring techniques, Bandwidth Test Set *(Italian)* 87−53988
fibre misalignment meas. by unidirectional image obs. *(Japanese)* 88−58157
fibre mode field diam. meas. using far field pattern method 87−46530
fibre mode field diameter: toward a standard definition 87−32974
fibre mode field radius meas. 87−54076
fibre nondestructive refraction index characterisation using phase contrast scanning optical microscope 85−56334
fibre optic cable, design, fabrication and testing 85−58141
fibre optic cable, power loss meas. during outside plant installations 85−8397
fibre optic cable characterisation under large tensile loads 85−35422
fibre optic cable characterisation using signal recovery techniques 85−12558
fibre optic cable improvements and developments 85−8389
fibre optic cables, OTDR measurement for quality control 88−26817
fibre optic cables losses meas., using Siemens universal reflectometer 87−49109
fibre optic communication cables and lasers testing, meas. equipment/systems *(Italian)* 88−51449
fibre optic communication lines, comprehensive meas. procedure *(Russian)* 88−72062
fibre optic components reflection coeff. meas. using dual reflectometer 85−56311
fibre optic conductors, cable junctions and error location methods *(German)* 85−12584
fibre optic connector for military radio sets, design features and optical testing 86−37902
fibre optic connectors and splices, test conditions 85−12554
fibre optic guides and cables meas., using Luch instruments 87−56150
fibre optic LAN testing 87−53985
fibre optic LEDs, potential standardised test method 85−12747
fibre optic links, bit error rate, noise meas. on laser diodes single modes 87−20532
fibre optic links, fault location and loss meas. using time-domain reflectometer 85−46148
fibre optic networks, short-haul, testers for fault determination 87−28555
fibre optic passive components, differential mode loss and mode conversion 87−18641
fibre optic power meas. standards accuracy and pitfalls 86−2800
fibre optic power meters, round robin testing results 86−65287
fibre optic sensor testing for process control on offshore oil rigs 88−16174
fibre optic spectral-streak equaliser, plasma diagnostics appl. 85−56345
fibre optic spectrometer, light source wavelength and fibre length meas. appl. 88−42145
fibre optic splice losses, continuous monitoring 88−26816
fibre optic subscriber loop testing system and broadband supervisory equipment, appl. *(Japanese)* 86−4626
fibre optic systems, instrumentation for development, production, installation and maintenance *(Italian)* 87−46457
fibre optic systems, performance test procedures and equipment for contractors 88−39868
fibre optic termini, military specification 88−39955
fibre optic test instrument calibration 88−33702
fibre optic waveguides, testing for long service life 85−41181
fibre optical power meas. *(German)* 87−70833

optical testing continued
fibre optics, development trends 85−62300
fibre optics, fault location using step frequency method 87−34531
fibre optics, longitudinal strain measurements, optical techniques 87−38756
fibre optics, radiation effects, test procedures and standards 88−47086
fibre optics, short-haul and long-haul meas. and appls., conf., San Diego, CA, USA (Aug. 1985) 87−22969
fibre optics, single-mode, standardization 87−38755
fibre optics test standards, effect on production efficiency 86−15468
fibre optics testing by power meter 87−18678
fibre OTDR, range and accuracy in backscatter measurements 87−8755
fibre OTDR tester for cable appls. 85−24298
fibre packagings characterisation procedure relative to microbends 85−46136
fibre parameters meas., techniques and instruments *(French)* 86−70233

fibre refractive index profile meas. using phase-contrast technique 85−46178
fibre refractive index profile meas. using refr. near field method *(German)* 86−58773
fibre reliability improvements via high fatigue resistant composition 88−45114
fibre splice meas. by OTDR from single fibre end 88−39893
fibre splicing using fusing technology with integrated attenuation meas. techniques *(German)* 87−76759
fibre telecommunication link, specialised testing 87−34597
fibre test equipment trends 86−17385
fibre testers review 87−68158
fibre testing, design of Hewlett-Packard HMS=10/HP high precision optical connector *(French)* 88−72017
fibre testing, technical accounting 88−7850
fibre testing techniques in field and laboratory environments 85−50958
fibre testing using self-detecting optical-time-domain reflectometer 85−29600
fibre time domain reflectometry using FM CW ranging technique 86−22111
fibre transmission charact. and defects anal. by SEM 85−29578
fibre transmission loss characteristics during drawing, continuous measurement 87−7080
fibre waveguide, strength increase of welded joints 85−35503
fibre-optic components, automation of testing 86−53971
fibre-optic modal coupler using periodic microbending 86−36186
fibre-optical waveguide, parameters meas. during quartz shell removal by HF *(Russian)* 87−60909
fibreoptic testing, design approach for programmable opt. attenuator 87−40901
fibres, bow-tie and anisotropic, microbending and macrobending behaviour 88−51457
fibres, chromatic dispersion measurement by phase shift method, influence of LP_{11} mode cutoff length depend. 87−46527
fibres, cooling rate of drawing process, effect on 630 nm absorption 88−39894
fibres, digital hand-held tensiometer, quality improvement 88−26813
fibres, fault detection by phase compensated reflectometer 88−26758
fibres, fault location in optical fibres using opticalfrequency domain reflectometry *(Japanese)* 86−9454
fibres, fault location using optical time domain reflectometer with a laser diode operating as light emitter/photodetector 85−37776
fibres, flaw detection by diffr. ellipsometer 86−52570
fibres, hermetically coated, performance and appl. 88−35567
fibres, high strength, long length, proof tests 86−28868
fibres, ionising-radiation hardness, testing and standards 87−68140
fibres, IR, dispersion and attenuation meas. using Pb-salt laser 85−18670
fibres, IR, for medical applics. 88−20380
fibres, mode field diameter definition for splice loss eval. 88−26771
fibres, mode transition matrices for differential mode attenuation and delay charactn. 88−45092
fibres, multimode, mode coupling coeff. determ. using nondestructive single pulse reflection technique 86−2817
fibres, multimode systems, eval. method for modal noise 88−39892
fibres, near-field radiation power density distrib. meas., luminance monitor *(Polish)* 85−4133
fibres, nondestructive refractive index characterisation using phase contrast scanning optical microscope 86−15473
fibres, optical system design with Gaussian beam input *(Slovak)* 87−18619
fibres, optoelectronic HF cross-correlation technique appl. 88−60650
fibres, outside diameter monitoring by diffraction pattern comparison method 86−36211
fibres, polymer, anal. of molecular features for telecommunications appl. 88−39912
fibres, precision-wound, signal loss meas. 88−39920
fibres, quasi-single-mode operating region, meas. of LP_{11} mode loss length depend. 86−48134
fibres, radiation effects testing and standardisation 88−1930
fibres, ref. index meas., comparison of three methods 88−58088
fibres, refractive index profiling and dimensional meas. 87−54071
fibres, relative dia. meas., microinterferometric method 85−50964
fibres, residual stress profile meas. by photoelastic computer tomography 86−28828
fibres, single mode, characterisation methods, review 86−2816
fibres, single mode, chromatic dispersion meas. using phase shift method, precision anal. 87−46526
fibres, single mode, effective mode index meas. 87−54081
fibres, single-mode, cut-off wavelength meas., using near-field system 86−22179
fibres, single-mode, mode diameter and cutoff wavelength meas. 87−54077
fibres, single-mode, mode field radius meas., harmonics detection appl. 87−18601

optical testing continued
fibres, single-mode, nonreciprocity meas. 87−54080
fibres, single-mode, standard meas. procedures 87−14583
fibres, single-mode, thermal dependence of stress-induced birefr. 85−24284
fibres, single-mode and few-mode, phase velocity meas. using prism output coupling 86−28849
fibres, single-mode and multimode, alignment using automatic alignment station 85−18657
fibres, single-mode polarisation maintaining, modal birefringence meas. by heterodyne interferometry 87−54002
fibres, splice loss meas. using local launch and detect technique 88−26770
fibres, step-index, radiation-resist., optical characterisation 85−35409
fibres, strainmeter for fibres and test of its stability 88−65261
fibres, testing using light in flight recording by holography 88−13791
fibres, voluntary standards from EIA and IEC 85−12629
fibres and preform rods refractive index profile reconstruction from transverse interferometric data 87−7070
fibres attenuation changes due to OH ions diffusion *(Czech)* 86−9494
fibres coated at 10 m/s speed, optical and mechanical props. 86−22116
fibres for spacecraft applications 88−13854
fibres geometric characts. meas., using semiconductor emission source 88−33620
fibres geometrical and optical parameters meas., using refracted near field method *(Czech)* 88−28846
fibres in data transmission systems, test equipment and systems *(German)* 87−18654
fibres prooftested to 3.5 GPa (500 ksi), multikilometre lengths 86−22106
fibres single mode, characterisation by equivalent step index and mode field diameter meas. 87−54078
fibres using OTDR with centimetre resolution at 10^{-15} W sensitivity 86−63616
field test equipment for optical fibres 88−60168
film thickness monitoring using optical fibres 88−9996
flame-retardant optical fibre cables, low smoke, halogen free, development 87−8328
FLIR testing improvement using transparencies for IR scene simulation 88−47563
fluorescent lamp-ballast combination performance and photometric testing 86−33820
fluoride glass fibre drawing, optimisation with respect to mechanical strength 88−39911
fluoride glass optical fibre, interferometric meas. of nonlinear refractive index 88−45166
fluoride glass optical fibres, nonlinear refr. index, direct interferometric meas. 88−45147
focusing grating coupler, physical optics anal. 88−33706
FOG-M missile, optical fibre spool testing 88−33703
FOTDR for optical cable fault finding 86−9459
Fourier analysis of complex envelope of echos 86−44443
free electron laser optics coating test device 87−75189
frequency-domain reflectometry, modulation freq. sweeping, for fibre diagnostics 87−8754
frost-resistant fiber-optic cable 88−65195
functional alignment of tilted and decentred optical trains, optical tooling, Antares laser 85−18999
fused fibre couplers, environmental testing 88−45119
fusion-spliced fibres, Zeiss-Linnik interferometric exam. 87−18592
Gaussian laser beam diameter meas. using Ronchi rulings 85−46439
glass fibre lightguides, contaminant critical particle size in high and low modulus coatings 86−22107
glass optical fibres, efficient second harmonic generation, direct testing of model 88−72014
glasses, monolithic, and fibre-optic elements, microhardness 85−12539
graded index fibre diameter measurement using diffr. pattern 87−46517
graded index fibres, longit. strain meas. techniques 87−26030
graded-index fibres, semi-automatic meas. of geometrical data *(German)* 86−9482
gradient index fibre meas. technology, microcomputer appl. *(German)* 86−63661
gradient-index lenses, refr. index profiling by total reflection method 87−54145
GRIN fibre cables, radiation resistant 88−22152
group delays meas. of guided modes, in optical fibre waveguides *(Czech)* 87−32987
heavy-metal fluoride glass fibres, impurity anal. using selectively excited photolum. 87−18606
heterodyne optical time domain reflectometry with fibre phase modulator 85−41187
Hewlett Packard Model 8145A OTDR 88−29486
Hewlett-Packard instruments for optical links testing *(Czech)* 86−4673
high reflectance coating, computer controlled NBS spectral reflectance meas. system 88−16537
high-birefringence fibres, dichroism eval. using crosstalk meas. 87−12117
high-speed, pulsed-laser interferometry 88−42291
hologram analyser testing with one-component optical system for hologram conjugation 86−15810
holographic interferometry appl. to testing concave grating with tonic wavefronts 85−2430
holographic interferometry vibrational testing of X-ray concentrator for astronomical satellite 88−45578
holographic testing of stretchable concave imaging mirrors 87−19078
horizons in optics, conf., Besancon, France (May-June 1985) 86−54
HP 81519A optical receiver for 550 to 950 nm 85−26333
HP 8154B optical sources for provision of stable LED sources for a wide range of applications 88−8072
IC devices, microscope stage control using piezoelectric disks 85−7003
ICs, optical and opto-electronic components testing, development trends 87−74944
imaging devices, advanced, optical test of spatial resolution, practical limits 87−41371
in-process optical metrology for precision machining, conf., The Hague, Netherlands (Apr. 1987) 88−37816
industrial appls. of laser and optoelectronic technologies, conf., Xiamen, China (June 1986) 88−49340
industrial test methods for single-mode fibres and cables 87−20478
installation testing of optical telecommunication cable systems 85−25862
installed optical fibre cables, meas. system for attenuation and pulse dispersion 86−53994
instruments for automated testing of objectives and camera adjustment 87−56503

optical testing continued
integrated optical circuit engineering conf., San Diego, USA (Aug. 1987) 88−49339
integrated optical directional couplers, charactn. by local absorpt. technique 87−60915
interference diagnostics of planar optical waveguides 87−18599
interferometric metrology, 1987 trends and future prospects 88−53877
interferometric metrology, conf., San Diego, CA, USA (Aug. 1987) 88−49348
interferometric testing technology developments and appls. in Japan 88−53878
interferometry and holography appl. to precision meas. 85−51309
IR components with diamond-like coatings development, appl. and testing 87−20955
IR imager performance meas., objective meas. of minimum resolvable temp. difference 87−20958
IR imaging optical systems, two-level testing process 87−20956
IR lens elements and assemblies, spectral transmission meas. 87−21265
IR lightguide, scattering and absorpt. loss meas., calorimetric method 86−9521
IR optical fibres, meas. system for dispersion, attenuation, numerical aperture, optical time-domain reflectometry 87−18721
IR technology and appls., Cannes, France (Nov. 1986) 87−16260
ISDN quality control appl. 88−21764
KOMPASS, measuring program to analyse optical system parameters 88−9882
laboratory investigation of optical fibre parameters 86−58765
laboratory meas. of optical fibre communication parameters for MSc students 86−58766
LANs, optical fibre type, test methods and equipment *(German)* 88−73912
large aspherics, direct contact profilometry 87−49483
laser beam, wide-spot, analysis of optical disc media 88−65151
laser beam power meter, design using fast photodiode detector 85−24634
laser beam profiling and scaling using diffraction edge waves 88−8275
laser damage testing, automating commercial systems 88−14260
laser damage testing, spot size effects 85−7504
laser damage testing, use of hole gratings 85−7493
laser damage testing of optical components, test planning 86−9927
laser damage threshold measurement of optical components at 1.06 μm 85−7503
laser diode collimator, design and testing 88−27243
laser diodes for undersea optical transmission systems, screening by ageing test 86−15707
laser glasses in China, research and development *(Chinese)* 85−18898
laser interferometer for optical components testing *(Czech)* 86−10036
laser mirror, adaptive cooled, construction and testing 86−22449
laser mirrors, reflection coefficient meas. *(Russian)* 88−2328
laser optics, fabrication and testing 87−39179
laser optics effects of surface quality on performance at 10.6 μm 86−22456
laser power meas. and testing with optical attenuators 88−65822
laser printers, optical systems for producing printing photomasters, system examination 88−20477
laser pulse energy nonintrusive determ. and mirror parameter monitoring, opto acoustic method 86−36553
laser scan lens properties, measured by multiwavelength test bench 88−34078
laser unstable resonators with spherical mirrors, misalignment sensitivity 88−34068
laser welds evaluation by optical detection system 85−5818
laser-induced damage research at LANL (USA) 87−33254
laser-scanner system for testing compact discs *(German)* 87−70278
launching light into multimode optical fibres meas., using semiconductor laser diodes, efficiency meas. 88−58167
lens, objective, for recording 3-D ensembles of small-size particles, resolution testing 85−24682
lens quality monitoring using holographic interferometer *(Russian)* 88−2392
lenses, aspherical plastic, optical performance for compact disc use 87−26122
lenses, molded-glass, optical performance, for optical memory applications 88−2078
light guide measurement instruments *(German)* 87−35213
lightwave digital test facility 86−30811
link, installed, attenuation meas., insertion loss modification method 87−74765
liquid parameters meas. using optical fibres 88−58165
Lode Advanced Mirror Program active mirror facesheets, process development 88−61536
long-haul single mode fibre attenuation meas., laser and LED source effects 87−26026
loose tube cables, compression resistance, design 88−22156
loss meas. system, detector selection for production testing 87−68151
losses meas. in fibre waveguide, Elektronika OT-6 optical tester attachment 86−68276
Mach-Zehnder systems for heterodyne fibre polarimetry in different coherence conditions 88−10151
magneto-optical disc testing system , key elements *(Japanese)* 88−72173
manually-positioned line-focus concentrator, optical performance and alignment error meas. 88−16538
manufactured glass, inspection using adaptive Fourier filtering 88−56049
measurement equipment for subscriber optical lines 87−34913
measurements and tests on optical light guide components *(German)* 87−13701
mechanical reliability of optical fibers through fatigue testing 88−45115
metrological principles and developments 88−4667
microfibres, calibration characts. calc. of scanning laser analyzers, diameter meas. accuracy 88−7863
micromachining of optical elements, conf., The Hague, Netherlands (Apr. 1987) 88−49333
mid-IR fibre characts. meas., laser sources and detectors 88−58166
mid-IR fibres meas. for telecommunication appls. 87−70106
milk glasses, radiation strength 85−1952
mirror surfaces, high performance, spectral and parameter estimation problems in metrology 87−19929
mirrors for high-power CW Ar lasers 87−68563
mirrors radiation props. meas. methods *(German)* 85−31609
ML910A optical spectrum analyser, technology for high accuracy and resolution 88−42010
mode partition noise effects in a 565 Mbit/s optical-fibre system 88−65931
mode phase lags meas. device for planar optical waveguides 88−72129

optical testing continued
modulator for motion picture camera, field standard facilities and requirements *(Czech)* 87−68239
module with diode laser, performance *(French)* 88−58558
monomode fibre cut-off meas. method 86−2832
monomode fibre waveguide dispersion meas. from spot size 86−2833
monomode fibres, cutoff wavelength meas. using azimuthal filtering technique 87−53974
monomode optical fibre, optical time domain reflectometer using photon counting technique 87−20486
MS96A high sensitivity optical spectrum analyzer *(Japanese)* 85−26237
multifibre cables, automatic optical characterisation 86−55543
multilayer coated optical components in high power laser systems, optical distortion anal. 88−45264
multilayer dielectric reflectors, UV damage testing 85−7499
multilayer structure characterization for soft X-ray laser research, reflectometer and instrumentation 88−2330
multimode and monomode fibres, automatic meas. system for dimens. characts. and numerical aperture 86−9575
multimode and monomode fibres, refractive index profile determ. *(German, French)* 85−35512
multimode couplers, real time performance anal. during testing 88−13865
multimode fibre attenuation meas., interlaboratory comparison in China 87−26029
multimode fibre industrial meas. methods 87−46520
multimode fibre lightguides testing using optical reflectometer 85−62309
multimode fibre loss, automatic meas. of spectral depend., cutback method and system *(Czech)* 87−12202
multimode fibre source power distrib. charact. by splice offset technique 87−46523
multimode fibres, bandwidth and differential mode delay, European interlaboratory comparison 86−2830
multimode fibres, differential mode delay meas. by far-field filtering 85−15057
multimode fused star couplers, temp. and vibr. tests 85−7223
multimode optical fibre, bandwidth meas. in frequency domain 87−68110
multimode optical fibre cable in BT network, remote-ended time domain bandwidth meas. on installed regenerator sections 85−63708
multimode optical fibre splicing using arc welding *(German)* 85−41156
multimode optical fibres meas., bandwidth meas. techniques comparison 86−63629
multimode optical waveguides, fibre losses meas., *(Czech)* 86−4675
multimode-fiber-type optical directional coupler for OTDR using acoustooptical deflector *(Japanese)* 88−58156
multistage laser amplifier alignment with periodic spatial filtering of beam 85−2263
narcissus as tool for testing thermal imaging systems 87−77133
non-halogenated flame-retardant telecom. and optical fibre cables, development *(Japanese)* 88−28852
Nova laser alignment computer-based control structure and software methods 85−18998
Nova laser three wavelength optical alignment 85−18997
OFDR diagnostics for fibre and integrated-optic systems 85−41133
optical fibre 88−51456
optical fibre communication links, technique and equipment for transmission measurements *(French)* 87−60906
optical fibre control, time domain and frequency domain reflectometry *(French)* 86−22074
optical fibre light guides, numerical aperture determ., automated meas. equip. *(German)* 85−62303
optical fibres, optical time domain reflectometry, coherent detection techniques use 86−48152
optical fibres, polarisation-maintaining, investig. of birefringence with stress-applying parts by means of photoelasticity 88−65190
OS-280M optical submarine cable system, commercialisation test *(Japanese)* 88−28847
OTDR, high performance measuring instruments 87−8251
OTDR, new correlation technique 88−47693
OTDR, submeter resolution, single-mode fibre LAN cabling tests 88−73974
OTDR coherent detect. at 1.3 μm for fibre fault location 86−5555
OTDR for fibre and waveguide investig. 88−1959
OTDR for optical fibre cable meas. 87−8304
OTDR present and future 87−29325
OTDR recent trends 87−35214
OTDR specifications and selection criteria 88−68047
OTDR with precision laser driven circuit 88−29509
OTDRs meet the challenge of single-mode technology 86−65283
overhead fibre-optic cable testing by Sydkraft electric utility, signal transmission *(Swedish)* 88−15462
paraboloidal lighthouse lamp reflectors, aberrations, system design 86−13158
parametric testing of fibre optics 85−24302
passivated optical fibers for harsh environments 88−45120
patterned wafer inspection using optical scanning technique 86−200
PCB and glass masters, using optical pattern analyser and line scanner system 85−45319
photodetector characteristics, wafer level HF meas. 88−74398
Photodyne 2260 XF smart fibre optic field test equipment 88−45076
photoelectric interferometer using phase method of information processing 88−20505
photolithographic lenses, optical performance meas. 85−29072
plano-cylindrical lens curvature radii meas., by opto-electronic method 87−77417
plastic clad silica cable connector termination, radiation exposure and testing 85−35420
platform vibration detection, laser beam meas. 86−63880
PMMA: benzil(benzildimethylketal), optical waveguide fabrication and loss meas. 86−2766
PMMA, real time laser damage detect. by Strehl intensities 86−29218
point diffraction holographic interferometer 88−40417
polarimeter for fibre characterisation using narrow- and broad-band sources 87−18600
polarisation-maintaining fibres, alignment using nondestructive temp. modulation technique 87−53983
polariser, fibre optic, single-mode, in-line, design, testing and performance 87−12170
polycrystalline waveguides, fabrication and testing, losses, grain size reduction 85−2025
porosimetry on optical fibres 88−20337
power meter, HP8151A for 550 to 1750 nm wavelength 85−26489
optical testing continued
printheads, nonimpact, testing device 87−47025
processed surface condition meas. by laser scatterometer *(Japanese)* 86−24761
programmable interferometry 88−4301
projected pattern autofocusing for thickness or roughness meas. *(Japanese)* 86−24766
projection reconstruction of axis-cylindrical object−accuracy improvement by adjusting projection noise distribution *(Japanese)* 88−58158
pulsed wavefront sensing using three-channel phase detector 86−50235
quasiperiodic line structures, statistical characteristics testing by spectral methods 86−50020
radius-of-curvature meter for reflecting surfaces 88−36221
resin coatings, UV curable, for optical fibres, attenuation and buckling props. *(Japanese)* 88−26793
ring gyro physics, conf., Snowbird, UT, USA (Jan. 1984) 85−32878
rotating light source for optical devices characts. meas. 86−24806
rotating linearly polarised light source for optical meas., using acousto-optical filter 87−14576
rugate coated optical components in high power laser systems, optical distortion anal. 88−45265
semiconductor laser-based instrumentation for ocean studies 87−77890
semiconductor optical power meter and their calibration in PTB 88−58169
semiconductor optical waveguides, loss meas. technique 85−52880
sensing in hostile environments, conf., Orlando. Fl., USA (May 1987) 88−31271
sensitivity of optical surface monitoring measurements, increased by use of holographic methods 88−51957
service life of optical fibres after proof testing, estimation 88−45167
side coupler for coupling between laser diode and single-mode fibre 87−68016
silica hollow core waveguide, transmission characts. determ. in 9-11 μm waveband 88−26859
single mode and multimode optical fibres, dispersion meas. 87−26024
single mode fibre, 1.3 μm, intramodal and intramodal dispersion meas. for use at 0.85 μm 88−58093
single mode fibre, field dispersion measurement techniques 85−12628
single mode fibre, installed, chromatic dispersion meas. 88−58092
single mode fibre, mode field radius meas. 88−58091
single mode fibre, OTDR meas. using semiconductor laser 86−53992
single mode fibre cable field tests using 1.3 μm portable OTDR 85−29627
single mode fibre cables, field test with portable time domain reflectometer 86−5557
single mode fibre cables, large scale manufacture and testing 85−20234
single mode fibre characterisation 86−2760
single mode fibre dispersion, routine meas. for factory and field environments 86−53993
single mode fibre meas., OTDR developments 85−29626
single mode fibre mode field radius meas. by far field pattern method 86−2831
single mode fibre mode-field diameter meas. by knife-edge scanning in far field 87−18637
single mode fibre non-Gaussian mode field meas. by far-field axial scanning technique 87−18634
single mode fibre optic connectors and splices, four rod alignment guide concept 85−7218
single mode fibre testing methods for industrial environment, review 87−46519
single mode fibre time domain reflectometer using correlation method at 1.3 μm *(French)* 86−9579
single mode fibres, bending loss charactn. 88−58071
single mode fibres, equiv. step index determ. from mode field diameter and refr. index profile meas. 88−58090
single mode fibres, interferometric meas. of chromatic dispersion 87−26025
single mode fibres, relative meas. of scatter levels, new technique 86−55866
single mode fibres, self-imaging offset meas. 86−15452
single mode fibres, spectral chromatic dispersion, long-distance field meas. method 86−22131
single mode fibres with graded index profiles, mode excitation by lenses 85−41113
single mode optical fibre, mode field radius meas. by near field pattern technique 86−68244
single mode optical fibres, mode field radius meas. by harmonic anal. 86−15453
single mode OTDR, high resolution, meas. capabilities *(French)* 88−53899
single mode waveguides, propagation loss measurement technique 88−20414
single-mode fiber loss meas., light detection technique *(Japanese)* 85−31612
single-mode fiber measurements 88−58164
single-mode fibre, birefr. determ. rel. to fabrication monitoring 86−28842
single-mode fibre, direct meas. of chirped optical pulsers with ps resolution 86−24802
single-mode fibre cables in Italy, expt. results *(Czech)* 87−62990
single-mode fibre characterisation using equalisation wavelengths 87−54075
single-mode fibre chromatic dispersion meas. technique 88−13824
single-mode fibre chromatic dispersion meas. technique, high resolution, review 87−46525
single-mode fibre communication system, optical meas. devices *(Japanese)* 86−28781
single-mode fibre couplers, performance evaluation 85−7213
single-mode fibre meas. and standardisation 87−26021
single-mode fibre spectral attenuation precision meas. 87−46481
single-mode fibre waveguide, chromatic dispersion determ. by interf. method 87−25984
single-mode fibre with axis having periodic perturbation, cutoff wavelength meas. technique 87−7097
single-mode fibres, charactn. using spontaneous Brillouin backscattering technique 87−7083
single-mode fibres, chromatic dispersion meas., comparison of spot-size and pulse delay methods 85−24266
single-mode fibres, chromatic dispersion meas. from Fourier transform of white light interf. patterns 87−38751
single-mode fibres, cut-off wavelength and mode-field diameter meas. 86−36136
single-mode fibres, cut-off wavelength and mode-field diam. meas., standardisation issues, trends 87−46524
single-mode fibres, cut-off wavelength meas. technique *(Slovenian)* 87−53986
single-mode fibres, direct meas. of chromatic dispersion using streak camera 85−48116

optical testing continued
single-mode fibres, dispersion meas. using LEDs, modulation freq. shift technique 87−74680
single-mode fibres, dispersion-optimised, highly accurate charactn. 87−46498
single-mode fibres, dispersion-shifted, chromatic dispersion meas. in 1.5 μm wavelength region 87−12110
single-mode fibres, effective cutoff wavelength determ., interlaboratory comparison 85−41146
single-mode fibres, long-range 1.5 μm optical time-domain reflectometry using lasers 85−46145
single-mode fibres, mode field dia. and chromatic dispersion meas. techniques 85−58919
single-mode fibres, mode field radius meas. using near field pattern technique *(Japanese)* 85−48118
single-mode fibres, mode-field dia. meas. using fibre probe far-field technique 88−20339
single-mode fibres, one-end splice loss meas. method using OTDR 86−50234
single-mode fibres, optical time-domain reflectometer with a semiconductor laser amplifier 85−4132
single-mode fibres exposed to H_2, loss increase over long term *(French)* 87−25919
single-mode fibres testing, equivalent-step-index parameters determ. 87−3203
single-mode glass waveguides, fabrication and charactn. 88−51536
single-mode lightguide system, guided-wave reflectometry with micrometer resolution 87−68018
single-mode optical cables, second and third windows, meas. 88−73975
single-mode optical fibre spot size meas. using strip integration of far field 85−56291
single-mode optical fibres, equalisation wavelength meas. technique 87−38738
single-mode short fibres, direct meas. at second order dispersion using interferometry 85−1986
single-mode transmission lines, chromatic dispersion, far-end meas. technique 85−31065
SL undersea fibre optic cables, design and testing 85−37022
Soar optical power meters for low cost high performance 88−42011
soft X-ray laser cavity components, beamsplitters and dispersive multilayer mirrors 88−2331
solar power plant heliostat focal spot characteristics test equipment and methodology *(Romanian)* 87−64473
soot particle measurement by the transmissive light extinction method *(Japanese)* 86−44423
spectral analysis of sampling optical time-domain reflectometer 88−72934
spliced multistage profile fibres, 1.1 to 1.6 μm, backscatter meas. *(German)* 86−22146
standards for optical power meter and rise time, 850 nm wavelength 85−26490
static fatigue of optical fibres in bending, humidity and proof stress effect 88−47083
steel ball, convex spherical reflector as laser beam expander, diverging wavefront aberrations 87−39177
submarine cable system, universal jointing 88−47186
submarine optical cables, OTDR for fault location 88−41612
submarine optical fibre cable requirements, design and testing 86−69752
submarine optical repeater, design and testing of optical fibre feedthrough 85−37029
submarine repeatered optical link, manufacturing, laying and testing 86−11124
subscriber cables, measuring equipment *(Japanese)* 87−8258
SUMIOFCAS TYPE 34 direct core monitoring system, compact fusion splicer development 88−58152
surface profilometry using two-frequency laser 88−36223
surface quality specification standard for laser optics 86−22455
surface sensor, high precision, based on laser beam critical reflection 88−29308
surface smoothness laser measuring system *(German)* 86−18108
surfaces, optical spherical, measured using holographic phase conjugate compensation 88−40413
switching device for automatic OTDR meas. of single-mode fibres 88−72078
TDM OTDR system for fibre meas., digital sampling averaging procedure 86−9474
temperature dependence of signal loss in precision-wound optical fiber 88−45116
test projector for camera lens quality control *(Russian)* 85−22275
test setup for meas. of high-speed optical components 88−47699
thermal imaging lenses, opt. performance requirements 86−22201
thermal imaging system inflight resolution evaluation 85−47841
thin film components, absorpt. losses, meas. by photothermal deflection spectroscopy 88−45266
time domain reflectometer fibre tester SA-9601 *(Japanese)* 86−2708
time domain reflectometer for fibre testing *(German)* 88−33613
time domain reflectometry 86−60366
time domain reflectometry for optical fibre testing, instrumentation principles 86−53966
time-domain eyewidth measurement of an optical data link operating at 200 Mb/s 88−15467
time-domain reflectometer, optical cable testing appl. *(Japanese)* 86−30750
time-domain reflectometer for fiber line testing, Anritsu MW290A *(Japanese)* 88−29498
time-domain reflectometer for long 1.5 micron band fibre cables 88−16536
time-domain reflectometer with fibre optic instrumentation, calibration verification in rugged field environment 85−35460
time-domain reflectometry instruments for fibre-optic cable testing, features and specifications 85−58753
transmission equipment, installation and testing 88−9586
TV camera lenses, specification and testing 87−76992
TV camera lenses with integrated digital control electronics *(French)* 87−70371
two-level classifier for use in moment-based optical/digital processor, image segmentation and real image tests 85−7936
two-wavelength holographic interferometer, appl. to optical testing 85−2429
UV curable resin coated fibre with low-temp. and lateral props. 87−7166
waveguide attenuation measurement, compensatory method 87−74773
waveguide attenuation measurements using prism coupler 88−51531
waveguide bandwidth measurement, nanosecond pulse generation using semiconductor injection laser *(Czech)* 85−18948
waveguide cable system testing and fault location *(German)* 88−58187
optical testing continued
waveguide loss meas. by scattered radiation detection 87−18602
waveguide loss measurement method 87−8752
waveguide losses at corner bending, in situ meas. method 85−7203
waveguide preforms testing using interferometers 87−74762
waveguides, multimode, transfer function, automatic meas. *(Czech)* 86−68278
waveguides diameter checking, by comparison with standard 85−12589
waveguiding layers, optical profile determ. by ellipsometry and WKB method 88−72127
work pieces nondestructive testing using coherent optics *(German)* 87−77180
X-ray mirror testing, computer controlled coord. meas. machine 88−22437
zero-dispersion of concatenated fibres, slope and wavelength statistics 88−67399
As_2S_3 fibres, IR, optical and mechanical props. 88−33643
As_2Se_3 fibres, IR, optical and mechanical props. 88−33643
C coated hermetic optical fibre, mechanical reliability 88−72076
CO_2 compact laser receiver lens for rangefinder, design, interferometric test 87−68570
coated CO_2 laser optical components employed in industrial plant 85−56759
CO_2 laser transceiver for free-space communications, on-ground testing 88−67363
GaAs coplanar waveguide, electro-optic meas. of standing waves 87−46442
GaAs-AlGaAs, double heterostructures, passive waveguiding props. charact. *(German)* 85−35438
Ge optical material testing for IR optics appl. 88−45040
Ge-Se chalcogenide glass fibres, IR, low loss, fabrication 85−7210
H_2 degradation reduction in optical cables, materials selection 87−8333
H_2 generation from optical fibre cable, eval. 88−22153
H_2 generation from optical fibre coatings UV curable acrylated resins 87−8332
H_2 reversible diffusion in optical fibres, expt. determ. of time constant 88−58073
InGaAsP high-power gain-guided laser array, fabrication and performance characteristics 85−7428
$LiNbO_3$ boules for integrated optics appls., testing/charact. techniques 86−53935
$LiNbO_3$ guided-wave Mach-Zehnder interferometric modulator fabrication by Ti-indiffusion and proton exchange, characterisation 85−29548
$LiNbO_3$, ion-milled alignment grooves, efficient fibre-chip coupling at 1.3 μm 85−2076
$LiNbO_3$ proton exchanged waveguide, electrooptic behaviour determ. 88−39964
$LiNbO_3$ waveguide optical damage meas. 85−29547
Nd doped fibre source, superfluorescent, single-mode, at 1060 nm 88−65267
Nd^{3+} and Er^{3+} doped optical fibres, charact. and appl. *(Japanese)* 88−26792
Nd:YAG, unstable laser resonator with super-Gaussian mirrors 88−45493
OH-ion concentration and transmitter-wavelength fluctuations, single-mode fibres loss spread 88−20394
SiO_2, fused silica optical fibres, transmission charact. alteration by pulsed UV radiation 86−28858
SiO_2 glass optical fibre, interferometric meas. of nonlinear refractive index 88−45166
SiO_2 glass optical fibres, nonlinear refractive index, interferometric meas. 88−45147
SiO_2 optical fibre temp. distrib. meas., Raman fibre optic sensor 85−50910
SiO_2 single-mode silica fibres, broadband low-dispersion, interferometric meas., bending sensitivity 86−2821
Ti films, thickness measurement for integrated optics appls. in $LiNbO_3$ 88−10132
TiO_2/SiO_2 multicavity filter stability 87−68247
TlBr-TlI, KRS-5, fibres, IR, optical and mechanical props. 88−33643
YAG:Nd^{3+} waveguides formed under ion irrad., optical charact. 86−28832
ZrF_4-based fibre, low-loss, absorption and scattering meas. 88−65230

optical transfer function
3-D light-microscopic image reconstruction 85−36438
3-D object representation in imaging systems 85−46917
3D light microscope images, reconstruction 85−36319
acousto-optic two-pupil synthesis, 2-D image processing and scanning holography appls. 85−36346
acousto-optic two-pupil synthesis, 2D bipolar incoherent image processing 85−46230
atmosphere, modulation transfer functions rel. to airborne reconnaissance imaging 88−20918
atmospheric effects on reconnaissance systems, advance prediction of image quality 88−45710
average mutual information as quality measure in imaging processes 86−64342
azo dyes in PVA matrix used as optical recording material, modulation transfer function meas. 88−71997
borescope quality assurance, test specification development 86−25354
camera performance charact. 87−14154
CCD camera with image intensifier and fibre optic coupling *(Czech)* 87−70463
CCD image sensor, image quality requirements *(German)* 86−70031
CCD image sensor coupled to fibre optic faceplates, modulation transfer function concept extension 88−4482
CCD linear array in pushbroom mode, MTF_i formula derivation *(Chinese)* 85−64022
CCD push-bloom imaging system, superposed sampling coeff. effect on resolution improvement *(Chinese)* 86−70021
coded phase reversal traveling wave modulators, spread spectrum frequency response 88−20442
colour imaging digital restoration models 88−34738
colour monitor display for vision research 85−8721
CRT, spot size, current density distrib. and modulation transfer function *(Japanese)* 85−11858
CRT antiglare surfaces, optical characterisation 87−8693
CRT antireflection filters, quantitative eval. of effect 87−8692
CRT display systems, high-resolution densified screen 87−3691
detective quantum efficiency of radiographic screen film systems 88−10339
digital image quality eval. for quantised continuous tone image 86−59320
digital radiographic systems 86−11945
discharge lamp flicker threshold assessment involving ocular temporal MTF *(Japanese)* 86−52027
display charact. determ., contrast sensitivity and target recognition performance obs. 88−16319

optical transfer function continued
electro-optic light modulator, high speed, MTF calc., design and performance 86−2861
electron-optical image luminance amplifiers, resolution capability 87−24717
electron-optical systems, MTF meas. 85−4136
electrophotographic image quality, computer model 86−23161
far-focus thermal imager system, deep-focus attachment 87−20953
fibre, GRIN, OTF calc. 88−33663
fibre coherent and incoherent illumination, transfer matrix description for light transmission, refl. 85−56270
fibre intramodal transfer function, bandwidth 85−41149
fibre lightguides, phase transfer functions 86−9510
fibre optic sensors, impulse response meas. of phase-retardation change 88−29417
fibre transmission capacity, 3 dB bandwidth 87−25974
fibres, birefringent monomode pulse transmission *(Spanish)* 88−33664
fibroscope for medical appls., OTF, image transmission and quality criterion 88−16712
glare-reduction techniques, MTF and perceived image quality 88−16303
gradient optical fibres, splice attenuation *(German)* 87−1959
Holocoupler-Selfoc fibre system, coherent transfer matrix description 87−12198
holograms, composite, diffraction and noise characts., investig. 85−62687
holographic lens, imaging, numerical investigations 85−56872
holographic lens-fibre coupling system coherent transfer function 87−68126
holographic optical elements, phase-transfer function optimisation 86−29252
holographic scanning objective, optical imaging system for video discs 87−68658
image convertor polychromatic MTF computing, using electron trajectory analysis 88−10036
image gathering and processing systems, combined optimisation 86−10533
image intensifier tubes with luminescent screens intagliated in fibre optic plates *(French)* 88−19635
image processing: analysis beyond matched filtering 85−63128
image processing, Gel'fand-Levitan inverse problem 85−2891
image quality considerations for laser image recording 86−68655
image quality overview, conf., Arlington, USA (Apr. 1985) 86−19716
image quality standardisation 87−70452
image sensors, detector size optimisation 85−20499
image sensors, MTF theoretical bases and meas. methods 86−24375
image transformation in spectral-system communication channels 85−2893
imaging instruments, non-rotationally symmetrical point spread function 88−10039
imaging system, airborne vehicular, resolution limits, mechanical vibration effects anal. 87−70437
incoherent image processing, optical/digital method for extended depth of field 88−14746
incoherent spatial filtering with a scanning heterodyne system, bipolar point spread functions 85−19491
incoherent spatial filtering with gratinginterferometers 86−2902
integrated image sensors, MTF theory and expt. verification 88−10038
interlaced, four-to-one thermal imaging system, based on US-Common-Module System 87−3497
inverse filter transfer function optimisation in blurred image restoration with incoherent light 87−47934
IR imager performance meas., objective meas. of minimum resolvable temp. difference 87−20958
IR imaging signal calibration and processing *(French)* 88−9852
IR imaging system performance meas., buildings thermal anomalies determ. 87−14174
IR optical systems, blurring calc., print spread function determ. 88−52579
IR sampled data systems, MRTD estimation 87−3492
IR staring arrays, modulation transfer functions and spatial noise distrib. 88−10037
IR system MTF loss evaluation, due to continuous wave and pulsed lasers 88−29404
IR technology, conf., San Diego, CA, USA (Aug. 1984) 85−44367
Landsat 4 and 5, Thematic Mappers and Multispectral Scanners, transfer functions and line spread functions 86−25396
Landsat Thematic Mapper, operational MTF 86−25403
Laplacian edge-enhancement filters, effect on incoherent images, effective transfer functions 85−41965
laser digitiser performance evaluation 88−36451
laser digitizer, performance evaluation 88−22510
laser printers, image signal modulation and noise characteristics 86−69181
light valve system of TV colour projector, OTF calc. with dark field obs. 87−61001
line art binarisation, resolution requirements 86−23162
linear CCPD-1024 array, integration MTF_i meas. *(Chinese)* 85−64023
liquid crystal television display as spatial light modulator for optical processing 87−46600
longitudinal image restoration, inverse filtering 88−34737
measurement techniques for fibre optic communication component *(French)* 88−58104
microchannel spatial light modulator, optical transfer characts. 88−65439
modulation transfer function for the display engineer 87−21173
MTF meas. of CCDs using laser speckle 86−38586
MTF measurement methods, anal. *(German)* 87−14142
multimode fibre baseband freq. response 87−38817
multimode fibre chain bandwidth 85−41148
multimode filament lightguides, transfer function meas. from pulse response *(Czech)* 85−50968
narrowband amplification by stimulated Brillouin scattering in optical fibres, influence of nonlinear dispersion 86−54207
nonlinear thin-film waveguide, transfer function analysis 86−15774
on-line vision systems, light source characts. and electro-optics optimum choice 87−70446
optoelectronic image processor, binary and circular symmetric filters 85−56393
pattern recognition, incoherent OTF synthesis and edge enhancement 85−36313
phosphor convertor for Si scanning photoreceiver, MTF 85−26340
photoconducting organic polymer-twist-effect liquid crystal space-time light modulator 88−20452
photolithographic lenses, optical performance meas. 85−29072
photorefractive materials appl. to signal processing 87−69380
plates, fibre-optic, modulation transfer coefficient, face roughness effect 86−15491
point-spread-function computation, quasi-digital method 85−25151

optical transfer function continued
PRIZ controllable transparency, space-time transfer characts. 88−13936
quality merit function in specifications of hard copy devices 88−40041
radiography, digital images, SNR and threshold contrast 86−69187
reflection holographic gratings as Fourier filters, transfer function 85−7552
remote sensing, meas. of Thematic Mapper data quality 86−18550
scintigraphic system, digital filtering with MFT compensation 85−43375
semiconductor Fabry-Perot lasers, optical feedback, influence on spectral behaviour 88−45437
single-mode optical fibre excited by LED, impulse response and transfer function *(Italian)* 88−13831
solid lasers, efficiency, elliptical pump cavities effects *(German)* 87−68412
spaceborne linear array detectors, remote sensing performance characts. 87−70651
spatial contrast detection for colour patterns under selective chromatic adaptation 85−26409
spatial-frequency filter, transfer function synthesis for optical processor 88−26926
spatially sampled staring imagers, static performance modelling 86−69186
SPRITE detector MTF, bias voltage effect 86−24532
SPRITE detectors for anamorphic imaging, optimisation 87−49748
SPRITE IR detector developments 85−47974
streak camera output image intensification, amplification stage performance evaluation 85−61651
streak image tube, temporal and spatial transfer functions determ. 88−47582
tabular grain X-ray film, cross over and MTF characts, 85−38047
thermal imaging lenses, opt. performance requirements 86−22201
transmitting adaptive system, operating algorithm *(Russian)* 85−63633
truncated Gaussian laser beam optical system image quality 85−56754
TV camera connection to computer, linearity and transfer function study *(Spanish)* 86−38060
video imaging systems, MTF meas. techniques 86−24376
video pictures taken by solid state image sensors, moire patterns *(Japanese)* 85−14423
wavefront, turbulence-distorted, sampling and reconstruction 86−59328
$Bi_{12}SiO_{20}$ crysts., transverse electro-optical effect, MTF and time characts. study 85−35547
a-C:H diamond-like coating on Ge, rain erosion resistance improvement obs. 87−18794
Cr^{3+}:$BeAl_2O_4$, alexandrite, rods, moire MTF and thresholds as lasers 86−42510
Ge optical material testing for IR optics appl. 88−45040
$LiNbO_3$ mode extinction modulator, planar waveguide analysis 86−68312
focal plane array detectors, modulation transfer function 88−29450

optical transmission *see light transmission*

optical variables control
AC plasma display, high-speed asynchronous video addressing with brightness control 87−8690
adaptive optics wavefront correction system, hill-climbing *(Chinese)* 88−72192
autokeratomileusis laser for precision reshaping of corneal surfaces 88−10427
automatic polarisation control schemes, overcoming finite-range limitation of certain state of polarisation control devices 86−23857
beam polarisation state, control method for communication and meas. system appl. *(Japanese)* 87−20570
car map light dimmer, control cct. with VMOS FET switching device 85−49190
coherent optical communications, automatic endless polarisation control with three elements of limited birefr. range 87−20482
coherent optical communications, error-tolerant endless polarisation control system 88−47151
diode compact linear array external cavity laser, wavelength control 87−26455
diode tunable laser control by stepping Michelson interferometer 87−26376
diode tunable laser wavelength control using internally coupled Fabry-Perot interferometer 86−29125
dye laser system, high resolution computer controlled 87−12413
dye lasers, pulsed or CW tunable, wavelength stabilisation and control 88−2183
equi-illumination lighting system photoelectric control 85−21959
fibre polarisation control system, automatic, using multilayer piezoelec. actuators 86−48117
fluorescent lamp brightness control *(German)* 87−58437
fluorescent lamps brightness control with flicker free adjustment *(German)* 87−58436
fluorescent lamps regulation with HF ballast *(German)* 87−51624
focusing, automatic for video cameras 88−67569
gyroscope, passive ring laser in very high finesse cavity, laser feedback control system 87−68556
high-intensity discharge lamp operation and dimming, 100 to 400 kHz *(Japanese)* 86−52028
industrial lasers, power output control, calibration system *(Russian)* 86−36540
insulating layer via hole fabrication with adjustable sidewall slopes 85−1184
laser diode, computerised freq. control *(Japanese)* 85−12848
laser electro-optic shutter control, w.r.t. luminance level of active medium 87−75194
laser freq. stabilization, magnetostriction effect appl. to laser-cavity length compensation 88−8246
laser printer exposure control, closed loop photoreceptor monitoring 85−41534
laser radiation freq. control based on semicond.-metal system holographic grating *(Russian)* 88−58732
laser scanner ophthalmoscope, active focusing, human eye aberrations meas. 85−43347
lighting control, for energy savings, by integration of microcomputers and controllable output solid state lighting ballasts 85−21942
lighting energy savings, by scheduling and daylighting control strategies 85−21941
LV halogen lamps, light output control schemes *(Swedish)* 88−49273
Michelson interferometer, fibre optic, remote polarisation control 87−38782
photoelectric devices, amplifiers as control systems *(Italian)* 87−68281
polarisation control scheme using optical heterodyne detection for coherent transmission 85−20185
semiconductor laser, frequency control using microcomputer *(Japanese)* 85−12885

optical variables control continued
semiconductor laser frequency control, optical fibre communication systems, laser types 85−51194
soliton laser stabilisation, feedback from pulse-shaping fibre, servo control 87−26351
tunable diode laser, wavelength control for IR spectroscopy 86−48441
AlGaAs external-cavity semiconductor lasers, electrical mode-hopping noise and elimination by nonoptical control loop 88−20646
AlGaAs-GaAs DFB-TJS external-cavity laser with optical phase control loop, spectral linewidth 87−12467
$LiNbO_3$ integrated optic device for endless polarisation control, communication appls. 88−33771
Nd:YAG laser pulse energy, wide range feedback control 88−51871
Ti:sapphire ring laser, freq. control and CW diode laser injection control 88−65632
Xe flash tubes, controlled intensification of output 87−72574

optical variables measurement

absorption loss meas. using poly(vinylidene) pyroelectric tube 86−2745
adaptive optics, conf., Arlington, VA, USA (Apr. 1985) 86−45906
adaptive wavefront estimation and compensation, self-referenced, high resolution 86−50236
advanced optical measurement methods in phys. and chem., developments 86−38589
aftereffect characteristics of multialkali photomultipliers with weak pulsed illumination 85−6671
amplifiers, back-action-evading, for meas. amplitude of optical field mode component 85−46460
analogue divider for fast circular dichroism meas. 87−59801
angle-resolved polarised light scattering meas., compact set-up 85−15059
Anritsu's optical time domain reflectometer MW98A 85−8890
apparatus for measuring the refractive index profile of an optical fibre 87−21267
applied optical meas., structure and system *(Japanese)* 88−4378
applied optical measurement *(Japanese)* 88−4659
AQ-6310 optical spectrum analyser, broadband range meas. with speed and accuracy 88−42009
atmospheric IR transmittance spectra meas., technique, instrumentation and results 88−48323
automated system for time transient optical absorptionmeasurements 86−55898
backscatter diagrams of lightwave conductors, attenuation meas. *(German)* 86−28838
backscatter meas. instruments for long wavelengths *(German)* 86−23914
bandwidth meas. instrument for optical fibres *(Italian)* 87−68042
bandwidth meas. of short plastic step-index optical fibres using time-domain method 88−1975
bending loss characterization in single-mode fibres 88−45161
biconic fibre optic connector sleeve, interferometric characterisation 88−26825
bidirectional scattering distrib. function meas. using computer controlled facility 87−29321
biosensors based on heat and luminescence measurement *(Japanese)* 87−77219
birefringence characterization of fibres without polarizer 88−45151
birefringence meas. in single-mode optical fibre, using circularly polarised light 86−11760
bolometric transducers for measuring laser emission energy, calibration *(Russian)* 85−31468
Bragg angle meas. technique using acousto-optic modulator and He-Ne laser 85−31610
brightness, objective meas. *(Japanese)* 88−4663
brightness-coefficient indicatrices, analytic approx. for polished milk-glass specimens 85−46119
cable attenuation meas. using back-reflection method 87−62955
cable single-ended distance-resolved loss meas. by OTDR 88−35524
cable with low-birefringence, polarisation states and group delay difference meas. 88−45150
cables, error location, backscatter meas. methods *(German)* 86−59898
camera tube performance, automatic and digital measuring systems *(Japanese)* 86−47258
CCD sensors for optical measuring equipment *(German)* 86−11470
CCITT optical fibres standardisation for telecommunications systems 85−42618
chirped optical pulsers propag. in single-mode fibre, direct meas. with ps resolution 86−24802
chrmatic dispersion characteristics measuring equipment *(Japanese)* 86−31458
chromatic dispersion meas. at 1300 and 1500 nm, error anal. 87−70077
chromatic dispersion meas. in 100 km dispersion-shifted single-mode fibre 86−53946
chromatic dispersion meas. of multimode optical fibre waveguides *(Czech)* 87−7099
chromatic dispersion measurement system using 'n' LD light sources different in wavelength 87−8753
chromatic dispersion measuring instruments, calibration 88−42305
chromatic dispersion of single-mode fibres meas., using GaInAsP lasers *(Czech)* 85−58918
coherent light phase meas. by zero fringe integration method *(Japanese)* 87−41621
coherent light signal, phase space-time distrib. meas. 87−19023
color characteristics derived by indirect measurement 88−74608
colorimetric performance testing of TV cameras 88−60440
colour anomaly inspection, colour monitor system 88−29556
colour characts. of cloth, industrial monitoring 86−55865

optical variables measurement continued
colour CRT electron-beam spot meas., two-dimensional intensity distrib, determ., semiautomatic system 88−12902
colour discriminating sensor using a-Si:H drift-type photodiode 88−47532
colour separation sensing technique 88−47700
colour TV set, automatic purity meas. system *(Japanese)* 87−8403
colour vision, stabilised image studies, impact of boundaries 88−67574
communication systems, test equipment, conf., London, England (May '86) 86−52157
complementary-correlation OTDR, performance advantages 88−53900
computer aided measurement of magnetic, photometric and thermal variable *(Japanese)* 88−29602
conference, Barcelona, Spain (Sept. 1986) 88−62879
conference, optical metrology and optical component manufacture, Delhi, India (Feb. 1985) 86−13257
conference, Wroclaw, Poland, Sept. (1986) *(Polish)* 87−36296
conference on instrumentation and meas. technology, Boston, MA, USA (Apr. 1987) 87−68858
conical cavities of thermal radiation receivers, absorption characts. analysis 85−64153
connector loss and reflection coefficient variations with wavelength 88−39933
continuous quantities meas. 88−4665
contrast-detail curve measurement and analysis in radiological imaging 88−68384
contrast-sensitivity meas., CRT-dependent artifacts 86−55544
control measurements of road lighting 88−49279
coupled mode waveguides, phase and coupling parameters meas. 88−26844
coupler, single-mode fibre, design parameters, determ. from loss meas. 86−2738
coupling losses meas. in optical fibres, CCD image sensor appl. *(German)* 86−68250
CRT antiglare surfaces, optical characterisation 87−8693
CRT antireflection filters, quantitative eval. of effect 87−8692
CRT colour and luminance meas. with tristimulus colorimeters 88−16331
CRT display spatial profiles meas., using scanning knife-edge aperture 88−16327
CRT displays, shadow mask, resolution analysis and meas. 88−67972
data link using optical fibres *(Spanish)* 85−3468
detector, automatic, based on glow discharge tube for millimeter wave intensity distrib. meas. 85−37619
dFB evaluation in high speed, high dispersion single mode systems 88−67416
dichroism, linear and circular, polarisation modulation approach 86−44445
differentiator, ultrafast, picosecond laser pulse meas. appl. 85−52882
disc storage characts., mechanical and optical test systems 87−56510
dispersion characteristics meas. of fibre optic guides 87−63540
dispersion in optical fibres, meas. methods and state-of-the-art 86−48093
display light output meas. 86−70038
dual-channel input optical power meter *(Japanese)* 87−56725
dual-mode fibres, intermodal delay meas, technique 86−9468
dust deposition meter in coal mines 87−63324
dye molecule transient absorption meas., coherent interactions between pump and probe pulses, effect of phase gratings 85−41460
dye picosecond lasers, study of mode-locked dynamics by streak camera *(Chinese)* 88−65789
economical light sources developments, scientific and technical collaboration of Interelektro participating nations 85−44297
electrical and optical measurements of fast risetime, high power pulser 85−4060
electro-optic frequency shifters appl. in heterodyne interferometric systems 87−12245
electro-optical active range finder, technique *(Japanese)* 87−29017
electroluminescence obs. in concentrator solar batteries, using optical microscope system 86−51908
elliptical-core fibre, polarisation mode dispersion meas. by optical heterodyne detection 85−20737
elliptically polarised light analysis over range of wavelengths 87−70832
EM fields, current and optical emission meas. from lightning stroke 88−58763
emissivity of hot cathode determ. during arc discharge, by laser reflectometry 87−66813
end-to-end system performance−predictions and problems 88−47182

excimer laser, gas flow type, high-power, opt. diagnostics 86−15647
far-focus thermal imager system, deep-focus attachment 87−20953
fault finding and testing in optical fibres, interpretation of results *(German)* 88−65185
fault location and damping study of optical cables using time domain reflectometer *(Swedish)* 85−14262
fibre, birefringent polarisation-maintaining, mode coupling distrib. meas 87−18668
fibre, modified cladding, meas. and analysis with various input illuminations 88−13881
fibre, monomode, dispersion meas. with tunable 1.3 μm external cavity laser 86−2834
fibre, single mode, short length, dispersion meas. using picosecond pulses from semiconductor laser 85−7244
fibre, single-mode, chromatic dispersion meas. 85−41140
fibre, single-mode, optical time domain reflectometry signatures interpret. 87−68146
fibre attenuation and chromatic dispersion, cable meas. instruments 87−8292
fibre bandwidth meas. 86−15509
fibre bandwidth measurement using pulse spectrum analysis 86−42231
fibre bandwidth variation with wavelength in 850 nm region, meas. using mode-locked styryl-9 dye laser 88−65181
fibre birefr. meas. using photoelastic modulator 85−41147
fibre birefringence determ. by normalised second-order factorial moment meas. 87−25933
fibre birefringence meas. method 88−58077
fibre cable integrated OTDR/throughput loss meas. system for environmental testing 87−28604
fibre cable joining and measuring technology *(Japanese)* 88−41644
fibre cable testing 88−9581
fibre cables, field characterisation 86−53995
fibre characterisation by transmitted near field meas. 87−46522

optical variables measurement continued
fibre characterisation using beam profile measurement, linear systems approach 85−41121
fibre characteristics and standards, conf., Cannes, France (Nov. 1985) 87−36301
fibre chromatic dispersion meas. with semicond. source without monochromator *(French)* 86−9577
fibre chromatic dispersion measuring technique 86−63656
fibre cleavers, performance anal. 88−26821
fibre communication systems, measurement methods and equipment progress review 86−23938
fibre components reflection coeff. meas., using dual reflectometer 86−22180
fibre connectors, meas. *(German)* 87−25989
fibre couplers, 3×3 type; meas. method for optical phase shift determ. 88−33608
fibre dispersion and light loss meas., using pulse delay method 85−62383
fibre dispersion measurement, swept freq. technique for field use 85−29637
fibre dispersion measurement using only two wavelengths, field-usable method 86−31684
fibre equilibrium mode distribution development, Corning data broadband fibre transient behaviour and steady state mandrel charact. 87−46521
fibre group delay measurement using low-frequency method 86−48129
fibre lightguide damage sites and lengths, meas. facilities certification 86−22100
fibre loss meas., stabilised light sources *(Japanese)* 88−26993
fibre loss meas. by Fourier transform spectroscopy 87−54073
fibre loss meas. by side-illumination technique 85−12575
fibre loss meas. method *(Chinese)* 88−1966
fibre loss measurement, meas. over MM to micron wavelength 86−38531
fibre loss measurement method 85−29628
fibre loss measuring equipment using comparison method, submarine cable stability/reliability testing appl. 85−20738
fibre loss spectra, meas. set-up with improved repeatability 86−42283
fibre measurement, conf., London, England (May 1987) 87−51750
fibre measurements, config., Boulder, USA (Oct. 1984) 85−27947
fibre measurements, phase shift techniques, current developments 88−72077
fibre measurements, symposium, Boulder, CO, USA (Sept. 1986) 87−43801
fibre Michelson interferometer for narrow laser output line detection and meas. 87−68592
fibre mode cut-off frequency measurement and polariser fabrication by local tapering *(French)* 86−15507
fibre mode field diam. meas. using far field pattern method 87−46530
fibre mode field diameter: toward a standard definition 87−32974
fibre mode field radius meas. 87−54076
fibre optic *(Japanese)* 88−9558
fibre optic cables, parameters affecting meas. 85−47542
fibre optic communication cables and lasers testing, meas. equipment/systems *(Italian)* 88−51449
fibre optic communication component measurement techniques *(French)* 88−58104
fibre optic conductors, cable junctions and error location methods *(German)* 85−12584
fibre optic couplers, automatic polarisation spectral response meas. systems 88−20390
fibre optic Fabry-Perot interferometer, precise meas. of optical path length change 86−42232
fibre optic links, bit error rate, noise meas. on laser diodes single modes 87−20532
fibre optic links, fault location and loss meas. using time-domain reflectometer 85−46148
fibre optic loss meas. using optical time-domain reflectometer, launching and receiving conditions *(Japanese)* 87−18733
fibre optic measurement techniques, review of methodology 86−65286
fibre optic power meas. standards accuracy and pitfalls 86−2800
fibre optic power meters, developments 85−62332
fibre optic power meters, round robin testing results 86−65287
fibre optic systems, instrumentation for development, production, installation and maintenance *(Italian)* 87−46457
fibre optics, power measurements, accuracy 87−38774
fibre optics, short-haul and long-haul meas. and appls., conf., San Diego, CA, USA (Aug. 1985) 87−22969
fibre optics, signal processing methods for optical measurement technology *(German)* 88−60931
fibre optics transmission, metrology of components *(French)* 87−62973
fibre parameters meas., techniques and instruments *(French)* 86−70233
fibre parameters meas. for communications *(German)* 85−50947
fibre power meas. techniques and instrumentation 86−15510
fibre power meter calibration, effect of connectors 87−49971
fibre power meters, potential errors in use 88−39930
fibre profiling technique, refracted near-field based, thermal effect 87−46528
fibre props. meas. methods, review 86−9493
fibre pulse dispersion meas., automated apparatus 85−58531
fibre test equipment trends 86−17385
fibre testing techniques in field and laboratory environments 85−50958
fibre transmission loss characteristics during drawing, continuous measurement 87−7080
fibres, birefringent, beat-length meas. 88−13835
fibres, butted, cladding alignment using diffraction alignment device and appl. to mode-spot concentricity-error meas. 86−2739
fibres, chromatic dispersion meas. system using phase-shift technique 87−68080
fibres, chromatic dispersion measurement by phase shift method, influence of LP_{11} mode cutoff length depend. 87−46527
fibres, cut-off wavelength meas., using near-field system 86−22179
fibres, dispersion, time domain meas. 88−33660
fibres, drawing induced defect centres *(Japanese)* 86−68240
fibres, mode field diameter meas. conditions by transmitted field pattern methods 86−42270
fibres, multimode, bandwidth measurements, factors affecting accuracy 86−36199
fibres, propagation constant and waveguide dispersion meas. from far-field 88−33647
fibres, quasi-single-mode operating region, meas. of LP_{11} mode loss length depend. 86−48134
fibres, single mode, chromatic dispersion meas. using phase shift method, precision anal. 87−46526
fibres, single mode, dynamic chromatic dispersion meas. 86−2818
fibres, single-mode, axially nonsymmetrical, mode field radius meas. 88−13837

optical variables measurement continued
fibres, single-mode, dispersion meas. using optical sampling with mode-locked laser diode 86−48135
fibres, single-mode, HE_{21}, TE_{01} and TM_{01} modes, cutoff wavelength meas. using single-polarisation launching 85−56280
fibres, single-mode, mode diameter and cutoff wavelength meas. 87−54077
fibres, single-mode, mode field radius meas. by harmonic anal. 86−42322
fibres, single-mode, nonreciprocity meas. 87−54080
fibres, single-mode, self-imaging offset measurements 86−42323
fibres, single-mode, temporal birefr. fluctuations 85−24285
fibres, single-mode and few-mode, phase velocity meas. using prism output coupling 86−28849
fibres, single-mode with high numerical aperture, bend loss meas. 86−28818
fibres, single-mode with nonGaussian profiles, mode field diameter meas, 87−46475
fibres, single-mode with short beat length, birefringence meas. 86−36237
fibres, spectral charactn. 88−51533
fibres, step-index used for point source scanning, lateral offset power loss meas. 87−68129
fibres attenuation changes due to OH ions diffusion *(Czech)* 86−9494
fibres geometrical and optical parameters meas., using refracted near field method *(Czech)* 88−28846
fibres in data transmission systems, test equipment and systems *(German)* 87−18654
fibres radiation-induced transient attenuation meas. 88−33672
fibres single mode, characterisation by equivalent step index and mode field diameter meas. 87−54078
fibres single-mode, characterisation 85−41115
fibres single-mode elliptical-core, equivalent step-index profile, spectral depend. 86−15489
fibres test system, optical system design with Gaussian beam input *(Slovak)* 87−18619
fibres testing, single-mode, standard meas. procedures 87−14583
field test equipment for optical fibres 88−60168
flames radiance meas. using thermal imaging radiometer 88−4664
fluoride glass single-mode fibres, spectral attenuation meas. by fourier transform spectroscopy 87−38744
FM subcarrier method for optical frequency meas. and synthesis 86−68421
frequency meas. of optical radiation 86−5461
frequency measurement, standards 86−38587
frequency standard based on Ramsey excitation in Ca atomic beam 87−14443
frequency standards, progress and appls. 86−5462
fused fibre in-phase/quadrature measuring multiport 86−2685
gain meas. in discharges, spontaneous emission amplification obs. 87−14577
glass-covered surfaces, luminance factor matrix, contrast standards 85−48114
glasses, optical density, sample certification 85−35381
glossiness of curved surfaces, instrum. 86−70234
glossiness of curved surfaces, meas. using CCD line sensor 87−56867
graded-index fibres, semi-automatic meas. of geometrical data *(German)* 86−9482
graded-index optical fibres, mode coupling investigation 86−2672
gradient calorimeter for measuring the energy parameters of optical radiation 87−70829
gradient optical fibres, splice attenuation *(German)* 87−1959
GRIN fibre cables, radiation resistant 88−22152
group delays meas. of guided modes, in optical fibre waveguides *(Czech)* 87−32987
gyro, phase-nulling, scale factor correction 85−24294
gyroscope, fibre optic, with linear scale factor using phase detect. 85−24295
HALON PTFE white standard *(Hungarian)* 88−16534
Hewlett-Packard instruments for optical links testing *(Czech)* 86−4673
high reflectance coating, computer controlled NBS spectral reflectance meas. system 88−16537
high-birefringence fibres, dichroism eval. using crosstalk meas. 87−12117
high-speed optical and electrical meas. methods 86−60104
horizons in optics, conf., Besancon, France (May-June 1985) 86−54
HP 8152A optical power meter firmware 88−9871
HV and VHV distribution systems, use of digital protective devices and optoelectronics *(Czech)* 88−61887
IECE Japan 1986 National Convention, conf., Niigata, Japan (March 1986) 86−66531
IEICE Spring Convention, Tokyo, Japan (March 1988) 88−49350
illuminated displays meas. using interactive digital video lightmeter 88−16330
illumination engineering, measuring instruments development 85−44295
illumination meas. by RPCh-1 radiometer, use of UPR-1 checking apparatus 86−31686
image sensors, MTF theoretical bases and meas. methods 86−24375
industrial test methods for single-mode fibres and cables 87−20478
installed optical fibre cables, meas. system for attenuation and pulse dispersion 86−53994
instrument for measuring dispersion distortions inoptical fibers and cables 86−37876
integrated optic device parameter meas. using computer aided meas. techniques 87−56871
integrated optical waveguide attenuation meas. by prism coupling and scattered light techniques 87−25960
integrated optical waveguides, attenuation meas. using fibre probe 85−62398
integrated optical waveguides, mode propagation losses, simple meas. method 85−24332
integrated optics wavefront measurement sensor 86−48208
interference filter demultiplexing system, light scattering from surface irregularities, crosstalk study *(French)* 88−60123
IR fibres, spectral loss meas. methods 2 to 11 μm *(Chinese)* 85−62288
IR imaging optical systems, two-level testing process 87−20956
IR lens elements and assemblies, spectral transmission meas. 87−21265
IR lightguide, scattering and absorpt. loss meas., calorimetric method 86−9521
IR optical fibres, meas. system for dispersion, attenuation, numerical aperture, optical time-domain reflectometry 87−18721
Iwatsu Electric optical power meter, operation and performance 88−4534
Kerr constant in weakly anisotropic liquids 88−10149
laboratory investigation of optical fibre parameters 86−58765
laboratory meas. of optical fibre communication parameters for MSc students 86−58766
lamps used for public lighting, Czechoslovak standards and policy *(Slovak)* 87−36244

optical variables measurement continued
laser and single-mode fibre far field power meas., two dimens., high ang. resolution and dynamic range 87−46529
laser beam power meter, design using fast photodiode detector 85−24634
laser diodes and LEDs, antireflection coated, facet reflectivity meas. technique 86−5554
laser power and energy measurements and the NBS lasermeasurement assurance program (MAP) 86−15759
laser radiation spectral charact. meas., using Fabry-Perot interferometer 87−68593
LED destination indicator brightness indicator *(Japanese)* 87−63453
level indicator with LED display and audible alarm, design and appls. *(Spanish)* 85−48021
light guide measurement instruments *(German)* 87−35213
light intensity, Si flip-flop sensor appl. 86−55644
light intensity meas. for inspection 85−48119
light intensity measurement under water using chemical actinometer *(German)* 88−22813
light measurement technology moves to the production line 85−31608
light scattering intensity determ., calibration method 88−36255
lighting research, current trends *(Japanese)* 88−6033
line of sight optical transmission links, meas. *(Dutch)* 87−62980
linear camera calibration 88−4666
linewidth measurement using in-line Fraunhofer holography, finite aperture effects 86−29253
link, installed, attenuation meas., insertion loss modification method 87−74765
losses meas. in fibre waveguide, Elektronika OT-6 optical tester attachment 86−68276
Luch instruments for fibre optic guides and cables meas. 87−56150
luminescent screens testing, luminescence lag meas. apparatus 86−50161
luminous power meas. instrument struct. *(Italian)* 88−36254
luminous quantities, objective meas., metrological problems *(Polish)* 85−43114
Mach-Zehnder low-loss modulator using mode coupling Y-branch waveguide 88−47129
Mach-Zehnder systems for heterodyne fibre polarimetry in different coherence conditions 88−10151
magneto-optical ellipsometer, using polarisation modulation 85−52883
magneto-optical Faraday rotation, personal computer controlled meas. system 86−24314
magnifying power standard for visual magnification aids/devices 88−11790
manually-positioned line-focus concentrator, optical performance and alignment error meas. 88−16538
matrix analyzer for the intensity distribution ina laser beam 86−29216
ME9301A chromatic dispersion meas. set for optical fibres *(Japanese)* 88−13790
measurement accuracy−RF to optical 86−38530
measurement equipment for optical fibres 85−63687
measurements and tests on optical light guide components *(German)* 87−13701
measuring equipment for fibre optic cable 85−48117
measuring instruments, research and development 86−24803
measuring set for single-mode glass fibre transmission charact. determ. *(German, French)* 87−14110
measuring spectrum for fiber-optic communications 86−44217
mesopic luminous efficiency functions measured with a Lagorio's color chart *(Japanese)* 88−47696
microbending and macrobending effects in optical cables 88−73972
mid-IR fibre charact. meas., laser sources and detectors 88−58166
mid-IR fibres charact. meas., for telecommunication appls. 88−15468
mid-IR fibres meas. for telecommunication appls. 87−70106
milky glass, scattering indicatrix determ. 85−62276
mirror, high reflectivity dielec., used in free electron laser cavities, precise meas. 86−58951
mirrors in Orsay storage ring FEL, diagnostic techniques and UV-induced degradation 86−3192
mirrors radiation props. meas. methods *(German)* 85−31609
ML910A optical spectrum analyser, technology for high accuracy and resolution 88−42010
mode field diameter meas. of single-mode fibre, systematic errors 88−39931
module with diode laser, performance *(French)* 88−58558
monomode fibre cut-off meas. method 86−2832
monomode fibre waveguide dispersion meas. from spot size 86−2833
monomode fibres, chromatic dispersion meas. *(German)* 86−22148
monomode fibres, chromatic dispersion meas. 85−26491
monomode fibres, cut-off wavelength meas., polarisation method 85−35479
monomode fibres, cut-off wavelength meas. by polarisation method 85−29591
monomode fibres, cut-off wavelength meas. method 85−12548
monomode fibres, cutoff wavelength meas. using azimuthal filtering technique 87−53974
MT9501A/B/C optical power meter calibration system *(Japanese)* 88−16526
MTF meas. of CCDs using laser speckle 86−38586
MTF measurement of electron-optical systems 85−4136
multi-mode optical waveguides, methods for optical props. meas. *(German)* 85−50912
multichannel spectrophotometer for industrial appls., microprocessor-controlled 87−29326
multidimensional fluorescence detected circular dichroism meas., microprocessor-controlled spectrometer 86−65285
multifibre cables, automatic optical characterisation 86−55543
multifibre optical cable delay time meas. in real time *(French)* 86−9508
multimeter for optical power and electric variables meas. *(Japanese)* 86−5353
multimode and monomode fibres, automatic meas. system for dimens. charact. and numerical aperture 86−9575
multimode fibre attenuation meas., interlaboratory comparison in China 87−26029
multimode fibre industrial meas. methods 87−46520
multimode fibre lightguide, synchronised optical pulse train propagation 86−22101
multimode fibre lightguides metric, meas. standardisation 85−18706
multimode fibre loss, automatic meas. of spectral depend., cutback method and system *(Czech)* 87−12202
multimode fibre meas. methods, review 85−29621
multimode fibre source power distrib. charact. by splice offset technique 87−46523
multimode fibre splice loss, relating system and laboratory meas. 88−20351
optical variables measurement continued
multimode fibre waveguide dispersion props. determ. and calc., review 85−41168
multimode fibres, bandwidth and differential mode delay, European interlaboratory comparison 86−2830
multimode fibres, differential mode delay meas. by far-field filtering 85−15057
multimode fibres, mode excitation and modal power distrib. meas. using computer-generated holograms 87−68068
multimode fibres, reference meas. method for mode spectrum determ. *(German)* 86−22147
multimode optical fibre, bandwidth meas. in frequency domain 87−68110
multimode optical fibres, field bandwidth meas. instruments 86−53944
multimode-fiber-type optical directional coupler for OTDR using acoustooptical deflector *(Japanese)* 88−58156
multiport junction, simultaneous phase and amplitude meas. on optical signals 85−8973
multiwavelength radiation pyrometry, algorithm and device based on emission and reflection *(Japanese)* 88−60738
near-white tint differences indices *(Hungarian)* 88−16533
nematic-cholesteric liquid crystal mixtures, fluorescent colour display props. *(Japanese)* 85−4053
Newton's fringes, phase change determ. using least-squares fit 88−16529
noise anal. of refractive index profile meas., optical fibre and preform, deflection function techniques 85−1961
noncircular waveguides, mode spot size meas. 87−1948
nondestructive inspection methods and development trends 87−52226
nonGaussian mode field radius measurement in axially nonsymmetrical single-mode fibres 88−65215
nonlinearity meas. in optical radiation detectors, by light addition 87−63417
nonstationary light field, spatial coherence function meas., diffraction technique 87−70830
optical fibre splice loss, local meas. by light launching at spliced point 85−46174
optical fibre submarine cable, transmission charact. meas. device development *(Japanese)* 86−64992
optical path difference meas., interferometric, using sinusoidal freq. modulation of diode laser 88−53902
optical radiation meas. system calibration standards, 200-600 nm region 85−20442
optical receivers and modulators, YAG:Nd dual-ring lasers heterodyne system for calibration 88−72305
optical spectrum analyzers MS9001A/A1, MS9003A/B meas. semiconductor lasers *(Japanese)* 88−15981
optical wavelength metrology, spatial coherence of laser beam 86−5465
optoelectronic products, unit for adjusting parameters 86−28947
Oslo-Drammen fibre lint, meas. *(Norwegian)* 88−15494
OTDR, high performance measuring instruments 87−8251
OTDR automation, optical fibre manufacture 88−26819
OTDR data, review *(Japanese)* 88−16527
OTDR recent trends 87−35214
OTDR splice loss meas., statistical approach 88−72074
OTDR with centimetre resolution at 10^{-15} W sensitivity 86−63616
paint coatings colour measurement *(Hungarian)* 88−16535
parallel laser light measurement with plane glass plate 85−7487
parametric testing of fibre optics 85−24302
passive IR systems and technology, conf., Hague, Netherlands (Apr. 1987) 88−24320
performance assessment of thermal imaging system 87−20957
phase and polarisation modulators, all-fibre, review 85−24278
phase conjugation metrology principle and appls. 88−2389
phase deformation recording on PLZT wafers for holographic and spatial light modulator applications 86−48514
phase reconstructor based on a multiplier-accumulator approach 86−49016
phase shifts meas. in optical fibres, thermodynamic limitations 88−10150
photocopier liquid developers characterisation for continuous tone electrography, computer controlled testing 88−8408
photodetectors frequency charact. meas., using sweep generator of optical signals 86−5324
Photodyne 2260 XF smart fibre optic field test equipment 88−45076
photoelectric instrument, FPS-3M, adaption for light scattering meas. and turbidimetric titration 85−14812
photolithographic lenses, optical performance meas. 85−29072
photoluminescence power and quantum yield meas. in narrow-gap semiconductors 87−3779
photomatrix for meas. of statistical charact. of two-level images 88−73201
photon-counting optical time-domain reflectometer using planar InGaAsP avalanche photodiode detector 86−38380
planar waveguide losses meas. using coherent fibre bundle 87−26064
plastic substrates of magneto-optical discs, birefringence eval. 88−45237
polarisation, optimal performance of an electro-optical sampler, stripline charact. determ. 88−2061
polarisation state control using fibre optic techniques 87−26035
portable optical power tester for fiber and component light loss meas. 85−41157
power meas. for optical fibre sources *(German)* 87−70833
power measurement with integrated optical waveguide refractometer *(German)* 87−74847
power measurements using detectors 88−9979
power meter, HP8151A for 550 to 1750 nm wavelength 85−26489
power meter, review *(Japanese)* 88−4538
power meter subminiaturisation technology 88−4530
preforms testing, by interferometric methods *(German)* 85−50913
printheads, nonimpact, testing device 87−47025
pulse-modulated radiation energy and time parameters determ., using thermo- and pyroelectric detector 88−67800
pulsed wavefront sensing using three-channel phase detector 86−50235
pyroelectric detection of optical absorption in non-transparent materials 85−8974
radiometer, elec. compensated, for meas. of solar radiant flux 86−38395
receivers and fibres, automatic characterisation in freq. domain 87−28588
reference signal in LIDAR, monitoring device 86−4747
reflectometer for luminance meas., automatic control and data recording system *(German)* 86−65284
relative spectrum flux density meas. of radiation sources 86−57014
roadway lighting, illuminance meas. system using split type photocells 88−37742
rotating light source appls., linearly polarised 86−24806
rotating linearly polarised light source, appl. to optical meas. 86−42394

optical variables measurement continued
rotating linearly polarised light source for optical meas., using acousto-optical filter 87−14576
sampled time-domain fibre measurements, Q-switched mode-locked laser jitter elimination 85−29630
sampling spectral-line intensity with width meter for hollow-cathode lamps meas. 86−70232
sampling system, electrical, optically coupled with 4 GHz bandwidth 87−29016
Sanwa Electric Instrument Co. optical power meters, review 88−4532
scanning camera with line CCD sensor for use in schools *(Slovak)* 87−20970
selective measuring transducer for light intensity meas. 88−22584
semiconductor cluster, four-wave mixing and scanning tunnelling microscopy 88−65866
semiconductor laser parameter meas. method *(Chinese)* 86−68521
semiconductor lasers for optical measurement *(Japanese)* 88−2256
semiconductor optical waveguides, loss and facet reflectivity meas. technique 87−54051
semiconductor optical waveguides, loss meas. technique 85−52880
semiconductor technology, dielec. process monitoring, appl. of contour maps and statistical control charts 88−13081
sensors, high-resolution, microprocessor-based phase determ. 85−20739
shadow-mask CRT display, resolution meas., automated technique using IBM PC 88−16328
SHG, surface, picosecond pulse duration meas. appl. 85−35855
Shimadzu fiberoptic power meter LW-1000A, evaluation *(Japanese)* 88−29520
Shimadzu optical power meter LW-100, evaluation *(Japanese)* 88−29519
single mode and multimode optical fibres, dispersion meas. 87−26024
single mode fibre, 1.3 μm, intramodal and intramodal dispersion meas. for use at 0.85 μm 88−58093
single mode fibre, field dispersion measurement techniques 85−12628
single mode fibre, installed, chromatic dispersion meas. 88−58092
single mode fibre, OTDR meas. using semiconductor laser 86−53992
single mode fibre characterisation 86−2760
single mode fibre characterisation methods 85−12547
single mode fibre chromatic dispersion meas. using modulation phase technique, meas. accuracy 85−35456
single mode fibre dispersion, routine meas. for factory and field environments 86−53993
single mode fibre dispersion measurement system utilising WDM technique 86−9475
single mode fibre measurements and standardization 87−68066
single mode fibre mode field radius meas. by far field pattern method 86−2831
single mode fibre mode-field diameter meas. by knife-edge scanning in far field 87−18637
single mode fibre non-Gaussian mode field meas. by far-field axial scanning technique 87−18634
single mode fibre optic waveguides, cutoff wavelength meas. method 87−12137
single mode fibre profiling, near field scanning appl. 85−1964
single mode fibre testing methods for industrial environment, review 87−46519
single mode fibres; high dynamic range chromatic dispersion meas. 85−12546
single mode fibres, accurate automatic system for chromatic dispersion meas. 85−29633
single mode fibres, bending loss charactn. 88−58071
single mode fibres, bending losses determ. from spot size meas. 88−39929
single mode fibres, birefringence and polarisation effects meas. using polarisation shuttle pulse technique 85−29619
single mode fibres, chromatic dispersion characterisation using multiple-wavelength system 85−29632
single mode fibres, chromatic dispersion meas., comparison of spot size and pulse delay method 85−29636
single mode fibres, chromatic dispersion meas. by wavelength temp. tuning of laser diodes 88−65235
single mode fibres, far-field pattern wavelength depend. meas. method 85−46176
single mode fibres, interferometric group delay method for dispersion meas. 85−29635
single mode fibres, mode field diameter meas. methods, spot size meas. 85−29615
single mode fibres, polarisation maintaining, mode field diameter meas. 86−53943
single mode fibres, relative meas. of scatter levels, new technique 86−55866
single mode fibres, self-imaging offset meas. 86−15452
single mode fibres, spectral chromatic dispersion, long-distance field meas. method 86−22131
single mode fibres, spot-size meas., optical processing technique 85−35480
single mode optical fibre, mode field radius meas. by near field pattern technique 86−68244
single mode optical fibres, mode field radius meas. by harmonic anal. 86−15453
single mode short fibres, precision interferometric meas. of dispersion 85−29634
single mode waveguides, propagation loss measurement technique 88−20414
single-mode, birefringence meas. using polarisation shuttle pulse technique 86−28817
single-mode, polarisation mode coupling coeff. evaluation from polarisation mode dispersion meas. 86−2735
single-mode, spot size estimation from far field meas. 87−74694
single-mode fiber loss meas., light detection technique *(Japanese)* 85−31612
single-mode fiber measurements 87−68150
single-mode fiber measurements 88−58164
single-mode fibre, birefr. determ. rel. to fabrication monitoring 86−28842
single-mode fibre, chromatic dispersion meas. using single edge-emitting LEDs 86−63621
single-mode fibre, mode-field radius meas. based on harmonics detection 86−22078
single-mode fibre characterisation using equalisation wavelengths 87−54075
single-mode fibre chromatic dispersion meas. technique, high resolution, review 87−46525
single-mode fibre chromatic dispersion meas. using interferometric detection *(Japanese)* 88−26789
single-mode fibre communication system, optical meas. devices *(Japanese)* 86−28781

optical variables measurement continued
single-mode fibre dispersion measurement techniques comparison 86−22109
single-mode fibre meas. and standardisation 87−26021
single-mode fibre measurements 87−62938
single-mode fibre spectral attenuation precision meas. 87−46481
single-mode fibre waveguide, chromatic dispersion determ. by interf. method 87−25984
single-mode fibre with axis having periodic perturbation, cutoff wavelength meas. technique 87−7097
single-mode fibres, birefringence parameters meas., fibre twisting appl. 85−35401
single-mode fibres, chromatic dispersion meas., comparison of spot-size and pulse delay methods 85−24266
single-mode fibres, chromatic dispersion meas. from Fourier transform of white light interf. patterns 87−38751
single-mode fibres, cut-off wavelength and mode-field diam. meas., standardisation issues, trends 87−46524
single-mode fibres, cut-off wavelength and mode-field diameter meas. 86−36136
single-mode fibres, cut-off wavelength and mode-field diameters meas. techniques 86−63680
single-mode fibres, cut-off wavelength meas. technique *(Slovenian)* 87−53986
single-mode fibres, direct meas. of chromatic dispersion using streak camera 85−48116
single-mode fibres, dispersion meas. using LEDs, modulation freq. shift technique 87−74680
single-mode fibres, dispersion-shifted, chromatic dispersion meas. in 1.5 μm wavelength region 87−12110
single-mode fibres, effective cutoff wavelength determ., interlaboratory comparison 85−41146
single-mode fibres, mode field dia. and chromatic dispersion meas. techniques 85−58919
single-mode fibres, mode field diameter meas., transmitted field pattern method *(Japanese)* 87−1940
single-mode fibres, mode field radius meas. using near field pattern technique *(Japanese)* 85−48118
single-mode fibres, mode-field dia. meas. using fibre probe far-field technique 88−20339
single-mode fibres, one-end splice loss meas. method using OTDR 86−50234
single-mode fibres, propag. const. and beat length meas., prism coupling technique 86−63617
single-mode fibres, self-imaging transverse offset meas. 86−28797
single-mode fibres, spot size meas., optical processing technique 85−18684
single-mode fibres, stress-induced scattering polarisation detection and beat length meas. 88−45149
single-mode fibres testing, equivalent-step-index parameters determ. 87−3203
single-mode nonlinear fibres, direct obs. of optical wave breaking of ps pulses 88−58083
single-mode optical fibre splice, optimisation 85−63684
single-mode optical fibre splice loss measurement methods, comparison 88−26826
single-mode optical fibres, equalisation wavelength meas. technique 87−38738
single-mode short fibres, direct meas. at second order dispersion using interferometry 85−1986
single-mode transmission lines, chromatic dispersion, far-end meas. technique 85−31065
small lightweight high resolution optical sensor forspecular reflectors 85−64313
Soar Corp. optical power meters, capabilities 88−4533
Soar optical power meters for low cost high performance 88−42011
soft X-ray multilayer characterisation using self-scanned photodiode array 88−23018
solar cell irradiance models, data and instrumentation for device performance anal. 87−9801
solar cell optical and electrical charact., meas. systems 87−9803
space energy charact. meas. of CO_2 laser, in far zone 85−7486
SPC Electronics optical power meters, review 88−4531
speckle interferometry for spectral analysis of lasersources and multimode optical waveguides 86−11762
spectral analyser design, with high resolution and stability *(Japanese)* 86−31278
spectral corrections to optical-density measurements 87−63541
spectral emittance meas. in mid-IR, results of Round Robin meas. 88−29668
spectral linewidth of semiconductor lasers meas., for use with coherent communications systems 87−68596
spectral radiance meter for light source evaluation, microprocessor controlled *(Japanese)* 88−43480
spectral reflectance meas. of high reflectance coatings 87−70387
spectrum anal. using Babinet compensator 88−42015
spectrum analyser and power meter, performance 88−4331
spectrum analyser meet stiff requirements 88−4330
spliced multistage profile fibres, 1.1 to 1.6 μm, backscatter meas. *(German)* 86−22146
sports lighting installations, photometric specification and meas. 87−43641
standards for optical power meter and rise time, 850 nm wavelength 85−26490
Stokes parameters spectral dependence determ. 87−70834
submarine cables, characteristics and long-term stability 88−28912
subscriber cables charact. *(Japanese)* 87−8258
telecommunication systems, meas. techniques *(Polish)* 86−59919
test setup for meas. of high-speed optical components 88−47699
testers for fault determination in short-haul networks 87−28555
testing of optical fibres 85−63682
thermal indicators based on cholesteric liquid crystals, optical parameters obs., biomedical appl. 87−68211
time domain reflectometry 86−60366
time domain reflectometry for optical fibre sensor networks 88−36060
time domain reflectometry in 1.5 μm range using LD and APD *(Japanese)* 87−77435
time-domain reflectometry instruments for fibre-optic cable testing, features and specifications 85−58753
TQ8345 optical spectrum analyser with new techniques and functions, review 87−8571
transient radiation damage meas. in optical fibres using streak camera 87−25953

optical variables measurement continued
transimpedance measurement receivers for modulated optical power in optical fibre systems 87−28551
transparency meas. of plastic scintillators 87−71021
transportable hemispherical illumination system for making reflectance factor measurements 88−42306
UIE flickermeter, lighting flicker level control 88−17226
ultrashort pulses, phase modulated for relaxation time meas. 85−41474
ultrathin films, thickness and optical const. dispersion determ. using reflection absorpt. spectroscopy 85−43101
underground mines measuring, monitoring and control instruments, use of electronics 85−43092
underwater measurement techniques using low-power lasers, seawater props. determ. 88−36676
units, photometric and radiometric *(French)* 88−60930
universal measurement system for recording optical signals 88−60642
unpositioned workpieces handling robot with visual andforce sensors 86−47205
UV curable resin-coated optical fibres, transmission characteristics at low temperature 88−26828
VanderLugt correlation technique, sensitivity, grating period change meas. 85−30294
video camera response correction using digital techniques 88−29086
video imaging systems, MTF meas. techniques 86−24376
visible laser precision freq. metrology 86−5464
washing machines, automatic, water and electric power consumption reduction by computerised control device 85−21969
wavefront meas. using integrated optics 88−72143
wavefront sensor, integrated optical, lens focusing onto detector array 87−12241
wavefront sensor error estimation using Cramer-Rao lower bound 86−50237
waveguide attenuation measurements using prism coupler 88−51531
waveguide devices, loss and phase shift measurement 88−7916
waveguide loss measurement by scatt. radiation detect. at visible and near-IR wavelengths, optimum conditions 87−54050
waveguide loss measurement using photothermal deflection 88−65288
waveguide loss measurements by three-prism method 86−42293
waveguide losses at corner bending, in situ meas. method 85−7203
waveguide propagation losses, measurement method 88−51520
waveguides, spectral charactn. 88−51533
wavelength, design and characts. of optical wavemeter 87−56868
wavelength measurement of tunable pulsed lasers, double-beam interf. method 85−8976
wavelength meter, design and characts. *(Japanese)* 86−31689
wavelength meter, using crystal optical rotator and retardation plate *(Japanese)* 86−31459
wavelength of light source, fibre optic spectrometer using Sagnac interferometer appl. 88−42145
wavemeter, CW laser wavelength meas. using travelling Michelson interferometer, design and operation 85−4135
wide dynamic range, using thermal and photoelectric *(Japanese)* 86−31683
wideband optical phase detector, using the He-Ne lasers 86−68650
Zeeman laser, stabilised transverse, applics. to polarisation meas. *(Chinese)* 87−39259
As_2S_3 fibres, IR, optical and mechanical props. 88−33643
As_2Se_3 fibres, IR, optical and mechanical props. 88−33643
CO_2 laser beam diagnostics and control 87−75225
$Ga_{1-x}Al_xAs$ electrolyte electroreflectance meas. system, microcomputer-controlled, technique 86−55528
GaAs optical absorption meas. by photoluminescent techniques 88−13034
He Townsend primary ionisation coeff. meas. by luminous-flux method *(Korean)* 86−14774
He-Ne laser beam meas. using direct looking apparatus for light intensity distribution *(Japanese)* 87−35217
$LiNbO_3$ optical waveguides, proton exchanged, resistivity to optical damage 86−42304
$LiNbO_3$ waveguides, guided mode effective index meas. using Cherenkov SHG 87−54034
$LiNbO_3$:Ti channel waveguides, guided mode cut off wavelengths meas. 86−9600
$LiNbO_3$:Ti channel waveguides, optical mode intensity meas., two dimens., comparison with numerical calcs. 87−54098
$LiNbO_3$:Ti, optical charactn. for integrated optical devices 88−51556
Na high-pressure lamp, efficacy variation obs., with arc tube bore and current 85−32784
Ne Townsend primary ionisation coeff. meas. by luminous-flux method *(Korean)* 86−14774
OH-ion concentration and transmitter-wavelength fluctuations, single-mode fibres loss spread 88−20394
PbS thin film IR detector, optical characteristics *(Korean)* 88−47518
Si bipolar transistors, optical sampling of GHz charge density modulation 87−67214
SiO_2 fibre, intrinsic transmission loss, temp. dependence 88−45148
SiO_2 reflection bending optical waveguide, loss meas. and anal. 88−33722
SiO_2 single-mode silica fibres, broadband low-dispersion, interferometric meas., bending sensitivity 86−2821
SiO_2:F graded index optical fibres, radiation hardness 88−45121
TlBr-TlI, KRS-5, fibres, IR, optical and mechanical props. 88−33643
W incandescent lamp luminous intensity meas. using self-calibration technique *(Japanese)* 88−37723
YIG waveguides, tuning of propagation constant difference 88−65344
ZrF_4-based fibre, low-loss, absorption and scattering meas. 88−65230

interwaveguide transmission efficiency 87−60955
invariant subspaces of periodical optical waveguide *(Russian)* 85−50975
Kerr-type dielectric film leaky waveguide, asymmetric, nonlinear guided wave *(Chinese)* 88−65286
laser FIR waveguide, oscillation conditions 85−35467
laser waveguide resonators, single-mode, coupling loss theory 85−46425
layered coupled waveguide arrays, approx. soln. of eigenmode problems 87−46467
leaky modes in waveguides, solns. of scalar wave eqns. 86−9507
leaky optical waveguide of four layer semiconductors, anal. 85−46123
leaky wave spatial spectrum generated by guided wave scatt. from acoustic wave 87−18658
light guides with nonuniform asymmetric thickness distribution of refractive index 88−2015
light propagation in complex dielectric waveguides, anal. 88−45187
light propagation through hollow lightguides *(Russian)* 85−35495
light radiation in optical fibres, self-induced optical effects 86−15479
limits of dispersive optical fibre transmission for chirped pulses 87−18609
localization of light waves, total decay length 88−33717
locally deformed stratified media, computer code appl. to rough surfaces and guided waves devices 85−35431
longitudinally anisotropic dielectric waveguides, critical mode frequencies 85−18705
loss and amplification in one waveguide, effect on propag. in multilayer heterostructure 87−7146
loss calc. based on Green's function determ. in paraxial approx. 86−9467
low loss bends for planar optical waveguides, theoretical study 88−65293
low-mode lightguides, modulation frequency characts. 85−18712
low-mode optical gradient fibres, dispersion characts. 85−41164
Mach-Zehnder low-loss modulator using mode coupling Y-branch waveguide 88−47129
macrobending losses and cutoff wavelength in dispersion-shifted segmented core fibres 86−53947
magneto-optical waveguide, periodic, nonreciprocal TE-TM mode conversion 86−54016
metal meshes, transmission as function of incidence angle, frequency and polarisation 85−18645
metal-clad GRIN, guided wave characts., analytical results 87−46468
metal-clad optical slab waveguides, step- and graded-index type, absorption loss study 86−42266
metal-clad planar optical waveguides produced by diffusion, guided mode characts. 87−53996
metal-clad ridge waveguide laser modes 88−26843
metal-clad ridge-waveguide laser, proper waveguiding condition 86−54132
metal-dielectric waveguide with corrugated boundary, light radiation 88−33747
method of moments and weighted index method, accuracy 87−68826
microbending and macrobending effects in optical cables 88−73972
microbending loss in single-mode triple-clad fibres 85−35394
microbending losses in single-mode fibres, anal. 86−53951
MLAYERS, interactive computer program for dielec. layer-optical fibre simulation in student teaching 87−33495
modal attenuation constant for bent overmoded hollow slab waveguide 88−65319
modal field analysis of injection-laser devices 87−68827
mode excitation by partially coherent radiation sources, quadratic refr. index profile waveguides 86−53985
mode field and propagation consts., calc. by numerical method 87−19254
mode field radius definition for planar single-mode waveguides 88−66131
mode separation in multichannel branching waveguides 88−1978
mode transducers utilising coupling effects of multi-mode coupling system, appl. to optical cct. components *(Japanese)* 87−68163
mode-conversion type optical branching waveguides, design considerations *(Japanese)* 88−51537
monomode and weakly birefringent, optical fibres, nonlinear transmission *(French)* 86−42225
monomode fiber lightguides with complicated core, critical frequencies 85−18704
monomode fibre evanescent-field coupling with high-index medium of limited thickness 85−46153
monomode fibre profiles, synthesis using modified eigenvalue problem soln. 85−46133
monomode fibre/integrated optic strip line waveguide junction, theoretical study *(German)* 85−50943
monomode graded index fibres with arbitrary cross sections, iterative eigenfunction expansion method 87−74803
monomode optical fibre dispersion, numerical analysis *(Italian)* 86−48144
monomode optical fibre half-coupler, beam propagation method *(French)* 88−51433
MQW waveguides, transmission characts., matrix method anal. 87−1951
multilayer coated optical planar waveguide termination anal. 88−39960
multilayer dielectric structure, nonlinear guided modes, dispersion relations and power-flow expressions 88−26856
multilayer radially nonuniform lightguides, natural modes method calculation 85−18715
multilayer slab waveguide guiding props., field distrib. 87−38768
multilayer slab waveguides, mode number, contrib. of low-index layers 88−26850
multilayer waveguides, dispersion characteristics 85−29588
multilayered dielectric planar waveguides, EM scattering from arbitrarily shaped junctions, integral eqn. approach 86−2741
multilayered structures, leaky waves and their excitation 86−42263
multilayered waveguides, confined mode number calc. unified approach 86−28826
multimode, optical field spatial coherence 85−18718
multimode and monomode optical fibres, matrix eigenvalue calc. *(German)* 85−50944
multimode branching waveguide, distrib.-index, evaluation by phase space 87−18586
multimode concatenation modal group analysis 88−26776
multimode fibre, effect of higher order modes on pulse propag., theoretical and expt. study 87−74794
multimode fibre chain bandwidth 85−41148
multimode fibre light guides, transmission characts. 86−22169

optical waveguide theory continued
multimode fibre lightguide, synchronised optical pulse train propagation 86−22101
multimode fibre lightguides, adiabatic model for pulse responses calc. 88−39947
multimode fibre splices, loss, noise and distortion due to tilt misalignment, modal analysis 85−7224
multimode fibre waveguide, temporal coherence of transmitted laser radiation 85−50936
multimode fibres, selective excitation, theoretical study 86−42239
multimode fibres, splice loss anal. for multiple misalignment 87−68164
multimode fibres, wavelength dependence of bandwidth concatenation exponent 86−9548
multimode graded index fibres, selective excitation of annular zones 85−1982
multimode graded-index planar waveguide, refractive index profile *(Italian)* 86−22753
multimode optical fibres, perturbed, bandwidth calc. 88−2017
multimode optical fibres, pulse propagation, scattering effect 86−28789
multimode step-index fibres, impulse response and transfer function 85−46602
multimode waveguide systems, coupled-mode eqns. 87−18675
multimode waveguides, irregular, modal noise, radiation coherence effects 87−7155
multimode Y-junction waveguide, propag. characts. in lens-like media *(Japanese)* 86−22175
multiple core fibres, symm. distrib., modal analysis method 85−56318
multiple stripe geometry laser modes, fast Fourier transform, finite element approaches 86−42615
multiple waveguide systems, coupled wave anal. 86−28804
multiple-core optical fibre, modal anal. method 85−18736
multiple-core optical fibres, coupled-mode anal. method 88−72069
multiple-wave generation due to four-wave mixing in a single-mode fibre 87−25945
multistep index fibres, cut-off freqs. of modes, eqns. *(Polish)* 87−38733
multistep-index fibre with uniaxial anisotropy, numerical anal. 85−35464
multistep-index monomode fibres, numerical anal. *(Polish)* 86−58746
multiwaveguide systems, coupled mode solutions 86−42262
multiwaveguide systems with non-parallel guides, appl. of coupled-mode theory 87−12116
non-Kerr-like media, nonlinear slab-guided waves 86−68619
non-parallel dielectric rod waveguides, coupling analysis 87−53997
noncircular waveguides, mode spot size meas. 87−1948
nonhomogeneous optical planar waveguides, surface layer depth determination 87−68120
nonhomogeneous unimodal optical fibre, perturbed wave spatial beats 86−28859
nonlinear, TM wave control by TE guided waves 88−27543
nonlinear boundary waveguide, TM wave propag., soliton waves 85−18720
nonlinear coherent coupler, all-optical switching through nonlinear stationary wave 88−65877
nonlinear coupling of waveguide modes, comment and reply 88−13904
nonlinear dielectric slab waveguides , FEA *(Japanese)* 88−72619
nonlinear effects, propagating beam method analysis 85−12965
nonlinear guided wave propag., effects of linear absorption 87−38776
nonlinear interaction between TE and TM waves 88−34118
nonlinear planar slab waveguide, TE modes *(German)* 85−24892
nonlinear pulse propagation in monomode waveguide 87−46466
nonlinear slab-guided waves, asymm. config., dispersion relations anal. 85−35856
nonlinear slab-guided waves, finite element formalism 88−65305
nonlinear slab-guided waves, generalised dispersion 85−41162
nonlinear TE waves in dielectric optical waveguide with nonlinear media, propag. characts. 87−68165
nonlinear thin-film waveguide, transfer function analysis 86−15774
nonlinear TM-polarised guided waves, solutions 85−29932
nonlinear waveguide, ATR device, resonant excitation and optical bistability 86−22477
nonlinear waveguide, soliton motion with dissipation and pumping 87−74749
nonlinear waveguide, soliton propagation with dissipation and damping 87−32979
nonplanar structures, effective index method appl. 85−7249
normal mode anal. 88−72099
open wide-aperture optical resonators formed by convex and concave mirrors 86−48639
orthogonality relation for TE- and TM-modes in guided-wave optics 88−72110
parallel dielectric guides, improved coupled-mode eqns. 86−68261
parallel dielectric waveguides, multi- and single-mode, coupled mode theory *(Japanese)* 88−52269
parallel single-mode/multimode fibres, wave coupling study, LAN directional coupler appl. 87−18627
parallel waveguides, coupled mode theory 86−22126
parallel waveguides, normal-mode and coupled-mode analyses 85−18695
parallel waveguides, weak coupling mode theory 88−33743
parallel-plane waveguide, plane wave coupling 88−2011
penalty function improvement of waveguide solution by finite elements 85−2633
phase modulated sensors, effect of fibre cladding on sensitivity, anal. *(Slovak)* 88−72064
phase-locked array lasers, coupled active waveguide anal., self-consistent and coupled-mode solns. 88−20658
phase-locked array lasers, self-consistent analysis of waveguiding 86−9880
phased-array diode lasers, anal. 85−51186
planar, GRIN, numerical anal. using matrix method 87−60914
planar anisotropic inhomogeneous optical waveguides, finite-element anal. *(Japanese)* 85−30076
planar anisotropic inhomogeneous optical waveguides, FEM 87−53973
planar arbitrarily anisotropic diffused waveguides, finite element soln. 86−2722
planar corrugated waveguides, diffraction at normal incidence 87−32977
planar corrugated waveguides, rigorous EM treatment 87−25975
planar dielectric waveguide, refr. index profile from effective index distrib. 85−56322
planar dielectric waveguides, resonance and scatt. of surface waves by tapered screens *(Ukrainian)* 86−15996
planar optical waveguide, in-plane scatt., refr. index fluctuations and surface roughness 85−46151

optical waveguide theory continued
planar optical waveguide functions, approx. analytical methods investigation 85−35491
planar optical waveguide mode coupling analysis 85−46164
planar optical waveguides, acoustoelectronic parametric amplification of EM waves in IR and visible band 85−18711
planar optical waveguides, generalised transverse resonance model 86−2825
planar optical waveguides, stability and instability of nonlinear standing waves 87−32994
planar surface waveguides with truncated index profiles, WKB anal. 88−20406
planar waveguide, completude of TE and TM modes *(French)* 85−62389
planar waveguide, Si-clad, numerical anal. *(Japanese)* 87−7158
planar waveguide equation, soln. using matrix algebra 85−35461
planar waveguide interface, mode transform. for oblique incidence 86−28839
planar waveguide profile determ. by nonstationary mode index calc. 86−36181
planar waveguide with Fermi index profile, mode eqn. 86−2660
planar waveguides, guide wave index saturation with power 88−13919
planar waveguides, nonlinear guided waves, stability of TE_1 branches 86−68620
planar waveguides, surface transmittance method calcs. 86−2710
planar waveguides, surface-guided nonlinear TM waves 87−54403
planar waveguides with arbitrary permittivity distrib., natural modes 85−29590
planar waveguides with curved surfaces, optics equations 87−54015
planar waveguides with irregular boundaries, EM wave propag. calc. by surface admittance method 86−2709
plane waveguide, randomly irregular, mean-field modes 87−26058
plate waveguides on higher refractive index substrates, optical charcts. *(Chinese)* 86−63601
polarisation holding fibres, boundary element anal. 86−68808
polarisation holding fibres, elliptical core, boundary-element anal. *(Japanese)* 85−12618
polarisation-maintaining fibres, three-layer elliptical cross-section, transmission charcts. *(Japanese)* 85−29606
power distribution in optical channel waveguide intersection 87−46471
power dividers at optical freqs., directional couplers and symmetrical Y-junctions, theoretical study 88−58210
preform refractive index distrib., interference meas. 87−74759
principles for modal waves in guided wave optics *(Japanese)* 88−26862
propagation, propagator-based calc. 88−58179
propagation charcts., numerical methods comparison *(Czech)* 86−58759
pseudo-modes anal. *(French)* 88−51493
pulse distortion and polarisation coupling due to random deform. of birefr. fibres 85−46193
pulse propagation in a periodic optical waveguide 88−58195
pure bending-induced birefringence in optical waveguides: a simple analytical expression 88−65324
quantum theoretical methods, mode coupling with offset, tilt and gap between two waveguides 88−1990
quasi-monomode fibre charcts. 87−1941
radially anisotropic cladded fibres, polarisation mode selection study 86−2687
radially inhomogeneous fibres, eigenproblems from scalar formulation 86−22093
radially inhomogeneous fibres, propag. consts and cutoff freqs. 86−42267
Raman scattering of guided waves by polaritons in piezoelectric slab-waveguides *(German)* 87−46985
Raman-type free electron laser using 2 D hollow beam, optimum beam thickness 85−41418
random volume perturbations, equivalent parameters 87−38832
ray optics and wavefield interference 85−18700
Rayleigh backscatter statistics of single-mode fibre 87−38761
rectangular cross-section, vectorial wave anal., equivalent network approach 86−9466
rectangular dielectric waveguide junction with transverse displacement, refl. and transmission charcts, study *(Japanese)* 88−38699
rectangular dielectric waveguide structs., finite-difference anal. 87−19236
rectangular dielectric waveguides, microwave equivalent circuit representation 86−68232
rectangular dielectric waveguides laid in different layers, coupling charcts. 86−68259
rectangular metal-optical waveguide, hybrid modes charcts. 86−48140
rectangular waveguide, laser radiation generation at difference frequency by nonlinear crystal 87−46972
rectangular waveguide, single-mode bandwidth calc. 85−35473
rectangular waveguide approx. anal. by modified effective-index method 86−36144
rectangular waveguides, Gaussian beam excited modes, ray theory synthesis 86−48128
resonators with side reflectors, soln. by means of waveguide modes *(Chinese)* 87−54367
rib dielectric waveguide anal., mode matching technique 85−50918
rib waveguide, propagation constants approximate values calc. 87−68044
rib waveguides, universal design curves 88−72107
rib waveguides with sloped rib sides, anal. 85−35392
ring resonator fabricated in phosphosilicate glass films deposited by CVD 87−12121
rough surface bounding layered medium, equiv. impedance, appl. to integrated optical waveguide 87−33411
scalar approx. in fiber optics 88−58094
scalar strong coupled mode theory for slowly-varying waveguide arrays 88−72124
semiconductor active waveguides, gain-guided modes 87−26411
semiconductor four-layer leaky optical waveguides, strong coupling approx. calcs. *(Chinese)* 86−9460
semiconductor lasers, integrated etalon interference, waveguiding props. and intermodal coupling anal. 85−29826
semiconductor lasers, phase locked arrays, eigenmode anal. 86−29129
semiconductor rib waveguide structures, comparison of analysis methods 85−41192
semiconductor waveguides, single rib structures and directional couplers, light propag. 86−15475
semiconductor waveguides, spectral cut-off behaviour 88−51532
semivectorial polarised finite difference method for optical waveguides with arbitrary index profiles 88−26842
shaped core fibres, fabrication using crucible technology, theoretical study *(Polish)* 85−35452

optical waveguide theory continued
side-pit fibres, calc. of relative single-polarisation bandwidth 86−63611
single mode, low dispersion, low loss and W fibres, anal. *(Japanese)* 86−36159
single mode fibre, refractive index profile and modal dispersion prediction from far field pattern 85−29613
single mode fibre far-field radiation patterns, mode field radius calc. 86−22110
single mode fibres, length depend. of effective cutoff wavelength 85−12572
single mode fibres with arbitrary index profiles, cutoff frequencies calc. 87−68076
single mode fibres with arbitrary refractive index profile, field radius relationship 88−39870
single mode film waveguides with plane or curved Bragg gratings, Goos-Haenchen effect study 85−24335
single mode inhomogeneous planar waveguide analysis 86−42280
single-mode anisotropic fibres, birefringence anal. using variational reaction theory 86−58764
single-mode fibers, stress applied, vector anal. *(Japanese)* 85−12620
single-mode fibre, 3D treatment based on Bergeron's method *(Japanese)* 87−1968
single-mode fibre, bent, field calc. using perturbation theory 87−46452
single-mode fibre, noncircular field, mode-field radius, splice loss, and waveguide dispersion 88−51446
single-mode fibre beyond cutoff freq. of LP_{11} mode, charcts. 87−53968
single-mode fibre couplers, wavelength selectivity limits 88−7887
single-mode fibres; modal field and far field intensity distribs., accurate empirical formulae 86−22133
single-mode fibres, asymptotic effective cutoff condition 87−46473
single-mode fibres, dispersion charcts. study *(Japanese)* 88−7876
single-mode fibres, dispersion-determined limits on production tolerances 87−7089
single-mode fibres, fundamental mode field, non-Gaussian model 87−18613
single-mode fibres, polarisation dispersion, influence of core ellipticity and birefringence, theoretical study *(Polish)* 85−1998
single-mode fibres, polarisation dispersion, model and anal. 87−7086
single-mode fibres, RF phase shift depend. on microbending loss 85−46173
single-mode fibres, space-curved and twisted, coupled-mode approach to field anal. 88−20959
single-mode fibres, step index, radiation from circular bend, theoretical anal. 87−53961
single-mode fibres with index well profiles, leaky-mode loss of second propag. mode 85−50903
single-mode fibres with material/linear profile dispersion; relationship between field and dispersion 88−65177
single-mode fibres with zero total dispersion at wavelengths 1.3 and 1.55 μm *(Japanese)* 86−9526
single-mode graded-index fibres; trial field for non-Gaussian field distribs. 87−7091
single-mode graded-index planar optical waveguides, numerical method for propag. charcts. study 86−42265
single-mode GRIN waveguide structures, propag. props. 87−46438
single-mode helically-wound optical fibres, field and propag. aspects, perturbation anal. 86−22099
single-mode laser diode, coupling to optical waveguide via gap, theoretical study 87−53971
single-mode linearly birefringent fibres with zero polarisation-modedispersion 86−2680
single-mode magneto-optic rib waveguides, nonreciprocal phase charcts. *(Japanese)* 88−65338
single-mode multiple-clad fibres with dispersioncompensation and low microbending loss 86−2670
single-mode optical fibre propagation charcts. approx. 86−15458
single-mode planar taper, mode conversion anal. 85−1962
single-mode planar waveguide with Gaussian index profile, fundamental guided mode props. 85−56320
single-mode single-polarisation fibre using resonant absorbing effect, theoretical study 87−25943
single-mode slab waveguides, with truncated parabolic profiles, energy losses at junction 85−62871
single-mode slightly elliptical optical fibres, freq. charcts. 85−46188
single-mode step-index fibres, core radii calc. for min, total dispersion 86−48092
single-mode step-tapered waveguide section design, power loss 87−38760
single-mode strongly and weakly fused fibre tapered couplers, polarisation anal. 85−50909
single-mode tapered fibres, oscillatory transmission *(French)* 88−51434
single-mode to multimode fibre power transfer, study using coupled-mode theory 87−7160
single-mode waveguides, propag. props., Monte Carlo simulation 88−33709
single-mode waveguides with rectangular cross-section, scalar variational anal. 85−35466
single-mode weakly guiding bent fibres, scalar field theory and 2D ray theory 85−56323
single-mode/multimode fibre losses and phase variations, theoretical study and utilisation in sensors *(Dutch)* 85−37605
sinusoidally corrugated dielec. waveguide, mode coupling at oblique incidence, anal. *(Korean)* 86−58768
six-port fibre couplers, vector modes 87−74678
slab dielectric waveguide, perturbed, mode propag. 85−46177
slab structures, attenuation of cutoff modes and leaky modes 86−42261
slab waveguide, fundamental mode, tilt, offset and end-separation loss 87−18642
slab waveguide, inhomogeneously layered line source excited, leaky-wave modes numerical evaluation 85−1957
slab waveguide, step-profile planar, exact ray representation of bound modes 86−2754
slab waveguide, TE modes, nonlinear coupling, beam propagation study 87−53956
slab waveguide discontinuities, BEM anal. 86−42226
slab waveguides, basic mode propag. const., approx. formula 86−22064
slab waveguides, finite-element theory of nonlinear TM-polarised guided waves 88−13909
slab waveguides, guided modes, roughness-induced scattering and attenuation 87−25976
slab waveguides characterised by moments of index profile 85−2011
slab waveguides with nonlinear substrate, scaling rules 88−1961
slab-guided mode amplification by inversion depletion of externally pumped dopants 85−18701

optical waveguide theory continued
slot electrooptical magnetooptical phase modulator, electrodynamic characts. calc., singular integral equations method 87−38857
soliton formation, influence of regular phase modulation 87−74706
soliton propagation in optical fibres 88−45131
spectral inverse problems for optical waveguides and couplers 87−74802
spectral parameter determ. by polarisation mode distrib. investig. 86−2755
spinor formalism and guided waves 87−1957
spot size, adiabaticity and diffraction in tapered fibres 87−74676
step discontinuities and tapers in optical dielec. waveguides, exact numerical anal. technique 86−36160
step discontinuity in planar waveguides, power transmission/loss calc. using beam propag. method 88−40639
step-index fibre, perturbed, mode props. 86−22080
step-index fibres, effective cutoff freq. of LP_{11} mode, theoretical study 88−13797
step-index single-mode fibers, EM radiation from circular bends 86−68286
step-index single-mode fibres, radiation from circular bend, theoretical study *(Japanese)* 85−50971
storage head, focusing grating coupler type, physical optics 87−61004
stratification methods in waveguiding structures 85−36077
strip optical microwaveguide, surface EM wave diffr. by open end 85−41169
strip-loaded with arbitrary index profile, guided mode calc. 85−12586
strip-slab guide, Green's function by plane-wave spectrum synthesis 88−13915
stripe geometry semicond. laser, theory of elec. and optical waveguiding processes *(Chinese)* 87−68449
stripe-geometry laser diodes, with self-existent waveguiding, P-J emission characts. *(Polish)* 85−18946
stripe-geometry laser diodes, without built-in waveguide, self-existing waveguiding *(Polish)* 85−18945
strongly-coupled mode theory appl. to integrated optical devices 87−46465
surface optical waveguides, mode conversion 85−35500
symmetric dielectric slab waveguide with Kerr like nonlinear permittivity, TE wave propag. 87−46976
symmetric parallel waveguide couplers, eigenmode analysis 88−7920
symmetric planar waveguide, degenerate nonlinear modes 87−33270
taper, GRIN, exact ray paths 87−46439
tapered monomode optical fibres, understanding large power transfer 87−25926
tapered optical waveguides, intrinsic mode theory 86−15474
tapered quadratic index media, metal waveguide modelling 87−25925
tapered waveguide, nonseparable boundary value problem 85−35530
tapered waveguide, radiation characts., ray optics and energy flux based numerical method 85−35529
tapered waveguide beam radiation 87−7103
tapered waveguide in integrated optics, steepest descent path determ. by computer 88−39982
tapered waveguide spectral analysis for integrated optics 86−15505
TE modes of layered nonlinear optical waveguide 85−1966
TE-TM mode conversion of an optical beam wave in thin-film optical waveguides 88−39961
thin film waveguide anal. by mode matching method, propag. characts. of embedded waveguide *(Japanese)* 85−56309
thin-film mag. waveguides, optical phenomena 85−29603
thin-film optical waveguides with unaxial anisotropic substrate, hybrid modes, zigzag ray model 88−1987
thin-film reflection filters having nonuniform multiperiodic interface corrugations 87−46557
thin-film two-parallel optical waveguides for optical ICs *(Japanese)* 88−65360
thin-film waveguide, guiding props. of TM modes 87−54008
thin-film waveguide-optical fibre coupling element, narrowing edge of planar waveguide 85−12601
thin-film waveguides, present state and future prospects 85−18744
three channel waveguide directional coupler, coupling characts. 86−15490
three-parallel thin-film waveguide, numerical anal. 88−51539
throughput and coupling in optical fibres 85−1956
TM-modes in a planar optical waveguide with a gradedindex of the symmetric Epstein type 86−42306
TM-polarised nonlinear modes guided by symmetric five-layer dielectric structure 87−54024
transmission line circuit models for inhomogeneous optical fiber 87−32957
transversely inhomogeneous waveguide medium, dynamics of rays 85−18716
tree-structured waveguide optical switches for optical switching networks 88−15442
triple-clad step-index single-mode fibres, with dispersion compensation, macro-bending loss study 86−42240
twin antiguiding active slabs, gain 86−36161
two-dimensional optical waveguide propagation characteristics approximation 86−9476
two-parallel embedded waveguides, num. anal. 88−1986
unstable cavities with cylindrical mirrors, light scatt. effect on oscills. 85−24612
variable length lightguides, frequency response form determ. 85−18709
vector E-field finite-element analysis of dielectricoptical waveguides 86−28782
very oversized circular waveguides for FIR laser resonators, mode transform. 88−7922
wave propagation, waveguide with anisotropic and gyrotropic materials, exact wave-optics anal. 88−58193
waveguide gratings, local normal mode anal. of guided mode interactions 88−72101
waveguides, dielectric, step-index, symmetric, simple modeling solutions 88−72103
waveguides, shaped, inhomogeneous, effective index method 88−72109
waveguides, single-mode, field distrib. near abrupt bend, model 86−15441
waveguides, single-mode and rectangular cross-section directional couplers, simple anal. method 88−72105
wavelength selective diffused-channel triple-waveguide couplers for λ-duplexers, propagating beam anal. 85−46121
WDM fibre with minimised insertion loss 86−65000
weakly guiding fibres, cutoff freqs., finite element analysis 85−12603
weakly guiding fibres, power loss calc. using far-field method 87−74804
weakly guiding single-mode optical waveguides, wave propag. 85−41153
Y-junction from bimode planar light guide to monomode light guides, parameters 87−54000
Y-junction semiconductor laser array, anal. 87−68461
Y-junction semiconductor laser arrays fabricated by MOCVD 87−68462

devices with cylindrical geometry, nonlinear optical interactions 88−2382
DFB and DBR waveguide lasers, anomalous modal spectrum 87−7239
DFB lasers, quarter-wave-shifted type with epitaxial layer taper, props. study 87−54308
DFB thin-film quasi-waveguide laser 87−75062
DFB thin-film quasi-waveguide laser, returnable ultrashort light pulse generation 87−39022
DFB waveguide structures, coupling coeff. determ. 88−65297
DH ridge-waveguide lasers, single mode, threshold current optimisation 87−39128
diameter checking, by comparison with standard 85−12589
dielectric, step-index, symmetric, simple modeling solutions 88−72103
dielectric guides in integrated optics *(German)* 87−33004
dielectric slab waveguide with two optically nonlinear layers, nonlinear TE wave propagation 88−20402
dielectric waveguides, bending losses, 3D anal. 87−38770
dielectric waveguides, rectangular, weak absorptive, optical characts. analysis, differentiation method *(Chinese)* 88−58181
dielectric-coated metallic hollow, for CO_2 laser light, power handling capability 85−56329
dielectric/semiconductor guided-wave bistable devices, periodic coupling 87−33318
diffraction from abruptly terminated dielectric slab waveguide in presence of adaptor lens 86−48100
diffraction grating sensor, spectral content of signals meas. 88−58192
diffraction lattices, focusing, holographic recording 86−22171
diffraction transmission gratings on step-index waveguides, design and fabrication 85−2053
diffused channel, propagation charact. by weighted residual method 88−33744
diffused glass, interference between modes with identical polarisations 85−50937
diffused waveguide based optical devices, effective use of diffr. gratings 86−22140
diffused-ion concentration profiles of ion-exchanged glass optical-waveguides *(Japanese)* 88−72131
diffusional light guides, synthesis, inverse spectral problems 87−32952
digital connections via optical waveguides in thelocal network 87−3201
digital high speed interconnects, optical alternative 87−26003
diode laser arrays, phase locked, direct supermode anal. 87−75084
diode laser beam scanning using local deflector integrated with mode filter 88−20690
diode lasers, phased-array with symmetrically branching waveguide structure 86−63824
directional coupler switches, reversed-$\Delta\beta$, crosstalk 88−33721
directional couplers, forward and backward coupling, bandwidth formula 88−26849
directional couplers, three-waveguide, crosstalk expression 86−68318
disc resonators, properties and appls. 88−39984
discontinuities anal. 88−33723
dispersion characts. description using generalised parameters 87−25981
distributed Bragg mirrors, asymmetric 87−46491
distributed Bragg mirrors, surface light wave emission 85−12645
distributed feedback, theory 87−32982
distributed feedback by four wave mixing in waveguide 85−41471
distributed-index branching waveguide integrated into bellows-type mode scrambler 88−65314
double-ion-exchanged glass type, masking process 86−68249
doublelayer waveguide, parameter determ. 87−25941
doubly clad slab waveguides, leaky modes, curvature losses 87−38769
dye laser, cylindrical waveguide, skew rays *(Chinese)* 85−18884
dye laser, DFB oscillation in slab-type optical waveguide 87−7282
dye laser, efficient narrow linewidth tunable waveguide, pumped by CuCl laser *(Chinese)* 88−40164
dye laser, flash-lamp pumped planar waveguide, tuning characts. *(Chinese)* 86−3096
dye laser, flashlamp pumped planar waveguide, energy transfer 85−2251
dye laser, quasi-waveguide thin-film tunable 85−29783
dye laser, quasiwaveguide, tunable, recent results 87−75026
dye lasers, thin-film energy-transfer using polymer waveguide 87−68398
dynamic instability in the amplitude of a light beam in a real optical light guide 87−68157
dynamic operation for optical logic 88−72115
education of optical waveguide engineers 85−1954
educational courses with demonstration experiments for optical waveguides 85−32951
electrically conductive laser waveguide for in-situ spectroscopic study of rotating electrochem. electrode 87−1956
electrically induced strip waveguide modes 88−65325
electro-optic materials for guided-wave optics, desirability analysis 88−7839
electro-optic polarisation convertors, wavelength tunable in birefringent waveguides 88−33758
electro-optical, four-layer, single mode conversion 88−39974
electro-optical effect, FEM anal. 87−74817

optical control and generation of microwave signals, conf., London, England (Jan. 1986) 86−26521
optical coupled waveguide switch, N×N 85−7263
optical disc pickup device, monolithic integrated-optical, fabrication and operation 86−36252
optical glasses, Ag electrodiffusion, planar waveguides form. 85−62386
optical guided wave modulation in dielec. thin film waveguide on semiconductor substrate *(Japanese)* 85−62381
optical guiding in an FEL 87−2196
optoelectronic devices, conf., The Hague, Netherlands (March-April 1987) 88−37813
optoelectronic devices, exciton bleaching based single quantum well 88−8082
optoelectronic materials, conf., San Diego, USA (Aug. 1987) 88−49335
optoelectronic sensors, applications and advantages *(German)* 85−26290
optoelectronic single quantum well devices based on electron bleaching of exciton absorpt. 87−61051
organic guided wave nonlinear devices, design and props. 86−54218
organic materials for integrated optics 87−12099
organic nonlinear materials for integrated optics 86−28773
organic nonlinear optical waveguides formed bysolvent-assisted indiffusion 86−63684
organic photochromic materials for waveguide hologram recording 85−24684
organic polymeric waveguides, nonlinear 88−51517
organic single crystal thin film waveguides, second harmonic generation *(Japanese)* 88−7927
orthogonal polarisation for optical isolation 88−47152
orthogonality relation for TE- and TM-modes in guided-wave optics 88−72110
OTDR for fibre and waveguide investig. 88−1959
oversized, hollow-core, for IR radiation, temp. distrib. 88−13900
parallel, weak coupling mode theory 88−33743
parallel waveguides, coupled mode theory 86−22126
periodic waveguide gratings, statistical analysis using Rouard's method 88−45170
periodically perturbed, bounded light beam refl. from surface 88−20424
perturbed, Green function results generated by FFT method 86−28848
phase conjugation of planar guided waves 88−34117
phase constant control by loading Langmuir-Blodgett films 88−72096
phase modulator, highly efficient, for integrated optoelectronics 86−54052
phase modulators, electro-optic, waveguide PIN junction, anal. and design criteria 85−56364
phase shifter, nonreciprocal using interferometric isolator, design 85−52358
phase-locked laser diode array, stable supermode operation with three index waveguides 86−9848
photochromic glass photocontrolled planar waveguides 88−1976
photochromic polymer films appl. 85−24257
photodetector, fast, deposited on dielectric channel waveguides 88−67795
photodetector array using laser recrystallised Si 85−29533
photoelastic waveguide devices for III-V optoelectronic ccts. 85−41189
photoelectric devices, hollow mirror lightguide and diaphragms, optical system calcs. 87−25970
photonics appls., conf., Cambridge, MA, USA (Sept. 1986) 88−6093
photosensitive waveguides, planar, mode selection 88−20419
photothermal deflection for waveguide loss measurement 88−65288
picosecond pulse generation in fibre waveguides due to self-modulation instability, dispersion effects 88−51460
picosecond Raman pulse combining and compression in light guides for ultra-high power laser systems 88−72425
piezoelectric films with waveguides for light modulation 85−2385
planar, characterisation by K^+ ion exchange in glass 85−29598
planar, dielectric, low loss Y-junctions 85−7261
planar, GRIN, birefringent, bisection algorithm to calc. hybrid modes 88−13902
planar, inhomogeneous, EM field distribution *(Polish)* 87−60931
planar, nonlinear optical excitation of modes 88−20409
planar, quasi-optics of scatt. and absorption 88−51502
planar, with external grating couplers as integrated optical bistable devices 88−72121
planar acoustooptic 2×2 commutator switch 87−26112
planar active, light amplification characts. 87−12442
planar and channel optical waveguides fabrication on Si substrates 85−46126
optical waveguides continued
planar and channel waveguide fabrication by N^+ implantation in fused SiO_2 85−29546
planar anisotropic inhomogeneous optical waveguides, FEM 87−53973
planar anisotropic inhomogeneous optical waveguides *(Japanese)* 85−30076
planar corrugated, diffraction characts. 86−63666
planar design, with prescribed propagation constants 87−74774
planar dielectric slab, with step discontinuities, light propag., operator formalism 86−68265
planar dielectric slab, with step discontinuities, light propag., TE-polarised field anal. 86−68266
planar dielectric slab, with step discontinuities, light propag. TM-polarised fields 86−68267
planar graded waveguides, parameters meas. in near IR, refractometric method 87−18677
planar graded-index diffusion waveguides, coupling 85−12605
planar gradient-index glass waveguide for optical accessor and star coupler 86−42361
planar metal-clad optical waveguides, TM mode-attenuation reson. 85−46205
planar metallic and composite, IR laser single mode propagation 88−39972
planar microlens, 2 D arrayed monolithically fabricated, for multimode lightwave components 85−2077
planar nonlinear waveguides, computer anal. method 88−13920
planar optical waveguides, fabrication by K^+ ion exchange on optical glass 86−28847
planar optical waveguides, synthesis 88−7957
planar optical waveguides for interconnection of VLSI 88−58386
planar optically controlled, made of photochromic glasses, selective props. 87−1958
planar step-index, interference effects between modes 86−68306
planar waveguide, electro-optic light deflection, optimal parameters anal. 87−18726
planar waveguide, laminar etching method for optical characts. determ. 88−20418
planar waveguide, periodically grooved, physical effects 85−1959
planar waveguide 8-port branched circuit 85−2075
planar waveguide interference measurements of continuous thickness changes of layers with high refractive indices 85−46166
planar waveguide lenses for integrated optical circuits *(Polish)* 87−68191
planar waveguide mode struct., stimulated Brillouin-Mandelstam scatt. use in optoelectronics 86−42633
planar waveguide technology solves optical coupling problem 88−45204
planar waveguide thin-film photodetectors, periodic coupling 85−62402
planar waveguides, electro-optically perturbed, transmission characts. 88−39975
planar waveguides, singly and doubly periodic light propagation 88−20407
planar waveguides graded-index, piecewise linear approx. for TM mode anal. 86−36183
planar waveguides with irregular boundaries, EM wave propag. calc. by surface admittance method 86−2709
planar waveguides with leaky modes, propag. consts. of TE modes 87−74711
plane metal-dielectric waveguide polarisation filter, spectral width 86−48243
plane waveguide, randomly irregular, mean-field modes 87−26058
plastic waveguides for optical dividers and mixers, development 87−7163
PMMA: benzil(benzildimethylketal), optical waveguide fabrication 86−2766
PMMA, distributed-feedback lasers with active framing medium 86−22343
PMMA light guides, fabrication by photo-induced self-condensation 87−54048
Pockels light modulator, fast, using guided wave resonance 85−56365
point matching method appl. to dielectric waveguides, elliptical harmonics 87−19269
polariser based on buried waveguide in glass 88−20430
polariser integrated on SiO_2 planar waveguide with metallic coatings, high extinction ratio 85−2054
polarization independent coupling in prism- and grating-loaded optical waveguides 88−7934
poly-vinylidene fluoride copolymer poled guest/host composite for freq. doubling and waveguiding structs. 87−53933
polycrystalline waveguides, fabrication and testing, losses, grain size reduction 85−2025
polydiacetylenes as nonlinear waveguide materials 87−12581
polyimide, integrated optical waveguides for wafer scale integration 88−72148
polyimide II, optical waveguiding 88−1920
polyimide lightguides, humidity monitoring 88−42026
polyimide planar optical waveguides, fabrication 87−54094
polyimide WSI optical interconnections 87−68310
polymer film integrated optic waveguide sensors, scatt. light intensity characters. at waveguide surface 88−45205
polymer films, acousto-optics characts., waveguide appl. *(Russian)* 85−41105
polymer films, optical, waveguide and acoustooptic props. 85−35490
polymer optical circuits, design and fabrication *(Japanese)* 88−26874
polymer strip waveguides, charactn. by leaky-mode spectroscopy 88−7911
polymer waveguide fabrication techniques, acousto-optic spectrum analyser 85−46127
polymer waveguides, efficient grating coupler fabrication by reactive ion beam etching 87−60892
polymer waveguides, nonlinear 88−58204
polymer waveguides, nonlinear organic, fabrication and props. 86−53989
polymer waveguides, plasma-etched for intrachip optical interconnects 88−51706
polymeric integrated optical waveguide chemical vapor microsensor, fabrication by photopolymerisation 86−55601
polymeric nonlinear optical waveguides 88−51518
polymeric optical waveguides, loaded with nonlinear organic materials 88−39978
polymeric thin films optical waveguides, polarised Raman spectroscopy, orientational effects in two dimens. films. 85−7255
polymers, optical waveguides, fabrication by ion implantation 88−65308
polymethyl methacrylate doped with benzophenone and coumarin 88−45190
polystyrene thin-film waveguides, Brillouin scatt. 86−9489
polyurethane coatings, integrated optics applications 88−71995
power and communications transmission on optical waveguides *(German)* 85−53337

optical waveguides continued
power distribution in optical channel waveguide intersection 87−46471
power plant optical waveguide transmission lines failure anal. *(German)* 85−52329
power plants automation/communication using optical waveguides for improved reliability and reduced interference *(German)* 85−52328
precision electrooptical deflector employing acorrugated lightguide 86−28896
preform refractive index distrib., interference meas. 87−74759
preform refractive index distrib. in interferometer with reference plane wave, interference meas. 87−74760
preform refractive index distrib. interference meas. in radial shearing interferometer 87−74761
preforms testing, by interferometric methods *(German)* 85−50913
preforms testing using interferometers 87−74762
pressure sensor, metal-clad ion-exchanged glass waveguide 87−54100
prism coupling into planar waveguides, self-pulsing 87−60927
prism coupling with optical waveguide having cubic nonlinearity 87−46552
process control appls. of light guides 87−32981
production by solid state diffusion, examination of props. 88−20420
propagation losses, measurement method 88−51520
propagation props. meas. using TV camera system *(Japanese)* 88−51538
proton exchanged waveguides, cryst. and optical quality, fabrication rel. to material limits 86−36227
pseudo-modes anal. *(French)* 88−51493
pulse propagation in a periodic optical waveguide 88−58195
pump-correlated Stokes fields in stimulated Brillouin scattering 88−20410
quantum well structures, linear optical props. elec. field depend. waveguide electroabsorpt. and sum rules 87−7178
quantum well structures, optical waveguide dispersion 85−62330
quartz, ion implanted, buried double waveguide 88−65290
quartz, ion implanted optical waveguides, refractive index profiles 87−12199
quartz, optoelectronic material, ion beam effects 88−7943
quartz glass, doped, He ion irrad., optical waveguide fabrication 86−28882
quartz optical waveguides, ion implanted, SAW diffr. of light 86−48181
radiation propag., parabolic eqn. approx. 87−60922
radiative Braff mirrors, spectral characts. versus grating groove profile 86−42356
Raman conversion, high efficiency and brightness via capillary waveguide amplifier 87−7442
random volume perturbations, equivalent parameters 87−38832
rare-earth doped waveguides, evaluation of fabrication by ion exchange 88−51512
rectangular dielectric waveguide junction with transverse displacement, refl. and transmission characts, study *(Japanese)* 88−38699
rectangular lightguides, geometrical optics treatment 88−45172
rectangular metal-optical waveguide, hybrid modes characts. 86−48140
rectangular optical waveguides, dual effective-index method for anal. 86−63602
rectangular reflection-type waveguide, microwave Raman generation, appl. to new ENDOR method 88−1991
rectangular waveguide, excitation by metallic rod *(Russian)* 85−41158
rectangular waveguide approx. anal. by modified effective-index method 86−36144
rectangular-core, directional couplers, anal. by iterated moment method 88−45194
refractive index profile, computer-aided estimation from propag. mode near-field pattern *(Japanese)* 88−45199
refractive index profile determ. of waveguides formed by ion implantation 86−28843
refractive index profile reconstruction, dielectric planar waveguides, inverse WKB procedure 88−7909
refractive index profiling using propagation-mode near-field method 87−7123
resonant optical waveguides cavities as electro-optic modulators 85−41213
resonator, waveguide with wavefront-reversing mirrors 85−41434
RF discharge excited waveguide lasers, impedance matching 85−12790
rib waveguide, propagation constants approximate values calc. 87−68044
rib waveguide grating resonator filters, anal. *(German)* 87−74906
rib waveguide with nonlinear substrate, anal. 87−60928
rib waveguides, universal design curves 88−72107
ridge waveguide DFB lasers, 1.5 μm, design and fabrication 85−29831
ridge waveguide laser, threshold current in gain and index guiding regimes including end facet reflectivity 88−40210
ridge waveguide lasers, 1.55 μm bridge contacted, gain guiding to index guiding transition 87−33168
ridge-waveguide lasers, threshold current optimisation 86−54135
rigid contact between a channel $LiNbO_3$:Ti waveguide and single-mode fiber waveguides 87−68113
ring resonator fabricated in phosphosilicate glass films deposited by CVD 87−12121
ring-type three-layer waveguide, surface mode propag., dispersion characts. *(Russian)* 86−2747
s-polarised nonlinear wave propag. in optical waveguide, bistable states 85−7537
saturable nonlinear with appls. to broad-area semiconductor lasers 88−13921
SAWD, waveguide-optical signal read-out, expt. study 88−1846
scattering by dielectric discontinuities, integral eqn. formulation 87−74696
sciences, conf., Kweilin, China (June 1983) 85−1
self-alignment technique for fibre attachment to guided wave devices 86−68257
self-switching of light in integrated optics 86−9942
semiconductor, heteroepitaxial ridge-overgrown DFB laser 85−62565
semiconductor 1.5 μm single-freq. laser with external waveguide Bragg reflector, performance characts. 88−40213
semiconductor DFB laser, multiple waveguide, coupled wave theory 86−42554
semiconductor four-layer leaky optical waveguides, strong coupling approx. calcs. *(Chinese)* 86−9460
semiconductor gain-guided lasers, accuracy of Petermann's K factor 86−42561
semiconductor heterostructure coupled waveguide devices, optical characts. 87−54016
semiconductor integrated etalon interference lasers, high-speed modulation, waveguide resonator 85−2354
semiconductor laser, linewidth enhancement factor depend. on waveguide struct. 85−29818
semiconductor laser, stripe geometry single quantum well, waveguiding, spectral and threshold props. 85−62581
optical waveguides continued
semiconductor laser amplifier, 1.3 μm, with integrated passive waveguides 87−12507
semiconductor laser array, laterally coupled, frequency selectivity 85−56661
semiconductor laser array, Y-junction, analysis 86−63807
semiconductor laser arrays, gain- and index-guided, lateral mode anal., injected charge carrier effect 86−9849
semiconductor laser arrays, gain-guided, free-running modes 87−68465
semiconductor laser arrays, gain-guided phase-locked, lateral modes, direct analysis 86−68531
semiconductor laser monolithically integrated with optical waveguide, laser oscillations *(Japanese)* 87−12502
semiconductor laser waveguiding, index guided and gain guided structs. 85−35799

semiconductor optical waveguides, loss and facet reflectivity meas. technique 87−54051
semiconductor optical waveguides, loss meas. technique 85−52880
semiconductor optical waveguides, nonlinear response, carrier diffusion effect 87−74730
semiconductor potential for optical integrated circuits 85−56363
semiconductor ridge waveguide, nonlinear 88−58212
semiconductor ridge waveguide DH lasers, self-consistent anal. 87−39109
semiconductor waveguide, optical transmission and refl. by slot with mirror walls 85−50935
semiconductor waveguide devices, optimum overlap of electric and optical fields 86−42238
semiconductor waveguides, coupling anal. between rib waveguides and optical fibres 87−12197
semiconductor waveguides, single rib structures and directional couplers, light propag. 86−15475
semiconductor waveguides, spectral cut-off behaviour, InGaAsP and InGaAlAs examples 88−58184
semiconductor waveguides, spectral cut-off behaviour 88−51532
semiconductor-clad dielectric optical waveguides, coupling and absorption phenomena 88−51519
semiconductor-clad optical waveguide devices, periodic coupling 86−28857
semiconductor-doped glasses for nonlinear waveguides 88−65333
semiconductors, nonlinear optical waveguiding 88−72116
sensors, review 87−26047
sensors use in physical reactions 85−18708
serial bus for microprocessor systems *(German)* 87−24292
shaped, inhomogeneous, effective index method 88−72109
SHG, phase-matched, by surface polariton along Ag layer 86−9935
signal processing appls. 88−28071
signal processing using nonlinear waveguides, review 86−54570
signal processors consisting of collinear acousto-optic channel waveguides 87−19932
signal transmission for elec. meas. technique, appl. *(German)* 87−60907
silica based, appl. to guided-wave optical interferometers 88−72095
silica hollow core waveguide, transmission characts. determ. in 9-11 μm waveband 88−26859
silica waveguides, hollow-core 87−32944
single mode integrated optical waveguides by ion-exchange in glass 88−7947
single mode strip waveguides, integrated optical acousto-optic switching 85−51013
single mode waveguides, propagation loss measurement technique 88−20414
single quantum well waveguides, anisotropic optical props. 86−9457
single-mode, field distrib. near abrupt bend, model 86−15441
single-mode, refractive index profile and modal dispersion prediction from far-field radiation patterns 85−62318
single-mode and rectangular cross-section directional couplers, simple anal. method 88−72105
single-mode channel and directional coupler by ion-exchange in glass 88−45182
single-mode fibre array permanent attachment to waveguides, insertion loss 86−2726
single-mode fibre waveguide, pulse generation of 100 to 200 fs by stimulated Raman scatt. 88−45083
single-mode glass waveguides, fabrication and charactn. 88−51536
single-mode integrated-optical polarisers in $LiNbO_3$ and glass waveguides, low loss 85−2066
single-mode low-loss high-silica channel waveguides, fabrication technique 86−36149
single-mode magneto-optic rib waveguides, nonreciprocal phase characts. *(Japanese)* 88−65338
single-mode optical refl. bending and intersecting waveguides 86−9464
single-mode optical Y-junction, anal. by bounded step and bend approx. 88−45183
single-mode planar taper, mode conversion anal. 85−1962
single-mode slab waveguides, with truncated parabolic profiles, energy losses at junction 85−62871
single-mode waveguide, complex amplitude-phase field distrib. conversion into Gaussian 85−46165
single-mode waveguide and polarisation optics, equivalence theorems 85−2034
slab and channel waveguides, refr. index determ. from multi-wavelength effective index data 85−46131
slab structures, attenuation of cutoff modes and leaky modes 86−42261
slab waveguide, fundamental mode, tilt, offset and end-separation loss 87−18642
slab waveguide, inhomogeneously layered line source excited, leaky-wave modes numerical evaluation 85−1957
slab waveguide electrooptic filters, modal dimensionality and dephasing effects 88−1984
slab waveguide refractive index profile, automatic meas. by interferometric fringe processing 87−56872
slab waveguides, almost-periodic distributed feedback, anal. via fundamental matrices 87−74662
slab waveguides, basic mode propag. const., approx. formula 86−22064

optical waveguides continued
slab waveguides, differential phase shift, influence of magneto-optic layer position 88−1979
slab-type waveguide, SHG using 2-methyl-4-nitroanaline as high index top layer 87−54399
slab-type waveguide, SHG using 2-methyl-4-nitroaniline as high index top layer *(Japanese)* 85−19040
slab-waveguide geometries, expressions for phase-conjugation fidelity for stimulated scatt. 88−65321
smoke detector, multipoint, using nephelometric-type lightguides 87−35134

tilted-mirror waveguide lasers and amplifiers, modal coupling 88−58559
time-space planar waveguide converter, design 87−74768
TM-mode selective filter using a high refractiveindex lossy layer cladded optical waveguide 87−7144
TM-modes in a planar optical waveguide with a gradedindex of the symmetric Epstein type 86−42306
TM-polarised nonlinear modes guided by symmetric five-layer dielectric structure 87−54024
TM-polarized nonlinear slab-guided waves in saturable media 87−19048
torsional strength characts. of light guides with polymer protective coatings *(Russian)* 88−51500
transition radiation of a modulated current in a waveguide 88−13914
transmission gratings on planar dielec. waveguides, diffr. characts. 85−24333
transmission of information using optical waveguides, operation, function and components *(German)* 85−14253
transmitters and receivers for light waveguides *(German)* 85−50917
transverse coupling between single-mode fibre and thin film waveguide 87−54026
tree-structured waveguide optical switches for optical switching networks 88−15442
triple-boundary waveguide geometry plane-wave treatment, optical stability study 85−51255
tunnel prism coupled to active optical waveguide, EM waves, amplitude, space-time behavior 85−50976
tunnel-coupled, switching by radiation of different frequency 87−25980
tunnel-coupled waveguides, self-switching 88−26852
tunnel-coupled waveguides, self-switching radiation 88−2009
two-layer, holographic recording 86−22555
two-layer single-mode fibre waveguides, chromatic dispersion, determ. and calc. 88−45085
ultrashort optical pulses propag. in resonant nonlinear light guides 85−12973
ultrashort pulse breakup in self-switching of light in tunnel-coupled waveguides 88−20737
uncoupled stacking of parallel ARROWs for 3-dimensional optical wiring 88−65339
uniaxial, dielectric, planar, hybrid guided modes 88−72102
vectorial wave analysis of dielectric waveguides foroptical-integrated circuits using equivalent networkapproach 86−63645
VLSI chips, optical interconnections 86−53716
VLSI optical interconnection networks 88−4003
wave propagation obs. in integrated optical waveguides and circuits 87−18745
wave stability guided by nonlinear self-focusing saturable film bounded by linear media 88−45189
waveguide devices loss and phase shift meas. 88−7916
waveguide grating filter, guided wave coupling for normal incidence 85−2059
waveguides, single-mode, magneto-optical mode conversion using end-fire coupling 86−42310
wavelength multiplexer and demultiplexer, six-channel, for single mode systems 86−23595
WDM for fibre-optic communication systems *(Japanese)* 88−28888
weakly guiding waveguides, anal. by scalar variational mapping technique 86−58761
wideband acousto-optical Bragg transducer for integrated optics 88−65402
windshield wiper control, using optical waveguide raindrop sensor 88−31169
Y coupled laser diode arrays with single-lobe far-field radiation pattern 87−39098
Y-branch structures, radiation loss 85−62323
Y-junction from bimode planar light guide to monomode light guides, parameters 87−54000
Y-junctions, single mode asymmetric, transmission characts. 85−35489
Ag layer on slab optical waveguide, phase-matched SHG of surface polariton 87−68599
Ag thin film coating, effect on absorption and dispersion of waveguide mode 88−20416
Ag-AgCl-ZnS photoinduced periodic struct. for planar waveguide study 87−25998
Ag-Na ion-exchanged planar waveguides in glass, refractive-index profile investig. 88−65312
Ag^+-Na^+ exchanged planar glass waveguides, wavelength-depend. propag. charact. 86−58742
Ag^+-Na^+ ion-exchange equilibrium influence on waveguide index profiles 88−65304
Ag^+-Na^+ ion-exchanged waveguides, process optimisation 88−51496
Ag^+-Na^+ ion-exchanges channel waveguides in optical glasses charactn. 87−54044
AgBr polycrystalline waveguides, IR, preparation and props. 86−68222
AgCl polycrystalline waveguides, IR, preparation and props. 86−68222
AgCl-Ag films, waveguide mode competition in photo-induced periodic struct. form. 88−20417
AgCl-AgBr polycrystalline waveguides, IR, preparation and props. 86−68222
(Al,Ga)As-GaAs MQW DH optical waveguides as electroabsorpt. modulators 87−74869
(Al,Ga)As-GaAs MQW planar waveguides, optical props., reactive ion etching of rib waveguides and directional couplers 87−60959
Al, Si-coated 85−18667
Al anodising technique for fabricating optical thin-film waveguides 87−68017
Al thin-film surface acoustic waveguides for acousto-optic devices, SAW propag. characts. study 86−42393
Al waveguides, planar dielectric coated for 10.6 μm radiation, attenuation characts. 86−58776
Al-GaAs Franz-Keldysh optical modulators in waveguides 88−2012

optical waveguides continued
Al-GaAs-AlGaAs asymmetric metal-clad waveguides, optical charcts. anal. and mode selection 88−65330
AlAs-GaAs superlattice waveguides in separate confinement heterostructure laser diodes, threshold current density 87−12480
AlGaAs BH laser with flared waveguides, high power operation 87−33144
AlGaAs DBR laser, index-guided surface emitting type, effective index and dispersion meas. 87−39104
AlGaAs DFB ridge waveguide lasers with multiple quantum well struct. 86−63802
AlGaAs, V-channeled substrate inner-stripe lasers with torch-shaped waveguide, high-power CW operation 88−65701
AlGaAs buried ridge waveguide laser array, fundamental mode oscill. 85−7423
AlGaAs high-power ridge-waveguide GRIN-SCH laser diode 87−7353
AlGaAs hybrid-external Bragg-reflector-waveguide laser, dynamic wavelength stabilisation 85−56611
AlGaAs laser diodes with graded waveguide, radiative charcts. 88−34053
AlGaAs laser rib-waveguide, gain- to index-guiding transition 87−18955
AlGaAs lasers, index guided with mode filter, local normal mode analysis 87−68459
AlGaAs monolithic lasers and modulators fabricated by impurity induced disordering 88−72138
AlGaAs nonlinear waveguides, difference-frequency generation of IR waves *(Japanese)* 88−72416
AlGaAs phased-array laser with symmetrically branching waveguide, 0° phase mode 86−3123
AlGaAs twin-stripe lasers, construction and operation 86−9867
AlGaAs/GaAs DBR laser with multiquantum well active/passive waveguides 87−33142
AlGaAs/GaAs depletion-edge-translation optical waveguide modulators, design 88−7972
AlGaAs/GaAs long cavity ridge waveguide DFB lasers, spectral linewidth reduction 87−2106
AlGaAs/GaAs ridge waveguide for miniature integrated optical beam-splitter 88−2030
AlGaAs/GaAs ridge waveguide quantum well lasers with high quantum efficiency 87−12488
AlGaAs/GaAs, rigid waveguide DFB laser, low threshold current, CW operation 86−29127
$Al_xGa_{1-x}As/GaAs$ superlattices, infrared devices, waveguide and surface plasmon coupled 88−33740
AlGaAs-GaAs DFB laser, surface emitting MQW type with broad-area grating coupler, fabrication/charcts. 88−34003
AlGaAs-GaAs DFB lasers, 780 nm, MOCVD fabricated, struct. and single longit. mode operation 88−34002
AlGaAs-GaAs, DFB lasers, low threshold, 0.88 μm emission, MOCVD fabricated with ridge waveguide struct. 87−7350
AlGaAs-GaAs DQW-SCH metal-clad ridge waveguide lasers 87−46857
AlGaAs-GaAs combined laser and photodetector in monolithic integrated-optics module utilising coupled waveguides 86−36248
AlGaAs-GaAs index-guided lasers with mode filter, props. study 87−7349
AlGaAs-GaAs integrable optical correlator, surface emitting second harmonic generation 88−72134
AlGaAs-GaAs laser, SCH DFB, at 880 nm, grown by MOCVD 87−68474
AlGaAs-GaAs laser diodes, index-guided 6950 to 7150 Å, optimisation and charactn. 87−68454
AlGaAs-GaAs laser, ridge waveguide, emitting at 757 to 790 nm, multicavity structure 88−2316
AlGaAs-GaAs laser waveguide under current injection, carrier-induced phase shift and absorpt. 87−46852
AlGaAs-GaAs lasers on Si, microwave modulation and CW operation 88−40242
AlGaAs-GaAs, multi quantum well laser, index guided, Si induced disordering 87−75125
AlGaAs-GaAs phase locked diode laser array, leaky waveguides, high power, diffraction-limited beam operation 88−72309
AlGaAs-GaAs, polyimide buried ridge waveguide laser diode, low thermal expansion 88−34027
AlGaAs-GaAs quantum well lasers with MOCVD grown diffraction coupled antiguided phase-locked array struct. 88−65676
AlGaAs-GaAs quantum wells, elec. field effects on excitons, appl. to optoelectronic devices 88−33760
AlGaAs-GaAs ridge-waveguide single-quantum-well lasers, low threshold current 86−9840
AlN plane optical waveguide prod. by reactive magnetron sputtering *(French)* 88−20423
Al_2O_3 hollow waveguides suitable for CO_2 lasers, dispersion phenomena 86−22094
Al_2O_3, ion implantation, optical waveguide form. 86−48180
Al_2O_3, low loss, reactive deposition by modified DC planar magnetron sputtering 85−12553
Al_2O_3 optical thin films, fabrication using PECVD, appl. for waveguides 88−6526
Al_2O_3 waveguide preparation by ion-beam-assisted deposition 86−2812
Al_2O_3 waveguide, pump injection into FIR laser resonator 87−25932
Al_2O_3-B_2O_3-SiO_2-Na_2O glass, heavy metal doped, generation of optically wave-guiding layers 87−54007
AnS crystals in mode-filter type optical modulator, propag. charcts. study 87−54104
As_2S_3 amorphous waveguides, photo-optical devices 85−50920
As_2S_3 chalcogenide glass, photoinduced gradient waveguide form. *(Russian)* 87−26054
As_2S_3, glassy, optical effects in thin film waveguides 87−54006
$As_{40}S_{60}$:Ag, chalcogenide glass films, grating fabrication by electron beam induced doping effect *(Japanese)* 88−26833
As_xSe_{1-x}, waveguides films for IR integrated optics 85−56362
Au coated glass waveguide laser *(Chinese)* 88−27014
$Ba_2NaNb_5O_{15}$:He^+, ion implanted planar waveguide 88−72083
BeO ceramic waveguide, losses in 10.6 μm region, IR refl. and Raman spectra 85−7274
BeO, properties for use in middle IR laser cavity dielectric waveguides 86−48073
$Bi_{0.8}Gd_{2.2}Fe_{4.9}Al_{0.1}O_{12}$ epitaxial garnet film, optical isolator charcts. meas. 86−9485
$(BiGdLu)_3$ $(FeGa)_5O_{12}$ LPE films, waveguide mode conversion by mag. linear birefringence 85−29581
BiGdLuGaIG epitaxial film, magneto-optical waveguide mode converter without external field 86−9487
optical waveguides continued
BiGdLuGaIG epitaxial film waveguides, growth-induced optical birefringence annealing effects 86−9486
$Bi_4Ge_3O_{12}$, ion implanted optical waveguides, surface processing 88−7946
$(BiNdLu)_3(AlFe)_5O_{12}$ thin film waveguides, optical birefringence 86−9483
$Bi_{12}TiO_{20}$ epitaxial waveguides on $Bi_{12}GeO_{20}$ substrate, optical props. 86−63678
$Bi_{12}TiO_{20}$:Fe optical waveguides, photoinduced nonlinear transmission 88−72128
CO waveguide laser, RF discharge excitation 87−46744
CO waveguide laser, elec. discharge instability 85−62495
CO waveguide laser for monitoring atmospheric pollutants 86−25451
CO waveguide laser, output power, discharge current oscillation effect 87−54238
CO waveguide laser, pulsed, operating at room temp. 87−54219
CO waveguide laser, water-cooled, gain 87−54240
CO waveguide laser with distributed losses, gain and saturation parameter 86−22306
CO waveguide laser with high-freq. excitation 86−29058
CO_2 CW RF pumped waveguide laser, numerical 2D analysis 86−42478
CO_2 DFB laser, small cross-section design for 1.06 μm 88−27231
CO_2 RF excited CW waveguide laser *(Chinese)* 85−46310
CO_2 RF excited waveguide laser, parameters affecting performance 85−7371
CO_2 RF-excited continuously tunable waveguide laser, frequency chirp, gas heating by discharge 88−8140
CO_2, coupled waveguide laser array, high power 86−63750
CO_2 gas laser, double coupled waveguide, RF excitation expt. exam. 87−18917
CO_2, high pressure CW waveguide laser, active mode locking 88−8267
CO_2 intracavity laser, working state *(Chinese)* 88−65550
CO_2 laser, Pyrex waveguide type with freq. tuning, construction and performance 87−68364
CO_2 laser design for hand-held and beamriding appls. 88−27067
CO_2 laser gain cavities, waveguide-like, RF- and DC-excitation, transverse gain profiles meas. 87−61191
CO_2 laser radiation transmission through hollow fibres and waveguides 88−13913
CO_2 laser waveguide, gain meas. 85−7373
CO_2 laser waveguide materials, IR optical consts. 86−28772
CO_2 lasers, RF, wideband, waveguide, mode structure 88−72273
CO_2 lasing charcts., effect of waveguide statistical surface roughness 87−26309
CO_2 metal-ceramic waveguide laser with transverse HF excitation *(Russian)* 86−36382
CO_2 pulse-periodic waveguide laser excited by AC capacitative discharge 86−48343
CO_2 ring laser CW, hybrid injection locking 85−51125
CO_2 sealed-off waveguide laser 85−12798
CO_2 self-focusing parallel-plate waveguide laser using transverse gas flow *(French)* 88−58468
CO_2 single pass waveguide laser amplifier, studies 87−68391
CO_2 thin film-coated waveguide lasers, output power characteristics 87−33105
CO_2 thin-film-coated waveguide laser, RF excited 87−7259
CO_2 tunable CW laser with waveguide cavity, gain in laser active medium 88−8245
CO_2 tunable waveguide laser, construction and operation 85−56505
CO_2 tunable waveguide laser with expanded tuning range 87−18885
CO_2 two-frequency waveguide laser for atm. pollution monitoring 86−29035
CO_2 waveguide, air breathing electric discharge laser at 10.6 μm 88−40129
CO_2 waveguide amplifier, IR DC-pumped, amplification and saturation 86−3012
CO_2 waveguide laser, Cohen model 87−12411
CO_2 waveguide laser, RF excited, 1 GHz freq. tuning range 88−45524
CO_2 waveguide laser, RF excited, structure and performance 85−51124
CO_2 waveguide laser, anomalous refr. indices of amplifying medium 87−26259
CO_2 waveguide laser, appl. of $La_{0.7}Sr_{0.3}CoO_{3-\delta}$ ceramic catalyst cathode 88−72276
CO_2 waveguide laser array, hollow bore, staggered ridge geometry 88−1964
CO_2 waveguide laser as tunable IR radiation source 87−18882
CO_2 waveguide laser, design and performance 87−7266
CO_2 waveguide laser design for manufacturing industry 85−51138
CO_2 waveguide laser, energy charcts. 85−24485
CO_2 waveguide laser excited by longitudinal alternating-current capacitance discharge, gain and saturation 86−9749
CO_2 waveguide laser, freq. stabilisation and sweep using Stark absorpt. lines *(Japanese)* 85−56504
CO_2 waveguide laser heating 85−62508
CO_2 waveguide laser, high power, design and performance 85−35679
CO_2, waveguide laser, injection phase locked CW, performance and efficiency 88−20571
CO_2 waveguide laser medium, rotational temp. meas. 88−27013
CO_2 waveguide laser, phase locking and tunability 87−68326
CO_2 waveguide laser plasma diagnostics 88−27052
CO_2 waveguide laser polarisation charcts. *(Chinese)* 88−27021
CO_2 waveguide laser, pulsed and CW with TE in RF cavity 86−48459
CO_2 waveguide laser, single-line and single-mode tuning conditions 88−8094
CO_2 waveguide laser, small signal gain and saturation intensity, curve-fitting technique 87−46758
CO_2 waveguide laser tuned by grating compound cavity *(Chinese)* 86−54078
CO_2 waveguide laser with 7.5 W output power 85−2232
CO_2, waveguide laser with plane mirrors, output charcts. 86−29045
CO_2 waveguide laser with quartz capillary and separated diffr. grating 87−68546
CO_2 waveguide laser with variable guide width, tunable RF-excited 88−20538
CO_2 waveguide lasers, RF excited 85−7381
CO_2 waveguide lasers, line discrimination improvement method *(Chinese)* 88−40122
CO_2 waveguide lasers, pulsed, RF-excited, chirp measurements 88−72268
CO_2 waveguide lasers, servo loop technique for locking slave resonator to master oscillator 87−61192
CO_2 waveguide lasers, transverse RF-excited, radiation spatial structure 86−29064
CO_2 waveguide lasers, tunability investig. *(Chinese)* 86−15610

optical waveguides continued
CO_2 waveguide lasers, two-dimensional array, coherent lasing 86−22319
CO_2 waveguide lasers utilising diffr. grating, lasing conditions for several transitions 85−24474
CO_2 waveguide lasers with RF excitation, emission freq. tuning 87−26297
CS_2 covered planar waveguide, degenerate four-wave mixing 85−35851
CS_2, use in nonlinear light guides of nonresonant type *(German)* 87−33003
$CaCO_3$, ion implantation, optical waveguide form. 86−48180
CdS doped thin glass films for optical nonlinear devices 88−51939
CdS microcrystallite-doped sputtered thin film glass waveguide charact. 88−33720
CdS substrate diffusion waveguides, fabrication and props. *(Russian)* 87−38794
$CdS_{1-x}Se_x$, semicond. layers, waveguide, index and depth profiles determ. 87−68167
CdS_xSe_{1-x} crystal waveguide Bragg light modulators 87−1975
CdS_xSe_{1-x} doped glass nonlinear guided wave structures 87−74753
CdS_xSe_{1-x} integral optics waveguides, fabrication study 87−54055
CdS_xSe_{1-x} integrated optics waveguides, fabrication, Se diffusion conditions 86−28890
CdS_xSe_{1-x} planar waveguide with variable band gap, light propag. 88−26853
Cr-Si-Al thin film photodetectors on waveguides 87−12335
Cs^+-doped glass buried waveguides for passive integrated optics 87−54090
FeNi thin films, magneto-optical effects, waveguide appls. 87−68149
Fe_xPO_4 optical waveguides, props. and fabrication by low temp. spin coating process 88−39958
Ga-Al-In-As ternary and quaternary alloy compositions, MBE growth and device appl. 87−44324
GaAlAs integrated semiconductor ring lasers 88−26872
GaAlAs integrated-optic waveguides exposed to ionising radiation, transmission loss meas. 86−58791
GaAlAs laser, transverse-mode stabilised, with slab-coupled waveguide, MOCVD growth 85−35796
GaAlAs leaky waveguide, modal bistability 88−72118
GaAlAs optical strip waveguides, photonic switching by photo-induced electroabsorption 88−33710
GaAlAs optical waveguide heterostructures, grown by MBE, charactn. 88−51514
GaAlAs passive waveguide, intrinsic optical bistability obs. 87−33317
GaAlAs strip waveguides, all-optical switching and modulation 88−65878
GaAlAs strip waveguides, optical transistor effects, expt. study 87−19051
GaAlAs waveguide, acoustooptic efficiency compared with $L:NbO_3$:Ti waveguide 86−22153
GaAlAs waveguide, acoustooptic interaction compared with $LiNbO_3$:Ti waveguide 86−53970
GaAlAs waveguide, intrinsic optical bistability and multistability 86−42624
GaAlAs waveguides, for all-optical switching via photo-induced Franz-Keldysh effect 88−39977
GaAlAs waveguides, induced absorpt. optical bistability 87−75228
GaAlAs waveguides, optical bistable switching on microsecond timescale 88−2386
GaAlAs waveguides, strong optical nonlinearities for efficient all-optical switching 86−68623
GaAlAs/GaAs index-guided inverted channel substrate planar lasers, MOCVD fabricated, high-power operation 85−56637
GaAlAs/GaAs low-loss strip-loaded waveguides with high coupling efficiency to single-mode fibres 85−56293
GaAlAs-GaAs GRIN ridge waveguide laser developed by ion beam etching 87−39110
GaAlAs-GaAs laser with dielectric-film waveguide DBR 87−68478
GaAlAs-GaAs multilayer structures, reactive ion etching waveguides for device appl. 86−28216
GaAlAs-GaAs ridge waveguide DFB lasers, lateral anal. 87−39076
GaAlAs-GaAs waveguide, freq. dependence of acoustooptic interaction efficiency 88−45186
GaAlAsSb/GaSb/GaInAsSb injection double heterostructure laser, room temp. operation 87−33200
GaAs BH waveguides with high coupling efficiency for single-mode fibres 87−60942
GaAs Fresnel waveguide grating lenses, aberration corrected, simulation 87−12237
GaAs and related cpds., conference, Heraklion, Crete, Greece (Sept. 1987) 88−55832
GaAs based waveguides, integrated guided-wave optics 88−58209
GaAs bulk materials, waveguide form. 85−18683

GaAs-AlGaAs SQW GRIN-SCH lasers, MBE grown on Si_3N_4 masked substrates, low threshold current 88−72313
GaAs-AlGaAs coupled quantum well waveguides, electroabsorption 87−53954
GaAs-AlGaAs diode laser, beam convergence using taper ridge waveguide 88−51880
GaAs-AlGaAs, double heterostructures, passive waveguiding props. charact. *(German)* 85−35438
GaAs-AlGaAs heterostructure waveguide Bragg diffract. modulators 88−72159
GaAs-AlGaAs large optical cavity semicond. laser arrays 87−7354
GaAs-AlGaAs, low-loss, single mode optical waveguides, organometallic VPE grown, appl. for integrated optoelectronics 87−60897
GaAs-AlGaAs mixed-mode phase-locked quantum well laser arrays 87−46907
GaAs-AlGaAs multiquantum well, optical waveguide props. 86−9593
GaAs-AlGaAs optical waveguides, bend losses 87−74828
GaAs-AlGaAs quantum wells in waveguides, physics and appls. 87−12235
GaAs-AlGaAs rib waveguide lasers, one-step two-level etching technique, appl. for monolithic integrated optics 88−26867
GaAs-AlGaAs single-mode miniature optical waveguide with low transmission loss coeff. 87−60943
GaAs-AlGaAs strip loaded waveguide, electronic optical bistability 88−7913
GaAs-AlGaAs strip-loaded waveguide, electronic optical bistability 88−72117
GaAs-AlGaAs superlattices, impurity induced layer disordering, delineated buried waveguides *(French)* 88−51494
GaAs-AlGaAs waveguide cavity, surface emission of coherently generated second harmonic wave 88−34104
GaAs-AlGaAs, waveguide, grating coupler, selective superlattice intermixing 87−74797
GaAs-AlGaAs:Si, channel waveguides, birefringence, impurity-induced superlattice disordering 88−26838
GaAs-AlGaAs:Zn superlattices, impurity-induced disorder-delineated optical waveguides 87−46721
GaAs-GaAlAs MQW optical waveguides, nonlinear props. 87−26550
GaAs-GaAlAs MQW waveguide, all-optical switching between modes 88−58650
GaAs-GaAlAs electron-beam-pumped semiconductor laser with a waveguide output 87−68521
GaAs-GaAlAs heterojunction as electronic-optic Mach-Zehnder interferometric modulator 85−18749
GaAs-GaAlAs high-NA optical waveguides with low losses 87−46451
GaAs-GaAlAs index-guided visible MQW lasers, stable transverse mode operation 85−7420

optical waveguides continued
GaAs-GaAlAs injection lasers, coupled, bistability induced by waveguiding 86−22505
GaAs-GaAlAs lasers, linear tailored gain broad area, anal. 87−68466
GaAs-GaAlAs multiple quantum well waveguides, nonlinear propag. 85−41190
GaAs-GaAlAs optical waveguides for microwave frequency electro-optic modulation 86−28886
GaAs-GaAlAs passive MQW strain-induced waveguide, optical nonlinearities 88−20405
GaAs-GaAlAs passive MQW waveguide resonators, all-optical switching effects, expt. study 87−7096
GaAs-GaAlAs planar waveguide acoustooptic Bragg cells fabrication and characts. 87−68237
GaAs-GaAlAs rib waveguides, variational and effective index analysis 85−12578
GaAs-GaAlAs rib waveguides, vector-H finite element solution 86−15476
GaAs-GaAlAs waveguide high-speed electro-optic modulator 88−20443
GaAs-GaAlAs waveguide, wide-band guided-wave acoustooptic Bragg cells 86−68308
GaAs-based semiconductor coupled-waveguide optical modulators, high frequency modulation characts. 85−2039
GaInAs p-i-n photodiode and optical waveguide, monolithic integration, modeling and realisation 88−40104
GaInAs strained layer quantum well GRIN ridge waveguide injection laser 87−61130
GaInAs/InP low-loss optical waveguides for 10.6 μm wavelength 87−46455
GaInAs-InP, phase and amplitude modulation by free carriers injection at 10.6 μm 87−74868
GaInAs-InP waveguides, amplitude and phase modulation by free-carrier injection 88−13942
GaInAsP strip-loaded planar waveguide for high-speed electroabsorpt. modulator 87−18757
GaInAsP twin-stripe lasers with asymmetrical waveguide channels, characts. at 1.3 μm 88−27149
GaInAsP/InP electro-optic modulators using passive rib waveguides 87−38864
GaInAsP-InP MQW ridge waveguide optical switch, field effect intersectional type, switching operation 88−39992
GaInAsP-InP distrib. reflector laser, 1.5 μm, struct. and high-power single longit. mode operation 88−40208
GaInAsP-InP, laser amplifier, 1.3 μm with integrated passive waveguides 87−68184
GaInAsP-InP lasers, DBR dynamical single mode bundle-integrated-guide, 1.5 μm, spectral behaviour 87−68468
GaInAsP-InP:Fe monolithically integrated laser/photodetector, fabrication and performance characts. 88−40100
GaInPAs-InP, heterostructure waveguide, liq. phase epitaxy 87−38764
GaSb/GaInAsSb/GaSb antiguiding struct. with metallic coating, threshold current density *(French)* 88−58518
GaSb-$Ga_{1-x}In_xSb_{1-}As_y$ heterostructure, coherent light generation and waveguide confinement 85−56665
GdIG:Bi, Ca LPE films for low-loss optical waveguides, sputter etching effects 88−20422
GdIG:Bi thin film, optical nonreciprocal phase shift and appl. to waveguide-type optical circulator 86−48113
Ge coated circular metallic hollow waveguides for IR radiation, electrodeposition prep. *(Japanese)* 87−18734
Ge-coated IR waveguides, fabrication and transmission props. 86−63631
GeO_2:SiO_2, mixtures, refractive index study using deposited-thin-film optical waveguides 86−22071
GeO_2-SiO_2 glass films, photodeposition, application to planar optical waveguides 86−28806
Ge_xSe_{1-x}-Si IR waveguide detectors, avalanche gain 86−54040
$Ge_{0.6}Si_{0.4}$ rib waveguide avalanche photodetectors for 1.3 μm optical fibre communication 87−8627
Ge_xSi_{1-x} strained layer superlattice, waveguide photodetectors in IR region 86−50094
H_2 filled hollow waveguide, stimulated Raman scatt. of dye laser radiation *(Russian)* 88−51924
H_2 high-power forward Raman amplifiers employing low-press. gases in light guides 87−12569
HCN submm laser, waveguide elec. discharge multifreq. emission 85−2237
HCN waveguide laser at 0.337 mm, optimisation 87−61082
$H_xLi_{1-x}NbO_3$ waveguides synthesized by proton exchange, structural characterisation 86−48096
Hg coated waveguides, dispersion charact. investig. 88−45185
HgCdTe IR optical waveguides 87−54052
HgCdTe thin film waveguide, characterisation at 10.6 micron *(French)* 86−42224
$Hg_{1-x}Cd_xTe$ optical waveguides, high band gap, for 10.6 μm 87−18729
III-V semiconductor waveguides and phase modulators, VPE 87−54046
$In_{0.52}Al_{0.48}As$ as waveguide material lattice-matched to InP, refr. index 87−74656
$In_{0.52}Al_{0.48}As$ optical waveguides, MBE growth on InP 87−7090
$In_{0.53}(Ga_xAl_{1-x})_{0.47}As$ layers, MBE growth, photoluminesc. charactn., optointegrated device appls. 87−73101
InGaAlAs/InP low loss ridge optical waveguides using MBE techniques 88−20399
InGaAlAs/InP ridge optical waveguide with low loss and grown by MBE 87−38739
InGaAlAs-InP monolithic integrated ridge waveguide photodiodes, MBE grown, 1.55 μm operation 87−54201
InGaAlAs-InP, monolithically integrated ridge waveguide photodiode 88−51702
InGaAlAs-InP ridge optical waveguide grown by MBE, low loss 87−74810
InGaAs PIN photodiode monolithically integrated on InGaAlAs ridge waveguides 88−45329
InGaAs monolithic integrated waveguide photodetector 87−46724
InGaAs/InAlAs multiple-quantum-well optical modulator, long-wavelength, with 30:1 on/off ratio 86−68329
InGaAs/InP antiresonant reflecting optical waveguides for integrated optics 87−38741
InGaAs/InP multiple quantum well waveguides, low loss, MOCVD growth 87−25938
InGaAs-GaAs strained layer superlattices, material props. and optical guiding 86−28013
InGaAs-InAlAs long wavelength optical modulators 88−20439
InGaAs-InAlAs waveguide MQW optical modulators with high on/off ratio and low drive voltage 87−60968

optical waveguides continued
InGaAs-InP integrated waveguide p-i-n photodetector by MOVPE regrowth 88−8078
InGaAs-InP multiple quantum well optical electroabsorption waveguide modulator 88−2052
$In_{0.2}Ga_{0.8}As$-GaAs superlattices and $In_{0.012}Ga_{0.988}As$ MBE layers, low-loss optical waveguides fabrication 86−58745
$In_xGa_{1-x}As$-GaAs strained layer superlattices, refractive indices and optical guiding 86−53438
InGaAs−InGaAsP−InP p-i-n photodiode with integrated waveguide 87−74938
InGaAsP BH DFB lasers, LPE 88−65686
InGaAsP DH optical waveguides with p^+-n junction, electroabsorpt. 85−7285
InGaAsP buried channel waveguide for electroabsorption modulation 88−26889
InGaAsP heterostructure with strip active waveguide, optical amplification at 1.3 μm 86−9862
InGaAsP, high-power index-guided multiridge waveguide laser array, fabrication 85−41377
InGaAsP ridge waveguide distributed feedback lasersoperating near 1.55 μm, fabrication and performance 86−63821
InGaAsP ridge waveguide laser array with nonuniform spacing 86−36460
InGaAsP ridge waveguide laser threshold current optimisation, simplified hybrid optical model 87−33167
InGaAsP ridge-guide DFB multiquantum-well laser, design, fabrication and performance characts. 85−51161
InGaAsP ridge-waveguide DFB lasers at 155 μm, anal. 85−62567
InGaAsP ridge-waveguide lasers, 1.55 μm wavelength, polarisation 88−34040
InGaAsP twin-stripe inverted rib waveguide lasers, delay triggered optical switching mechanism 86−3148
InGaAsP vapour-phase transported lasers, 1.52 μm, FM, modification for bandwidth improvement 85−41393
InGaAsP waveguide PIN photodetector, high-speed zero bias, features 86−70140
InGaAsP waveguiding layers for AlGaAs/GaAs 720-80 nm DFB lasers 88−40244
InGaAsP/InP metal-clad ridge waveguide laser, 1.3 μm operation, lateral waveguiding anal. and structs. 86−3130
InGaAsP/InP multimode optical switches operated by acarrier induced refractive index change 86−42358
InGaAsP/InP multiple quantum well waveguide phase modulator 87−33006
InGaAsP/InP waveguides for narrowband grating resonator filters 86−36293
InGaAsP/InP waveguides, narrowband grating resonator filters 86−68362
InGaAsP-InP CW injection lasers with very low threshold current density at room temperature 85−62583
InGaAsP-InP DFB laser with monolithically integrated optical waveguide, spectral line width 86−42580
InGaAsP-InP DFB lasers with monolithic external cavity, spectral characts. for 1.3 μm 87−12464
InGaAsP-InP DH with strip-loaded planar waveguide, 1.6 GHz electroabsorption light modulation 86−15511
InGaAsP-InP high speed metal clad ridge waveguide laser diode at 1.3 μm 88−34055
InGaAsP-InP integrated optics wavelength filter 86−36294
InGaAsP-InP internal-reflection-interference laser, stable longitudinal mode operation at 1.3 μm 85−62570
InGaAsP-InP laser, ridge waveguide, threshold current anal. 87−18964
InGaAsP-InP material, waveguide struct. by epitaxial techniques 87−74811
InGaAsP-InP metal-clad ridge-waveguide lasers for 1.3 μm wavelength 86−36487
InGaAsP-InP optical switches, carrier induced refractive index change 87−32998
InGaAsP-InP optical waveguide switch operated by carrier-induced refractive index change 86−36177
InGaAsP-InP quantum well modulators, MBE grown 87−60898
InGaAsP-InP ridge waveguide laser, high reliability, low-threshold emitting at 1.3 μm 88−34035
InGaAsP-InP ridge waveguide lasers, emitting at 1.3 μm, high reliability low threshold 88−20652
InGaAsP-InP ridge-waveguide-laser diodes, polarisation control 87−54292
InGaAsP-InP, thin film waveguides, refractive indices, cutoff spectroscopy 88−51497
InGaAsP-InP waveguide mirrors, self-aligned low-loss totally reflecting *(German)* 87−74813
InGaAsP-InP waveguides, optical parameters 87−32988
InGaAsP-InP-ridge waveguide lasers, LPE fabricated, design and 1.5 μm low-threshold operation 87−7359
InGaAsP-$LiNbO_3$:Ti integrated optic narrow linewidth laser 86−63804
InGaP-InP waveguides, pure and Fe doped, fabrication and characterisation 87−53955
InP based waveguides, integrated guided-wave optics 88−58209
InP bulk materials, waveguide form. 85−18683
InP inverted optical rib waveguide with integrated InGaAs photodiode, design and fabrication 87−26226
InP inverted rib waveguide, monolithic integration with GaInAs photodiode 87−74947
InP material system single-mode optical waveguides and phase modulators 86−2702
InP, reactive ion beam etched structs. for advanced optoelectronic devices 88−8089
InP, selective area epitaxy using metallo-organic VPE, rib waveguide fabrication 85−39783
InP waveguide, thermal index changes by optical absorpt., all-optical signal processing 87−19033
InP:Mg p-n junction waveguide fabricated by Mg ion implantation 87−32309
InP/InGaAsP antiresonant reflecting optical waveguides, chemical beam epitaxy and propagation losses 87−32929
InP-GaInAsP integrated optical anisotropic semicond. waveguide 85−12585
InP-InGaAsP, directional grating-coupled waveguide photodetector, wavelength selective 88−4429
InP-InGaAsP optical waveguides, MOVPE grown, low-loss, single-mode, fabrication, props. and appls. 87−53984
K^+-Na^+ exchanged optical waveguides, surface index variation, time and temp. depend. 88−26845
K^+-Na^+ ion exchanged optical waveguides, charactn. 88−51535

optical waveguides continued
K^+-Na^+ ion-exchanged glass waveguides, effect of conc. and induced stress on refractive index 88−65311
K^+-doped borosilicate glass monomode ring coupler, fabrication 87−54043
KH_2PO_4-KD_2PO_4 mixed cryst. optical waveguide grown on {101} plane of KD_2PO_4 cryst., characts. 87−54067
KNO_3-$AgNO_3$, low melting point mixtures for glass waveguide fabrication 88−26835
KNO_3-glass, ion-exchange diffusion, planar waveguides 87−7101
$KNbO_3$ electro-optic induced optical waveguide/cut-off modulator 85−46212
$KNbO_3$, electro-optically induced optical waveguide 86−9585
$KTa_{1-x}Nb_xO_3$ optical waveguides grown by LPE 86−63623
$KTiOPO_4$ optical waveguides, fabrication and characterisation 87−46441
$La_{0.7}Sr_{0.3}CoO_3$ cathodes for CO_2 waveguide lasers, electrical and emission characts. 87−33246
$LiBnO_3$:Ti waveguides, acousto-optic interaction, thermo-optic and photorefractive effects 86−5154
$LiMO_3$ (M=Nb,Ta), ion implanted optical waveguides, refractive index profiles 87−12199
$Li(Nb,Ta)O_3$ thin film optical waveguides, LPE growth 85−18724
$LiNb_3$:Ti channel waveguides, parametric light generation, phase matching conditions 85−24664
$LiNbO_3$: Ti waveguide collinear Bragg diffr. cell, acousto-optic interaction efficiency anal. 87−26108
$LiNbO_3$, C_2F_6 reactive ion-beam etching, optical waveguides appl. 85−7284
$LiNbO_3$, He^+ implantation, lattice disorder, refractive index changes 87−12201
$LiNbO_3$, Ti indiffused H^+ exchanged optical waveguides, fabrication and charactn. 87−32976
$LiNbO_3$ Ti-indiffused optical waveguide fabrication, Ti implantation, shallow perturbation 87−74805
$LiNbO_3$, X and X-cut dilute melt proton exchange waveguides 86−28803
$LiNbO_3$, Y- and Z-cut, optical waveguide fabrication by He^+ implantation 86−63632
$LiNbO_3$, Y-cut, dilute melt proton exchange for monomode optical waveguide fabrication 88−58203
$LiNbO_3$, Y-cut proton-exchanged waveguides, acousto-optic interactions 86−58805
$LiNbO_3$ Z-propag. waveguide polarisation-state controller *(Japanese)* 88−65361
$LiNbO_3$ Z-propagating waveguides wide optical bandwidth TE/TM convertor 86−9628
$LiNbO_3$ Z-propagation waveguide, efficient TE-TM mode convertor 86−68284
$LiNbO_3$ Z-propagation waveguide polarisation converter, optical damage immune 86−9458
$LiNbO_3$ anisotropic optical slab waveguides anal. using hypothetical boundaries 85−12566
$LiNbO_3$ based integrated light conductor *(German)* 87−33003
$LiNbO_3$ blazed grating couplers and appl. to integrated optics 87−12122
$LiNbO_3$ channel waveguide integrated optics, review 88−51543
$LiNbO_3$ channel waveguides, Li depletion, SIMS characterisation 85−35493
$LiNbO_3$ channel waveguides, optical TE to TM mode conversion 85−18650
$LiNbO_3$ channel-planar composite waveguide, acousto-optic Bragg diffr., optical computing appl. 86−2883
$LiNbO_3$ coded phase-reversal modulator with 20 GHz bandwidth at 1.3 μm wavelength 87−33001
$LiNbO_3$ component wafer-scale integration for coherent optical signal processing 85−50991
$LiNbO_3$ crystals, Y-cut, ion-exchanged lightguides 86−36219
$LiNbO_3$ crysts., X- and Y-cut, optical props. of ion-exchange light guides 85−7272
$LiNbO_3$ cutoff modulator using thermally annealed single-mode proton-exchanged channel waveguide 86−68321
$LiNbO_3$, double proton exchange for low loss and quasi-embedded waveguides 87−74807
$LiNbO_3$ efficient damage resistant acousto-optic waveguide deflector fabrication and props. 86−9636
$LiNbO_3$ electric-field-assisted proton-exchanged 87−74675
$LiNbO_3$ electro-optic ADC based on interferometric waveguide modulators *(German)* 87−68307
$LiNbO_3$ electro-optic guided-wave modulators for single-mode transmissions 88−33754
$LiNbO_3$ electro-optic waveguide devices, stability rel. to ambient water vapour 86−28801
$LiNbO_3$ epitaxial film on sapphire with $LiNbO_3$ buffer layer, RF sputtering 88−11976
$LiNbO_3$ film waveguide, for electro-optic deflection amplifier 88−51573
$LiNbO_3$ films for integrated optics appls., MBE growth 86−419
$LiNbO_3$ guided-wave Mach-Zehnder interferometric modulator fabrication by Ti-indiffusion and proton exchange, characterisation 85−29548
$LiNbO_3$, guided-wave optics, physical props., devices and signal processing systems 85−50956
$LiNbO_3$ guided-wave type light modulators, coplanar waveguide struct. 86−68337
$LiNbO_3$ high quality waveguides fabricated by dilute melt proton exchange, optical props. 86−36228
$LiNbO_3$ high-index low-loss waveguides, fabrication *(French)* 88−51495
$LiNbO_3$ integrated acoustic-optic Bragg modulator in channel-planar waveguides 86−36286
$LiNbO_3$ integrated optical components for fibre gyroscopes 87−12222
$LiNbO_3$ integrated optical components for optical communication networks 87−54095
$LiNbO_3$, integrated optical devices, technology 87−54088
$LiNbO_3$ integrated-optic wavelength multiplexers based on two-mode interference 88−72145
$LiNbO_3$ integrated-optical device modules for computing and signal processing 88−65350
$LiNbO_3$ interferometric waveguide modulators, polarization-independent and optical-damage-insensitive 88−51562
$LiNbO_3$ intersecting diffused channel waveguides, anal. for TE and TM polarisations 86−22095
$LiNbO_3$, ion implantation, for optical waveguide fabrication 85−24331
$LiNbO_3$, ion implanted optical waveguides, surface processing 88−7946
$LiNbO_3$, ion implanted stripe optical waveguide, fabrication 87−46496
$LiNbO_3$ low-insertion-loss channel waveguides fabricated by proton exchange 87−38743
optical waveguides continued

SiO_2 waveguides based integrated micro-optic components 88−45210
SiO_x film waveguides for integrated optics, losses 87−54084
SiO_2:Al integrated optical waveguides, microwave plasma deposition and etching 88−6525
SiO_2:Ge integrated optical waveguides, plasma CVD 87−10501
SiO_2:GeO_2 integrated optical waveguides, laser heating effect on opt. props. 87−26075

optical waveguides continued
SiO_2:GeO_2 optical waveguides, optical props. effect of laser heating 87−74822
SiO_2:GeO_2 waveguides for integrated optics, plasma CVD 86−68252
SiO_2:P waveguides, integrated four-channel Mach-Zehnder multi-demultiplexer 88−72147
SiO_2/Si substrate low-loss optical waveguides, near cutoff propagation 88−7931
SiO_2-GaAs-AlGaAs, ridge dielectric waveguides, optical characteristic anal. 88−45195
SiO_2-Si multilayer structures as antiresonant reflecting optical waveguides 86−63605
SiO_2-Si_3N_4-SiO_2 rib waveguide on Si, Bragg reflector fabrication techniques 88−45169
SiO_2-Si_3N_4-SiO_2 rib waveguides, low loss Bragg reflectors 87−60957
SiO_2-TiO_2 glass planar optical waveguide fabrication by soot deposition process *(Japanese)* 85−62384
SiO_2-TiO_2 glass planar optical waveguides, fabrication by soot deposition process 87−53965
SiO_2-TiO_2 guided-wave hybrid optical transmitting-receiving module 86−69782
SiO_2-TiO_2 single-mode waveguides, coupling with GaInAsP photodiodes for hybrid integrated optical ccts. 87−74941
$Si_xO_yN_z$ film waveguides for integrated optics, losses 87−54084
SiO_xNy dielectric waveguides, optical props. 87−32927
SiO_xNy low loss optical waveguides fabricated by thermal nitridation of SiO_2 86−2668
$Sr_{0.6}Ba_{0.4}Nb_2O_6$ optical waveguides, formation and props. 88−7938
$Sr_{0.6}Ba_{0.4}Nb_2O_6$, vapour diffused optical waveguides, electro-optic modulation 86−28785
Ta_2O_5, dielectric waveguide films, prod. by cathode sputtering 86−28840
Ta_2O_5 film, waveguide fabrication by MOCVD and opt. characteris. *(Japanese)* 88−72123
Ta_2O_5 films for waveguides in integrated optics, sputter deposited, props. study *(German)* 85−50985
Ta_2O_5 planar waveguides with ZnO SAW transducer, acousto-optical interaction 86−9638
Ta_2O_5 shadow deposited lens-like waveguide, focusing props. 88−39962
Ta_2O_5 thin film waveguide props., integrated optics appls. 85−46208
Ta_2O_5 thin-film optical waveguide Luneburg lenses on SiO_2-Si substrate 85−46206
Ta_2O_5 thin-film surface acoustic waveguides for acousto-optic devices, SAW propag. characts. study 86−42393
TaO_3, reactively RF sputtered waveguides, charactn. 88−51511
Ta_2O_5-SiO_2-GaAs waveguide, acoustooptic interaction 87−74747
$Ta_2O_5N_x$ thin film waveguide props., integrated optics appls. 85−46208
Ti flint planar gradient waveguides, fabrication 85−41166
Ti:$LiNbO_3$ optical waveguide fabrication, characterisation of TiO_2, $LiNb_3O_8$, $(Ti_{0.65}Nb_{0.35})O_2$ compound growth 85−62310
Ti:$LiNbO_3$, optical waveguides, photoinduced conversion of polaris. of light 88−58208
TiO_2 based oxide films, refractive-index distribution 88−20415
TiO_2-Al_2O_3(ZrO_2)(Nb_2O_5), asymmetric parabolic waveguides, parameter determ. 88−72086
TiO_2-Nb_2O_5-B_2O_3-Na_2O-SiO_2 glass for nonlinear optical waveguides, synthesis and charactn. 87−74658
$TlNO_3$-glass, ion-exchange diffusion, planar waveguides fabrication 87−7101
Xe, coherent vacuum ultraviolet generation by freq. mixing in glass hollow waveguides 88−45174
XeCl microwave discharge waveguide laser 87−39001
YAG:Nd^{3+} waveguides formed under ion irrad., optical characts. 86−28832
$Y_3Fe_5O_{12}$-$(YSm)_3(FeGa)_5O_{12}$ double-layer mag. garnet films, mode spectroscopy 85−24303
$Y_3Ga_5O_{12}$:Nd thin film optical waveguides, RF-sputtering on YAG substrates 86−36167
YIG film optical mode conversion device using MSSW formicrowave signals 86−15528
YIG films, symmetrical single-mode magneto-optic waveguides, phase matching by stress appl. 87−26100
YIG gyroanisotropic planar waveguide, magnetooptical mode conversion 87−68123
YIG multilayers, LPE, single mode magneto-optical waveguide props. 87−60912
YIG multiple-layer garnet, single mode magneto-optic waveguide, LPE fabrication 86−9586
YIG rib waveguide, polarisation mode conversion 86−36176
YIG rib waveguides, magneto-optic, nonreciprocal propag. 86−42309
YIG single mode magneto-optic waveguide films 86−36133
YIG single-mode buried channel waveguides, fabrication 88−45200
YIG thin-film waveguide magneto-optic isolator 85−41222
YIG waveguides, tuning of propagation constant difference 88−65344
YIG:Bi garnet films for magneto-optic waveguides, birefringence elimination 88−7914
YIG:Bi thin film waveguide-type mono-sectional optical isolator, nonreciprocal props. 88−40016
YIG:Gd, Ga thin films, magneto-optical effects, waveguide appls. 87−68149
YIG/$Gd_3Ga_5O_{12}$ waveguides, planar guided-wave magnetooptic diffr. by magnetostatic surface waves 85−2101
YIG-GGG waveguides, noncollinear coplanar magneto-optic diffr. by magnetostatic surface waves 86−9634
YIG-$GdGa_5O_{12}$ tunable wideband guided wave magneto-optic modulator using magnetostatic surface wave 88−40014
ZnO electro-optic modulator using guided wave resonance 88−2055
ZnO film on sapphire, low loss optical waveguide props. 88−1983
ZnO multilayered waveguides, electrooptic modulators 86−9625
ZnO nonlinear waveguides, angular dependence of prism coupling 88−65342
ZnO optical waveguide, low loss, SAW acousto-optic appls. 88−51540
ZnO optical waveguides, pulsed excitation of nonlinear distributed coupling 88−33730
ZnO processing for integrated optic sensors 86−57487
ZnO textured waveguiding films for planar acoustooptic devices 85−56384
ZnO thin-film waveguides, distributed coupling and fast switching 87−7073
ZnO waveguides, on SiO_2 substrates deposited by DC sputtering, acoustooptic interaction 85−46207
ZnS, ZnSe nonlinear planar waveguides, bistability and self-pulsing using prism couplers 87−33319
ZnS films, optical losses, substrate temp. effects 87−25979
optical waveguides continued
ZnS polycrystalline waveguide thin film; nonlinear optical effects *(Chinese)* 85−46452
ZnS substrate diffusion waveguides, fabrication and props. *(Russian)* 87−38794
ZnS thin film waveguides, propagation losses 88−51521
ZnS wavelength prism coupling, nonlinear coupler example 87−19039
ZnSe single crystal waveguides, optical bistability, nonlinear switch ing 87−74664
ZnSe-ZnS strained layer superlattices, low-loss short wavelength optical waveguides 88−26837
ZnSe-$ZnS_{0.6}Se_{0.4}$ rotationally twinned layer waveguide, frequency-conversion efficiency 88−65329
antiresonant reflecting optical waveguide structures for III-V integrated optics 87−68182
metal-clad waveguides for pb-salt diode lasers 88−51506
optical windows *see optical elements*
optical workshop techniques
acoustic emission, appl. in optical fibre cutting and fibre cut-end inspection 88−65216
acoustic fiber waveguide coupler 88−58163
acousto-optic deflector/modulator using single-mode crossed channel waveguide and transducer, fabrication 85−2107
acousto-optic edge-coupled surface wave deflector, 500 MHz bandwidth 85−29669
adhesives, durable for optical components *(Japanese)* 87−34546
advanced optics in government use 88−13989
angle meas. by multireflected autocollimation, mirror mount reception test appl. 87−21249
anti reflection coating design for fibre optic communication equipment, production run simulation 87−12287
antireflection neutral solution process for laser damage resistant coatings, scaling up 85−7299
arc welding of optical fibres, using controllable power supply source 86−40898
arc-fusion spliced fibres for improved reliability 87−8262
arc-fusion splicer with self-core alignment 87−7133
aspheric lenses, precision molded, for camera or compact disk systems 87−26121
aspheric lenses, replicated, for optical recording, moulds and meas. 85−51016
aspheric objective lenses replicated for optical disc systems, design and prod. technology 85−51017
aspheric plastic lenses, moulding die machining techniques *(Japanese)* 86−28933
aspheric replicated objective lenses for compact-disc players, mass production 88−33840
aspheric surface meas., using laser CCD light diffraction analysis 88−53876
aspherical focusing lenses for high-power multi-wavelength laser systems 87−33243
aspherical lenses as high power laser focusing optics 87−46628
aspherical lenses for audio disc systems, prod. by high-precision replication using UV curable coatings 86−22198
aspherical lenses replication for compact-disc players, mass-production process 88−29128
automatic fusion splicing machine for single mode fibres *(French)* 86−9580
axial lateral plasma deposition (ALPD) technology for optical fibre manufacture 85−29536
backscatter diagrams of lightwave conductors, attenuation meas. *(German)* 86−28838
bandpass filter set for multispectral detector, design and manufacture 87−38890
beamforming and optical fibre gap devices fabrication 88−65237
BGG 31, new glass for multimode waveguide fabrication 88−72133
bi-aspherical readout lens, replicated, for optical disc systems 87−46626
biconical fused taper low-loss fibre coupler, fabrication and characts., temp. meas. appl. 87−26061
biconical taper coaxial coupler filter, characts. and fabrication from single-mode fibres 86−9469
biconical tapered couplers, automated manufacture and charactn. overcoupled operation 87−68137
binary lenses, high efficiency, fabrication 85−41198
binary optics, fabricated using electron beam lithography 88−65909
blank and fibre waveguide parameters, MCVD prod. method with jacket dia. automatic control 86−9499
blazed grating fabricated by synchrotron radiation lithography 87−18785
blazed holographic grating, fabricated using aspherical recording with ion-etching method 88−45569
blazed holographic gratings, real-time recording effects in positive photoresist 88−58697
blazed surface relief diffractive optical elements 88−8349
book, optical fibres 87−13
borosilicate glass, antireflecting coatings produced by neutral soln. processing, surface damage threshold meas. 85−7502
buried ion-exchanged optical waveguides, refr. index profiles controlled by rediffusion 85−7207
buried optical strip waveguides, fabrication using one-step field-assisted ion exchange 88−1974
buried single-mode channel waveguides in BK 7 byfield assisted Cs-ion exchange 86−9591
cables, assembly and meas. *(Polish)* 86−43839
cables, manufacture *(Spanish)* 88−47090
cables, Poland, status and international perspectives of development *(Polish)* 86−23936
centering accuracy meas. of cylindrical lens, noncontact interferometric technique 87−12282
chalcogenide glass fibres, with low optical losses, fabrication 85−18665
chalcogenide glass fibres for mid-IR transmission, loss characts. 85−12537
chalcogenide glass optical fibres, fabrication by crucible technique, attenuation losses, IR transmission props. 85−41127
chalcogenide glass optical waveguide film fabrication process *(Japanese)* 85−35393
chalcogenide glass waveguide holograms for information processing, fabrication 85−41526
channel waveguides, glass, depolarisation due to sidewall roughness, fabrication 85−2048
chirped grating lenses on planar optical waveguides, performance limitations 85−29576

optical workshop techniques continued
chirped grating lenses on planar waveguides, diffr. performance, fabrication tolerances effect 85−24334
chirped gratings in integrated optics, variable period type, fabrication technique and appls. *(Polish)* 86−15512
cleaving tools for practical in-field use in fibre optic link installation 86−37889
coating deposition, cryopump conversion advantages 87−2009
coatings for optical fibres, review 88−65250
communication system components fabrication using lithography and etching *(Japanese)* 85−56316
communication techniques, performance, optical fibres performance *(Japanese)* 88−39881
component reliability, effects of solder creep 87−10212
components, passive made using fused-head-end method, progress 88−13883
components for multimode fibre-optic networks, manufacturing technique 86−63634
components polishing for CO_2 lasers *(Japanese)* 86−29203
components reliability, for submarine system *(Japanese)* 86−11063
composite metal/glass fibre polarisers, high-performance, fabrication 88−65218
computer-controlled electron-beam writing system for thin film micro-optics 87−38848
concentric pregrooved disc, fabrication by beam scanning method 88−33594
condensate deposition on moving sample holder surface for noncosinusoidal distrib. law 85−16982
conference, Barcelona, Spain (Sept. 1986) 88−62879
conference, optical metrology and optical component manufacture, Delhi, India (Feb. 1985) 86−13257
conference, San Diego, CA, USA (Oct.-Nov. 1984) 85−22056
conference, San Diego, USA (Aug. 1987) 88−43562
contactless interference profilograph 88−60905
core centering in optical fibres 88−51470
Corning glass films, RF magnetron sputtered, optical props. 87−32989
coupled-cavity lasers, dynamic single mode, monolithic integration 85−2349
couplers, single mode fibre, low loss, fabrication 86−2700
couplers, single-mode fibre, power oscillations in tapering 86−42341
couplers between one and several multimode fibres, realisation *(French)* 86−9572
couplers for fibre optic systems, review 87−68138
critical issues in the assembly and packaging of optoelectronic devices 87−74945
crystal orientation for cutting, precision optical method 85−34749
CVD, OVD and VAD manufactured fibres, bend characts. 88−72075
cylindrical V-grooved nonmetallic optical fibre cable 85−58138
DFB grating for InGaAs-InP DH lasers, characts. and fabrication using electron beam lithography 88−20663
DFB lasers fabricated by electron beam lithography for high density WDM systems 88−45450
DH lasers with facets formed by hybrid wet and reactive-ion-etching 85−51176
dichromated gelatin holographic scanners for printing appls., characts. 85−35911
dielectric coatings for integrated-optics elements, techniques for applying them 86−9607
dielectric coatings for laser mirrors, fabrication 87−7194
diffraction grating fabrication for integrated optics frequency demultiplexer 86−28892
diffraction grating fabrication techniques using light sensitive emulsions, integrated optics appl. *(Polish)* 85−2058
diffraction grating masks for information processing, digital prod. 88−72194
diffraction gratings monitoring technique for fabrication 88−26928
diffraction limited replicated objective lenses for compact disc players, mass production 88−41911
diffraction limited replicated objective lenses for compact disc players 88−53486
diffraction transmission gratings on step-index waveguides, design and fabrication 85−2053
diffraction-limited replicated objective lenses, mass prod. for compact-disc players 88−20480
diode laser, λ/4 shifted DFB corrugation, formed by spatial phase modulating masks 86−36506
diode laser mirrors, focused ion beam micromachining 88−51873
directional couplers, single-mode, fabrication techniques 85−56328
disc substrate replication master 87−46623
discharge fusion splice optimum method for polarisation preserving fibres 87−18590
dispersion-shifted fluorine added cladding VAD fibres, characteristics 88−65213
drawn fibre tapers with spherical microlenses, fabrication and performance 86−22132
drum twister for stranding of optical fibre cables 87−60953
dynamic alignment of small optical components 88−1951
effective splicing for optical communication, Placoptic splicing system 88−1950
electron beam lithography, very high resolution, appl. to integrated optics 85−2079
electron beam lithography fabrication of computer-generated holograms 86−9999
elliptical birefringent fibre current monitor, using active temp. compensation 88−36049
epoxy resins, glass transition temp. significance for fibre optic appl. 88−1957
fabrication by plasma activated CVD, review 87−7114
fabrication of all-dielectric high reflectors, coating materials for UV, selection and characterisation 85−12689
fabrication of fully synthesised VAD single mode optical fibres 88−65212
fabrication of long length, high strength single mode optical fibres by VAD process 88−65211
Fabry-Perot filters for wavelength demultiplexing, optical monitoring method during growth 87−54150
factory splicing of optical waveguide fiber 85−35399
far-field meas. using integrating sphere 87−46531
fiber attachment for guided wave devices , review 88−72021
fiber optic guided missiles, tougher fibers, production technique 88−13841
fibre, high-speed bubble-free coating on short drawing tower 86−42333
fibre, manufacture in Australia 88−9576
fibre, MCVD fabrication technology *(Croatian)* 86−28870
fibre, polarisation maintaining coupler with ultra-low-crosstalk 88−65271

optical workshop techniques continued
fibre, polarisation-holding, elasto-optic alignment of birefringent axes 86−63670
fibre, simple-structure cables manufactured without stranding processes 88−72033
fibre, single mode single polarisation long length, fabrication and characts. 86−9538
fibre, single-mode low-OH-content, fabrication by particle size control sol-gel method 86−15464
fibre alignment robot system 88−1952
fibre and fusion splices, mechanical strength 86−42327
fibre arc fusion splice machine, fully automatic design 85−18675
fibre array, two dimens., fabrication and characterisation 85−7205
fibre blowing for network appls. 88−39872
fibre buffer coatings, UV curing systems 88−26827
fibre cable construction methods *(Polish)* 87−49119
fibre cable installation, splicing techniques *(Spanish)* 85−52348
fibre cable single-mode, ultra-low-loss, in 1.5 μm region, design and performance 85−63666
fibre characteristics and industrial production techniques *(French)* 87−1966
fibre characteristics and standards, conf., Cannes, France (Nov. 1985) 87−36301
fibre cleavers, performance anal. 88−26821
fibre cleaves, high-quality for better fibre splices, testing with interference microscope 88−26798
fibre coat stripping method using felt rollers, theoretical and expt. study *(Japanese)* 86−28873
fibre coating requirements and developments 87−38805
fibre coating with dual dies separated by pressurized chamber 85−29569
fibre connector design and testing 85−29537
fibre coupler fabrication method with automatic fusion-elongation processes 87−68091
fibre couplers, connectors and splice technology, conf., Arlington, VA, USA (May 1984) 85−5626
fibre couplers, mass-fabrication process using arrayed fibre ribbons 88−72018
fibre couplers, polarisation preserving single-mode, reproducible fabrication method 88−72024
fibre deposition, high-rate, by double-flame VAD process 86−9557
fibre deposition by MCVD, increasing efficiency 86−9558
fibre devices, conf., London, UK (June 1988) 88−62904
fibre diameter monitoring during pulling using dual edge diode beam of light 87−54020
fibre drawing, high speed and coating, review 87−7116
fibre drawing machine, microcomputer control *(Czech)* 86−42300
fibre drawing process, temp. regime effect on stability 87−36824
fibre drawing system, microprocessor-controlled, config. and operation *(German)* 85−50946
fibre drawing system. tower construction for high-speed operation 88−13896
fibre end evaluation before splicing using spatial freq. analysis 87−38815
fibre ends, positioning and treatment *(French)* 87−68116
fibre fabrication, chalcogenide glass for IR 85−18664
fibre fabrication, lightguide technology review and status 85−18738
fibre fabrication and drawing standards 86−42297

fibre units, manufacture and performance, for installation by viscous drag of air 86−48156
fibre waveguide, graded-index, with extremely low losses, CVD fabrication 85−12610
fibre waveguide, strength increase of welded joints 85−35503
fibre waveguide with F-doped cladding and pure quartz glass core, fabrication 85−56327
fibre waveguides low-loss, with polymer coatings solidified by UV radiation 85−35502
fibre-optic bundles having uniform illumination over output end, fabrication 85−46184
fibre-optic components, tapered and spliced, fabrication, modal characts. 85−41123
fibre-optic mirror fabrication 87−18790
fibre-optic pressure sensor on frustrated-total-internal-reflection principle, design and construction 86−22125
fibre-optic star coupler, 9×9 single-mode 85−24310
fibre-optic transducers of physical field parameters, construction and classification 85−2026
fibres 88−65174
fibres, additional losses induced by microbends due to polymer coating 86−36154
fibres, birefringent, angular alignment by interferometric technique with broadband source 87−68025
fibres, bubble-free coating and cooling at high drawing rates 85−62297
fibres, cleaving 88−13872
fibres, cooling rate of drawing process, effect on 630 nm absorption 88−39894
fibres, drawing induced defect centres *(Japanese)* 86−68240
fibres, excess loss of packaged fusion splices at low temperatures 85−35517
fibres, fabrication by out-diffusion method 88−26788
fibres, fabrication of SiO_2 core by PICVD 88−20355
fibres, fusion mass splicing *(Japanese)* 85−41136
fibres, fusion mass-splicing 86−28866
fibres, high-birefringence, fabrication by preform deform. 85−12574
fibres, high-speed drawing with pressurised coating 85−62322
fibres, high-strength, long-length, for submarine cables, drawing process 85−35435
fibres, IR, manufacture and loss reduction *(Japanese)* 85−29575
fibres, IR transparent, low loss, overview 85−18658
fibres, isotopic, total internal reflection on isotopic interfaces 88−51459
fibres, lens-ended, fabrication technique for optical connectors 86−48123
fibres, manufacture by vertical CVD method, and properties *(German)* 86−22143
fibres, materials, fabrication, book 87−65058
fibres, monomode, splicing techniques, optical losses and technique complexity 85−41118
fibres, multimode, GRIN, core diameter meas. by side launch excitation technique 88−72029
fibres, outside vapour phase oxidation and deposition process, areas of advancement 86−58786

optical workshop techniques continued
fibres, PICVD, pure SiO_2 core, influence of preform collapse process 88−20356
fibres, polarisation-maintaining, fabrication using VAD 86−9540
fibres, polarisation-maintaining, low-loss, low-crosstalk, design and fabrication 87−7120
fibres, polarisation-maintaining and their appls., review 87−7118
fibres, precision-wound, signal loss meas. 88−39920
fibres, production processes *(German)* 86−22142
fibres, protective polymer sheath removal using polar solvents 85−50953
fibres, radiation-induced loss, drawing condition depend. 86−22088
fibres, side-tunnel single-polarisation, fabrication and characts. 86−36236
fibres, single mode, precision cleaving and fusion welding 86−36196
fibres, single mode low-loss low-OH, VAD fabrication 86−9555
fibres, single polarisation, reduced pressure collapsing MCVD fabrication 85−12573
fibres, single-mode, dispersion limited production tolerances 88−13819
fibres, single-mode, flat mass splicing technique 86−42343
fibres, single-mode, high-rate preform preparation by MCVD 86−42330
fibres, single-mode, low loss dual window with low bending sensitivity, fabrication 86−42320
fibres, single-mode, splice loss related to fusion time, temp. and index profile alteration 86−42342
fibres, single-mode, tapering 87−18625
fibres, single-mode multiple-clad dispersion flattened low loss, long lengths for cables and links 86−37915
fibres, sol-gel processing 87−74823
fibres, special purpose, manufacture and appls. 88−72059
fibres, step-index, fabrication by downward axial vapour deposition, mode coupling 85−50922
fibres, transmission principles and manufacture *(French)* 87−13745
fibres, vapour axial deposition, developments 87−7113
fibres coated at 10 m/s speed, optical and mechanical props. 86−22116
fibres connector reflection reduction methods using index matching materials *(Japanese)* 86−36140
fibres containing low rare earth ion levels, fabrication 86−36222
fibres end surfaces preparation, cutting device 85−12591
fibres for sensors, design and fabrication 87−46564
fibres for telecommunication, plasma CVD process for large scale prod. 87−38800
fibres Gaussian profile dispersion shifted, VAD 86−36241
fibres H_2-induced loss, drawing condition dependence anal. 86−36146
fibres multicore, long length, coupled/noncoupled wave transmission 86−9543
fibres single crystal, by laser-heated pedestal growth method 86−22159
fibres single-mode, high-strength long-length synthesised by vapour axial deposition 87−7117
fibres single-mode dispersion flattened, plasma CVD, performance and design optimisation 86−36242
field-installable antireflection coating for optical fibre connectors 88−65188
film deposit evaluation using a holographic interferometer 88−40402
film developments, conf., San Diego, USA (Aug. 1986) 88−6085
film ion based technique prod., progress in optics book 87−36306
fine glass particles, fluorine doping by VAD *(Japanese)* 88−65117
fine oxide particle VAD for optical fibre preforms *(Croatian)* 87−12204
fluoride fibre glasses, absorpt. loss due to Fe ions, reduction using oxidation technique 85−56299
fluoride glass fibre drawing, optimisation with respect to mechanical strength 88−39911
fluoride glass fibres, reduction of impurities by starting material purification 85−12533
fluoride glass fibres, single-mode and multimode, fabrication by double-crucible technique 86−15462
fluoride glass optical fibre, low OH and low loss, fabrication 85−12552
fluoride glass optical fibres, synthesis by CVD process 88−58141
fluoride glass single-mode fibre, preform fabrication technique and transmission loss characts. 87−7087
fluoride glasses, CVD 88−65123
fluoride glasses for optical fibres, reduction of OH absorpt. 85−12534
fluoride IR optical fibres with high numerical aperture, preparation *(Chinese)* 88−39865
fluoride optical fibres, elevated NA, preparation 86−63650
fluoride optical fibres, removal of Fe, Co, Ni and Cu from Zr 85−18633
fluoroaluminate glass, IR transmitting, prep. method and physical props. *(Chinese)* 88−39854
fluorozirconate glass, IR transmitting, prep. method and physical props. *(Chinese)* 88−39854
fluorozirconate glass preforms and optical fibres, manufacturing processes 88−45071
focused ion beams, for optoelectronic technology, review 88−58390
focusing grating coupler, high-performance, fabricated by electron-beam writing 85−2081
free electron lasers, short wavelength optics fabrication 85−2374
functional alignment of tilted and decentred optical trains, optical tooling, Antares laser 85−18999
fused couplers, low-loss, overcoupled, fabrication and sensitivity 88−65262
fused-head-end method, passive optical fibre components for multimode networks 88−9607
fusion mass-spliced fibres, rapid reinforcement using low-power induction heating 85−50904
fusion splice losses for single-mode fibres, statistical analysis 85−1975
fusion splicing between deposited silica waveguides and optical fibers 85−35451
fusion-spliced fibres, Zeiss-Linnik interferometric exam. 87−18592
geodesic lenses, fabrication and charactn. problems, outer rim design, substrate grinding, polishing 88−7964
geodesic lenses, multimode spherical, simple fabrication method 86−48211
geodesic lenses, passive optical component production 88−45207
geodesic lenses for wavelength optical devices, design and fabrication 88−2034
glass:Tb_4O_7 Faraday rotator low loss single mode fibres, MCVD fabrication 87−18694
glass, Ag^+-Na^+ ion exchange, planar optical waveguide fabrication 88−33719
glass, gradient layers refractive index of ion-exchanged diffused materials, stress effects 85−12540
glass, index profiles of diffused optical waveguides 85−24320
glass, light and the information revolution, lecture 87−9984
glass, optical waveguide fabrication by electrolysis 85−7271

optical workshop techniques continued
glass, porous, impregnated with light sensitive cpd., waveguiding prod. by photochem. method 86−68255
glass, Pyrex and BK7, planar graded index waveguide fabrication by K^+ ion exchange 86−68310
glass buried waveguide with symm. index profile, Ag^+-Na^+ ion exchange fabrication 86−9592
glass ceramic, machinable, as useful optical material 86−58730
glass fibre extrusion process, response to external perturbations, dynamic model 86−2707
glass fibre preforms for telecommunication, fabrication 87−68111
glass fibre production from mech. shaped porous preforms 86−36230
glass fibres, prep. process, second harmonic generation 88−58067
glass integrated optical waveguides, low loss, fabrication by ion exchange, review 85−41163
glass matrices, planar lightguide production by electrodiffusion treatment 85−41175
glass optical waveguides, buried, symmetric index profile, Ag^+-Na^+ ion exchanged 86−28786
glass planar waveguides made by ion exchange, refr. index profiles 86−15443
glass porous layers for optical waveguides, CO_2 laser processing 85−29530
glass waveguide, fabrication, ion migration during electrolysis 86−2713
glass waveguide, ion-exchanged, fabrication through Ag ion electrolytic release 85−46128
glass waveguides, Ag film diffused, diffusion process and optical props. 87−25959
glass waveguides, ion-exchanged, stress 87−18638
glass waveguides, planar Ag^+-Na^+ exchanged, design, process and device parameters 86−42279
glass waveguides, planar buried, Ag^+-Na^+ ion exchange, diffusion characts. 86−68254
glass waveguides, semiconductor-doped and ion-exchanged 87−25936
glass waveguides fabricated by Tl ion exchange, optical loss and index profile *(Chinese)* 85−29565
graded index fibre diameter measurement using diffr. pattern 87−46517
graded index lens for simplifying alignment to optical fibers, design and fabrication 85−7253
graded-index fibre, dopant flow variation determ., math. treatment 85−56274
graded-index fibre preforms, wholly synthesised, high-rate fabrication by multiframe vapour deposition using $SiHCl_3$ 86−15461
graded-index multimode fibre arc-fusion splice machine, automatic 86−28879
graded-index optical waveguides and planar microlens arrays and their applications 88−7948
graded-index polycrystalline fibre for IR light transmission, fabrication method and characts. 86−36142
gradient index imaging systems, conf., Palermo, Sicily, Italy (Sept. 1985) 87−16231
gradient index lens for low-loss coupling of laser diode to single-mode fibre, ion exchange fabrication 87−18585
gradient index optical imaging systems, conf., Reno, NV, USA (Jan. 1987) 87−51742
gradient-index objective lens for compact disc system, design and fabrication 87−18783
gradient-index slab lens with high numerical aperture, indiffusion ion exchange and cementing fabrication 87−18742
grating, wavelength division multiplexer, micro-optical, fabrication by ion etching 85−37009
grating fabrication by microcomputer and laser printer 87−74825
grating for information processing, optical prod. *(Japanese)* 88−72193
gratings, guided-wave, simple interferometric fabrication method using single mirror 86−2843
guided wave optoelectronic materials processing, conf., Los Angeles, CA, USA (Jan. 1984) 85−27912
guided-wave multi/demultiplexer for optical FDM transmission 88−67409
halide glass fibres, fabrication from the melt, protective coatings, phys. props. 85−41126
heavy metal fluoride glass, processing and purification techniques, IR fibre optics appl. 86−58734
heavy metal fluoride glasses, bubbles, light transmission losses 88−26782
heavy metal fluoride glasses, high optical quality, preparation 85−18632
heavy metal fluoride glasses and fibres, review 85−12532
heavy-metal fluoride glass optical components, processing and appl. prospects 86−2650
holographic grating arrays, recording and large scale replication using multiple beam interferometry 85−35908
holographic interferometer with monomode fibres, appl. to integrated optic grating device manufacture 87−12615
holographic solar concentrator, design and manufacture 88−51959
holographic table construction and evaluation *(Spanish)* 88−58729
honeycomb microlens close-packed microstruct. by holographic recording, replication and embossing 86−9996
hybrid integrated optical circuit construction 86−36250
III-V semiconductor, integrated optoelectronics, micrograting form. by HV electron beam lithography 87−18866
III-V semiconductor waveguide, dry etching processes 85−41191
image fibre, 250000 pixel capacity, development and fabrication, hazardous environments monitoring appl. 87−46547
image plane modulator, monolithic, optimisation algorithm and fabrication 88−58238
in-process optical metrology for precision machining, conf., The Hague, Netherlands (Apr. 1987) 88−37816
in-process optical metrology for precision machining 88−42288
incandescent light source with transparent heat mirror, design, construction and performance 87−79191
Indian work on fibre optics, survey 87−34563
infrared mesh filters, fabrication by electron beam lithography 85−35578
injection molded ST compatible connector for LAN, high performance 88−33698
integrated and guided-wave optics, conf., Kissimmee, FL, USA 85−26
integrated optical circuit engineering conf., San Diego, USA (Aug. 1987) 88−49339
integrated optical circuits, waveguide modes, coupling techniques and fabrication 86−15514
integrated optical device of heterojunction phototransistor and inner stripe LED, fabrication 86−29020
integrated optical structs., micromachining 86−63683

optical workshop techniques continued
integrated optical waveguides, photolithography and ion exchange production technique, on glass substrate 88−20429
integrated optics, electron beam lithography appls. 86−9610
integrated optics, laser beam photolithographic fabrication 86−9611
integrated optics elements, fabrication by diffusion localised by elec. field 87−74826
integrated optics in China, review, fabrication techniques *(Chinese)* 85−62397
integrated optics lenses realized by thin filmtechnology *(Italian)* 86−22184
integrated optics technology for branching devices production 88−7969
integrated optics theory and technology, book 86−19721
integration technology *(Japanese)* 88−7953
ion exchanged channel waveguides, fabrication directly into IC mask plates 87−68179
ion exchanged waveguides, fabrication method through Ag ion electrolytic release 86−2720
ion-exchanged integrated structs. for waveguide/fibre coupling, fabrication and characts. 85−50982
ion-exchanged waveguide fabrication, in situ meas. of ionic conc. 85−12543
ion-exchanged waveguides for optical signal processing 88−72132
IR CCD MTF meas. method using laser speckle 85−58588
IR components with diamond-like coatings development, appl. and testing 87−20955
IR diffractive filters fabricated by electron beam lithography, spectral and polarising characts. 87−33025
IR fibres, prospective materials, fabrication methods and applications 85−41128
IR fibres, prospective materials, fabrication methods and appls. 86−22157
IR fibres fabrication, hybrid extrusion, multicrucible and multirod-in-tube technologies 88−33681
IR graded index elements development, using chalcogenide glasses 88−45260
IR radiation pyrometer, polishing of optical fibre incidence face *(Japanese)* 88−7859
IR technology and appls., Cannes, France (Nov. 1986) 87−16260
Japan fibre optic passive components, status and trends 86−63628
Japanese optical fibre cable techniques, present state 85−8409
jointing of monomode optical fibres *(Spanish)* 87−60933
kinoform optical elements: methods of design, productiontechnology, practical application *(Russian)* 85−56860
lapped polarisation-maintaining fibre resonator, develop. and invest. 88−65254
laser accessories, deformation energy influence on laser damage threshold 88−40289
laser diode collimators for free space optical communications 88−27241
laser diode to single-mode fibre coupling with high efficiency and low optical feedback *(German)* 85−46150
laser glasses in China, research and development *(Chinese)* 85−18898
laser lens, miniature, cylindrical non-circular, design and fabrication 88−8264
laser optical elements, production technology *(Russian)* 88−51868
laser optics, fabrication and testing 87−39179
laser splicing of lightguides 85−19069
laser-assisted evaporations of dielectric and semiconductor materials 85−374
laser-beam writing system for optical integrated circuits 88−14310
layered synthetic microstructures as mirrors in free electron laser development 85−2372
lens arrays and steric GRIN polymer optical waveguides, interfacial-gel copolymerisation technique for prep. 88−26836
lens formation by fiber fusion for terminating optical connectors 87−68031
LIGA technique, accuracy and appls. in integrated optics 88−51544
lightwave conductors and cables, props. and prod. *(German)* 86−64994
$LiNbO_3$:Ti, diffused waveguide devices, processing and characterisation 86−2801
liquid crystal polyesters for optical fibre jacketing *(Japanese)* 88−13795
load-carrying cable, attenuation, influence of fibre fabrication process 86−36170
Lode Advanced Mirror Program active mirror facesheets, process development 88−61536
long wavelength systems, ultra low-loss optical fibres fabrication 86−4621
long wavelength systems, ultra-low loss optical fibres development 85−52324
loose tube splices for polarization maintaining fibers 88−45136
low-loss fused fibre beamsplitters, fabrication and overcoupled operation 88−65217
low-loss joints between dissimilar fibres by taperingfusion splices 86−36147
low-loss planar optical tapers, fabrication and meas. 88−65300
Lyot depolariser, all-fibre, fabrication 86−36173
machining of optical components *(German)* 86−9447
manufacturing processes for glass fibre cables, introduction *(German)* 88−39876
mask making using laser writing system 88−8378
mass-fusion spliced fibre using UV curable resin, reinforcement method *(Japanese)* 88−20388
matrix of gradient microlenses fabricated by electrostimulated diffusion, optical connectors development 87−18598
MBE technique and equipment, optical coating fabrication 85−5998
MCVD for optical fibre fabrication, Ge chemistry 87−46480
MCVD graded-index fibres with various glass comps., IR loss stability 86−2822
MCVD multimode fibres, bandwidth improvement by fluorine etching to reduce centre dip 86−48175
MCVD procedures and spinning for optical fibre manufacture *(Hungarian)* 85−18671
MCVD process, single-mode preforms manufacture 86−48080
mechanically shaped preforms, recent progress 88−45138
mechanically shaped preforms for optical fiberproduction 86−28792
medium infrared fibres 88−58074
metal matrix composites, appls. in precision instruments and optical systems 88−45039
micro-lens, design and fabrication, fibre coupling device appls. 85−56347
micro-machined optics for laser printing, eval. and specification 88−51644
microlens array, monolithic fabrication 88−45202
microlens ended fibres for medical appls., laser-microfurnace fabrication technique 85−4345
microlens fabrication technique for an efficient laser/single-mode fiber coupling 88−51471

optical workshop techniques continued
microlens fabrication technique for stressed-cladding polarisation-preserving fibre 85−56306
microlens for coupling semiconductor laser to single-mode fibre 86−68273
microlenses, monolithically fabricated on integrated circuits 88−65522
microlenses, step-index profile, formed in glass by Na-Ag ion exchange 86−9608
microlenses, substrate integrated, prep. by plasma CVD, for laser-fibre coupling 85−2078
microlenses formed by electrostimulated diffusion method, near IR performance 85−41203
microlenses on end of single-mode optical fibres for laser appls., photolithographic fabrication 86−2663
micromachining of optical elements, conf., The Hague, Netherlands (Apr. 1987) 88−49333
micromachining with focused ion beams 87−38849
milled-groove method for fiber-to-waveguide couplers 88−26775
mirror, glass, replicated, appl. to large segmented opt. systems 87−18788
mirror, inside ellipse, for high power glass laser amplifiers *(Japanese)* 85−18981
mirror, multilayer dielec. exit, half-shadow evaporation fabrication, non-Gaussian laser beam form. 87−26491
mirrors for CO_2 lasers for high power material processing appls. 87−46957
modified SZ stranding of optical fibre cable conductors 87−60952
moldable glass, recent developments in integrated optics 88−20421
monocoated fibres and fibre ribbons, fusion splicer development 88−58153
monolithically Peltier-cooled laser diodes, fabrication using marking and wet chem. etching 85−41398
monomode fibre cables, manufacture *(German)* 86−23902
monomode fibre splicing techniques, comparison 85−18734
monomode fibre welding equipment development trends *(German)* 86−22150
monomode fibres, manufacture using modified CVD technique *(French)* 85−56348
monomode fibres, optimisation of parameters, fabrication by MCVD process *(French)* 86−9505
monomode optical fibre cables with low losses at 1.55 μm, manufacturer, laying and splicing 85−58145
monomode optical fibre technology, state and further developments *(German)* 86−22144
multi-fibre ribbon connectors, plastic moulded, design, fabrication and loss characts. *(Japanese)* 85−46192
multi-flame VAD method for high-rate optical fibre synthesis 88−63379
multi-flame VAD process for high-rate fabrication of optical fiber preforms 87−26053
multiclad monomode optical fibres, multivariable zone diaphragm technology appl. 87−74755
multifibre plastic connector, high density, fabrication and evaluation 85−56350
multilayer fibres with complex refr., index profiles, fabrication using multicrucible technology *(Polish)* 85−1999
multilayer mirrors and beamsplitters for X-ray laser cavity, TEM and X-ray anal. 88−2332
multilayer optical filters fabrication, monitoring and control *(French)* 85−12695
multimode and single mode fibres, fusion splicing 87−12210
multimode and singlemode fiber splicing in BellCanada 86−2836
multimode fibre design for local networks, optimisation, recent developments 88−35538
multimode fibre with high numerical aperture, by pressurised MCVD 86−53942
multimode optical fibre handling, practical hints *(German)* 86−22075
multimode optical fibre splicing using arc welding *(German)* 85−41156
multimode optical waveguide components, photofabrication 88−13924
multimode quartz light guides welding technology 87−54037
nanometer grating pattern fabrication and replication techniques using X-ray lithography 85−55639
nanotechnology appls., review 88−18668
Nd:phosphate glass strengthened for high average power laser applications 88−20616
noncircular core optical fibres made by pressurized MCVD method 87−32933
objective lenses for compact disc players, mass production 87−46624
optical fiber manufacturing process, microwave plasma appl. 87−74752
optical fibres, aging under mechanical stress, mechanical reliability study 85−41165
optical fibres, single crystal pulling, laser heated pedestal growth technique 87−25973
optical fibres and cables, joining techniques in subscriber loops 86−49611
optical fibres production, sol-gel and other fourth generation processes 88−45163
optical glasses, Ag electrodiffusion, planar waveguides form. 85−62386
optical polycrystalline waveguides, fabrication and testing, losses, grain size reduction 85−2025
optical storage, conf., Los Angeles, USA (Jan. 1988) 88−62858
optomechanical systems engineering, conf., San Diego, CA (Aug. 1987) 88−49334
optomechanics, an ultra-high-precision machining technique for aspheric surfaces 85−35573
organic materials, optical nonlinearities, fundamentals and device applications 88−7838
organic materials for integrated optics, fabrication flexibility 87−12099
organic thin films, laser induced deposition and crystallisation *(French)* 86−40762
passive components for multimode fibre-optic networks, manufacturing technique 86−42328
passive components for multimode fibre-optic networks, fabrication by fused-head-end technique 87−46534
passive fibre optic components using dispersion shifted fibre, biconical fusion technique fabrication 87−38843
passive integrated optical components made by ion exchange in glass 87−74833
passive integrated optics components for fiber opticscommunication in moldable glass, fabrication 86−36240
phase diffraction grating fabrication, photolithographic methods 85−18748
photonics for integrated circuits and communications, review 85−41199
photoresist gratings with high aspect-ratio 88−65882
pin photodiode and FET, monolithic integration using graded step process 85−35658

optical workshop techniques continued
planar and channel optical waveguides fabrication on Si substrates 85−46126
planar microlens, 2 D arrayed monolithically fabricated, for multimode lightwave components 85−2077
planar microlens fabrication by ion exchange/diffusion, distrib. index profile 87−18744
planar optical waveguides, fabrication by K^+ ion exchange on optical glass 86−28847
plasma assisted ion plating deposition of optical thinfilms 86−15547
plasma deposition of metal oxide films for integratedoptics 86−15515
plasma-activated CVD, fibre production for high-reliability systems 88−58155
plasma-activated CVD of telecommunication fibres 88−33677
plasma-impulse-CVD for optical fibre fabrication, review 88−58140
plastic lenses, fabrication methods and properties *(Japanese)* 85−35378
plastic lenses, superprecision injection/compression moulding technique *(Japanese)* 86−28934
plastic optical fibre, development *(Japanese)* 85−12596
plastic optical fibre star coupler, fabrication 87−18588
plastic waveguides for optical dividers and mixers, development 87−7163

proton exchanged waveguides, cryst. and optical quality, fabrication rel. to material limits 86−36227
quarterwave multilayers, optical monitoring of thickness *(French)* 87−56832
quartz fiber preform collapse process, identification 87−53998
quartz optical fibres, drawing, laser surface processing of blanks 86−22165
quartz optical fibres drawing, blanks nonuniform laser heating study 88−7942
quartz single-mode fibre, modal field transforming type, fabrication technique and characts. 88−45073
radial GRIN glass rods prep. by sol-gel method 86−22060
rare-earth doped waveguides, evaluation of fabrication by ion exchange 88−51512
rare-earth-doped fibres, fabrication by soln., doping technique 87−38749
reactive sputtering, progress report 85−16965
reflective optics, conf., Los Angeles, USA (Jan. 1987) 88−31267
replicated objective lenses manufacture for compact disc player 88−41912
ribbon cable splicing, fibre holder design *(Japanese)* 88−7881
ring interferometer for frequency stabilization of semiconductor lasers 88−27235
ring resonators, high finesse, fabrication and analysis 87−54099
scratch standards, improper use for damage threshold prediction 85−7494
second-order gratings for 1.55 μm DFB lasers, fabrication using deep UV lithography 88−20637
secondary coating of optical fibres 87−7167
self-aligned single-mode fibre-horn beam expander 88−45156
semiconductor doped glass, integrated nonlinear optical device fabrication 87−12585
semiconductors, photoelectrochemical etching of holographic gratings 87−12606
service life of optical fibres after proof testing, estimation 88−45167
side coupler for coupling between laser diode and single-mode fibre 87−68016
signal processing components and applications 88−67407
signals transmission with optical fibres and LED and IRED handling of modulated laser beam *(German)* 87−7100
silicon multifibre connector and fusion splicer 85−29539
single mode coupler manufacturing 87−12191
single mode depressed cladding fibre design and perform. for SL undersea system, review 85−37021
single mode fiber microlenses, self-centering using optical levitation 85−1977
single mode fibre, dispersive device on polished cladding, ion beam etching 86−63655
single mode fibre cables, large scale manufacture and testing 85−20234
single mode fibre coupler fabrication using Si microelectronic technology 85−7214
single mode fibre fabrication, VAD process using high rate cladding deposition burners 88−45140
single mode fibre industrial prod., MCVD process control *(French)* 86−9573
single mode fibre optic connectors and splices, four rod alignment guide concept 85−7218
single mode fibre splicing 85−18725

optical workshop techniques continued
single mode fibre splicing, axis misalignment and splice loss estimation using direct core monitoring 85−46146
single mode fibre splicing and jointing of fibre cables 85−18735
single mode fibre splicing techniques, statistical anal., splice loss per fibre-span meas. 87−26028
single mode fibre testing methods for industrial environment, review 87−46519
single mode fibres, arc-fusion splicing with automatic core-axis alignment mechanism 85−7243
single mode fibres for land cables, design, fabrication and characterisation 85−18733
single mode fibres for landline and submarine cables, splicing 86−37888
single mode fibres for undersea cable, high strength low loss flame fusion splicing 85−7220
single mode fibres production using plasma activated CVD process 85−46179
single mode high NA plasma CVD fibres, F doped, loss reduction 86−36233
single mode integrated optical waveguides by ion-exchange in glass 88−7947
single mode multifibre splice using elastic V-groove, low loss method and expt. eval. *(Japanese)* 88−72068
single mode optical fibre, field splicing system 85−56353
single mode optical fibre cable, field splicing system 85−20237
single-mode, dispersion-flattened, low-loss fusion splicing 88−13820
single-mode connection to high-silica waveguide with fibre guiding-groove 88−26774
single-mode fibre, birefr. determ. rel. to fabrication monitoring 86−28842
single-mode fibre, F_2 added VAD fabricated, characts. 86−2820
single-mode fibre, low OH content, fabrication by particle size control sol-gel method 86−36220
single-mode fibre, low-loss dispersion-shifted, manufactured by OVD process 86−22103
single-mode fibre cables at 1300 nm, optical and mechanical properties 85−58146
single-mode fibre coated at line speed of 10 m/s, transmission props. 85−12559
single-mode fibre connector, low loss, design and fabrication 85−7217
single-mode fibre coupler technology, fused-taper fabrication, review 85−7212
single-mode fibre high reliability splicing 86−28793
single-mode fibres, core tapering by controlled thermal diffusion, feasibility study 88−33605
single-mode fibres, depressed index substrate tubes to eliminate leaky-mode losses 86−22105
single-mode fibres, dispersion-modified, review 88−26797
single-mode fibres, fabrication of tapers by controlled core diffusion 88−33606
single-mode fibres, fusion splice loss 85−7219
single-mode fibres, microprocessor controlled splicing equipment *(German)* 86−22151
single-mode fibres, self alignment effect in V-groove method, splice characts. study *(Japanese)* 88−39949
single-mode fibres, splicing and connecting techniques, recent development 85−12627
single-mode fibres, stuffing-pulling mass fusion splice techniques *(Japanese)* 87−68159
single-mode glass waveguides, fabrication and charactn. 88−51536
single-mode integrated-optical polarizers in $LiNbO_3$ and glass waveguides 85−24336
single-mode low-loss high-silica channel waveguides and directional couplers, fabrication technique 86−36149
single-mode optical fibre cable splicing and jointing techniques *(Japanese)* 86−2689
single-mode optical fibre preforms, dimension control in VAD process 87−7082
single-mode optical fibre spot size meas. using strip integration of far field 85−56291
single-mode optical fibres, matched and depressed cladding, fabrication, CVD 87−38766
single-mode optical fibres, quasi-matched and depressed-cladding, design and fabrication 88−65239
single-mode passive fibre components, automated coupler manufacturing system development 86−63681
single-mode step-index fibres, implementation and manufacturing technology *(French)* 85−12617
single-mode wavelength division multiplexer/demultiplexer for two channel bidirectional transmission 88−47150
single-model optical fibre formed by vapour-phase axial deposition *(Japanese)* 86−48142
singlemode cables and splicing technology 85−14300
slotted core optical fibre cable manufacture 88−9577
soft glass fibres with large thermal expansion differences 88−58177
soft X-ray laser cavity components, beamsplitters and dispersive multilayer mirrors 88−2331
soft X-ray optics and technology, conf., Berlin, Germany (Dec. 1986) 88−18302
sol-gel procedure for optical fibres production with high SiO_2 percentage *(Croatian)* 87−12203
spherical gradient-index sphere lens, modified suspension polymerisation fabrication 87−18784
splice, mechanical, for permanent fibre optic installation 87−12184
splice/connector for multimode optical fibres 88−13873
splicer for single-mode fibres, field use using direct core obs. technique 87−12194
splicing and connectors for optical fibres 88−72016
splicing in factory environment of optical waveguide fibre 85−58131
sputtering system, in-line, for magneto-optical data storage media 88−65152
stamper process for optical discs 88−65148
star coupler, fibre, small loss-deviation, for LAN, design and fabrication 85−62312
star coupler, ion exchanged, for multimode fibre communications, fabrication method 86−9598
star coupler fabrication by stacking polymer films 88−72011
Stepanov's method to grow two-layer single-crystal fibres 88−39908
submarine cable production using arc fusion splicer with profile alignment system 87−7132
submarine fibre optic transmission systems, high performance couplers 88−47187
submarine optical cable splicing *(Japanese)* 86−11062

optical workshop techniques continued
submarine optical cable termination *(Japanese)* 85−42414
submarine optical repeater housing of thermal-dispersion shock-absorbing structure *(Japanese)* 85−42415
subnanometer bandwidth interference filter for optical fibre communication systems 88−51649
subscriber cables, optical systems, splicing and connecting techniques 85−3243
subscriber optical fibre cable, construction techniques under various environmental conditions 86−30803
SUMIOFCAS TYPE 34 direct core monitoring system, compact fusion splicer development 88−58152
superluminescent diodes, 0.83 μm, recent developments 88−14050
surface relief gratings, photoresist mask fabrication 88−51553
switching in waveguides fabricated on semiconductor-doped glass substrates 88−39957
synthetic single mode fibre develop. with high dimensional accuracy *(Japanese)* 88−51477
tachometer, programmable for displacement velocity meas. 88−74599
taper coupler for integrated optics formed by ion-exchange under nonuniform electric field 87−26001
taper splice method for subscriber single-mode fibre cables 87−18591
tapers and couplers in single mode fibres, design limitation 86−42337
telecommunication optical fibres, props. and manufacture *(Polish)* 87−40940
thermoplastic rubber/liquid crystal polyester dualcoextrusion coating system for optical fiber drawing 87−7162
thin film microfabrication limits, review 88−39338
thin-film lenses for integrated optics, fabrication by photolithography and diffusion processes 88−7965
thin-film optical waveguide fabrication by ion exchange *(Japanese)* 86−48090
three-channel WDM transceiver module, assembled using aligned LED and PD ball-lens packages 88−47049
translucent screen fabrication technique 86−65235
trunk cable network of West German Post Office, devices assembly *(German)* 86−23916
tunable directional coupler fabrication and characteristics *(Korean)* 88−45087
US cleaning equipment appl. *(Slovak)* 85−9400
UV curable resins for cabling optical fibres 87−8330
V-groove optical fibre mass splicing reliability, splice loss temp. charact. improvement 86−28867
VAD process, high strength single mode fibre synthesis 88−65231
VAD single mode fibres in mass production performance characts. 85−56352
VAD soot refractive index profile determination 88−63380
vapor-phase axial deposition, fibre fabrication and splicing 85−56287
vapour axial deposited preform stretching, numerical model for internal distortion 87−7115
waveguide, circular metallic hollow, with Ge coating, for IR laser radiation transmission 87−60905
waveguide, manufacture techniques and integrated opt. components development on glass substrates *(Italian)* 86−42305
waveguide, multimode, strip, formed by ion-electro-diffusion from Ag 87−18659
waveguide, single-mode channel and directional coupler by ion-exchange in glass 88−45182
waveguide chemical vapour microsensor fabrication by photo-polymerisation method 88−20428
waveguide components, manufacturing techniques for high-yield production 86−63736
waveguide couplers, ion-exchange processes in glass for fabrication 88−58202
waveguide fabrication, Ag^+ diffusion in Na^+ containing glass for producing refractive index inside-maximum distribution 85−12599
waveguide fabrication, diffusion parameters evaluation with gradient index gratings 87−46482
waveguide fabrication, planar and channel, by N^+ implantation in fused SiO_2 85−29546
waveguide fabrication by ion beam sputtering 88−13922
waveguide fabrication from doped quartz glasses, He ion irrad. 86−28882
waveguide fabrication in nonlinear semiconductor-dopedglasses 86−42646
waveguide profiles, ion-exchanged control with Ag thin film sources 87−74691
waveguides, connectors, splicers and splitters *(German)* 86−17380
waveguides, curved, integrated optical circuits appls. 87−54042
waveguides, fusion splicers, new family 85−2037
waveguides, ion-exchange fabrication , review 88−72094
waveguides, ion-exchanged, and components, recent advances, review 88−65315
waveguides, ion-exchanged, in glass, analytical model 88−65307
waveguides, multimode, fabrication in glass plates and meas. *(Chinese)* 86−68234
waveguides, multimode, thick, fast processing by ion exchange *(Chinese)* 88−13906
waveguides, multimode GRIN strip, fabricated in glass by ion exchange 87−54041
waveguides, production by solid state diffusion, examination of props. 88−20420
waveguides, thin film, nonlinear-optical mode conversion efficiency, fabrication 86−15778
waveguides in polymer matrices, solvent-assisted indiffusion 88−20408
waveguides produced in glass by K^+-Na^+ ion exchange *(German)* 87−74816
waveguiding Fresnel lenses, modelling and fabrication 88−65317
wavelength flattened 8×8 single-mode star coupler 88−65241
wide band pass filters, multiple Fabry-Perot interference filter struct. *(Korean)* 87−12286
YAG:Nd optical quality single crystal fibres, laser assisted growth 85−29542
Ag^+-Na^+ ion-exchange equilibrium influence on waveguide index profiles 88−65304
Ag^+-Na^+ ion-exchanged waveguides, process optimisation 88−51496
AgBr, IR single crystal fibres fabricated by travelling-zone melting 85−18668
AgCl IR fibre bundles, production by plastic deformation methods 85−29574
AgCl, IR single crystal fibres fabricated by travelling-zone melting 85−18668

optical workshop techniques continued
(Al,Ga)As/(Ca,Sr)F_2 multilayer structures, MBE growth as broad-band high-reflectivity mirror 87−36740
(Al,Ga)As/(Ca,Sr)F_2 multilayer structures, MBE grown, broadband high-reflectivity mirrors fabrication 87−7191
(Al,Ga)As-GaAs MQW planar waveguides, optical props., reactive ion etching of rib waveguides and directional couplers 87−60959
Al Si-coated waveguide, for IR transmission, transmission properties, fabrication 85−18667
Al anodising technique for fabricating optical thin-film waveguides 87−68017
Al coated optical fibres, mech. and optical props. 87−38813
AlGaAs graded index lens for integrated optics, laser-assisted CVD fabrication 88−65346
AlGaAs index-guided MQW lasers and grating structures fabricated by Si-induced disordering 88−65354
AlGaAs/GaAs phase couplers for optical IC appls., design and fabrication 85−46197
AlGaAs-GaAs laser diode, inner stripe type, single-step MBE fabrication 87−39092
AlGaAs-GaAs monolithic integration SCC laser, microcleaved process fabrication 86−48415
AlGaAs-GaAs phase couplers for optical integrated-circuit appls., design and fabrication 86−22181
Al_2O_3 optical quality single crystal fibres, laser assisted growth 85−29542
Al_2O_3 waveguide preparation by ion-beam-assisted deposition 86−2812
Al_2O_3:Cr optical quality single crystal fibres, laser assisted growth 85−29542
Al_2O_3-P_2O_5-SiO_2 based fibres, Nd^{3+}(Er^{3+}) doped, fabrication, assessment, optical props. 88−51461
ArF_4 based fluoride glass single-mode fibre fabrication 85−12569
As-Ge-Sb glass hollow fibres, drawing and attenuation meas. 86−28825
As-S glass IR fibre, Teflon-clad, low-absorption losses 86−42269
As-Se glass hollow fibres, drawing and attenuation meas. 86−28825
As_2S_3 amorphous chalcogenide optical grid, submicron resolution, VLSI appls. 87−25028
As_2Se_3 IR optical fibre, improved 88−58116
As_xSe_{1-x}, waveguides films for IR integrated optics 85−56362
CdS waveplates for IR lasers, reproducible volume manufacture 87−19017
CdS_xSe_{1-x} doped glass nonlinear guided wave structures 87−74753
CdS_xSe_{1-x} integral optics waveguides, fabrication study 87−54055
CdS_xSe_{1-x} integrated optics waveguides, fabrication, Se diffusion conditions 86−28890
CsBr-AgBr fibres, growth by Stepanov's method 87−18628
CsBr-CsCl two-layer single-crystal fibre waveguides, fabrication, optical loss reduction 86−48121
Cu, vapour lasers, art and science 88−51762
CuCl, IR single crystal fibres fabricated by travelling-zone melting 85−18668
Er^{3+}:SiO_2, single-mode fibre laser operating at 1.55 μm 87−39045
Fe_xPO_4 optical waveguides, props. and fabrication by low temp. spin coating process 88−39958
(GaAl)As monolithic composite-cavity laser, chem. etching technique 87−26401
GaAlAs-GaAs multilayer structures, reactive ion etching waveguides for device appl. 86−28216
GaAs, diffraction gratings for distributed feedback laser, holographic photoetching 88−33109
GaAs electro-optic Y-branch broadband waveguide interferometer, 1.3 μm operation 85−29647
GaAs, fibre-optic Fabry-Perot temp. sensor 88−67881
GaAs, integrated optical bent waveguide with 45° mirror, selective LPE growth 87−68062
GaAs ion implanted integrated optics fabrication technology 85−46198
GaAs large amplitude submicrometre gratings, laser wet chemical etching 86−36251
GaAs monolithic integration, guided wave device design and fabrication 85−29732
GaAs optical directional couplers with short coupling lengths, anal., fabrication and characts. 88−45176
GaAs optical waveguides, $SiCl_4$ reactive ion etching 86−22127
GaAs optical waveguides, low loss, MOCVD growth 85−56283
GaAs proton implanted optical waveguides 88−51522
GaAs rib waveguide totally refl. mirrors, reactive ion etching fabrication and appl. 86−9594
GaAs single-mode rib waveguides with reactive ion-etched totally refl. corner mirrors 86−2724
GaAs substrate, optical IC planar waveguides, design and fabrication by ion implantation 85−41200
GaAs surface, photoelectrochemical etching of gratings, crystallographic orientation effect 88−33110
GaAs, waveguide effect during photoetching 85−7273
GaAs, waveguide interferometers and couplers for high-speed electro-optic modulation and switching 87−38818
GaAs waveguides fabricated by localised VPE, optical characterisation 85−2049
GaAs/GaAlAs BH laser with ion-beam etched mirrors, low threshold device fabrication 85−51160
GaAs/GaAlAs waveguide fabrication techniques 85−46196
GaAs-$Al_xGa_{1-x}As$ low-loss DH directional coupler 85−2073
GaAs-AlGaAs SQW GRIN-SCH lasers, MBE grown on Si_3N_4 masked substrates, low threshold current 88−72313
GaAs-AlGaAs rib waveguide lasers, one-step two-level etching technique, appl. for monolithic integrated optics 88−26867
GaAs-AlGaAs, waveguide, grating coupler, selective superlattice intermixing 87−74797
GaAs-GaAlAs Y-branch interferometric modulator, dry etching fabrication 86−9622
n-GaInAsP, holographic photoelectrochem. etching of diffr. gratings for DFB lasers 85−24675
GaInAsP/InP crystal growth by organometallic VPE for integrated optics 85−401
GaInAsP/InP quantum box structure with p-n junction and optical guide structure, fabrication 88−45447
GaInAsP/InP unstable resonator lasers, fabrication using chemical facet etching method, characts. and performance 87−75087
GaInAsP-InP DFB lasers, 1.3 μm DCPBH type, narrow linewidth, λ/4 shifted first-order gratings 88−20638
GaInAsP-InP VPE transported BH lasers with passive external cavity, lasing characteristics 88−65824

optical workshop techniques continued
GaInAsP-InP low threshold 1.3 μm laser, design, fabrication and characts. 86−36508
GaInAsP-InP mass-transported BH lasers and integrated mirrors 85−2345
GaInPAs-InP, heterostructure waveguide, liq. phase epitaxy 87−38764
Ge-Se chalcogenide glass fibres, IR, low loss, fabrication 85−7210
Ge-Se chalcogenide glass optical fibres, low loss IR, fabrication 86−9542
Ge-coated IR waveguides, fabrication and transmission props. 86−63631
GeO_2:Sb glass optical fibre prepared by VAD, loss values 85−12570
GeO_2-core/SiO_2-cladding optical fibres, modified CVD deposition and stimulated Raman appl. 87−25935
GeSbSe chalcogenide glass IR optical fibres, properties and applications 87−38777
$Hg_{1-x}Cd_xTe$ optical waveguides, high band gap, for 10.6 μm 87−18729
HgCl, acoustooptic devices, fabrication and charactn. 88−13957
$In_{0.52}Al_{0.48}As$ electro-optic directional coupler grown on InP by MBE 87−74866
InGaAs/InP multiple quantum well waveguides, low loss, MOCVD growth 87−25938
$In_{0.2}Ga_{0.8}As$-GaAs superlattices and $In_{0.012}Ga_{0.988}As$ MBE layers, low-loss optical waveguides fabrication 86−58745
InGaAsP DH optical waveguides with p^+-n junction, fabrication by LPE and chem. etching 85−7285
InGaAsP, RIE for semicond. optical devices, expt. study *(Japanese)* 88−7967
InGaAsP, diffraction gratings, etching techniques *(Chinese)* 88−58324
InGaAsP high-power gain-guided laser array, fabrication and performance characteristics 85−7428
InGaAsP lasers, stop cleavage fabrication for monolithic optoelectronic integration 85−51155
InGaAsP/InP BH laser, 1.5 μm CW operation, reactive-ion etched facet, fabrication and characts. 85−56636
InGaAsP/InP DBH laser, 1.3 μm, low-threshold, reactive ion-etched facet, design and characts. 86−22373
InGaAsP/InP DFB laser and InGaAs/InAlAs MQW optical modulator monolithic integration using hybrid LPE/MBE technique 86−36245
InGaAsP-InP laser lenses and mirrors, miniature fabrication 88−65777
In_2O_3 on glass, optical data discs, master fabrication using reactive ion-beam etching 86−9450
InP, RIE for semicond. optical devices, expt. study *(Japanese)* 88−7967
InP, diffraction gratings, etching techniques *(Chinese)* 88−58324
InP dry etching at room temp. 87−11660
n-InP, holographic photoelectrochem. etching of diffr. gratings for DFB lasers 85−24675
InP, selective area epitaxy using metallo-organic VPE, rib waveguide fabrication 85−39783
InP:Mg p-n junction waveguide fabricated by Mg ion implantation 87−32309
InP/InGaAsP optical devices, anisotropically etched deep gratings 88−8022
KCl, polycryst. IR laser windows, hot forging prep. and characts. *(Chinese)* 85−62274
KH_2PO_4 crystals for freq. doubling components, fine diamond turning 86−58731
KH_2PO_4-KD_2PO_4 mixed cryst. optical waveguide grown on {101} plane of KD_2PO_4 cryst., characts. 87−54067
KNO_3-$AgNO_3$, low melting point mixtures for glass waveguide fabrication 88−26835
KNO_3-glass, ion-exchange diffusion, planar waveguides 87−7101
$KTa_{1-x}Nb_xO_3$ optical waveguides grown by LPE 86−63623
Li(Nb,Ta)O_3 thin film optical waveguides, LPE growth 85−18724
$LiNbO_3$, C_2F_6 reactive ion-beam etching, optical waveguides appl. 85−7284
$LiNbO_3$, Ti indiffused H^+ exchanged optical waveguides, fabrication and charactn. 87−32976
$LiNbO_3$ Ti-indiffused optical waveguide fabrication, Ti implantation, shallow perturbation 87−74805
$LiNbO_3$, Y- and Z-cut, optical waveguide fabrication by He^+ implantation 86−63632
$LiNbO_3$, Y-cut, dilute melt proton exchange for monomode optical waveguide fabrication 88−58203
$LiNbO_3$ channel waveguides, Li depletion, SIMS characterisation 85−35493
$LiNbO_3$ component wafer-scale integration for coherent optical signal processing, plasma etching 85−50991
$LiNbO_3$ crystals, Y-cut, ion-exchanged lightguides 86−36219
$LiNbO_3$ crysts., X- and Y-cut, optical props. of ion-exchange light guides 85−7272
$LiNbO_3$, double proton exchange for low loss and quasi-embedded waveguides 87−74807
$LiNbO_3$ guided-wave Mach-Zehnder interferometric modulator fabrication by Ti-indiffusion and proton exchange, characterisation 85−29548
$LiNbO_3$ high quality waveguides fabricated by dilute melt proton exchange, optical props. 86−36228
$LiNbO_3$ integrated optical modulator, Mach-Zehnder type, design, fabrication and waveguide props. *(German)* 85−50986
$LiNbO_3$ integrated optics technology under Joint Opto-Electronics Research Scheme 88−33761
$LiNbO_3$, ion-milled alignment grooves, efficient fibre-chip coupling at 1.3 μm 85−2076
$LiNbO_3$, microfabrication of planar waveguides 87−54089
$LiNbO_3$ optical quality single crystal fibres, laser assisted growth 85−29542
$LiNbO_3$ optical waveguide fabrication by Ti in-diffusion and proton exchange 85−46129
$LiNbO_3$ planar-optical waveguides, proton-exchanged, chem. and optical props. 87−32956
$LiNbO_3$, proton exchange, integrated optics development 87−74838
$LiNbO_3$ proton-exchange slab optical waveguides, charactn. 86−42254
$LiNbO_3$ proton-exchanged waveguides, materials anal. and optical characts. 85−29545
$LiNbO_3$, sputter etching characts. and techniques 86−42205
$LiNbO_3$ substrate, outdiffusion during waveguide fabrication 87−74809
$LiNbO_3$ surface, corrugated grating fabrication with high diffr. efficiency 85−2067
$LiNbO_3$, tapered waveguide for directional coupler, proton exchange form., interf. effects 86−9588
$LiNbO_3$ waveguide fabrication by $^4He^+$ implantation and transient annealing 86−2669
$LiNbO_3$ waveguide fabrication by proton exchange, strain and surface damage 86−22102
$LiNbO_3$ waveguides, fabrication and characts. *(Italian)* 86−22177
$LiNbO_3$ waveguides, fabrication techniques review 88−39959

optical workshop techniques continued
$LiNbO_3$ waveguides, high index low loss, fabrication 87−46512
$LiNbO_3$ waveguides, proton exchanged, short- and long-term stability 85−29544
$LiNbO_3$:Fe(Ti), impurity in-diffusion for diffraction grating fabrication 88−13935
$LiNbO_3$:H^+ ion-exchange planar optical waveguides, light propagation 86−15494
$LiNbO_3$:H^+ waveguide fabrication and charact. giving low index increase and good optical quality *(French)* 88−7924
$LiNbO_3$:He^+ implanted optical waveguides 88−7456
$LiNbO_3$:He^+ optical waveguides, ion implanted, damage profiles, propag. const. and attenuation var. with annealing temp. and time 87−46495
$LiNbO_3$:He^+, stripe waveguides, charact. 88−51534
$LiNbO_3$:MgO proton-exchanged waveguide, fabrication and characterisation 85−46169
$LiNbO_3$:Nd proton-exchanged optical waveguides, fabrication 88−65296
$LiNbO_3$:Ti, H^+ polarisers, monolithic, low-loss, high extinction 88−51549
$LiNbO_3$:Ti TIPE waveguide lens, fabrication and characteristics 88−39987
$LiNbO_3$:Ti channel waveguide horn antennas, design, fabrication and characterisation 85−2043
$LiNbO_3$:Ti deep waveguides diffused in dry and wet O_2 ambient, characterisation 86−36128
$LiNbO_3$:Ti, indiffused, optical waveguides, in-plane scattering 85−1976
$LiNbO_3$: Ti integrated optic mirrors by ion-beam micromachining 88−7952
$LiNbO_3$:Ti, low loss optical waveguides 88−51523
$LiNbO_3$:Ti low-loss waveguides, fabrication using closed Pt crucible 88−1973
$LiNbO_3$:Ti microlens arrays fabrication using proton exchange technique, single-mode waveguide microlenses 85−41194
$LiNbO_3$:Ti multichannel modulator array, develop. of tapered glass coupling waveguides for source radiation input 88−72098
$LiNbO_3$:Ti multichannel modulator arrays, develop. of multichannel glass couplers for input 88−51529
$LiNbO_3$:Ti optical waveguides, fabrication and optical characts. 85−50952
$LiNbO_3$:Ti optical waveguides, fabrication by diffusion and proton exchange *(German)* 85−50941
$LiNbO_3$:Ti optical waveguides, proton-exchanged, fabrication and charactn. 86−53937
$LiNbO_3$:Ti phase modulators, fabrication parameter 88−51574
$LiNbO_3$:Ti planar waveguides, fabrication by diffusion in dry and wet O_2 atmospheres 88−65310
$LiNbO_3$:Ti planar waveguides, refr. index profiles, water vapour effects during fabrication 86−36225
$LiNbO_3$:Ti proton-exchanged optical waveguides *(Chinese)* 85−46149
$LiNbO_3$:Ti, surface guiding elimination by outdiffusion suppression 85−41112
$LiNbO_3$:Ti waveguide, SHG, indiffusion proton exchange fabrication 87−12583
$LiNbO_3$:Ti waveguide mode control via fingering of Ti strips 87−74808
$LiNbO_3$:Ti waveguide power divider, passive, three-branch, fabrication 85−29568
$LiNbO_3$:Ti waveguide production, water vapour effects on TiO_2, $LiNb_3O_8$ and $(Ti_xNb_{1-x})O_2$ compound kinetics 85−29543
$LiNbO_3$:Ti waveguide-fibre coupling using ion-milled grooves 85−7262
$LiNbO_3$:Ti waveguides, fabrication by laser annealing 85−2045
$LiNbO_3$:Ti waveguides, high index low loss, fabrication 87−46512
$LiNbO_3$:Ti waveguides, proton-exchanged Fresnel lenses 87−18741
$LiNbO_3$:Ti waveguides, refr. index step induced by wet atm. diffusion 87−74806
$LiNbO_3$:Ti waveguides, refractive index step induced by wet atmosphere diffusion 88−58183
$LiNbO_3$:Ti waveguides, with small radius bends, low loss fabrication 86−36130
$LiNbO_3$:Ti, ion-implanted, solid-phase epitaxy, optical waveguide fabrication 87−54004
$LiTaO_3$ optical waveguides, fabrication by H^+ exchange 87−46488
$LiTaO_3$, proton exchange, integrated optics development 87−74838
$LiTaO_3$:H optical waveguides, ion exchange fabrication method 85−24319
$LiTaO_3$:Ti, optical waveguides fabricated by Ti diffusion 85−18719
Mo mirror, superpolished, for VUV Ar_2 excimer laser 88−45500
N_2 sealed-off miniature stable UV laser, construction, characteristics 86−3018
Na-K ion-exchanged glass waveguides, swelling characts. 87−18610
Na^+-K^+ ion exchanged optical waveguides, charactn. 88−51535
NaCl, infrared high-vacuum windows 88−14245
$NaNO_3$-KNO_3-$AgNO_3$, low melting point mixtures for glass waveguide fabrication 88−26835
Na_2O-Al_2O_3-SiO_2 glass, channel waveguides form. via Ag-Na field assisted ion exchange 86−42275
Nb_2O_5, C_2F_6 reactive ion-beam etching, optical waveguides appl. 85−7284
Nb_2O_5 film, waveguide fabrication by MOCVD and opt. characteris. *(Japanese)* 88−72123
Ni Ge-coated waveguide, for IR transmission, transmission properties, fabrication 85−18667
Si, V-groove structures, etch process 85−50980
Si V-grooves for multiple fiber interconnects 88−51472
Si, etching V-groove structures 87−12232
Si, fibre-optic Fabry-Perot temp. sensor 88−67881
Si, large optical structs., profile control by gas etching techniques 88−7968
Si micromachining of periodic structures MM- and subMM-wave appls. 88−44336
Si micromirrors, chemical etching 88−40038
Si, reactive ions etching, large scale optical components fabrication 87−74205
Si substrate, fabrication of integrated optical components 88−72151
Si substrate, guided wave optical structs. formed by sputtering, oxidation and CVD 85−41201
a-Si:H Schottky-barrier thin-film-waveguide photodiode 86−38388
Si_3N_4 antireflection coatings for semiconductor lasers, reactive sputtering directly controlled deposition 87−39078
Si_3N_4 films, selective area laser CVD, microlenses fabrication 87−36804
Si_3N_4 waveguides for integrated optics, plasma CVD 86−68252
SiO_2 MCVD fibre preform process, laser enhancement of thermophoretic deposition 86−42276
SiO_2 broad band antireflective coatings on fused SiO_2, form., high power laser appls. 86−15546
SiO_2 core dispersion-shifted single-mode fibres, development 88−45144
SiO_2 core fibres, O_2 content effect on defect formation 88−45146
SiO_2 fibre, V-grooves fabrication using CO_2 laser 87−26062

optical workshop techniques continued
SiO_2 fibre prepared by VAD, control of radiation induced defects 88−476
SiO_2 films, selective area laser CVD, microlenses fabrication 87−36804
SiO_2, fused silica, CO_2 laser polishing for increased surface damage resistance 85−7563
SiO_2, fused silica, damage threshold at 1.06 μm, surface finishing effect 85−7198
SiO_2, fused silica, float polishing and defects 85−7197
SiO_2 gel glasses for waveguide fabrication 88−65332
SiO_2 glass, ultrapure, prep. from autoclaved gels, drawn fibre optical losses 88−43950
SiO_2 monomode fibres with F-doped cladding, prep. by MCVD process 87−1934
SiO_2, optical coating ion beam sputter deposition, optical props. and laser damage 85−7199
SiO_2 optical fibres, SiO_xN_y coated to reduce mech. fatigue and H_2 induced optical ageing 85−35419
SiO_2 optical fibres, characts., influences of drawing conditions 87−68131
SiO_2 optical fibres, drawing-induced defects, consolidation-atm. influence 88−33636
SiO_2 optical fibres, formation mechanism of drawing-induced defects 88−26785
SiO_2 optical waveguides, low-loss planar, fabrication using thermal nitridation and charactn. 87−12233
SiO_2 plastic clad fibres, axial lateral plasma deposition for single and multimode fibres 87−38802
SiO_2 silica core fibre long lengths, MCVD fabrication and performance 86−22104
SiO_2, silica optical fibres, drawing induced E' centres, ESR study 86−22135
SiO_2 silica transparent microporous fibres by sol-gel process, gel preform geometry, bulk density 88−6536
SiO_2 undoped cladding in MCVD-fabricated fibres, etching characts. 86−22141
SiO_2:F optical fibres, low-loss, single-mode, fabrication by sol-gel method 88−13798
SiO_2:F optical fibres, sol-gel method synthesized 88−45137
SiO_2:F optical fibres, stress props. 87−46437
SiO_2:F single mode fibre for submarine cables 88−45142
SiO_2:F(GeO_2) optical fibre preforms, plasma-induced CVD, stress 86−42235
SiO_2:Ge fibres, direct core obs. method using thermal radiation *(Japanese)* 88−33692
SiO_2:Ge integrated optical waveguides, plasma CVD 87−10501
SiO_2:GeO_2 high NA multimode fibre made by pressurized MCVD 87−38803
SiO_2:GeO_2 optical fibres, stress props. 87−46437
SiO_2:GeO_2 waveguides for integrated optics, plasma CVD 86−68252
SiO_2:Nd,Yb optical fibres, fabrication and props., review 88−65266
SiO_2:Sb_2O_3 fibres fabricated by VAD method 87−68082
SiO_2-F cladded dispersion-shifted single mode fibres with dual shape core, VAD method 88−45141
SiO_2-GeO_2 D-shaped fibres, fabrication and charactn. 86−36150
SiO_2-GeO_2-CeO_2 based doped optical waveguide fibre fabrication 85−35424
SiO_2-Si_3N_4-SiO_2 rib waveguide on Si, Bragg reflector fabrication techniques 88−45169
SiO_2-SiO_2:F, pure silica core fibre with doped cladding, VAD fabrication technique and characts. 87−53964
SiO_2-SnO_2-P_2O_5 optical fibres, improved modified CVD fabrication technique 85−18677
SiO_2-TiO_2 glass planar optical waveguide fabrication by soot deposition process *(Japanese)* 85−62384
SiO_2-core single-mode fibres, residual stress effects on refractive indices, comment and reply 88−26752
SiO_23:Sb_2O_3 optical fibre fabrication by VAD process 86−2677
SiO_xNy low loss optical waveguides fabricated by thermal nitridation of SiO_2 86−2668
SiO_2(Si_3N_4), laser CVD, selective area deposition, microlenses fabrication 88−6494
SiO_2ion-beam exposure for pattern generation, semiconductor and integrated optics fabrication 85−6800
SnO_2 photopatterning in porous glass, phase grating fabrication 88−33767
$Sr_{0.6}Ba_{0.4}Nb_2O_6$, vapour diffused optical waveguides, electro-optic modulation 86−28785
Ta_2O_5, dielectric waveguide films, prod. by cathode sputtering 86−28840
Ta_2O_5 film, waveguide fabrication by MOCVD and opt. characteris. *(Japanese)* 88−72123
Ta_2O_5, optical coating ion beam sputter deposition, optical props. and laser damage 85−7199
Ta_2O_5 thin-film optical waveguide Luneburg lenses on SiO_2-Si substrate 85−46206
Te-based chalcogenide glass optical fibres, low-loss, fabrication 86−63606
Ti flint planar gradient waveguides, fabrication 85−41166
TiO_2, optical coating ion beam sputter deposition, optical props. and laser damage 85−7199
TiO_2, optical coatings, single layer and multilayers with SiO_2, preparation from colloidal suspensions 88−13991
TiO_2-SiO_2 dielectric mirrors for optically-controlled transparencies with MOS-liq. cryst. struct., prep. 88−20484
TlBr, IR single crystal fibres fabricated by travelling-zone melting 85−18668
TlBr-TlCl fibres, growth by Stepanov's method 87−18628
TlBr-TlCl two-layer single-crystal fibre waveguides, fabrication, optical loss reduction 86−48121
TlBr-TlI (KRS-5) fibres, with low optical losses, fabrication 85−18665
TlBr-TlI fibre for high power CO_2 laser beam 87−18629
Tl_2BrI (KRS-5), IR single crystal fibres fabricated by travelling-zone melting 85−18668
$TlNO_3$-glass, ion-exchange diffusion, planar waveguides fabrication 87−7101
YAG:Nd^{3+} waveguides formed under ion irrad., optical characts. 86−28832
$Y_3Ga_5O_{12}$:Nd thin film optical waveguides, RF-sputtering on YAG substrates 86−36167
YIG cryst. laser diode module with optical isolator, floating zone growth method 87−54326
YIG multiple-layer garnet, single mode magneto-optic waveguide, LPE fabrication 86−9586
Yb_2O_3-SiO_2 core fibre for nonlinear optical devices, transportation and oxidation method fabrication 86−36223

optical workshop techniques continued
ZrF_4 based fluoride glasses, crystn. kinetics, optical fibre fabrication 86−22062
ZrF_4 based glass-cladded fibres, optical props., fabrication 85−35375
ZrF_4 glass, cation removal for use as low loss optical fibres 85−56333
ZrF_4-BaF_2-LaF_3-AlF_3-NaF glass single-mode fibres, fabrication and characts. 86−15466
ZrF_4-BaF_2-LaF_3-NaF-AlF_3 glass optical fibres, prep. and characterisation 85−12536
ZrF_4-based glass fibres for IR transmission, prep. and props. 86−68299
ZrF_4-based optical fibres, formation of extrinsic ZrO_2 scatterers 88−26781
single-crystal fibre, growth apparatus, laser-heated miniature design 85−18703

optical zone plates
binary optics, fabricated using electron beam lithography 88−65909
contamination lithography for the fabrication of zoneplate X-ray lenses 86−11923
fibre optic mechanical sensors for aerospace appl. 88−42116
fibre optic mechanical sensors for aerospace applications 88−47548
fibre optic sensors, displacement meas. using diffr. grating and Fresnel zone plate 85−35398
Fresnel, IR sensing array appl., using p-Si/Al thermopile 88−47533
Fresnel zone plate lenses, pattern characts. 88−2769
Fresnel zone plates used as alignment targets, semiconductor processing effect on focusing props. 85−6782
holograms sampled by Fresnel zone plates, 2 D image reconstruction 88−14291
holographic, off-axis, recorded and reconstructed by cylindrical wavefronts 85−2437
holographic, phase-transfer function optimisation 86−29252
holographic multidirectional scanner for point-of-sale bar-code symbol reader 85−24680
holographic NDT by optically generated zone plate 86−58976
holographic scanning, principles and appls., review 85−35909
holographic zone plates, wavelength-shift-aberration compensation 85−56848
holographic zone plates for $f\cdot\theta$ and collimating lenses 86−36588
holographic zone plates with aberration corrections, systematic design method 87−61000
holographically produced parabolic zone plates 87−61258
mm-wave Fresnel zone plates, characts. 87−73641
MM-wave holography, 2D image reconstruction method from holograms sampled by using Fresnel zone plates *(Japanese)* 87−26573
optical sensors, spectral props. and parameters 87−61002
phased-array laser, single-lobe radiation pattern generation using variable phase-shift zone plate 87−26490
spatial filters for replicating images 87−2006
to-and-fro zone plate method for 3D frequency characts. obs. 87−14441
X-ray lithography, high speed zone plate alignment systems 87−38033
X-ray projection method using zone plates for mask prep. with submicron feature sizes 88−26131
X-ray zone plates fabrication by electron beam lithography 86−25157
Ge diffracting lenses with high performance, low cost design 88−58326

DDC electric drive dynamic disturbance optimisation *(German)* 88−37650
decentralised controllers for interconnected power systems, hierarchical computation 86−18707
decentralised optimal feedback control of large-scale linear stochastic systems *(German)* 86−18645
decentralized algorithms for optimal flow control 88−35189
detuned minimum variance self-tuning feedforward controller for multivariable electric furnace heating 86−45830
diagonally weighted conformal mapping, polynomial matrix spectral factorisation using Z-plane methods 86−19883
diesel engine model, optimal piston path for ideal cycle 86−12651
diesel generators combined with wind turbine generators, optimum control 87−78633
diesel locomotives antiskidding system, optimal control 88−69828
digital controllers for elec. drives, control algorithms *(German)* 86−13123
digital feedback controllers absolute value optimisation, elec. drive appl. *(German)* 86−13124
digital position controller of PM DC motor for improving time optimal control under the inexact load parameter 87−30608
digitally controlled thyristor convertors, fast response and optimum regulation 86−45528
disc file actuator, power dissipation minimisation 88−64930
distribution network, optimisation of prospective development, representation methods of functioning conditions *(Russian)* 85−32151
distribution network optimum voltage and wattless power control *(Russian)* 86−39116
distribution networks, optimal regime parameters determ. 87−64142
distribution networks, reactive power, estimation of optimum regulation of flow *(Spanish)* 87−30172
distribution networks optimal control of reactive power and voltage 87−71662
distribution system control, multicriterion optimisation by principal-component method *(Russian)* 86−56417
dynamic drive systems, with noncontacting synchronous clutches, design optimisation *(Russian)* 85−49145
dynamic programming teaching in optimal control 87−36363
electric arc steel melting furnaces, elect. operating conditions, dynamic optimisation 85−65648
electric car driving system with three-phase induction motor and invertor *(Polish)* 86−13142
electric drive digital controller optimization *(German)* 87−36197
electric drive optimal structure for random disturbances under load 86−71086
electric drives, automatic control, synthesis of optimum system *(Russian)* 86−13126
electric drives, linked, regulation optimisation and digital simulation *(German)* 86−33734
electric drives, nonlinear, optimum speed control *(Russian)* 87−31009
electric drives, optimal control *(Russian)* 86−33735
electric drives, optimal control of continuous current *(Russian)* 86−26344
electric drives, speed controlled with elastic load, optimisation *(German)* 88−5925
electric drives control optimisation based on temp. rise. *(Russian)* 87−78991
electric drives with flexible and elastic couplings, optimum control 86−40196
electric melting using computerised digital control, algorithm optimisation 85−5558
electric motors optimal efficiency control by microprocessors *(Korean)* 85−60134
electric power systems, optimal control appls., book 87−72680

optimal control continued
electric traction vehicle optimal control determ., numerical methods 88−18177
electric transmission of transport vehicles, optimum controller synthesis *(Russian)* 86−13151
electric vehicle induction motor drive, optimised microelectronic power control 86−61786
electricity production, optimal daily scheduling 86−12309
electromagnet power supply, optimal control 88−72518
electromechanical energy storage with computer control for energy optimisation *(German)* 87−16067
EM environment control using system models with random structure 86−15955
EM suspension, multiple-component system, control optimisation *(Russian)* 88−20869
energy conversion systems, online optimising strategies 87−35809
energy production systems with random perturbations, optimal control policies 88−42804
energy recovery hybrid car for urban transport 86−71100
epitaxial reactor, optimal control law for thermal regulation 87−36775
excitation regulator principles and performance *(Chinese)* 87−78848
feedback amplifier design for control systems 87−37033
feedback control system design method with feedforward control loops 86−61699
fixed point digital filters and controllers, small roundoff noise realisation 88−59140
flexible space antenna computer aided modelling/compensator design 86−59141
fluidised beds for chemical processing and steam generation appl., control and optimisation for energy conservation 86−12664
force meas. in injection moulding processes control 86−11735
forward maximum principle algorithm with decision horizon results 88−5496
four-quadrant AC motor drive power factor improvement and pulse pattern optimisation 86−70910
frequency control of HVDC transmission links, using control system CAD 85−32116
generating unit in interconnected machine system, optimal control and identification 86−12764
generator computer control system based on magnetic flux detection, development *(Japanese)* 85−60139
generator excitation and speed governor system, multivariable optimal control 86−25971
generator optimal control and on-line state estimation 87−9490
generator optimal control system, appl. of multivariable control theory *(Japanese)* 86−33292
generators, digital multivariable optimal control system 86−66029
generators, optimal excitation controllers, theory and practice 87−72111
H.B. Robinson PWR, sensitivity-reduced design, optimal control problem 88−30446
highway lighting programmable control related to traffic speed and volume 85−5509
Hilbert spaces, implicit complementarity problem 86−34124
Huangpu River industrial water pollution control system analysis *(Chinese)* 86−65569
hybrid elec. car optimisation and control 88−11446
hybrid integrated circuits, control systems optimisation *(Russian)* 85−1200
hybrid permanent magnet step motor control 87−30693
hydro-power system general configuration, optimal operation 88−23377
hydro-thermal power system, decentralised suboptimal load-frequency control using state variable model 85−43531
hydro-thermal power system optimal scheduling *(Chinese)* 86−12728
hydroalternators during critical breakdown events *(Slovak)* 85−4986
hydroelectric power generation projects in Dead Sea, dynamic optimal control model 85−32378
hydroelectric power plant appl. 87−42705
hydroelectric power plant with unregulated spilling water, optimal control 88−30610
hydroelectric power plants, optimisation using linear/dynamic programming 85−38923
hydroelectric power station, automatic control system, general model *(Russian)* 87−4604
hydroelectric power stations, long-term operation of series parallel reservoirs 87−77957
hydroelectric power stations, optimal load distribution using computerised control *(Chinese)* 85−9769
hydroelectric power supply system operation, optimal dispatch and control 87−71606
hydroelectric reservoir level control using linear programming regulator 87−9238
hydroelectric reservoirs modelling and optimisation for long term regulation 87−4620
hydroelectric systems 86−6604
hydropower station electric braking by microcomputer and time-optimal control *(Chinese)* 86−39608
hydrothermal interconnected power systems, optimal variable structure controller for load-frequency control 85−21120
hydrothermal power system, fixed-head, optimal load flow problem 87−21867
hydrothermal power systems optimal scheduling 85−38464
hydrothermal system, optimal control strategy for automatic generation control 88−61841
hyperthermia phased-array system, optimal temp. control 86−60750
hyperthermia treatment equipment, feedback control and optimisation, present status and future needs 87−63828
incremental motion control systems conf., Champaign, IL, USA (June 1985) 87−23026
induction drive frequency control optimisation algorithm using normalised variables *(Russian)* 87−78668
induction heating, HF current-source invertors using static induction thyristors 88−31213
induction machine vector control synthesis by state feedback *(Japanese)* 88−69371
induction motor, speed regulation using model reference adaptive control 87−30562
induction motor, using state space method *(Japanese)* 87−15738
induction motor drive system, transvector controlled, optimal speed regulator using model reference adaptive control 86−51954
induction motor drives, frequency controlled, synthesis of discrete feedback suboptimal control 85−44222

optimal control continued
induction motor drives, microcomputer-based optimal control for reducing parametric variations and speed measurement errors 85−27707
induction motor drives, variable-frequency, on-line efficiency optimisation 85−27694
induction motor drives with microcomputer based optimal control system 86−45743
induction motor electric drive, minimum loss operation by computer-based control of PWM inverter waveform 85−53875
induction motor electric drive, variable frequency, on-line efficiency optimisation 85−53877
induction motor steady-state characts. research 85−65253
induction motors, current source inverter fed, optimal efficiency control technique 87−22343
induction motors, optimal control using rotor flux manipulation 88−55338
induction motors, optimum invertor waveforms for decreasing acoustic noise 86−39801
induction motors, speed control, optimal gain design 88−31087
induction motors, time-optimal control 87−42946
induction motors, wound rotor, optimal starting torque control by microprocessor 85−21603
industrial and biotechnical processes, modern control techniques appl. 86−6500
inertial platforms with sway motion, design and simulation of closed loop ground alignment 86−60868
information systems, state identification *(Polish)* 86−49042
information systems, state identification *(Polish)* 86−49044
integrated data/voice network traffic flow control protocols 87−34028
integrated digital network, flow control and estimation, separation principle 86−23323
interceptor Earth-launched rockets, optimal trajectories computing based on simulation 88−68715
interconnected elec. energy systems, decentralised load-freq. control 88−23371
interconnected electricity supply systems, optimal two-level control method *(Spanish)* 86−32650
interconnected power system frequency and tie-line power flow correction with real-time identification *(Chinese)* 87−50632
interconnected power system load frequency-tie line power control 86−44854
interconnected power systems 87−57542
interconnected power systems, decentralised optimum load frequency control 85−43552
interconnected power systems, large deviation theory for stability against voltage collapse 88−48515
interconnected power systems, optimum decentralised load freq. control 85−21133
interconnected power systems, optimum load frequency control 85−32054
interference of synchronous machines with optimal stochastic automatic excitation controllers. 87−57556
interval analysis appl. to parameter tolerances for linear dynamic systems 87−36563
invertor sources of welding current *(German)* 87−9968
invertor-driven induction motor, optimal PWM control 88−48989
isolated power systems, near-optimum control plans for fault situation prevention *(Russian)* 87−15186
KaMeWa wind turbine, pitch control system 85−48914
large interconnected dynamic system optimal control location determ. 87−57573
large scale systems, hierarchical optimisation appl. 85−26997
large-scale interconnected power system adaptive decentralized optimal control *(Chinese)* 88−48495
large-scale power systems, excitation control design by using dynamic equivalencing technique 86−6256
linear DC motor for graphics printer 87−43101
linear induction 88−37243
linear motors, microprocessor-based control for magnetic guidance of rail vehicles 85−10192
load curve flattening, theoretical concepts and practical solns. *(French)* 86−6209
load frequency control, decentralised, frequency of adjacent areas use 88−36756
load-frequency control in interconnected power systems, optimal observer design 86−61036
local energy systems in Tokushima Prefecture, Japan, analysis using LQG theory 85−43674
locomotives, energy optimum on board microcomputer control 86−13148
machine tools, microprocessor-controlled drives 85−10134
magnetic bearing control system, experimental study using gyroscopic measuring instrument *(Japanese)* 85−30014
matrix spectral factorisation algorithm 86−19881
microelectronic ultrasonic welding with sonic energy control *(German)* 87−53087
microprocessor-based self synchronization of permanent-magnet stepping motors 87−30702
MIMO feedback control system, optimal, motor-generator control appl. 88−17521
mine electric locomotives, traction load control *(Russian)* 85−49163
minimal time function of linear control processes, and level sets 87−23573
missile guidance based on Kalman filter estimation of target maneuver 85−25083
missile/aircraft variable speed interception game, approx. soln. and accuracy evaluation 88−42731
missiles, reduced-order pulse-motor ignition control logic [missile] 87−77813
mixed min-max optimization problem with restrictions 88−63186
motion drive algorithms for aircraft motion cue 88−16817
multi-area interconnected power system, optimal decentralised load-frequency control 86−12312
multi-class queueing networks with decentralised information, optimal flow control 87−55571
multiarea AC/DC power system, power modulation controller design using eigenvalue sensitivity 88−23394
multiarea large-scale power system decoupled control and interaction meas. *(Chinese)* 87−50675
multichannel meas. with partially preset parameters, optimisation *(Russian)* 85−42826
multilevel PWM convertors., optimum feedforward control criterion, general approach 85−27531
multimachine power system closed loop hierarchical optimal controller 88−30305
optimal control continued
multimachine power system model including transient saliency for linear optimal control application 87−35593
multimachine power system performance with local optimal controllers 87−42394
multimachine power systems, multivariable control, design optimisation 87−71609
multimachine power systems, optimal output local control 86−50813
multimotor systems, closed-loop stepping motor control appls. 85−21667
multipacket Aloha, decentralized control algorithm 88−34878
multiple-access trees, analytic properties 85−51519
multivariable generalized self-tuning decouplingcontroller and application 87−5094
near time-optimal control of step motors 87−30651
near time-optimal control of step motors with a velocity restriction 87−78711
near-optimal controllers design for synchronous machines 87−30525
network operational control, trapezium diagram construction and optimisation *(German)* 86−32719
network reactive power security control as linear constrained optimisation problem *(Chinese)* 87−71515
nuclear power reactor, neutron kinetics model, stochastic control 85−27256
nuclear reactor, optimal control system design by generalised spectral factorisation 88−55148
nuclear reactor system, distributed parameter, optimal feedback control 86−12635
O-type oscillators, resonant distributed-interaction, optimisation 86−21047
optimal control of arrivals at a blocking node 88−52670
optimal projection method for nonlin. systems of eqns. 86−57387
optimally controlled DC brushless motor using Inductosyn feedback, VTR appl. 85−3758
optimization of active and reactive power in power systems *(Czech)* 87−57472
overload control for switches of communication systems−a two-phase model for call request processing 87−34297
paper mill powerhouse optimisation and control economics 86−26456
parallel AC-DC system control by aggregation 87−30098
parallel multireservoir power system, long-term optimal operation 87−4221
paralysed limbs, joint angle control by using functional electrical stimulation with digital PID control system *(Japanese)* 87−35447
Pareto optimal flow control in a multiclass environment 88−35190
passive solar heated buildings, optimal control of auxiliary heating 86−19631
PCB electroplating, programmable hoists, optimization using linear programming 85−40354
permanent magnet castings, thermomag. treatment regimes optimisation 87−51662
permanent magnet hybrid stepping motor with step transductor, control and meas circuits 86−66108
permanent magnet stepper motors, time-optimal and precise control 85−32525
permanent magnet synchronous motor drives, efficiency optimisation using adaptive control 88−30688
phase distortion structure for beam propagating in randomly inhomogeneous nonlinear medium 87−68585
photovoltaic array inverter induction motor generator, optimal functions for transients calcs. 86−26135
photovoltaic array inverter induction motor pump set, transients, optimal functions 86−6621
photovoltaic array/inverter/induction motor/pump set control *(French)* 86−39967
photovoltaic generator-PWM invertor-induction motor maximum power point tracking 87−43018
photovoltaic pump powered by asynchronous machine, optimal control *(French)* 87−36122
photovoltaic pumping stations, adaptation and control technique for automatic optimal control *(Italian)* 88−30624
PID controller for electric furnace, simulation and design *(Japanese)* 88−31205
PMM linear synchronous vehicle, magnetic levitation system simulation, optimal design 88−37665
point absorber wave power device, optimal control strategy 86−65972
positional drives, relay control systems synthesis *(Russian)* 87−43507
power *(Spanish)* 86−18709
power electronic systems, optimal control using microprocessors *(Spanish)* 85−59628
power electronic systems feedback control, optimal pole assignment 86−7884
power flow and reactive compensation using Newton's method and penalty function *(Chinese)* 87−50677
power flow control by decoupled approach using Fletcher's quadratic programming 86−12308
power limit distribution among consumers, game-theoretic approach *(Russian)* 88−10740
power plant optimal control system synthesis methods *(Hungarian)* 87−50910
power plants, design of near optimum regulator 85−48639
power pool loads, unplanned, optimal control *(Russian)* 86−65625
power station and power system control requirements, optimum integration 86−50894
power station multimode steam distribution system, optimisation 86−51465
power station reservoirs, level control techniques 86−51188
power stations, control optimisation using mathematical models *(Dutch)* 87−57852
power system, optimal control, linear programming appl. *(Chinese)* 86−12249
power system adaptive stabiliser using linear quadratic control 86−12304
power system appl. of optimal control reduction algorithm 88−68781
power system blanket viability crisis, static optimal control *(Chinese)* 88−36789
power system computer control, adaptive optimal load flow 87−4234
power system control, generalised gradient method with second order information for optimal power flows 87−4312
power system control, optimal power flow in energy management systems 87−4311
power system control, optimal stabilisation using matrix sign function theory 86−18669
power system control, transients due to accident stabilisation *(Slovak)* 86−50828

optimal control continued
power system control in USSR, hierarchical model of real power optimisation *(Russian)* 87−15170
power system control using constrained tracking methods 86−12276
power system demand, uncontrolled, prediction using hot water control model 86−44908
power system in Switzerland, optimal remote control system and tariff structure *(German)* 86−18665
power system load flow control using optimal corrective rescheduling techniques 88−30282
power system load shedding algorithm, emergency control appl. 85−32100
power system optimal control, dynamic stability anal. of emergency turbine control 85−43522
power system optimal voltage control using a constant sensitivity matrix 87−42323
power system real-time optimal voltage control assessment 86−56333
power system sparse linear programming model and program *(Chinese)* 86−50862
power system stabilisation, eigenvalue control by operating point optimal setting 88−36753
power system stabilisation by control-effort and response-time minimisation 86−32682
power system stability enhancement anal. using static VAr compensators 86−50919
power system stability enhancement by control of static VAr compensators 87−30060
power system stabilization, optimal digital stabilizer 86−25473
power system stabilizer design using alternative pole assignment 88−23392
power system transient stability, suboptimal controller appl. 85−9431
power systems, controlling actions for high quality transients in fault situations *(Russian)* 87−30247
power systems, decentralised control, extended minimum error excitation, optimal *(Chinese)* 88−61809
power systems, interconnected, PF control based on deadbeat controller, multivariable structure system approach 87−71542
power systems, optimal active and reactive power control using computer aided analysis 85−26947
power systems, optimal control of automatic load-relief equipment 85−43520
power systems, optimal control voltage and reactive power 87−71580
power systems, optimal power flow by guiding search direction *(Chinese)* 87−21839
power systems, optimal power flow for operational planning and utilisation 87−4310
power systems, optimal reactive power control, linear approach *(Chinese)* 88−61803
power systems, optimal voltage and reactive power control *(Chinese)* 88−61807
power systems, security constrained real-time optimal load flow 88−10761
power systems and long transmission lines, reactive power compensation 85−48518
Power Systems Computation, conf., Helsinki, Finland (August 1984) 85−39412
power systems dynamic stability control using stabilising signals 86−39008
power systems governed by nonlinear dynamics, optimal feedback control 87−4292
power systems optimal control actions for cascade faults 88−75107
power systems stabilising signal derivation, multivariable freq.-domain/time-domain approaches 86−65650
power transmission line control structure optimization using hierarchic and functional attributes 87−21928
power-system control, real-time constraint determ. *(Russian)* 87−71534
process optimisation by low-cost digital instrument system 86−24344
production and energy management systems 87−30103
pulse voltage stabiliser, optimum high-speed control *(Russian)* 86−34529
pumped-storage plant optimal weekly operating schedule program *(Korean)* 86−12736
PWM AC drives, field orientation controlled, controller design 88−43431
PWM invertor control of AC drives, optimal switching patterns 86−7187
PWM invertor drives, microprocessor-controlled, suboptimal switching strategies 85−44224
PWM invertors, linear method of optimum harmonic control 86−6902
PWR control using hierarchical method, power distrib. soln. 88−17314
PWR load-following control system optimal design *(Korean)* 86−51290
PWR power plant, suboptimal control using approx. model following method 88−36935
PWR steam generators, optimal level controller 87−64253
queueing system admission, optimal control 85−60839
queueing system with single server, dynamic scheduling 87−44114
queues with server setup times 87−58778
radial distribution feeders, reactive power optimal voltage dependent continuous-time control 85−9493
radio links, centralised control of power resources 88−35363
radio transmitters, radiation power optimal control, errors in channel state estimation 86−17200
radioelectronic tracking systems, optimal control 88−41748
railways, optimum power feed voltage control for cost reduction *(Japanese)* 86−7230
random access system, optimisation by biased source blocking 86−4081
reaction turbines, optimal control 88−37086
reactive power compensation and optimum control in power systems, models *(Russian)* 87−42325
reactive power control, optimal, via loss minimization and voltage control 86−18702
rectifier motor overload conditions, armature current optimal control *(Russian)* 87−4668
residential heating strategies, power load management using optimal control 86−71129
residential solar photovoltaic/thermal collectors, for combined electric/thermal energy generation, control aspects 85−60087
residential space heating strategies, discrete algorithms, optimal control theory appl. 87−58466
reverse osmosis desalination plant optimal control system 86−40353
robotic perception system, optimal control *(French)* 88−46134
SCR time-optimal control synthesis 87−16859
SCR voltage controller for induction machines, optimised control and dynamic modelling 86−6756
secondary voltage-VAr control using pilot point information structure 85−53246

optimal control continued

100 MW photovoltaic power plant, solar cell array optimisation 85−53625
110 kV transformer stations, automation and remote control using microcomputer systems *(German)* 86−19331
500 MW steam turbine-generator set, modular computer control, starting optimisation *(Russian)* 86−33040
n-person noncooperative discounted vector valued dynamic game with a stopped set 87−65316
abstract mathematical programming, variational methods 88−43798
AC drives drive control and regulation, pulse width modulation principles *(Czech)* 86−26337
AC machine with concentrated winding for operation with static power convertor 85−9841
AC magnetic coils for switchgear and other applications, design and evaluation 85−2511
AC motor drives with PWM invertors, optimal control 86−7188
AC stabiliser, magnetic suspension-based, design parameters optimisation *(Russian)* 85−60371
AC-fed traction drive power convertors, line current and voltage response, online optimisation 85−5187
AC-input brushless DC motor without smoothingcapacitor 86−6797
accelerated life tests, design optimisation 85−16750
acoustical field calcs., Gaussian beam functions as base function set 88−54805
acousto-electro-optic signal processing optimisation in anisotropic media 88−51612
active filters for symmetric components, parameter optimisation *(Russian)* 85−49976
active rotary flux compressors for powering laser lamps, optimisation study 85−5254
active solar collectors, calcs. and appls. (book) 87−58343
active sonar system design optimisation 86−37951
adaptive A/D convertor, 2-bit, performance optimisation in CW interference 85−30902
adaptive antenna system control, using artificial intelligence, directive charact. optimisation *(Slovak)* 88−14513
adaptive array and algorithm *(Japanese)* 87−39497
adaptive filter optimisation, parameter choice for regularised method 87−19717
adaptive filtering, optimum convergence factor using gradient techniques 85−19469
adaptive filters, steepest descent and LMS algorithms 87−47812
adaptive filters with individual adaptation of parameters 85−17733
adaptive interframe scene coding, space-variant regular decomposition quadtrees 88−66734
adaptive interpolated time-delay estimation 85−51602
adaptive Kalman-Wiener filters 88−40972
adaptive microphone-array system for noise reduction 87−20761
adaptive multiplication-free transversal equalisers 85−25709
adaptive nulling array antennas, maximising jammer effectiveness 86−22829
adaptive optics, phase distortions, optimum estimation 85−36382
adaptive Pisarenko harmonic retrieval, rotational search methods 87−19654
adaptive stochastic optimisation technique *(Czech)* 88−11895
adaptive systems as optimal processors 86−14408
adaptive systems design, mean-square error minimisation, optimal filtering theory appl. 88−46057
adaptive transversal filters, gradient and recursive least squares algorithms *(French)* 88−21228
ADC, 1D distribution parameters based optimisation 88−72759
ADOPT−a CAD tool for analog circuit design 88−63449
ADOPT-a CAD system for analog circuit design 88−64706
aerial photography, exposure and processing optimisation 85−48457
aggregate subgradient method for nonsmooth andnonconvex minimization 86−34182
air conditioning indirect evaporative cooler system optimisation, cost function 87−43666
algebraic circulation problems, out of kilter method 85−22321
algorithm for cit. design and anal. program *(Chinese)* 87−36608
algorithm for optimisation of working conditions for cross-country gas conduit *(Russian)* 86−40632
all-pole filter design, optimal, based on discrete prolate spheroidal sequences 85−954
alloy, high temp., quantification of development pot., S-shape model forecasting capability 86−33996
ALOHA scheme with capture effect, performance eval. and optimisation 88−46343
ALSO: a system for chip floorplan design 88−71650
alternative call routing systems with partial overflow scheme, optimum design *(Japanese)* 85−30618
analog ICs, design centering using spherical surface random numbers 88−57712
analog pulse-modulated signals, optimum reception in the presence of non-Gaussian noise 85−36288
analogue data transmission, digital transmission code design using simulated annealing 88−52339
analogue IC yield optimisation, design centring using spherical surface random numbers algorithm *(Japanese)* 87−25461
analogue networks, fault location; optimisation approach 87−393
analogue processor networks, highly interconnected, optimization problems 86−52981
anisotropic layered absorbers on cylindrical structures 88−27375
anisotropic magnetic shielding 88−8495
annealing algorithm, convergence 86−19960
antenna array pattern synthesis, optimisation with controlled null placement 85−36124
antenna arrays, sidelobe level constraints, peak directivity optimisation 88−72683
antenna beam-channel formation in near field optimisation *(French)* 88−21008
antenna linear array pattern synthesis with null constraints, fast algorithm for optimal weight computation 85−13220
antenna linear arrays, performance indices, quadratic forms, effects of symm. props. 87−33498
antenna meas., optimisation criteria for information-meas. systems selection 88−72668

optimisation continued
antenna optimisation, enhancement of gradient method *(French)* 88−66178
antenna patterns synthesis, with shaped beam 85−24927
antenna phased array pattern optimisation with failed elements 88−40746
antenna structures, automated design optimisation for performance requirements 86−68847
antennas, crossed dipoles optimisation *(Polish)* 86−64097
antennas, electrostatically formed, optimisation *(Russian)* 85−51492
antennas, self-steering array system for optimal reception of coded waveforms 88−8631
antennas, transient radiation bounds 85−13239
approximate algorithm for solving system reliability optimization problems 87−44046
arbitrary cylindrical antenna array, directivity and S/N ratio optimisation 88−58971
arc furnace reactive power compensators, meas. system and predictive control 86−71151
area-delay optimization of programmable logic arrays 87−31859
area-time complexity of the unconstrained minimization problem 87−38334
ARMA spectral estimation of time series with missing observations 85−30260
ARQ protocols with copy transmission, delay performance 88−52645
array antenna adaptive optimization algorithms rel. to multivariate stochastic signal defect. 85−2698
array optimization for VLSI synthesis 87−67459
array optimizer for VLSI synthesis, GENIE 87−6916
arrhythmia classification decision rule optimisation based on a fixed parameter set 85−9206
arrivals control for two queues in series 85−60838
articulating motion, spectral distance measure, model matching *(Japanese)* 85−41880
associative variation principle for optimising processing of observation results *(Russian)* 87−23526
AST-500 nuclear heating station design matching to E. German district heating conditions *(German)* 88−75267
ASTRO, control logic synthesis and optimization algorithm with an overlap degree vector 88−25137
asymmetric *M*-travelling salesmen problem: aduality based branch-and-bound algorithm 86−46217
asymptotically optimum sample size for quickest detection 87−55074
asymptotically optimum signal discrimination algorithms for finite obs. sample, performance 86−23068
asynchronous communication, distributed optimal sampling 86−64395
asynchronous DS-SSMA system, multiple-tone jammer optimisation 88−28668
asynchronous electric drives design for industrial robots *(Russian)* 85−32737
asynchronous electric motors, frequency convertor output charact. optimisation for control *(Bulgarian)* 87−22531
ATE pre-acquisition optimisation 85−31349
attenuation and group delay approximation for a systemof digital IIR and FIR filters 87−937
audio tape recorder, digital, tape path mechanism development and head shape optimisation *(Japanese)* 85−58446
automated optimisation of IC cells for improved performance 86−35812
automated semiconductor design and model charactn., integrated system using SUXES-10 optimisation program 87−445
automatic decomposition approach to optimization of large microwave systems 88−25439
automatic feature selection for classification of nonGaussian data 87−62152
automatic placement algorithm for optimising thermal behaviour of hybrid circuits 88−1278
automatic washing machines, operating conditions optimisation *(Romanian)* 88−62797
automatic weather routeing, current methods overview 88−31126
automobile transmission system design optimisation of fuel economy and air-pollution *(German)* 88−69850
autonomous power supply network, conductor cross-sections and location coordinates *(Russian)* 85−21179
availability/cost optimisation methodology for power plant generators 88−10940
avionics integrity, power supply technology optimisation 88−5091
avionics systems man-machine interface optimisation, predictive methodology testing 88−61557
backplane ordering heuristics 87−59966
band-pass active filters, GIC-based, optimal transformation strategies 85−49989
band-pass filter functions, attenuation outside pass band optimisation 86−1201
bandlimited bounded signals, optimal reconstruction 86−16295
bandlimited signal extrapolation algorithm using pseudo inverse filtering and heuristic optimisation 88−66584
bandpass channels and efficient multi-scale representations 87−47849
bandwidth distance optimisation for full response constant envelope modulation systems 87−75683
bang-bang theorem for optimization overspaces of analytic functions 86−62074
BAT: optimization algorithms and overall design of abehavioral automatic tester 87−1103
Bayes classifier, multistage, separability problem 88−46268
Bayesian quickest detection of signal in discrete-time observations, optimum receiver 86−54508
beam waveguides, feed efficiency optimisation *(German)* 86−3659
beamformer with robustness capability, alternative formulation 86−3702
behavioural and logic simulation system using optimisation and compilation techniques 88−70725
bevelled p-n junctions, sensitivity anal./design optimisation for off-state semicond. devices 87−37937
BFGS method, numerical results *(French)* 86−7649
bilinear optimisation problem 87−10284
binary amplitude-shift keyed signals, optimality criterion 85−7794
binary DPSK, clock frequency fluctuation, optimum reception 85−25122
binary programs flowcharts for programmable logic devices 87−37143
binary steam turbine-gas turbine power plants, compressor pressure optimisation 85−4901
bipolar transistor, maximum oscill. freq. optimisation 87−38217
bipolar transistor oscillators, low-noise, anal. 88−18972
bipolar transistors, alternating current model, optimised extraction of model parameters *(Chinese)* 85−55777
bipolar VLSI, multilevel modelling and optimisation 86−35852

optimisation continued
boiler turbine system, optimal set-point scheduling 88−5518

conjugate gradient methods, convergence *(Italian)* 85−10640
connected speech recognition by phonemic semi-Markov chains for state occupancy modelling 87−47821
consecutive-2 systems of lines and cycles, failure probability 86−19870
constant delivery industrial products with initial failure components, optimum ageing time study 85−5860
constant envelope signals with prescribed effective bandwidth, optimum source statistics and max. information rate 86−3713
constant-factor optimal algorithm for computing the relative convex hull of a set of points in a polygon 87−48046
constrained optimisation, dual techniques 88−6377
constrained optimisation, null space 86−52362
constrained optimisation with convex functions, exact penalty function 88−18595
constraint based signal restoration and image reconstruction, optimal techniques 86−10525
constraint-based image restoration and reconstruction, optimal technique 87−19846
continuity of the minima for a family ofconstrained optimization problems 86−34200
continuous FFT schemes optimisation in high speed convolution algorithms 87−58897
continuous time discounted Markov decision model, optimal policy *(Chinese)* 86−19899
contour extraction, median filter characts. anal. 85−36442
contour-edge optimal detection, recursive algorithm *(French)* 88−21342
contradiction and compliance in vector optimization *(German)* 88−315
contrast enhancement layer optimisation in microlithography 88−26158
controlled random search in global optimisation 88−24649
controlled structure formation, optimization andevolution 85−54592
conventional penalty optimization methods 87−16511
convex function minimisation subgradient method with space dilation 85−54293
convex function minimization over complement of convex set 85−54310
convex inequalities, finite linearisation method 88−49735
convex network flow problems, distributed asynchronous relaxation methods 87−44157
convex optimisation, communication complexity 87−54830
convex variational inequalities, stochastic methods for num. soln. *(Russian)* 88−38104
convolution, optimised bit level systolic array 85−733
convolution reconstruction algorithms, L^2 optimal convolution functions 87−69288
convolution squared error versus observer performance, nucl. medicine image processing 88−21308
coreless low frequency induction furnaces, melting process power consumption optimisation *(German)* 85−39330
corner array, optimum design 86−22844
corner array antenna, radiation characts. design optimisation procedure 86−36787
corona discharge modelling for pulsed precipitator applications 86−29318
correlation properties of frequency-hopping systems, complete code partitioning 88−3045
COST 201, end-to-end blocking optimisation, improvement 86−4071
cost optimal discrete locations, calc. using OR methods *(German)* 88−18405
cost/benefit approach to establish optimum adequacy level for generating system planning 88−36808
costs optimisation in combined power and heat production, using microcomputers *(Czech)* 86−18682
covariance sequence parameters optimisation 86−22853
crossover filters for multiway loudspeaker system, numerical optimisation 86−38126
cryptographic knapsack scheme, general 85−2766
crystal filters, wide-band, lattice impedance transformation and optimisation 87−18451
Cuk converters, isolated RC snubber cct. optimum design 87−64727
current availability optimisation for DC traction systems using solid state relays 87−79129
current impulse commutated invertor with least trapped energy, anal. and optimisation 87−15852
current source invertor fed induction motor drive, optimum design 87−22328
current source invertors, optimal pulsewidth modulation for harmonics reduction 87−4797
current source invertors, PWM, off-line optimisation and subharmonic modulation, performance criteria 86−45563
current transformer investigation and design using simulation methods 88−49027
current transformer magnetic circuits, cross-sectional area optimisation calc. 87−72185
cusptron microwave oscillators, design optimisation 88−25829
custom IC, automated performance optimisation, book contrib. 86−35806
cutting-plane algorithm for optimal graph partitioning 88−298
CW high power ATT oscillators, modelling and realisation in 94 GHz window *(French)* 88−63557
cycloconvertor, forced commutated, optimised PWM method 87−64680
cylindrical linear induction machines, with small nonmagnetic gap, current load optimisation 87−30626

DAC design statistical modelling and simulation 87−24286
DAMA satellite communication systems, strategies for optimal capacity allocations 86−37807
data channels with induction loops, optimisation and receiver performance comparison *(German)* 88−52718
data communication network flow control decentralised algorithms 87−55425
data communication networks, routing optimisation and congestion control *(Polish)* 85−2912
data fusion, globally optimal computable distributed decision fusion 88−46117
data network, optimization method for multiplexer locations 85−57851
data networks, discrete capacity assignment methods 87−8043
data networks, distributed asynchronous optimal routing 86−49277
data networks extension with load sharing and concave-convex link transmission costs 86−64759
data transmission systems, optimisation of economic and technical charact. 86−16083
data-transmission system optimisation, composition method, technical and economic indices 87−27777
dBS coverage improvement using elliptical aperture and feed positions optimization 88−52279
DBS downlinks, design and engineering considerations 85−37170
DC bi-polar commutator motors optimal parameters anal. 86−39832
DC machine balancing connections, number and parameter optimisation based upon switching capacity *(Russian)* 88−23949
DC machine disk-winding forming, multicriterion optimisation 86−33418
DC motor, static convertor-fed, current regulation and speed control *(French)* 85−16044
DC motor drive, cyclical duty optimisation by energy criteria *(Russian)* 85−32724
DC motor min.-energy consumption control by considering armature inductance, math. model *(Chinese)* 88−62373
DC traction motors, air gap optimisation 87−9578
DC transmission lines, optimal design 85−43584
DC ultra high speed switch contacts, constructive optimisation *(Rumanian)* 87−51393
DC-DC convertor, inductor-transformer resonant, steady-state anal. and design optimisation 88−30919
decentral load-freq. control systems for distributed networks, design concept 87−35622
decentralised switching systems, controller communication and network optimisation aspects *(German)* 85−8263
decentralized dynamic routing as a Markov chain optimization problem 88−43765
decision point steering for long distance optical fibre links 88−47183
decision trees, optimal variable theorem 86−19897
decomposition method to solve problems onoptimization of physical devices on the basis of thesimilarity theory *(Russian)* 86−46426
decomposition theory based on a dominance relation and composite jobs 87−44170
deep-regional hyperthermia, optimal excitation of multiapplicator systems 88−74872
degeneracy in reduced gradient algorithms 85−33314
delay eval. problems, signal optimisation, noninformative refraction effect parameter presence 87−55092
DELIGHT.SPICE: an optimization-based system for the design of integrated circuits 88−49956
demodulation, linear multiuser detectors, asymptotic efficiency 87−55206
demodulation of phase modulated signal in non-Gaussian noise 88−21060
DEPLOMAT: a design expert for PLA optimization, maintenance and test 88−25163
desalination and power generation plants, combined, multilevel control and optimisation appl. 87−31107
descent methods for composite nondifferentiableoptimization problems 86−19949
design automation, conf., Albuquerque, NM, USA (June 1984) 85−20
design methodology for low-power full custom RISCmicroprocessors 87−425
design of electronic circuits for optimal production yield 85−61047
design optimisation, coupled algorithmic-heuristic approach 87−58812
design tool, nonlinear, appl. in power converter design *(Chinese)* 87−73308
deterministic signals with MFSK, optimum reception 85−25119
deterministic trees, organisation of soln. search *(Russian)* 85−28128
diagnostics, efficient algorithm for optimal design 85−5829
dielectric strength of nonuniform field gaps, field optimisation 85−40956
diesel/PV/battery and PV battery systems, optimisation using SOMES model 88−17958
diffraction electronics devices, optimisation using Pontryagin maximum principle 86−21015
digital audio methods for optimised reproduction *(German)* 86−38150
digital cellular subscriber channel from AT&T, field performance results 88−73845
digital CMOS circuits, fast design and optimization 87−65666
digital communication lines, receivers of multifrequency signals, noise immunity optimisation 87−55504
digital communication systems, optimum receiver of weak optical Gaussian signals 85−63672
digital correlation method, optimised appl. to deformation analysis 87−19672
digital filter optimisation using Gaussian adaptation and quadratic function minimisation 88−6979
digital filters, linear type, multiparameter anal. using multivariable feedback representation 85−34077
digital filters, multiplier coeffs., discrete optimisation 87−45113
digital filters, one-step time-domain design of optimal realisations *(Japanese)* 87−27417
digital filters with multiple feedback, optimisation of real-coeffs. solns. 86−67426
digital IC chip layout optimization using critical path weighting 85−685
digital image edge detection via optimal clustering 85−30464
digital microwave radio links using QAM, fading study and decision directed diversity combiners 85−25697
digital mobile radio 85−42490
optimisation continued
digital MOS VLSI, delay and power optimization 85−688

digital readout optimisation, use of greyness gradation *(Polish)* 86−44182
digital receiver parameters adaptive adjustment in data transmission systems 86−4253
digital screening with irrational angle values, optimal computing method 85−57434
digital signal processing systems, technical-economic optimisation 86−37047
digital signal restoration using fuzzy sets 87−7726
digital transmission systems, optimisation criteria and bounds *(German)* 85−30129
digital video tape recording, noise optimisation *(German)* 85−20366
digitally controlled thyristor convertors, self-adaptive controller optimisation 87−4789
digraph diameter minimising, LAN and data alignment analogies 87−62642
DIM-REL, performance biased placement program from custom IC layout 87−1637
diode microwave oscillators, frequency stability 88−63914
dipole array, transient radiation optimisation 85−24979
dipole-fed resonant reflector antenna with high efficiency, low cross polarisation and sidelobes 86−22783
direct broadcast satellite systems, elliptical antenna beam optimisation, interactive computer program use 85−36965
direct-radiator loudspeaker system, parameters estimation in LF range by nonlinear optimisation technique 87−3341
direct-radiator loudspeaker system parameters in low freq. range, nonlinear optimisation *(Japanese)* 85−58420
directional coupler, optimal design of MM wave integrated dielectric image lines 86−1352
directional couplers, radiophysical synthesis, optimality conditions 86−20802
Discrete chip artwork model with interactions 88−24935
discrete constrained iterative deconvolution algorithms with optimized rate of convergence 85−19463
discrete load frequency regulator, optimisation 86−6234
discrete optimisation of special structure, solution methods *(German)* 88−18607
discrete optimisation problems, algebraic struct. *(German)* 88−38100
discrete signal synthesis, optimum basis functions 88−3051
discrete signals, circular convolutions direct computation optimisation 88−21192
disruption and recovery tracking probability determ. 86−30854
distance functions, optimisation with constraints and its convergence *(Chinese)* 85−60873
distance to surface meas., sounding signals optimisation 85−24808
distorted optical signal detection, optimum algorithms for propagation in turbulent atmosphere 86−23061
distributed asynchronous deterministic and stochastic gradient optimisation algorithms 85−317
distributed asynchronous optimal routing in data networks 85−57653
distributed communication networks, large scale, dynamics anal. using network model 85−57575
distributed computer networks subject to reliability constraints, topology optimisation 85−19828
distributed database systems with distributed concurrency control, optimisation model 85−25567
distributed process control communication systems traffic optimisation, flying horizon method *(Bulgarian)* 87−19367
distributed query processing, optimal semi-join programs derivation 85−8218
distributed-gain amplifiers, phase characteristics for excitation of acousto-optic modulators 88−50037
distribution network, optimisation of prospective development, representation methods of functioning conditions *(Russian)* 85−32151
distribution network compensating apparatus optimisation *(Russian)* 86−61132
distribution network parameter optimisation by geometric programming with zero degrees of complexity *(Croatian)* 87−21914
distribution network reactive power compensation optimisation *(Russian)* 87−4364
distribution network transformers, choice of voltage regulator adjustments, optimisation method *(Polish)* 86−61540
distribution networks, development optimisation using design time interval selection *(Russian)* 87−78091
distribution networks, discrete-optimisation networks with fuzzy coeffs. 87−50774
distribution networks, layout planning, computer model *(German)* 85−32138
distribution networks, multi-step, mathematical models *(Russian)* 87−50778
distribution networks, optimal configuration, approximated model *(Croatian)* 88−36828
distribution networks, optimum power distribution between plants in industrial complex, numerical anal. *(Russian)* 85−4623
distribution networks, unilaterally supplied power line optimisation, theoretical *(Polish)* 85−32152
distribution networks reliability optimisation taking account of consumer operating conditions *(Russian)* 88−30355
distribution networks with end-load and varying load condition, reactive power control 85−43592
distribution sensor systems, optimal detection and performance 87−47682
distribution substation optimisation, computer aided load transfer cost assessment 86−19378
distribution substations placement in urban areas *(Croatian)* 85−39058
distribution subsystem losses reduction, choice of series capacitors 85−15589
distribution system, optimisation planning techniques appl., CADPAD system 86−44955
distribution system control, multicriterion optimisation by principal-component method *(Russian)* 86−56417
distribution system planning, novel long range optimisation model 86−18805
distribution system planning, optimal multistage model 87−30120
distribution system planning, optimisation model based on real/reactive power flows 85−27051

optimisation continued
distribution transformers, optimal sizing and replacement 86−61576
district heating from cogeneration plants, optimal temperature level, economic optimisation 87−15507

format synthesiser parameters, optimum coding 85−46718
four-wire voice-frequency cable symmetrisation *(Croatian)* 85−30846
frame optimization in an integrated voice/data link 86−30223
Framed ALOHA scheme with capture effect, performance eval. and optimisation *(Japanese)* 88−34863
free electron laser, interaction conditions, optimisation 88−34063
free electron laser magnetic undulator analysis and parameter optimisation *(Russian)* 86−54166
French power supply-demand system management 85−32103
frequency analysis of linear digital networks by ananalog network analysis program 87−915
frequency controlled asynchronous electric drive, optimal current regulator stabilisation 86−45741
frequency sequences synthesis under additional constraints 86−23069
frequency-encoded radiotelegraphy signal amplitude in variable-parameter channel with noise, optimum recursive estimation 85−13447
fuel resource scheduling, long term, network flow optimization 87−30292
furnace linings, optimal replacement period with external exposures 85−54100
fuzzy c-means algorithm, optimality of solutions and effective termination 87−19875
fuzzy ISODATA clustering algorithms, local optimality 86−48983
fuzzy programming, possibility and necessity approaches 88−18597
G/G/1 queue max. entropy anal. at equilibrium 88−31590
G/M/1/∞ discrete queueing system, optimal priority assignment with constraints 87−44113
gas laser frequency stability, optimisation *(Polish)* 85−35692
gas trunk pipelines parameter optimisation using base-point method 87−4483
gas turbine drives, energy efficiency improvement, secondary heat source optimisation *(Hungarian)* 85−32362
gas turbine-steam turbine combined cycle, H fuelled, cycle optimisation method 88−37067
gas-discharge light-pulse generators, optimising parameters, use as base of flash photometer 85−5497
gate assignment in 1 D array, time complexity 88−12292
gate matrix based cell assembler 88−26534
gate matrix layout, representation of nets 88−517
gate matrix layout algorithms with controllable upper bound 87−65740
Gaussian bandpass filter for differentially encode GMSK, optimum bandwidth anal. 85−41837
Gaussian image detector boundary location optimisation *(French)* 88−21344
general model for classical group testing problem 85−22270
generalised spline signal interpolation and smoothing, time and frequency domains optimisation 86−16478
generalised tamed FM BER performance, bandwidth constraint, optimisation 87−47471
generating equipment, month scheduling of routine maintenance *(Russian)* 85−32075
generation expansion long-term planning, optimisation 86−12363
optimisation continued
genetic algorithm for economic optimisation of manufacturing system 88−70137
GEODE system for energy management and equipment optimisation telecommunication power plants 85−64859
geodesy, information theory and optimal estimation 88−5114
geometrical, approx. of set of points by points of grid 87−65386
GEOTEC/OTEC power plants, thermodynamic and economic optimisation 85−60075
geothermal power station parameter optimisation method 88−5575
global, general branch-and-branch approach 87−16510
global, internal modelling of objective functions 87−16513
global convergence of the partitioned BEGS algorithm for convex partially separable optimization 87−16519
global flow analysis in automatic logic design 86−27223
global minimization of indefinite quadratic problems 88−18593
global optimisation, sequential stopping rules for multistart algorithm 87−72966
global optimisation for electronic cct. design, comments and reply 88−6593
global optimisation method for electronic cct. design 85−33588
global optimisation using adaptative random search 85−5923
global optimisation with Lipschitzian structure, branch and bound algorithms 88−43811
good codes design using simulated annealing algorithm 87−39639
gradient optimisation algorithms, distributed asynchronous deterministic and stochastic 87−194
gradient-based adaptive algorithms, optimality in convergence factor choice 87−33679
graph optimal isomorphism algorithm 85−28134
graphs, optimisation problem 86−46183
graphs expansion and renewal process, optimisation *(Polish)* 88−31630
greedoids, relations between subclasses 86−34185
greedy algorithms for elementary graph-theoretic problems, average case anal. 88−43797
Greek energy system, EFOM-12C/GRESOM model for evaluation of alternative scenarios 85−9571
Greek telephone network, traffic optimisation 86−30274
Greek thermal power plants optimisation, boiler dynamic behaviour 88−69139
GRIM, fast simulated annealing program for standard cell placement in VLSI layout 87−60596
ground two-coordinate radar, technical and economic indicator optimisation 86−17476
group testing procedure and optimum group size 85−22269
GTO thyristors, loss optimisation using carrier lifetime control 88−39433
Gummel-Poon model parameter optimization for a power transistor 88−44747
Gunn diode autodynes, operating mode optimisation 85−6537
gyroklystron efficiency, optimisation 86−47230
Hamilton-Jacobi-Bellman eqn. for synthesis problem of hyperbolic system *(Polish)* 88−34366
Hammerstein models, optimisation process *(Rumanian)* 85−302
handwritten Arabic numerals recognition, digital learning network optimisation 87−55315
hard-limiting digital detectors, weak bandpass signals in nonGaussian noise, quantisation 86−16359
heart, gated NMR struct. imaging, optimisation by electronic axial rot. 85−38094
heat exchangers, coolant intermediate loop in nuclear heat and power station, parameter optimisation 88−5442
heat pump system, thermoeconomic optimisation 87−16182
heat pump/heat storage systems with time-of-day energy price incentive; optimal control appl. 88−62763
Helmholtz coils for generating mag. fields, optimisation using computational method 87−26629
heterodyne detection transmission expt. with optimum system configuration for solitary LD 88−47144
heuristic algorithm for planar assignment problem, anal. 87−72956
HF ccts., CAD aspects, anal., synthesis and optimisation software *(German)* 88−31922
HF curtain antennas, new design for high performance 88−66195
HF digital radio systems at high latitude, optimisation *(French)* 86−59776
HF invertor transistor assembly boards, loss minimisation by optimising parallel-connected elements *(Russian)* 88−12215
hierarchical optimization of large-scale energyresources systems 86−6468
hierarchical power systems, load forecasting optimization problems *(Russian)* 87−9136
high level synthesis optimisation 87−423
high power invertors, optimum PWM waveform synthesis filtering approach 86−7948
high power laser installations, optical layout study 87−54213
high recurrence frequency radar transmissions, form factor optimisation *(French)* 87−13764
high-current plasma amplifier, optimization 85−17773
high-density digital recording channel, properties and optimisation *(German)* 86−21978
high-frequency bipolar transistors, computer-aided linear modelling, optimisation 85−12256
high-order RC active networks, sensitivity optimisation 85−23015
high-speed computing, conference, Los Angeles, California (January 1988) 88−49344
histogram equalization for optimal intensity range utilization 88−34739
holographic interferometer, optimisation for displacement vector components determ. from fringe order 85−29952
holographic interferometer optimisation for small displacement vector meas. errors 85−56878
homogeneous field magnet, optimal design, boundary element method and optimisation 87−68730
hot rolling mill rollers DC drive speed conditions optimisation *(Russian)* 85−60585
household load data anal., and estimation methods 87−9140
householder transformations optimisation, linear least squares 88−6408
HV asynchronous motors protection, thermal model setting optimisation *(Czech)* 87−58068
HV axisymmetrical electrode contour optimisation 88−52056
HV fuse link contactor combinations, optimisation 87−72328
HV insulating system design by optimising electrode and insulator contours 87−21962
HV insulator electric field optimisation 87−4426
HV insulators, field stress optimisation 87−46263

optimisation continued
HV insulators, field stress optimisation 86−45006
HV network voltage and power factor optimisation *(German)* 86−32720
HV surge voltage testing ccts., optimisation procedure *(Slovenian)* 88−69076
HVDC thyristor convertor valve design, characterisation, eval. and modelling 86−9122
HVDC transmission networks, optimum expansion planning of HVDC transmission networks 86−12388
hybrid ccts., automated layout using thermodynamic optimisation *(French)* 87−66796
hybrid elec. car optimisation and control 88−11446
hybrid solar forced-convection water heating system, operational and economic optimisation 88−11490
hybrid wind-solar electrical supply systems, simulation and optimisation w.r.t. energy pay back time 88−62264
hydraulic turbine rotation frequency regulators, adjustment optimisation *(Russian)* 86−33188
hydraulic turbogenerator units, load distribution optimisation using computerised algorithm *(Russian)* 88−17406
hydro-plant performance models in economic operation studies, optimal parameter estimation 87−30420
hydro-thermal interconnected power system, optimal power scheduling using iterative methods 88−42764
hydro-thermal power systems, optimal load flow computational using Newton's method 87−9057
hydroelectric generation system, optimal operational planning 88−48519
hydroelectric power plant online scheduling and control program 87−35842
hydroelectric power plants as domestic energy generators, modernisation and optimisation *(German)* 87−30417
hydroelectric power schemes, small, optimum capacity and components, selection guidelines 86−65961
hydroelectric power stations, optimal sequencing model 87−9412
hydroelectric power system operation 85−4998
hydroelectric power system power production optimisation 88−23328
hydroelectric power systems with variable head, production optimisation 88−75511
hydroelectric reservoirs modelling and optimisation for long term regulation 87−4620
hydroelectric system expansion planning model and optimisation program package 87−9415
hydropower generation maximisation, truncated Newton approach 86−39606
hydropower system expansion optimisation 86−39605
hydropower systems operation optimisation, quadratic models 88−48800
hydrothermal interconnected system, economic operation *(Chinese)* 88−30310
hydrothermal power generation reservoir optimisation, aggregation-decomposition approach 85−59860
hydrothermal power system scheduling using progressive optimality algorithm 86−45229
hydrothermal power systems optimal scheduling 85−38464
hypergraph vertex set, optimal partitioning 87−5587
hyperthermia, optimisation of simulated 2D temp. distribs. induced by multiple EM applicators 86−60808
IC, optimum placement based on a method of limitedcuts 86−67574
IC CAD, interactive optimisation based tool for nominal design 86−35829
IC CAD techniques, simulation, verification and optimisation *(Polish)* 85−35056
IC cell optimisation subject to parametric yield constraint 85−18426
IC computer-aided stochastic optimisational user-reprogrammable interactive interface system 86−2316
IC design, multicriteria optimisation techniques appl. *(Czech)* 85−28492
IC fabrication process optimisation 85−45816
IC geometry optimisation, parasitic thermal feedback elimination *(Polish)* 85−1633
IC layout and yield, relationship, defect density fn. and chip size optimisation 88−64656
IC models, gradient methods for parameter identification *(Russian)* 87−65636
IC power/ground nets, optimum design subject to reliability constraints 88−64659
IC routeing by simulated annealing 88−71671
IC selection tests, tolerance assignment 85−40798
IC statistical analysis and modelling 87−46107
IC yield optimisation with deterministic process parameters, random perturbation method 85−18427
IC yield-optimizing design rules 85−50621
ICs, CAD and optimisation techniques *(Polish)* 85−503
II-VI heterojunctions, performance optimisation 88−19700
IIR filter design with arbitrary amplitude and phase requirements 87−45112
IIR filters, zero phase design 87−59774
IIR filters designed as tapped cascaded interconnection of identical allpass subfilters 87−66404
IIR noncausal filters, freq. domain design using multiple criterion optimisation 85−45177
illumination units for railways, optimisation *(Slovak)* 86−33817
image anal., relaxation matching techniques, comparison 86−10474
image coding, gain-shape vector quantiser 87−19922
image digitisation 87−47897
image dissector, one-electron sensitivity optimisation 86−1644
image enhancement and thresholding by optimization of fuzzy compactness 88−34768
image gathering and processing systems, combined optimisation 86−10533
image processing, Gaussian operators optimal design in small neighbourhoods 88−3175
image processing by max. entropy procedure, frequency domain bounds and prior knowledge 87−69389
image processing by simulated annealing 86−23111
image reconstruction from projections, use of optimization techniques 88−3135
image resolution improvement using subpixel motion 87−47946
image restoration, constrained optimisation using nonlinear programming 86−10526
image restoration techniques 88−28012
image segmentation, knowledge based approach 88−41111
image segmentation, optimal multiple threshold scheme 85−7931
image sequence motion field statistical filtering 88−21338
optimisation continued
image/speech compression, vector quantisation of optimally grouped sets 88−45944
imaging connector interconnect system optimisation, aerospace appls. 86−69791
imaging systems, optimal quantisation of noisy signals 85−9143
IMPATT diode MM-wave amplifiers and oscillators, operating cct. efficiency evaluation and optimisation 85−17862
implantable coated wire glucose sensor, optimisation expts. 86−38737
importance sampling simulations, optimisation, radar clutter appl. 88−27908
importance sampling technique for efficient simulation of digital communication system 88−34531
improved statistical design centring for electrical networks 85−501
in-circuit testing process, optimisation 88−57088
inclusion functions and global optimization 86−19951
incremental loss rate calc. from complex nodal admittance eqns. *(Russian)* 86−56407
independent invertor parameter vectorial optimisation using perfect point technique *(Russian)* 88−49043
independent power supply systems, mathematical model for electric machine optimisation 85−43558
independent power system using DC motor, optimisation calc. 88−30239
induction machine, voltage fed with feedback control, torque oscillation optimisation 86−6758
induction motor, multi-speed, commutable winding structure optimisation *(Polish)* 85−9897
induction motor, voltage controlled, black-box modelling in control system design 88−17601
induction motor design optimisation using orthogonal arrays 88−62339
induction motor drives, microcomputer-based optimal control for reducing parametric variations and speed measurement errors 85−27707
induction motors, single-winding, dual speed, computerised design for operating cost minimisation 88−23915
induction motors, speed control, optimal gain design 88−31087
induction motors, split phase, single phase, starting winding design optimisation 87−15748
induction motors, technology of manufacture model *(Russian)* 88−37217
inductively coupled line systems, interference computation and Monte Carlo optimisation for compatibility guarantee 86−15939
inductors, air-cored, single layer, for power electronic circuits, optimum design 86−8533
industrial cogeneration of heat and power, optimisation using profitability criteria 86−51427
industrial instrumentation and control advancements, conf., Houston, USA (Oct. 1984) 86−48
industrial power plant turbine design *(German)* 86−6576
industrial power supplies operation optimisation *(Russian)* 85−26985
industrial power system optimisation, CAD *(German)* 86−12348
industrial system development model, goal-oriented, power industry appl. 86−39080
inequality relation between fuzzy numbers and its usein fuzzy optimization 85−49461
inertial navigation system synthesis, gravity-induced error sensitivity approach 88−48273
information networks topological optimisation accelerated sorting method 87−19979
information system optimisation w.r.t. economics, correlation equations derivation 85−44462
information systems optimal synthesis 88−2909
information theory, realisable adaptation algorithms, convergence and optimality 86−48725
inhomogeneous grounded fin lines, transmission characts. anal. and taper design optimisation 85−34127
input optimisation for mathematical models 85−33308
insertion devices, variational theory 87−26641
inspection, repeated meas. to reduce meas. error effect 88−43718
inspection frequencies, cost model 87−44016
inspection policies, optimum and nearly optimum *(Japanese)* 87−72879
instrument optimisation and reliability 85−3828
instruments accuracy allocation, optimum method *(Chinese)* 85−63920
integer partition, quadratic forms 85−54312
integrated circuit/packet-switched computer newtwork, topological optimisation 85−57811
integrated optical switching networks, optimisation of X-switches 86−42360
integrated packet networks with voice and data, optimisation 86−64505
integrated supportability analysis 88−266
INTELSAT-VI SS/TDMA switching system, optimal traffic assignment 87−56057
interactive circuit design technique using optimization 88−12144
interactive decision making system, optimisation problem with indeterminate gradient of objective function 87−23461
interactive distribution network planning using graphic data-processing system 88−17131
interactive optimization method for the design ofintegrated circuits *(German)* 86−26972
interactive powerhouse operation planning system, optimisation methods appl. 86−6300
interconnected multi-area power system, generating unit commitment for optimal economic dispatch 87−42372
interconnected power systems, decentralised optimum load frequency control 85−43552
interconnected power systems, economic optimisation, using mathematical models *(Czech)* 86−44870
interconnected power systems, optimal energy transactions, linear programming and Monte Carlo methods 86−18639
interconnected power systems, with unplanned operational states *(Czech)* 86−50825
interconnected radio tracking systems, loss function use in set optimisation 86−17425
interface transducer logic, automatic synthesis and optimisation 88−25143
interference immunity of a digital demodulator of complex signals 88−18999
interurban automatic telephone network, optimisation *(Polish)* 85−25322
inverse magnetic field problem, magnetised body geometry and magnetisation optimisation 86−6081
invertor, parameters optimisation using field emission cathode 85−50151
invertor circuit parameter optimisation, algorithm and software develop. programme *(Russian)* 88−12214
invertor design, PWM optimisation using microcomputer 86−6895

optimisation continued
invertor-convertor transformers in impulse voltage stabiliser, modelling and optimisation *(Bulgarian)* 86−41368
invertors with two level control and constant frequency, LC filter optimisation 86−57654

load distribution optimisation from dispatch centre using power and voltage measurement *(Croatian)* 85−9419
load flow, optimal study using generalised reduced gradient approach 86−38999
load flow, variable head hydro-thermal generation scheduling 87−30018
load flow calc. using optimal pivot strategies 87−50658
load management equipment reliability, load control optimisation 86−18692
load management in AEW supply area, energy consumption optimisation by remote computer control *(German)* 87−64037
load shedding, optimisation with load voltage and frequency charact. considerations 85−59592
local optimization of colorings of graphs 88−6370
local telephone network, digital switching evolution 85−14054
local telephone networks, digital switching facilities, optimal provisioning model 85−57833
local telephone networks, optimal exchange renewal strategies 86−37325
local/global convergence of reduced quasi-Newton method 87−10289
localization of search in quasi-Monte Carlo methods forglobal optimization 86−46227
logic structure of safety monitoring systems *(Japanese)* 85−33222
logic synthesis and optimization benchmarks 87−5598
logic synthesis systems, overview 86−975
logic synthesis using simulated annealing 87−44796
long distance transmission networks, reliability, system variables optimisation and economic assessment 86−50957
long-haul distributed point-to-point computer networks, optimal design considerations 86−30129
long-term develop. of planned power systems, math. optimisation models *(Russian)* 88−10816
long-term load limitations, loss minimisation by optimisation method *(Hungarian)* 87−57524
loudspeaker crossover filters with digital signal processor, simulation 88−38631
loudspeaker crossover networks, optimised design using personal computer 86−38127
loudspeaker systems with optimized wide-listening-area imaging 88−22357
low power motors, mathematical model for optimal construction 85−44025
low-pass filter parameters, w.r.t. data aging 87−45003
low-pass harmonic filters, optimised design for satellite appls. 85−17631
low-power transformers, rationalised sorting and directed search algorithms *(Russian)* 88−37271
LPC speech coding, multipulse, perceptual weightings and optimal pulse positioning 86−10307
LSI, waveform relaxation simulation, dynamic sensitivity anal. *(German)* 85−23833
LSI DSP, performance optimisation 85−22945
LSI layout CAD, minimum width packing of rectilinear blocks 86−21711
LV distrib. network optimisation using urbanistic parameters *(Croatian)* 88−23447
LWR safety containment Shield Building Annulus ventilation system design and optimisation *(Italian)* 86−33003
LWRs, computer aided transients simulation for emergency response optimisation 85−59972
m-machine flow-shop scheduling problem with separate setup times, solvable cases 86−26586
m-phase dependent invertors, with arbitrary control law, power charact. anal. *(Russian)* 85−60291
Macro Block Compiler with logic optimization 88−38490
macromodeling and optimization of digital MOS VLSI circuits 87−25554
magnetic deflection system optimisation by method of orthogonal design 87−39307
magnetic poles with toothed active surfaces for drives, centrifuges and flywheels *(Russian)* 85−21542
magnetic resonance imaging, computer model to optimize image contrast 87−29714
magnetic separator with resistive or superconducting winding, design optimisation and magnetic forces *(Slovak)* 85−62738
magnetostatics, optimisation methods, comparative anal. 88−52084
magnetrons, cylindrical hydrodynamic multifrequency model, optimisation techniques *(Russian)* 86−41481
magnets with iron, optimisation using computer program 88−52150
mammography, optimised systems, doses delivered rel. to technological innovations 85−4383
maneuvering target tracking in clutter, algorithm 85−14332
manufacture of housings for circuit breakers, starters and relays, size optimisation *(Russian)* 85−5784
MAP estimate for entropy maximization, autoregressive model 85−49487
matched FIR Nyquist filters with stop-band equiripple, optimum design *(Japanese)* 87−37470
matched-filter receiver optimisation, for frequency hopping code acquisition in jamming 86−30579
matrix calculations in optimization algorithms 85−54369
Max's algorithm for optimum quantisation 85−57229
max-cut problem, DAC appls. 86−46207

optimisation continued
maximal points with respect to cone dominance in Banach spaces and their existence 85−304
maximisation of sum of integers when their sum of squares is fixed 88−43812
maximum energy window with constrained spectral values 87−2527
maximum network flow, $O(n^2n^{1/2})$ distributed algorithm 88−6374
Maxwell-Wien and Schering bridges with constant sinusoidal voltage, sensitivity *(German)* 88−50002
measurement channels structure optimisation, using resistive transducers 88−4275
measurement sensor location, optimal, random optimisation method appl. *(Japanese)* 88−9970
measurement transformers, optimal thickness calc. of buffer coatings 86−41367
mechanism and machine theory, world congress, Sevilla, Spain (Sept. 1987) 88−37834
Meoplan laser transmitter of illuminated plane , optical design *(Czech)* 88−72362
MESFET amplifiers, analysis and multiharmonic optimization *(Spanish)* 88−56906
MESFET amplitude modulators, dual gate, optimum design 85−11115
MESFET nonlinear oscillator synthesis for optimum output power operation 88−44379
message switched communications optimal flow problems with path length constraints 86−59389
meteorological, laser radar image enhancement by piecewise linear grey-scale transformations 86−25436
MHD generator duct *(Chinese)* 85−27665
MIC broadband multistage amplifier synthesis 86−27634
microdosimetric counters for radiation protection, wall thickness optimisation, expt. basis 86−38850
microdosimetric dose equiv. meters, design optimisation 85−26819
microphone arrays, adaptive optimisation under nonlinear constraint 87−20778
microstrip coupled lines for microwave device design, optimisation method to determ. characts. 88−56849
microstrip couplers, design approach for CAD optimisation packages 87−52809
microstrip ring-star 5-ports, optimised design for broadband 6-port meas. appls. 85−17800
microwave CAD and modelling, cct. optimisation techniques, state of the art review 88−31930
microwave cct. design for 88−32408
microwave device modelling and large cct. design, automatic decomposition technique 87−73664
microwave device modelling technique using efficient l_1 optimisation 87−17333
microwave devices, modelling using efficient l, optimisation 87−6069
microwave energy converters, parameters optimisation 85−33712
microwave FET amplifiers, anal. and harmonic optimisation using computer aided approach 88−1003
microwave heating for construction materials production, computer simulation and measurements 85−39331
microwave holography, satellite Earth station antenna optimisation 88−34425
microwave MESFET freq. multipliers with and without feedback, optimal CAD 88−71133
microwave MESFET nonlinear cct. design using optimising harmonic balance method 88−44376
microwave nonlinear active devices, mathematical formulation for harmonic optimisation, cct. synthesis appl. 88−56979
microwave repeater stations, power demand reduction, strategic pursuing by Telettra *(Italian)* 85−20050
microwave semiconductor amplifier, phase and amplitude-frequency characteris. optimisation 87−65870
microwave transistor oscillators, large signal transient optimization 88−56905
military aircraft, four-dimensional trajectory optimisation 87−77702
miniature SSB microwave modulators, design theory 88−25447
minimum spillage sequencing problem 88−46964
minimum variance synthetic discriminant functions, constraint phase optimisation 88−34736
mirror antenna dual-band lightweight mirror design 85−41701
mirror antennas geometry, optimisation method 85−62893
MIS: a multiple-level logic optimization system 88−12312
missile synthesis with trajectory and propulsion system optimisation 88−68600
mission and trajectory planner, automated, for piloted and autonomous vehicles 88−48417
MLB drill position optimisation process control using real-time X-ray imaging 88−44468
MLB optimising of drill hole positions 88−44467
MMIC affordability through worst-case design optimization 88−44357
mobile radio, optimum frequency assignment strategies 87−3078
mobile radio telephone system, frequency allocation 88−60040
mobile robots, adaptive navigation algorithm 88−3246
modified Lagrangians in the constrained problem offinding a saddle point 85−54381
module placement for intermodule communication distance minimisation, problem simplification 88−63433
monocular image sequence, feature points trajectories location 87−39893
monopulse arrays with sum and difference sidelobes constraints, performance indices optimisation 86−68929
monopulse linear array, optimum excitation using Zolotarev polynomials 85−57152
MOS circuits, models and algorithms for transistor sizing 85−40940
MOS device, mag. field sensitive computer anal. and design optimisation 88−33230
MOS models, optimisation of drain current and small signal conductance in analogue cct. simulation 87−67196
MOSFET, hot electron energy anal. using high-speed Monte Carlo simulation 88−7617
MOSFET, lightly-doped drain, submicron channel depth, computer simulated optimization 88−44767
MOSFET, models, polynomial spline MOSFET model approximation, tableau formulation 86−67889
MOSFET, n^+--n^- double-diffused drain, optimum design to reduce hot carrier emission 85−40741
optimisation continued
MOSFET fabrication processes eval. using 2D process/device simulation 87−45984
MOSFET model parameter extraction using simplex direct search optimisation method 86−21566
MOSFET models, parameter extraction and optimisation algorithms, IC design appl. 88−19956
MOSFET parameter optimization for accurate outputconductance modeling 86−2208
motion/structure estimation from monocular perspective images, two-step approach 88−28131
motor design optimisation aided by modelling *(French)* 87−64536
motorway lighting system, maintenance optimisation model using computerised simulation 85−10199
moving target indicator filtering, optimum vel. response functions 85−3491
moving target selection radar systems, optimisation for non-Gaussian signals 85−14342
multi contoured beam antennas for Ku-band frequency re-use satellites 88−34467
multi stage Monte Carlo optimization applied to circuit design 87−73233
multi-cavity microwave communication filters, sensitivity anal. and optimisation 86−62675
multi-criterion optimization in locating elements in regular structures in CAD *(Russian)* 86−46219
multi-level logic circuit optimization, expert system 88−44021
multi-level logic minimization using implicit don't cares 87−44794
multi-state reactive power optimization 88−5246
multiaccess channel, maximisation of one-step throughput 87−75975
multibeam packet satellite systems with freq. reuse, optimal TDMA assignments, anal. 87−28498
multichannel approach to power system planning, multicriterial hierarchical problems solution *(Czech)* 87−21888
multichannel impulse current sources, critical regimes *(Bulgarian)* 86−40902
multichannel transmission systems, line distortion correcting devices, characts. optimisation 86−36873
multicommodity communications network, optimal estimate of linear problem of its synthesis 85−62948
multicoupled cavity filters, exact sensitivity anal. and optimisation 86−27444
multicriteria, stability of linear problem *(Russian)* 87−31434
multicriterion image reconstruction and implementation 87−48040
multidimensional decimation and interpolation filters, joint optimisation, time-varying imagery appl. 87−24359
multidimensional digital filters, approximation and implementation 88−63816
multidimensional digital filters, single-input single-output, optimal realisation 87−59775
multidimensional matched filter, global optimisation, multipaths separation 87−12971
multidimensional normal populations, recognition system optimisation 87−61546
multidimensional spherically symmetric IIR digital filters with sum of powers-of-two coeff. 87−66424
multiechelon production inventory systems, integer multiple lot sizes, efficiency 85−54121
multiextremal optimisation with monotonically unimodal constraints 85−54314
multifunction radar design for naval applications, modular approach 88−15616
multihop packet radio networks, routing table update activity anal. 87−48914
multilayer cable shield designs, optimisation advances 86−49431
multilayered EM wave absorbers, optimal design 88−14361
multimachine power system, controller parameters optimisation 85−64850
multimachine power system with phase shifter, stabilizing control synthesis 86−32679
multimachine power systems, multivariable control, design optimisation 87−71609
multimachine power systems, stabiliser design using optimal multivariable structure methods 88−68750
multimachine power systems, stabiliser settings determ. 87−4207
multimode electric drives, digital control *(Russian)* 85−65476
multiobjective interactive programming on a microcomputer, Greek electricity power system 88−5308
multiobjective optimisation problems, generalised hyperplane methods *(Japanese)* 88−56166
multiobjective optimisation problems, generalised scalarisation methods, hyperplane methods *(Japanese)* 88−49725
multiobjective optimisation problems, trade-off rates in hyperplane method *(Japanese)* 88−49726
multiple coil winding configs., design optimisation 88−25595
multiple criterion optimisation of IIR and FIR filters 85−19429
multiple moving sources location, use of signal subspace algorithms 85−52411
multiple objectives and imprecise utility structure, alternative ranking 85−44632
multiple objectives optimization by interactively narrowing bounds on the most preferred solution 85−44631
multiple optima in local search 87−65348
multiple sensor array having spatially correlated noise, optimal delay estimation 86−29847
multiplexed transmission networks optimisation under resilience constraints 86−64506
multipoint satellite videoconferencing, connection techniques optimisation 86−24179
multipole linear induction motor with different induction windings, computer anal. and optimisation *(Russian)* 87−42926
multiprocessor-based hardware simulation machines, circuit partitioning 86−27018
multireservoir hydroelec. power system optimal monthly operating policy determ. 86−61209
multireservoir power system, optimal monthly operation 88−62232
multireservoir power system optimal long-term operation for critical water condition 87−57950
multirotor wind energy system with large diameter tower, aerodynamic optimisation 88−17484
multisection transformer between rectangular waveguides of adjacent freq. bands, CAD and optimisation 85−11513
multiserver queue, optimisation problem 86−62079

optimisation continued
multispectral data clustering using sequential simplex optimisation technique 85−30455
multistage Bayes classifier decision rules 88−59166
multistage broadband low-noise amplifier, distrib. cct. design techniques 85−28393
multistage Monte Carlo optimisation for solving nonlinear system of eqns., capacitance example 85−22611
multivariable systems, identification of multivariable systems by transients 87−35914
multivariate non-Gaussian noise, locally optimal detection 85−30259
multivibrators, circuit-design optimisation 88−19005
multiway uniform combline directional couplers for microwave frequencies, design using computer optimisation methods 88−56856
MV cables in parallel operation, optimisation methods *(German)* 88−68943
MV oil and dry transformers, choice optimisation 88−24014
myoelectric filter, adaptive, for prosthetic arms control, optimisation 85−43442
myoelectric signal vs. force optimisation in functional neuromuscular stimulation 88−48202
n-dimensional global optimisation, extended univariate algorithms 86−34179
narrow band nonuniform transmission line design: a newapproach 86−3611
narrow-band antireflection coatings on glass substrate *(Czech)* 86−58810
Nash bargaining solution computation 88−42803
natural texture synthesis, parallel method 85−30376
natural-draught cooling towers, air-intake height optimisation *(Czech)* 86−33063
net synthesis, problem class 86−57340
NETCON, integrated tool for planning and configuration of packet switching networks 87−48445
network, topology selection for optimal terminal reliability 86−52594
network consisting only of diodes, discrete optimisation problems and transients calc. *(Russian)* 87−36949
network constraints, matrix of bottlenecks 87−59061
network decomposition for the optimization ofconnection structures 86−49057
network flow programming and its appl. to power system economic dispatching *(Chinese)* 88−54879
network functions, elements and sensitivity anal., derivatives of denominator and numerator obtainment 87−10544
network minimal cuts search, polynomial equivalence 88−40770
network planning, software simulated optimisation 86−40447
network reliability analysis using 2-connected digraph reductions 85−46670
network reliability modelling and calculations, survey 87−40432
network route optimisation, network guidance, and system minimisation *(German)* 87−27686
network synthesis, space rotation methods for frequency-time characts. 85−17056
network terminal reliability optimisation 85−19885
networks, centralised, design with reliability and availability constraints 88−46542
networks with relaying, maximum flow problem 85−49454
NIC compensated inverting amplifier, optimum design and sensitivity study 85−17178
nitinol heat engine power plant system installation andcost optimization 85−53549
NMOS summing networks using neural optimisation concept 88−51027
NMR chemical-shift imaging 86−18301
noise optimization of switched-capacitor biquads 87−52721
noise perturbed function values estimating modified Bernstein technique 86−34178
noisy image edge detection using local threshold 85−30280
noisy signals optimal quantisation 87−47790
nominator-selector two-stage signal detection scheme 87−55073
non-convex quadratic optimisation, information source separation procedure *(German)* 85−60875
non-Gaussian data classification using automatic feature selection 87−48107
non-linear MESFET modelling 88−26358
noncoherent code tracking loops, full-time and time-shared, optimisation 86−29745
nonconvex global optimisation problems, parametric approach 88−43804
nonconvex optimization by fast simulated annealing 88−18615
nonhierarchical packet networks routeing issues, design 88−21400
noniterative correction of images and motion sequences 87−47947
nonlinear *(Polish)* 86−13949
nonlinear, equality-constrained, efficient algorithm 88−18605
nonlinear, linearisation method 88−38097
nonlinear Boolean optimisation problems and soln. methods *(German)* 87−58822
nonlinear circuits, symbolic anal., dynamic parameter optimisation *(Russian)* 88−56417
nonlinear constrained optimization using Lagrangian function 85−44633
nonlinear equality constrained optimisation, variants of reduced Newton method 87−31428
nonlinear equations, global convergence of path following methods 88−11922
nonlinear filtering with constraints 85−19466
nonlinear l_1 optimisation algorithm for design, modelling, and diagnosis of networks 87−36609
nonlinear least squares, hybrid methods, superlinear convergence 87−73004
nonlinear least squares efficient line search 86−40636
nonlinear microwave CAD/anal. techniques, state-of-the-art and trends survey 88−32407
nonlinear microwave ccts., optimisation by harmonic balance technique, CAD package 86−14541
nonlinear networks, power characts. evaluation, statistical approach *(Russian)* 85−4607
nonlinear networks, superlinearly convergent algorithm for nonlinear l_1 optimisation 86−57600
nonlinear optimisation, local convergence characts., iterative methods 88−18613
nonlinear optimisation, structural stability 88−18609
nonlinear optimisation algorithms, user's guide 85−22348
nonlinear optimisation of ccts. and systems, efficient gradient approx. 86−66937
nonlinear optimiser, unconstrained, GGOPT 88−56160
nonlinear reliability optimization of complex systems using random search technique 88−70175

optimisation continued
nonlinear residual least Pth and P-norm optimization, combined Newton/1st order approx. with Hessian approx. 87−23533
nonlinear triangle-to-sine converter design using Gauss-Newton optimisation 87−52780
nonlinear Volterra filters, design method based on unconstrained nonlinear optimisation 87−47813
nonlinearly constrained, globally convergent algorithm 87−36614
nonsmooth anal. theory 87−31431
nonsmooth optimisation, superlinear convergence 85−33309
nonstationary and limit extremal problems, soln. without gradient eval. 86−7674
nonstationary Gaussian signals, locally optimum detection, time-frequency receivers appl. 88−73121
nonstationary spatial functional optimisation 87−36601
nonuniform power networks optimisation, w.r.t. minimal losses of active power *(Czech)* 88−30340
Northeastern United States power system, optimal power flow by Newton approach 85−15466
NP-complete problem, directed graph loopless side selection *(Chinese)* 87−72945
nuclear boiling water reactor, optimal deadbeat reduced-order observer 88−36934
nuclear power generation, optimal power mix *(Japanese)* 86−70750
nuclear power plants, optimization of preventive maintenance 87−78288
nuclear power plants, pipe support optimisation 86−32964
nuclear power station steam turbines, thermal load distrib. optimisation in intermediate superheating stages *(French)* 87−57760
null constrained optimisation problems in antenna array pattern synthesis 88−34486
numerical optimisation techniques, book *(French)* 88−56182
numerical solution of an optimization problem with anunknown boundary 85−54427
Nyquist signals, optimum design 85−2845
O(n) algorithms for discrete n-point approximation by quasi-convex functions 85−33339
O-type oscillators, resonant distributed-interaction 86−21047
objective computer clusterisation, goal function approach 88−41007
objective function improvement with indeterminate gradient 86−52371
observation duration optimisation when searching for signal in measuring systems 86−16298
ODE, optimal numerical solution with partial information 88−24680
office lighting optimisation, use of computer graphics *(German)* 85−60532
offset satellite antenna with multiple shaped beams, optimisation 88−14548
offset single and dual reflector antennas, optimum beam scanning 85−36091
oil drilling and production platforms, offshore power system optimisation 86−45882
one-bit full adders embedded in regular structures, optimisation 87−10947
one-channel queueing system with finite queue, operation optimisation 86−7592
one-dimensional hybrid picture coding optimisation *(Slovak)* 88−8692
one-unit system, optimum planned policies with minimal repair 88−38039
one-way and two-way channels, direction of communication optimisation 87−48464
online boundary optimum detection for inverter-driven induction motor stator current minimisation 88−48949
online tap changing transformers, utilisation of tapping range and voltage level anal. chart 86−19349
open-ended waveguide applicators for medical appls. optimisation 85−43320
optical communications, optimisation of receivers 88−47113
optical design of automobile headlamps, geometrical parameters of reflectors optimisation *(Czech)* 85−10204
optical fibre link optimisation, standard modulation codes use 85−14302
optical fibre systems, subscriber loop design optimisation 87−8293
optical filter, continuously variable in hybrid optical correlator 88−8019
optical filters, thin film, inhomogeneous, design using new CAD technique 85−56394
optical flow estimation, error analysis of gradient-based methods with local optimisation 87−47901
optical microscope, dimens. meas., automated, development and analysis 88−9874
optical receiver, binary intensity modulated with direct signal detection, optimum performance anal. and construction *(Japanese)* 85−20215
optical signal detection, optimum ranked algorithm 86−30032
optical signal detectors using direct photodetection scheme, parametric optimisation 85−47985
optical storage systems, information pit shape optimisation 88−33593
optically bistable interference filters, optimisation 86−36571
optimal algorithms under indeterminacy 86−62068
optimal capacity and non-bifurcated flow assignment 87−55743
optimal classification regions for normal random vectors 88−56117
optimal edge detector design, coefficient quantisation 86−48975
optimal edge detector design, parameter selection and noise effect 86−48974
optimal firm hydro energy and water supply 87−42700
optimal joint load balancing and routing in message switched computer networks 88−52927
optimal linear discrete filtering with grouping 88−34675
optimal linear feature extraction for three-class equal-covariance Gaussian case 87−69281
optimal load dispatching network anal., real-time, min. spanning tree approach *(Chinese)* 86−39103
optimal multidimensional linear filters synthesis, ill-posed problems 86−64246
optimal nondivergent filtering algorithm without distribution density, synthesis 88−3026
optimal power flow determ. using quadratic approx. approach 87−64101
optimal projection for multidimensional signal detection 88−73133
optimal quantizer design with entropy constraint 87−13057
optimal rotation problems in channel routing 87−413
optimal route of distribution feeders, approximate technique 88−30364
optimal routing policies in queueing network 86−26704
optimal stochastic strategy with information transmission on a noisy channel, optimal encoding/decoding decision problem 88−40804
optimal systolic arrays, design 85−28455
optimisation algorithms and parallel execution automatic differentiation part 88−49724
optimising accelerator for CAD workstation 88−63704
optimum geometry analyses for rectangular 'hard' magnet pairs 88−51348
optimum placement of remote information concentrators in centralised data transmission network 87−40074

optimisation continued
order statistics and the linear assignment problem 88−11885
orientation track measurements for range fixing, optimum digital filtering procedure *(German)* 85−19454
orthogonal design for process optimization and its application in plasma etching 87−60340
oscillator with plate-grid modulation, energy efficiency optimisation 88−63562
overflow-stable 2-D digital filters, spatial domain design 85−17744
overhead line conductors cross section-selection, multi-criterial optimisation problems 88−42866
overseas telecommunication network planning 86−64514
oxide cathodes, coating optimisation 85−23311
p-n junction capacitance determ. using curve fitting procedure 87−74055
p-n junctions, surface termination profile optimisation, design model 87−6460
pacing window flow control with admission delay, anal. and optimisation 88−52931
packet data network, nodes cluster design optimisation 86−64760
packet length and window size selection 86−37178
packet radio network using random access, optimal design parameters 85−42436
packet radio networks, anal. of routing strategies 86−17217
packet switched data networks, performance optimisation *(German)* 85−19798
packet switched data transmission network channel flow 85−7953
packet switched network optimisation for grade of service fairness *(Japanese)* 88−21369
packet switched network planning system architecture and optimisation algorithms 88−41145
packet switched networks, optimisation for grade-of-service fairness 88−41140
packet switching, optimal adaptive scheme for two competing queues with constraints 86−64397
packet switching, optimal congestion control in single destinationnetworks 85−63134
packet switching network routing 85−30493
packet switching network with conflict-free multiple-access, optimal channel assignment 86−4075
packet-switched communication network, capacity and flow assignment joint optimisation 87−40113
packet-switched network planning system *(Japanese)* 88−34840
packet-switched network planning system architecture and network optimization algorithms 88−67018
packet-switched networks under end-to-end packet transit delay constraints, optimisation method *(Japanese)* 87−48282
packets optimisation, fluctuating optical signals detection 86−37151
paging algorithms, optimal, for mobile telephone systems 85−63568
parallel analogue banks, transfer fn. anal. and design method 87−24302
parallel multireservoir power system, long-term optimal operation 87−4221
parallel tube-manifold system for dynamic press. meas. optimisation 87−49996
parameter design optimisation for process and product quality improvement, statistical anal. appl. 88−11786
parametric optimisation, critical sets 86−46224
parametric optimization of active filters withidentical sections 86−34982
parametric yield optimization for MOS circuit blocks 88−51030
Pareto distribution charact. through maximisation of α-entropies 86−68948
Pareto optimal flow control in a multiclass environment 88−35190
Paris telecommunication network, five year planning with APHRODITE software tool 86−64531
partial orders, new appls. 86−40644
partially polarised backscatter, optimal polarisations 85−24792
partially testable standby-systems with periodical testing, optimal maintenance policy aspects 85−49318
partition constrained assignment problem using simplex algorithm *(German)* 88−70242
passband phase minimization in low-pass-type filters 88−63772
pattern recognition, distance functions using density estimates 85−30449
pattern recognition, multiclass Fisher feature selection algorithms 88−14797
PBFA II vacuum magnetically insulated transmission line redesign to inductive energy store 87−21934
PBX, multi-feature, voice control dialogues 87−48807
PCB electroplating, programmable hoists, optimization using linear programming 85−40354
PCB layout CAD, solving the insoluble: PCB placement 87−52982
PCB layout CAD design optimisation for manufacturability and reliability 88−1108
PCM optimality conditions 86−16141
peaking current reference, cct. enhancements, anal. and optimisation theory 88−56441
penalisation and multiplier methods *(German)* 86−7663
perceptron algorithm, fuzzy membership function incorporation 86−23121
periodic preventive maintenance, cost optimisation 86−46009
permanent magnet linear alternators, optimal CAD techniques 88−69655
permanent magnet linear wiggler for FEL, optimisation using 3D FEM 88−51831
permanent magnet motors, rotor pulse magnetisation, optimal inductor winding design 88−37163
permanent magnet synchronous motor drives, efficiency optimisation using adaptive control 88−30688
petrochemical complex utility system simulation for online management justification 86−26453
phase code spectra 86−22900
phase direction finders, statistical optimisation, priori uncertainty 85−25953
phase lock simulation by means of a digital computer *(Czech)* 85−11111
phase-inverter loudspeaker system parameters, time-domain estimation *(Japanese)* 87−56427
photodetectors for photon counting, selection criterion optimisation 86−31440
photodiode-operational amplifier pair for weak flux meas. 86−44313
photolithography, process optimisation, exptl. design 88−19877
photon pulse integrating receiver optimisation using avalanche photodetector 85−8844
photoresist process optimisation using statistical design of expts. 85−7034
photovoltaic array, function optimisation using feedback control system 85−21811
photovoltaic power system, computer-aided optimisation of operation 85−32392
optimisation continued
photovoltaic power system, optimum design *(Japanese)* 88−43095
photovoltaic power systems for telecommunication appls., design optimisation 87−4638
photovoltaic pumping system based on induction motor driven pump, optimisation 87−42732
photovoltaic stand-alone systems, optimal sizing using analytic models 87−57968
pictorial quadtree data structure, top/bottom compaction techniques 85−30457
picture processing, contour element parameter identification *(Italian)* 87−13081
piecewise linear digital filter, optimisation of ε-filter *(Japanese)* 88−38636
piecewise optimal load flow for interconnected power system appls. using mode-tearing technique 88−68822
piecewise-linear curve approx., point number choice *(Japanese)* 85−41990
pinch temperatures in Rankine cycle power generationutilizing heat sources of medium and small temperaturedifferences 86−25867
PLA, topological optimisation strategy *(Spanish)* 85−17297
PLA circuits synthesis, step-by-step optimisation 87−37141
PLA folding, optimising technique *(Chinese)* 88−12289
PLA optimal folding, branch and bound algorithm 85−1695
PLA optimisation, multiple-valued minimisation 88−669
PLA optimization and layout generation in silicon compilers 87−44800
placement algorithms optimising delay for ECL masterslice LSIs 87−5841
placement of electronic circuits under moduleconstraints 87−435
placement problem, soln. on automated design subsystem *(Russian)* 86−46441
placement under uncertainty in position of ports, VLSI 87−36910
planar assignment problem, efficient algorithm for optimum soln. 87−65741
planar directional couplers with improved directivity, design and optimisation *(German)* 85−34147
planar nonuniform slotline antennas, anal. *(French)* 88−40702
plant layout optimization method based on coupling symbolic and numerical computations 88−1761
PLAs, design optimisation for control ccts. 87−44793
PLAs, electrical optimisation 86−20496
PLAs, large monoplane type with mixed I/O lines, optimisation and layout generation 86−34743
PLAs, multiple-valued logic and optimization 88−50088
PLASCO: a procedural silicon compiler for PLA basedsystems 86−976
plastic component and structure optimisation *(German)* 87−5515
PLD designs, optimisation tools 87−59439
PLL for clock recovery cct., optimum parameter determ. 88−44094
pointwise state variable constraint for dynamic response optimisation problems 86−7648
polarity coincidence correlation detection of weak signals with duty cycle, optimisation process appl. 87−62140
pole-zero pairing strategy for area and sensitivityreduction in cascade SC filters 86−67334
polyhedral proof methods in combinatorial optimization 86−57321
polymatroids in E_+^3 *(German)* 87−58809
polysilicon-emitter transistors, self-aligned, device design and gain-speed trade-off 88−57623
portable natural gas analyser optimisation 86−5577
positive photoresist, response surface methodology, process optimisation 88−13274
positive photoresist optical density, optimisation, for high resolution lithography on reflective surfaces 86−1906
positivity of cubic polynomials on intervals and positive spline interpolation 88−63202
post-QC reliability optimisation using sampling plans 88−38004
poultry processing plant refrigeration heat recovery system 87−5121
power consumers, capacitor bank distribution optimisation *(Russian)* 88−23316
power consumption, multicriterion control *(Russian)* 88−5260
power consumption optimisation *(German)* 88−68770
power consumption optimisation, w.r.t. economics, labour and energy resources *(Czech)* 88−30292
power consumption patterns optimisation in Czechoslovakia, w.r.t. 8th five-year plan *(Czech)* 87−42334
power convertor EMC parametric optimisation problem 86−39972
power dispatch method with security online economic system 86−6215
power distribution networks, medium voltage, fault location process optimisation *(Polish)* 87−42439
power distribution networks, normal and post-emergency regimes, optimisation algorithm *(Russian)* 87−15261
power distribution networks for transportation, optimisation of element redundancy *(Russian)* 85−21878
power distribution optimisation by gradient method *(Croatian)* 86−39034
power distribution system reactive power requirements optimum eval. 86−25472
power distribution systems, computer-aided long range planning, optimisation 85−27052
power electronic systems, CAD optimisation *(German)* 85−49730
power electronics-regulation using microprocessors, quantitative optimisation *(Spanish)* 86−732
power engineering, method for constructing Pareto sets in hierarchical structures 87−58808
power engng. installation operation, multipurpose optimisation *(Russian)* 88−10927
power engng. multicritical optimisation problem soln. using game theory *(Russian)* 87−42494
power generating units, optimal maintenance scheduling 86−61205
power generation scheduling via large scale nonlinear optimisation 88−17068
power line current densities optimisation, energy content considerations *(Romanian)* 88−30368
power line protection optimisation using statistical methods *(Russian)* 88−75218
power MOSFETs, on-state resist. model, cell layout optimisation 85−18327
power MOSFETs with lateral structs. and deep junctions, drift region optimisation 88−26263
power network model, nonlinear cost network flow and optimal daily scheduling calcs. *(Chinese)* 88−23406
power network reactive power distribution optimisation, calc. of per-unit increases in losses *(Russian)* 85−43580
power network repairs, optimal interval *(Spanish)* 87−15153
power network security monitoring and optimisation 88−54857

optimisation continued
power networks, continuous optimisation on graph model *(Russian)* 87−64147
power overhead lines, computer aided optimisation *(German)* 86−25605
power plant circulating water system, optimisation *(Chinese)* 88−48777
power plant installation optimisation, planning and operation *(German)* 86−32885
power plant microcomputer appls., planning, control and monitoring *(Polish)* 86−18911
power plant optimisation by math. modeling in USSR energy sector 87−21999
power plant preventive maintenance programme optimisation, analysis and engineering approach 87−9231
power plants, generation schedule optimisation with nonlinear incremental cost curves 88−23714
power plants, optimum layout eval. using reliability theory *(Croatian)* 87−22005
power station heat exchanger system optimization 88−36911
power station optimisation using computer aided anal. *(German)* 85−43667
power stations, system-forming networks, site allocation, optimisation *(Russian)* 87−15510
power supplies CAD for machine tool industries *(Slovak)* 85−21182
power supplies reliability optimisation, w.r.t. economics *(Czech)* 88−68775
power supply, network installation and equipment selection using dynamic programming 86−70968
power supply ccts., source impedance as optimisation criteria *(German)* 86−67007
power supply for microwave relay in France, photovoltaic diesel engine generator, optimisation and economics 87−30454
power system, stabilizer of parameter optimization, mathematical model 87−30096
power system, stabilizer optimization, mathematical model formulation 87−30097
power system computerised operation planning 87−71605
power system control, load flow optimisation based on security criteria 88−54920
power system design, method of plotting trajectories *(Russian)* 88−5303
power system design optimisation program relating electricity cost to plant configuration 87−9121
power system design optimisation using fuzzy set theory *(Russian)* 85−59644
power system design using similarity theory *(Russian)* 87−15122
power system development optimisation and economic eval. *(Russian)* 87−15119
power system dynamic load shed scheduling, optimisation 85−59585
power system economic load dispatch, network approach and bus incremental cost *(Chinese)* 85−32077
power system electric power performance, optimisation problems and solutions 87−50624
power system expansion planning, optimisation problem, soln. *(German)* 85−38458
power system generation mix considering system reliability, multi-stage optimisation 87−57589
power system generation schedule optimisation using modified coordination equations 86−61051
power system load change modelling as external perturbation, dynamic state estimation 88−75063
power system load dispatching, dynamic optimal economic dispatch for interconnected systems 85−48524
power system load dispatching, dynamic optimal economic dispatch policy 85−48527
power system load flow problem, constrained methods *(Russian)* 85−32130
power system multiple bad data identification for stateestimation by combinatorial optimization 86−46215
power system operating region, optimisation models 86−50792
power system operation, optimisation between successive inspections *(Rumanian)* 85−38415
power system optimal ordering triangular factorisation, sparse vector methods 88−23290
power system optimisation, economic load dispatching, security and planning 85−32047
power system optimisation, fuel and economic dispatch considerations 85−59539
power system optimisation and modeling, indeterminancy factor 87−71488
power system optimisation criteria, Russia 87−21830
power system optimisation using structural relationships of criteria *(Russian)* 87−15129
power system planning, optimal generator maintenance scheduling 85−15530
power system planning, optimum location of electrical equipment *(Russian)* 86−18745
power system planning, reactive power optimisation, computer aided hierarchical approach 85−59642
power system planning, reactive volt-ampere sources optimisation, computer program 85−27007
power system power factor correction source location, optimisation method *(Russian)* 87−9100
power system power generation, dynamic programming algorithm for thermal unit scheduling 86−25535
power system preventive regime reliability model, linear optimisation *(German)* 86−65627
power system reactive power compensation optimisation *(Chinese)* 85−4527
power system reactive power optimisation, assessment using probability methods *(Russian)* 85−53265
power system real-time control of reactive power dispatching using multiobjective LP 87−71525
power system real/reactive power dispatching, optimisation for economic operation 85−48544
power system reliability optimisation, charact. interconnection and interpolation 88−23274
power system security analysis and optimisation 88−30314
power system security assessment and control system: corrective strategies 85−48541
power system security control, ϵ-optimal generation schedule using iterative procedure 85−21135
power system stabilisation, dynamic output feedback controllers design 86−39035
power system stabilisers, parameter optimisation taking into account exciter saturation nonlinearity 86−44916

optimisation continued
power system state estimation, bad data identification using decision theory 87−21876
power system steady state regimes optimisation basis selection 87−4276
power system structure and parameters, optimisation method and algorithm *(German)* 86−12347
power system structure planning, agreement with partial solns. *(Russian)* 87−71613
power systems, daily operating condition optimisation by subsystem division *(Russian)* 87−15128
power systems, economic dispatch, optimisation methods 85−43563
power systems, large-scale, decentralised control and stabilisation 85−38439
power systems, mathematical modelling, steady-state stability *(Russian)* 85−64829
power systems, multicriterion optimisation and correction *(Russian)* 86−65595
power systems, multipurpose optimisation of control *(Russian)* 86−32664
power systems, nonsinusoidal, optimal power factor correction identification method 85−43544
power systems, optimal load and reactive power dispatching using iterative linear programming 85−48508
power systems, optimal load dispatching using fast power flow technique 86−12341
power systems, optimal load flow calc. using direct search optimisation 86−6274
power systems, optimal power flow, new computation method 85−21052
power systems, optimal reactive power control, linear approach *(Chinese)* 88−61803
power systems, quality criteria for analysis and optimisation *(Russian)* 85−38430
power systems, real time security optimisation method 86−70616
power systems, thermal and hydraulic, DSS for operation 88−17084
power systems, voltage base corrective strategy, program 88−48513
power systems and substations, input reactive power optimisation *(Russian)* 88−61780
power systems economic effectiveness optimisation criteria *(Czech)* 87−57531
power systems governed by nonlinear dynamics, optimal feedback control 87−4292
power transformer design optimisation based on automated search and control system *(Russian)* 87−22463
power transformer design optimisation methods *(Polish)* 85−60249
power transformers, automated design, multicriterial optimisation *(Russian)* 87−58169
power transmission electrode geometry optimisation by boundary element method 85−62719
power transmission networks, optimisation and modelling using fuzzy set theory 86−50966
power unit availability improvement by maintenance optimisation *(Rumanian)* 86−70583
power unit overhaul period optimisation allowing for reliability and cost changes *(Russian)* 88−5417
power-system control, real-time constraint determ. *(Russian)* 87−71534
PR^2 algorithm for 0.1 knapsack problem 88−70257
precise SAW convolvers and long delay lines, CAD 88−51118
preconditioning of truncated-Newton methods 85−60890
preventive maintenance, optimum spare allocation 87−36538
preventive maintenance program 85−39512
pricing problems with a continuum of customers as stochastic Stackelberg games 88−6357
primal and dual vector optimisation problems, numerical comparison *(German)* 85−54319
printed circuit antenna radiation efficiency optimisation, superstrate-substrate combination considerations 85−19263
printed circuit antennas using magnetic superstrates, radiation efficiency optimisation 85−13317
printed circuit single row routing, fast algorithm 86−62377
printed dipole antenna arrays, ground plane backed, synthesis 88−21032
private data networks, design and optimisation 86−64756
private network performance optimisation 85−47004
private telephone networks design, use of ANCRE interactive computer tool 86−64581
probabilistic networks anal. and design, combinatorial optimisation problems 85−46671
probabilistic optimization of mass production yield by themethode of statistical derivatives 87−114
process industries, optimal common use of energy 86−26452
product design optimisation using robust design 87−23368
product form queueing networks, derivatives and moments of queue lengths 88−73397
production, scheduling to minimize total penalties due toearliness and tardiness 86−7488
production plans and schedules, integration and optimization 85−54123
program tools for VLSI architecture synthesis 88−20089
project scheduling heuristics, perform. measures standardisation 88−55938
projected gradient method 86−52359
proper, reflecting and absorbing facets of complementary cones 85−22329
public packet-switched networks, computer-aided planning 86−23257
pulse power sources with capacitance energy stores, three criterion optimisation 87−5714
pulse shape optimisation for min. bandwidth design, waveform comparison 86−3742
pulsed radiation sources location, parameters optimisation of dissector system 87−49754
pumped storage power station, optimal load distribution *(French)* 86−39615
pumped storage power station scheduling using dynamic programming 85−60070
pumped-storage power stations, computer-aided expansion-planning and operation-planning simulation and optimization *(German)* 85−32387
pursuit-evasion differential games, simple-motion, optimal evasion from proportional navigation 87−16461
PWM inverters, losses minimisation 88−69550
PWM invertor control of AC drives, optimal switching patterns 86−7187
PWM invertors, optimal strategy *(Slovenian)* 87−15860
QAM, linearly equalised, anal. 88−14573
QC screening procedure using correlated variable, economic design 88−38009
quadrature mirror filter banks, lattice structures 88−25329

optimisation continued
quadrupole struct. optimisation for isosceles trapezoidal electrodes 88−58807
qualitative data anal., complete preorder heuristic 88−56167
quality control in job shop manufacturing process, M/M/1 queue approach 87−31315
quality engineering through design optimization 85−39571
quality of nonconvex optimization problems *(German)* 85−54317
quantisation for noisy input signals, optimisation *(German)* 88−27937
quantum-limited imaging, use of Grenander's sieves 87−48248
quarterly repairs and maintenance planning optimisation for electrical mine equipment *(Russian)* 85−10378
quasi-convexity of a special job shop scheduling problem *(German)* 88−31661
quasi-deterministic signal detection, asymptotically optimum rank algorithms 85−13556
quasicyclic codes construction, optimal, based on optimum distance profile convolutional codes 87−69045
quasilinearisation, dynamic programming, and invariant imbedding 86−62069
quasiNewton updates, restricted pseudoinverses for unified derivation 85−44644
query optimization using the concept of restricted topologies 88−41348
queueing systems, light-traffic type, optimal buffer allocation 88−43763
queueing systems, optimal relative situation priorities 85−28096
radar array synthesis using nonlinear optimisation techniques 88−58974
radar group targets, digital detector, multilevel quantization, anal. and optimisation 85−8451
radar systems, multicriterial optimisation by correlation matrix, generalised indices selection 88−4072
radar target vs. clutter and clutter suppression, polarimetric contrast optimisation 88−9619
radar working freq. selection 87−63013
radial distribution feeders, shunt capacitors optimised utilisation 85−9492
radial distribution networks, with reliability constraints, modelling and optimisation 86−32747
radial distribution primary feeders, reactive power optimisation, quadratic programming 85−48583
radial distribution system planning, optimal conductor selection 88−54957
radiation sources with parametric uncertainty, detection and direction-finding 86−48946
radio receiver third order intermodulation, dynamic range optimisation 86−24067
radio signal space-and-time processing, algorithms optimisation 88−8770
radio signals, optimal signal processing system design, allowing for component deviations from ideal 85−14105
radio systems, algorithm for optimal versions choice 86−17206
radio systems and trajectory meas., optimal signal filtering algorithm 85−36283
radioelectronic ccts., adaptive optimization strategy 87−44451
radioelectronic ccts. with multiterminal interactive cct. design, parametric optimisation 88−24878
radioelectronic device placement, temp. regime, optimisation 87−436
radioelectronic systems optimisation, composition and decomposition methods 87−20384
radiograph digitising system optimisation, software method 88−68381
radiographs restoration using Wiener filters 87−55253
radiometer, scanning, determ. optimum transfer charact. 85−14811
radiotelevision spectrum, freq. band utility optimisation, eval. and discussion *(Italian)* 87−76906
radiotherapy planning, γ-ray SM-4 computer-assisted programme complex *(Russian)* 85−38190
railways, optimum power feed voltage control for cost reduction *(Japanese)* 86−7230
Raman free electron laser, parametric optimisation, electronic efficiency for cusp and EM wiggler 88−51841
Rance tidal power station, production optimisation and operation 86−65979
random pulse signal packet, optimal detection 88−34676
random search algorithms in the vector optimizationproblem 86−40654
random search method, optimisation of channel bunches in a network 88−28150
random sequences, Bayes discrimination and estimation 86−29877
random stationary signal correlation delay meter 88−22806
randomly distorted signals restoration, max. a posteriori approach 88−66587
range finding systems, pulsed-phase difference, uncertainty elimination 88−9677
rank order operators and the mean absolute error criterion 88−27893
rapid transit system, cable system design, reliability optimisation using fuzzy uniform-cost algorithm 88−49231
RAPSODY dynamic programming model, hybrid energy conversion systems optimisation 88−69172
rare-earth permanent magnet generator field, mesh-complex finite element calc. and optimisation 87−30508
RC integrated inhomogeneous ladder network, optimal type, computer-aided synthesis 86−653
RC passive and active networks, program for anal. and optimisation 86−67341
reactive power optimization in power system quadratic programming method *(Chinese)* 87−21838
reactive power source positioning in power networks, current increment optimisation for reactive power source positioning in power networks *(Russian)* 87−15185
reactive source optimisation in high-voltage networks, restrictions *(French)* 88−36821
real bandlimited functions in two-dimensional Euclidean space, optimum sampling *(German)* 85−25072
real frequency broadband microwave matching using a modified Marquardt optimization 88−1020
rear focus collector, optimisation study 86−71070
receivers and their structure and CW interference conditions *(Japanese)* 85−19451
rechargeable battery optimisation on basis of required reliability level 86−66637
rectenna element, Schottky-barrier diode parameters optimisation 85−6533
rectifier diodes for switching power supplies, optimisation 85−28358
recursive digital filter, frequency charact. approx. using bilinear transformation 87−45093
recursive digital filters, two-dimens. half-plane, recursive optimisation design technique *(Chinese)* 85−34085
optimisation continued
recursive lattice digital filters for minimum roundoff noises, proper scalings 88−66595
recursive process parameter estimation, guaranteed, a priori information approach 87−72911
reduced variable metric method for optimisation with nonlinear equality constraints *(French)* 86−46228
reduction motors with trapezoidal stator and rotor slots, optimal tooth zone geometry 85−5134
redundancy optimisation, improved method 85−33307
redundancy optimisation problem, new heuristic approach 85−16830
redundant dynamic systems, reliability evaluation and optimisation 85−54199
redundant multicomponent systems, periodic maintenance interval optimisation model 87−5197
reflector antenna, directivity optimisation with cluster feeds, closed-form solution 86−22799
reflector antenna optimisation for ground station of satellite link *(French)* 87−39492
reflector antenna with cluster feeds, directivity optimisation, closed-form solution 85−13336
reflector antennas, CAD and optimisation 87−68887
regional energy supply structures determ. with regard to environmental requirements 88−17242
regular wavefront arrays 88−70680
relative effectiveness of four direct search optimization algorithms *(Japanese)* 87−73240
relativistic electron beam amplifiers, two-stage, optimum efficiency 85−6652
relaxation algorithms, convergence 85−22343
relay protection equipment, optimisation of test-diagnostic algorithms 85−38567
reliability optimisation, sampling plans, statistical simulation methods 88−43745
reliability optimisation models using parametric nonlinear integer programming 85−54198
reliability optimisation with Lagrange-multiplier and branch-and-bound technique 88−31547
reliability test conditions 87−31365
reliable circulant networks with min. transmission delay, graph-theoretic optimisation problems 86−22858
reliable systems with standby, failure rate anal. 88−31565
reluctance motor steady-state and transient performance 87−51182
remote photovoltaic solar power plants, design optimisation 85−9796
remote sensing imagery hierarchical segmentation using a composite criterion 88−59260
remote sensing images, optimisation and classification procedures 88−68651
remote sensing satellites, system parameters for continuous survey of Earth's surface 85−48370
remotely piloted space vehicle, heads-up displays, speech recognition anal speech synthesis evaluation 87−50525
remotely-piloted vehicle reconnaissance system optimisation 88−48277
repair level analyses, common ground support equipment cost optimisation 86−57169
repeated distances in space 88−56136
RESATRAN, variable speed transmission for electric vehicle, design considerations 87−22864
resequencing delay for queuing system with heterogeneous servers 88−59364
residential solar photovoltaic/thermal collectors, for combined electric/thermal energy generation, control aspects 85−60087
resonant reflector antenna, directivity-optimization 85−13311
resource optimisation in Indian Department of Telecommunications 88−31390
resource planning in predominantly hydro system, optimization and simulation 87−71623
response time optimization in teletext systems 86−16872
reverse convex duality, surrogate type, generalisation 88−18602
RF/microwave network anal., optimisation and synthesis, CIAO and DESIGN personal computer programs 87−16810
ridge-waveguide lasers, threshold current optimisation 86−54135
rigid body 3-dimensional position meas., error anal., optimisation *(Japanese)* 87−29300
ring data transmission, structure optimization 87−28029
ring LAN, parameters optimisation 86−30349
ring laser, random frequency base, anal. 87−68558
robotic perception system, optimal control *(French)* 88−46134
robust product and process design optimisation for quality and cost 88−49481
robust signal detection differential geometric viewpoint on robust signal detection 87−47864
rod insulators based on glass-plastic, shape optimisation 86−25622
ROM with geometric codes, parametric optimisation *(Russian)* 86−1051
Romanian power system, short-term forecasting accounting for weather systems *(French)* 88−42812
Rosenfeld type relaxation operator, theory *(Japanese)* 88−49727
rotationally symmetric electric fields, electrode contours, optimization *(Croatian)* 85−46515
routing of multilayered circuits with vias using theory of fuzzy sets 87−6213
routing optimisation round rectangular components *(Korean)* 85−39840
rule-based logic design assistant 86−67213
run-of-river hydro plants, optimisation of capacity and tunnel diameter 86−65951
rural satellite communication system, design and optimisation 86−64956
sample optimisation, transinformation measure 85−46672
sampling plans, Bayesian acceptance model, risk preference, multiple criteria 86−210
SAMURAI: a general and efficient simulated-annealing schedule with fully adaptive annealing parameters 88−70920
satellite antenna beam optimization through interactive computer program using personal computers 88−58933
satellite antennas, contoured beam optimisation 86−3656
satellite communication, matrix decomposition complexity 85−58059
satellite communications, carrier freq. assignment, optimisation method for cochannel interf. reduction *(Japanese)* 87−20470
satellite ground station antennas, corrected equatorial assembly *(Czech)* 88−35448
satellite microwave multiplexers, CAD and simulation 85−25808
satellite network topology, low altitude, delay and reliability optimisation 88−22039
satellite shaped beam antennas, design techniques 88−14509

optimisation continued
satellite system for regional and domestic appls. in Africa 85−20139
satellite system synthesis model for orbital arc allotment optimization 88−66243
satellite transmission system design 86−30745
satellite transmission system design using numerical optimisation techniques 86−30727
SAW filters, optimisation, unified time-domain approach 88−57874
SAW tap-weighted filters, generalized FIR design by optimisation techniques 86−63525
SC biquads, parasitic insensitive, design optimisation technique 88−12499
SC filters, voltage invertor switch type for interpolating/decimating sampled signal, anal./optimisation 88−63779
SC filters based on lossy FDNR proto 88−50254
SC-filters, CAD and analysis *(German)* 86−14355
scanning electron microscope, collector system optimisation for secondary electrons 88−44529
scanning region method for component distribution 85−16885
scene segmentation from visual motion using global optimization 87−47900
scheduling policies to control resequencing delay, generalisation 88−45827
Schottky-diode optimization for a low-voltage power converter *(Japanese)* 85−40684
Schwarz-Christoffel conformal transformation, numerical inversion 87−33478
SCNSOP, switched-capacitor cct. simulation and optimisation program 86−34448
SCPC satellite networks, demand assigned, optimisation 86−11034
SCPC system, memoryless characteris. 85−14195
SCR triggering, computation of optimum trigger point *(Spanish)* 88−57631
search algorithm, global random, convergence and efficiency *(Chinese)* 87−44273
search algorithm using non-convex optimization 87−51933
search surface method 87−23534
search value of a network 85−46669
search-tracking measuring systems for multistep search and control, analysis 88−22201
sectioned optimization methods for image restoration 87−33808
segmented-image coding: performance comparison with the discrete cosine transform 88−34749
seismology, large residual statics corrections, automatic estimation 86−59270
selective I/O scan: a diagnosable design technique for VLSI systems 87−67322
semi-Markovian deterioration system with cost constraint, optimal maintenance policy *(Japanese)* 88−31625
semiconductor converters optimum design, reduction of models in computer design optimisation *(Russian)* 87−22536
semiconductor device, circuit and process simulation, integrated program system 86−20172
semiconductor device model parameter extraction and optimisation using TECAP software 88−50785
semiconductor laser-to-fibre couplings, optimisation by electrical control loop 88−45445
semiconductor manufacture, material flow optimisation, wafer transfer reduction 88−31470
semiconductor test systems, model for analyzing test capacity, cost, and productivity 87−23321
sensitivity constrained optimum endfire array gain 86−16055
sensor array data, absolutely optimum filtering 85−63078
sensor development for chemical analysis *(German)* 85−64136
sequential analysis of variants, design problems soln. 86−52370
sequential system optimal standby problems, universal generating function 88−31567
series reliability, optimum design of reliable systems for specified life cycle cost 85−44545
service process with least thinking time for optimisation of resource utilisation 85−16857
servicing warranty, optimal repair cost limit policy 88−49467
shapable block placement for IC layouts, simulated annealing-based algorithm 88−64677
shape investigation of interfaces between different media 88−52033
shape optimization of subreflector for thedual-reflector antennas *(Chinese)* 86−16060
shaped antenna reflector optimisation 88−14559
shaped beam reflector antennas designed using synthesis and optimisation 87−47348
shaped beam satellite antennas, conf., London, UK (Nov. 1987) 88−11619
shaped reflector antenna designed using optimisation techniques 88−14508
shaped reflector antenna designed using optimisation techniques 87−54719
SHF, extremal parameters of transmission and passive elements noise calc. *(Spanish)* 85−63805
short-term hydrothermal coordination problem, soln. using continuation methods 87−30135
signal classification and identification minimisation using optimised unstructured waveforms 88−21217
signal detect., optimal serial distributed decision fusion 88−46118
signal detection, optimal vectorial quantisation *(French)* 88−21235
signal detection in noise, stability 85−51679
signal detection with decentralised sensors, hypothesis testing 86−48911
signal flow graph computation; optimization methods 86−66737
signal processing, digital technology and prospects 85−46755
signal processor code optimisation of digital networks 86−62635
signal synthesis in presence of inconsistent constraints, optimisation problem soln. 86−48920
signals with Laplacian density, optimum quantizers, comparative study 86−3873
silicon compilation, layout synthesis strategies 87−65681
silicon compiler, algorithmic description to hardware structure 87−31653
similarity in optimisation tasks *(Russian)* 86−27052
simplex method improved algorithm on convergence in function optimisation *(Japanese)* 87−23529
simplex search procedure modification 87−51996
simulated annealing, convergence and finite-time behaviour 86−52373
simulated annealing, cooling schedule, with appl. to combinatorial optimisation problems 87−36618
simulated annealing, inner loop criterion 88−63193
simulated annealing, probabilistic hill climbing algorithms, props. and appls. 86−9266
simulated annealing, use in device parameter optimization 87−465
simulated annealing anal. 86−52374
optimisation continued
simulated annealing and codebook design 88−66535
simulated annealing approach to the multiconstraint zero-one knapsack problem 88−43775
simulated annealing as a tool logic optimization in aCAD environment 86−27277
simulated annealing convergence props. 87−52008
simulated annealing experiments 86−21342
simulated annealing for block placement 87−38361
simulated annealing for max. likelihood parameter estimation 88−73124
simulated annealing for NP-complete combinatorial optimisation problems 85−33599
simulated annealing research at Berkeley 85−33600
simulated annealing schedule performance 88−71703
simulated annealing theory and appls., tutorial survey 86−52372
simulated annealing without rejected moves 85−33601
single commodity networks, optimal dynamic routing, iterative methods 88−14925
single ended forward DC-DC converter optimisation *(Chinese)* 86−27516
single period-to-period compensation, optimum properties 85−63059
single V-groove guide, dimensions optimisation at X-band 85−45212
single-chip DSPs, high level language appl. 88−66577
single-ended domino logic ccts, optimisation technique 85−40005
single-layer cable systems, multicriteria optimisation 87−50798
single-phase asynchronous motors with driving capacitor, parameter optimisation program *(Spanish)* 87−4695
single-phase induction machine as capacitor self-excited induction generator 88−5676
single-phase induction motor efficiency optimisation model 87−72149
single-phase MHD relays with matching transforms, statistical parameters, optimisation problems 86−7162
slotted ALOHA systems, lightly loaded, optimal retry distrib. 85−63132
small power producing facilities under energy spot pricing policies, optimisation 87−57869
snubber circuit optimisation for emitter-switched power transistors 88−63527
software generation of equivalent ccts. of microwave IC components 88−19420
solar cell array/AC distribution network connection, optimum power transfer using linear current control 85−5009
solar cell arrays of ARCO Solar photovoltaic power plants, tracking optimisation 85−53624
solar cell mismatch losses, minimisation using computer model 86−7083
solar cell structs., computer-aided optimisation method 85−60446
solar cells, concentrator, optimum grid-line patterns under nonuniform illumination 86−7095
solar cells, thin film, rectangular shape, series resistance and optimum grid design 85−21813
solar chimney power plant, collector efficiency optimisation 86−33225
solar flat-plate collectors, optimum operation through exergy optimization 87−31002
solar photovoltaic energy system, optimal power flow control 88−5885
solar power efficiency, solar cell max. power output using impedance matching 'Maximiser' 88−11148
solar power station CAD, heliostat array control system optimisation 86−19160
solar power stations with field of heliostats and tower, optimum dimensioning *(Rumanian)* 85−15934
solar water heating system, optimum design 85−39218
soldering, SMD defect rate reduction through solder paste screen optimization 86−13473
solenoid type inductors, optimum parameter calculation *(Russian)* 88−37270
solenoids, cross-sectional profile optimisation to obtain strong magnetic fields *(Russian)* 85−56977
solenoids construction optimisation, for generating strong magnetic fields *(Polish)* 85−19105
solid rotor asynchronous machines, optimisation and rotor loss study using Fourier anal. 85−43965
SOS wafers, optical nondestructive quality control techniques 88−57827
space mission trajectories optimisation, high-thrust and low-thrust 87−71190
Space Shuttle, augmenting with space station and tug 85−59401
spacecraft antenna design using optimisation search routine 88−34478
spacecraft array antennas synthesis for Intelsat frequency reuse multiple contoured beams 86−22830
spacecraft photovoltaic power systems, optimum sizing and in-orbit utilisation 88−16847
spacecraft power plant system parameters optimisation, outflow rate determ. *(German)* 87−71258
spacecraft shielding against electron-bremsstrahlung 87−71196
SPAN test for unimodality 88−56158
spare part specifications for optimised repairs *(Russian)* 87−89
spare power capacity, optimal control under power supply limitations, Cu smelting plant appl. *(Russian)* 88−11514
sparse assignment problems, efficient labelling technique 86−46176
sparse basis computing, for null space 87−212
sparse matrix methods in optimization 85−5942
spatial processing systems, partial optimisation anal. 85−36274
spatially distributed physical structures of VLSI ICs 86−35797
speaker-independent word recognition using multiple similarity method, optimisation and expt. study *(Japanese)* 85−25064
spectral analysis, discrete coefficient DFTs, optimisation, multiplierless FFTs 86−29842
spectrometric lidar, optimising optical system parameters 85−3514
spectrum management for communication satellites 86−64917
speech, contour-gain vector quantization 88−59090
speech recognition, decoder selection based on cross-entropies 88−66338
speech recognition, optimal solution of training problem 85−46723
speech synthesis, sinusoidal representation, quasi-optimal anal. 88−21156
spin glass-like problems, optimisation, simulated annealing 88−631
spin-glass-like optimisation problems, simulated annealing method 88−43800
spray coolers for steam power stations, optimal design using atomisation method 85−38840
spread spectrum direct sequence techniques, PSK system optimisation in jamming/multipath interf. environment 85−57945
spread spectrum systems, correlative code-tracking anal. and optimisation 85−25705

optimisation continued
SQUID system dynamic behaviour optimisation, using electronic simulation 88−20270
squirrel cage motors, design optimisation using stress anal. *(Polish)* 88−5681
squirrel cage motors, three phase, optimum design including active power loss effect 87−9557
squirrel cage motors, three-phase, LV, optimal design anal. 87−15749
SS/TDMA systems, switching optimisation 85−30871
stability constraints, sensitivities and applications 86−66654
standard cell placement, clustering based simulated annealing 88−71704
standard cell placement, simulated annealing algorithm 87−36902
standard cell placement algorithm with predictive row width equalisation 87−36901
standby device optimal design, reliability of repair facilities 87−31359
standby system optimum inspection interval model considering human errors 88−43753
static algorithm for a closed tree like queuing network. 86−37176
static frequency converter design, optimisation problems solutions 86−45521
stationary signals, interspectral matrix estimation, bias/variance trade-off optimisation *(French)* 88−21247
statistical cct. design, yield gradient estimation for non-differentiable density fns., yield optimisation appl. 86−66939
statistical cooling, general approach to combinatorial optimisation problems 86−7661
statistical design, profit based methodology of integrated circuits 86−46456
statistical leveraging: getting the best from your test 88−6247
steam power stations, computerised control using AI systems for optimal boiler perform. 88−43050
steam turbine power stations 85−32349
steam turbine-generator shaftline optimisation 87−4594
steel melting arc furnaces, optimal energy regime calc. algorithm 88−37776
steel-smelting arc furnaces, mathematical model of electrical operating conditions *(Russian)* 86−13196
step direction in optimisation algorithms, evaluation 86−13654
step motor driven system, start and stop process optimisation, CAD 87−58127
stepping motors, control optimisation *(German)* 87−4739
stereo images for depth calculations using optical flow 87−2595
stereo matching as constrained optimization using scale continuation methods 88−46200
stereo vision, calibration problem 87−2617
stereo vision, computational theory 86−10586
stereo vision, graph matching by parallel optimisation 85−36418
stereovision regions matching process 87−75928
stochastic distributed optimization algorithm *(Japanese)* 87−31432
stochastic optimization algorithms with slowly decreasingstep 85−60872
stochastic processes, testing hypothesis for the shift parameter in diffusion processes 88−49640
stochastic relaxation algorithm in the combinatorial optimization problem *(Japanese)* 88−24654
stocking/replacement model with minimal-repair at failure 85−33235
stopband optimised *E*-plane filters with multiplemetal inserts of variable number per couplingelement 86−47038
straight bladed vertical axis wind turbine, free vortex simulation method 88−48828
straight bladed vertical axis wind turbines, optimum pitch control 88−37131
strategic planning for cogeneration and energy management, conf., Atlanta, GA, USA (Oct. 1985) 87−32
streak camera dynamic range optimization 88−47584
strip line ccts., computer-aided optimisation *(German)* 88−56895
structural optimisation by force method, sparse orthogonal schemes 85−5941
structural optimization, efficient method *(Chinese)* 87−65368
structural pattern recognition, instruction samples *(Russian)* 87−27625
studio production processes automation, optimum hardware structs. to solve control tasks *(German)* 85−37202
submarine cables, cut-and-hold grapnel 88−53249
submarine communication systems planning using optical fibre cables 85−31075
suboptimal nonuniform codes for excluding redundant messages 87−19386
subtransmission network reactive power planning, optimisation technique 86−56337
successive approximations in Markov processes 86−40652
superconducting generator rotors, optimal thermal design approach 87−9604
superconducting magnets for whole-body NMR imaging, optimal design 87−71094
superconducting solenoid coil design 88−65036
superconducting synchronous generator, gas-cooled leads, optimisation design, current carrying tests *(Chinese)* 88−48903
superconducting unipolar machine, inductor and screening coil optimisation using gradient method 86−39817
superlinearly convergent projection algorithms with relaxed stepsizes 85−33302
supports and convex envelopes 85−33313
surface classification, hypothesis testing and parameter estimation 88−73317
surrogate constraints algorithm appl. to optimal reliability designs 86−40579
surrogate constraints algorithm for reliability optimization problems with multiple constraints 85−39585
surveillance radar optimisation with instrumented range 88−15570
switch-level CMOS logic array with guaranteed timing and back-up supply 87−670
switched capacitor biquads, noise optimisation procedure for second order filters, CAD appl. 87−24325
switched capacitor circuits, analogue silicon compiler 88−24952
switched capacitor filters, two-phase type, transformations and optimisation, SCNAPT program implementation 85−49987
switched capacitor filters in MOS VLSI technology, optimal automated design 86−1249
switched capacitor networks, optimisation using equiv. transformations, SCNAPT program implementation *(German)* 87−66356
switched mode DC-DC power convertors, optimum switching frequency selection 87−10671
switched mode power supplies, closed loop control circuit design using source impedance 87−51365

optimisation continued
switched reluctance motor, magnetic analysis using boundary element-finite element coupling method 88−55313
switched reluctance motor torque optimisation by linear analysis 87−42860
switched-capacitor biquads, generation, design and optimisation 85−23011
switched-capacitor filters, design package using pole/zero prewarping procedure 85−930
switching circuit parameter optimisation for thyristor turn-off in electric drive power amplifiers *(Russian)* 85−17163
switching convertors employing current injected control, optimal design strategy 85−39104
switching networks, large-scale, practical approach to optimisation 87−27674
SYMBL: an optimized layout system for partially symmetric functions 87−36900
symmetrical branch-waveguide directional couplers, optimum synthesis 88−38679
synchronous generator excitation regulator settings determ. from dominant roots of system *(Russian)* 87−30522
synchronous generators with cylindrical rotor, design automation *(Croatian)* 85−65225
synchronous machines, cryogenic, high-power, with large number of pole pairs, optimisation 85−27398
synchronous machines with permanent magnet excitation, design optimisation *(German)* 86−33332
synchronous motor operation optimisation by reducing EM losses *(Russian)* 88−48904
synchronous motors, self controlled, computer aided optimisation design 87−15712
synthesis and optimization of multilevel logic under timing constraints 87−24063
synthesis filter optimisation and coding, appl. to code-excited LP 88−66369
synthesis problem for electronic products, optimal solution determ. 88−49960
synthetic sounds quantitative anal. of similarities between data using MDS-kNN 87−47623
system availability upgrading by redundancy allocation, heuristic method 86−13561
system for recognizing 1D normal sets, time parameters optimisation 86−37086
system reliability apportionment, fuzzy set theoretic nonlinear optimisation problem 87−58730
systematic design methodologies for systolic arrays, comparative study 87−16817
systematic switching optimisation of power transmission networks 87−35608
systems repaired upon detection of failure, optimal inspection schedule 85−5858
systolic architecture for optimal filter design support 88−40886
systolic routeing hardware, performance eval. and optimisation 88−38343
TACAN antenna pattern, optimised circular array 86−42934
tactical multichannel fibre-optic connector design and optimisation *(French)* 88−41714
tamed FM, generalised 87−39594
tandem networks with symmetric hearing range, maximal selection 86−62063
target enhancement, constraint optimisation filter design 87−27441
target tracking in low SNR using a dynamic programming technique 85−52381
TDM exchange control structures, configs. and optimum processor distrib. *(German)* 85−3298
teams, stochastic, with nonclassical information 87−54776
technical objects optimisation for maximum operating efficiency margin 87−20383
telecommunication channel with minimum noise level, two-stage search 86−16088
telecommunication equipment, optimum design, fuzzy set theory appl. 86−16637
telecommunication equipment , optimal remote inspection scheduling 88−73453
telecommunication network, optimising availability and efficiency *(French)* 86−23325
telecommunication network construction algorithm based on link significance eval., NABLE 86−64519
telecommunication network cost performance optimisation models 86−64529
telecommunication networks, large, decomposition for hierarchical control implementation 87−20046
telecommunication networks, large scale, design using optimisation methods 88−46377
telecommunication networks, multipoint line optimization using fuzzy set partitioning 87−40208
telecommunication networks, planning and optimisation *(Norwegian)* 87−33948
telecommunication systems, optimal scheduling of interactive/noninteractive traffic 88−34848
telecommunication systems, vector optimisation 88−9308
telecommunication traffic flow control, game theoretic approach in integrated environment with two classes of users 88−52962
telecommunications, optimal resource allocation for two processes 85−36148
telecommunications, planning system with uncertain demands, optimal time interval 86−64528
telecommunications link with delta modulation, computer-based optimisation *(Russian)* 85−25009
telecommunications networks 87−55593
telecommunications transmission survivability overview 88−21511
telegrams, automatic indexing, two criterion problem of database optimisation 87−48482
telegraph network, labour saving using optimisation without additional capital investment 86−37346
telemetering systems, optimising parameters of noisy telecommunications to minimise error *(Russian)* 86−37387
telephone call-record sampling optimisation for network planning and administration appls. 88−14981
telephone company office with standby service staff, transient service queueing model 87−34027
telephone exchange modernisation planning models 86−17131
telephone exchange units, optimal component placement *(Polish)* 86−49364

optimisation continued
telephone exchanges, decentralised network optimisation methods *(Croatian)* 85−30787

telephone network, automatic trunk exchanges, economic optimisation *(Polish)* 85−47127
telephone network, hierarchical, with nonpersistent subscriber, grade-of-service indices optimisation 87−76212
telephone network dimensioning models, comparison 85−19683
telephone networks, economically optimal number of circuit groups *(German)* 86−23356
telephone networks, reliability optimisation 86−54805
telephone networks, routing optimisation 87−13278
telephone networks dimensioning, with nonhierarchical routing and trunk reservation 86−64580
telephone switching centre network problem 88−14848
telephone traffic, nonhierarchical sequential routing: an approximate solutionto the optimal routing problem 85−57563
teletext, cyclic transmission optimality 87−34084
teletext systems, optimality of cyclic transmissions 86−59609
teletransmission link failure, reservation network for substitute routes creation *(Polish)* 87−27802
template matching and image sensor noise anal. 88−28119
terrestrial/satellite communication network systems, optimum design algorithms *(Japanese)* 87−48283
test intervals for means of meas. optimisation 87−70339
test program set expert development tool, AI-based design for testability 88−29253
textile industry, power consumption, effect of operational factors and choice of product *(Russian)* 85−27897
textural edge detection filter, optimal freq. domain 86−10541
texture discrimination based on an optimal utilization of texture features 88−59241
textured images segmentation, optimum window sizes 86−10540
theory and appls. review 88−56165
thermal generating set commitment/scheduling optimisation using dynamic programming *(Chinese)* 85−43873
thermal power generating plant, overhaul cycles optimisation 85−4941
thermal power generating systems, optimal preventive maintenance scheduling 88−43030
thermal power plant spares requirement *(French)* 87−50980
thermal power station maintenance, personnel optimisation using algorithms *(Russian)* 87−71973
thermal power stations, atmosphere protection against pollutants, optimising measures 85−48855
thermal power systems, large-scale, short-term optimisation 88−23369
thermal storage tank for solar heating systems, optimum volume determ. 86−66368
thermal/hydro power system, simulation model for optimising energy allocation to hydroelectric and thermal plants 88−48477
thermal/hydroelectric system power distribution optimisation matrix *(Croatian)* 86−18690
thermoelectric power generators, cascaded, design optimisation 86−33725
thermosonic au wire bonding evaluation by fractional factorial designed experiment 88−1302
thin film heads, optimisation of resolution, peak shift, and overwrite 86−36014
thin film Permalloy magnetoresistive sensor, optimisation of performance 85−26300
thin-film potentiometers, optimal design *(Polish)* 85−1070
three phase induction motor design, optimisation 88−5683
three phase squirrel cage motor design optimisation, cost, efficiency 88−5684
three-phase asynchronous motors, optimisation of operation *(Italian)* 87−30574
three-phase induction motor design for optimum efficiency 87−42990
three-phase induction motor efficiency optimisation model 86−12826
three-phase induction motor optimal design 87−42991
three-phase three wire transmission system, calc., optimisation of reactive power compensation 86−18779
thyristor convertor, control system optimisation using digital signalprocessing techniques 86−27081
thyristor convertors, energy characts. optimisation *(Russian)* 88−30808
thyristor convertors under digital control, system analysis 87−16876
thyristor frequency convertors as power sources, damping network parameter optimisation 86−45520
thyristor invertor optimisation by random search with reset for failed steps *(Russian)* 86−56834
thyristorised frequency convertors for electrothermics, design, multicriterial optimisation *(Russian)* 88−37287
thyristors, optimum evaporative cooling, experimental study 85−6915
thyristors, P-n-P-n struct., high-power, static and freq. characts. optimisation 88−71540
TIBER-II fusion reactor, toroidal-field superconducting coil design 88−65101
tidal power plants, optimal design, alternative criteria effects 86−25953
tie lines, freq. and active power control synthesis using noniterative optimisation operators *(Russian)* 88−30303
TimberWolf placement and routing package using simulated annealing optimisation technique 85−45760
time sidelobe suppression for coded pulse compression by means of nonlinear optimization method *(Japanese)* 87−75842
time-averaged meas. systems optimal estimators 88−53514
time-dependent M-phase convertors with arbitrary control law, power indices anal. 85−60298
time-hopping patterns 88−41134
time-of-use pricing, simulation and anal. 88−17083
timed Petri nets, modelling and optimising pipelines 87−23517
timing-driven auto-placement 88−25172
Toland's duality scheme *(French)* 88−18610
total energy management for integrated pulp and paper mills 86−7343
tracked transport vehicles, permanent magnet suspension system anal. and optimisation *(Russian)* 85−39263
tracker optimization in presence of discrete white noise 88−41715
tracking radar, acquisition process 86−65016
traction frequency convertor, invertor characts. optimisation *(Russian)* 85−32603
trajectory detection in monocular image sequence 86−43347
trajectory nets connecting all critical points of a smooth function 87−16505

optimisation continued
tramway DC motor, compensating poles shape optimisation, using conformal mapping and finite element anal. *(Czech)* 85−39010
transform trellis code with appls. to speech 86−10259
transformer and choke coil layout optimisation *(German)* 85−9954
transformer capacity optimisation model allowing for design load dynamics *(Russian)* 86−26108
transformer substation installed capacity optimisation *(Croatian)* 85−65306
transformers, low power, with twisted armoured mag. circuits, multicriterial optimisation *(Russian)* 88−30765
transformers, margins for improving efficiency *(Russian)* 88−62414
transistor sizing in CMOS circuits 87−67579
transistor switch oscillators with reduced switching losses, multi-purpose parameter optimisation *(Russian)* 87−17439
transistors in semiconductor circuits, parameter optimisation CAD, student designer tutorial 85−33586
transmission channel, SS-TDMA regenerative repeater for communications satellite 87−70000
transmission network, capacity expansion, long-range planning soln. 85−32109
transmission network, optimal long range expansion planning 88−5317
transmission network planning using integer-linear programming optimisation techniques *(Italian)* 85−38485
transmission networks, complex-closed system design, optimal conditions 86−50963
transmission path networks, planning, state and development tendencies *(German)* 88−66850
Transpac, French public distributed packet switched network, grade of service and optimisation 87−48569
transportation system optimisation and structural circuits *(Russian)* 88−62698
transversal equaliser, 60 Mbit/s, for satellite communications 87−56056
transversal filter with adaptation, pulse characteristics optimisation *(Russian)* 86−16286
travelling salesman and other optimisation problems, common edges in optimal solutions 88−56122
travelling salesman problem, neural network method, effect of synaptic strengths 88−63546
travelling salesman problems, continuous linear optimisation model 87−21894
travelling-wave microwave FET amplifier with parallel-gate transmission lines, CAD optimisation 85−45236
tree graphs, block-vertex duality and the one-median problem 86−23194
tree-rooted maps on surface, asymptotic number 88−63168
trellis codes with multilevel AM, error probability criterion, optimisation 87−2428
trellis source codes designed by conjugate gradient optimization 88−27759
tridiagonal linear complementarity problems 87−44206
trilateration networks costs optimisation, graph theory appl. 88−5115
tuned LC circuits with varactor computer optimisation of thermal properties *(Polish)* 85−28305
turbomachine stage with optimal characts., complex soln. *(Ukrainian)* 85−53660
TV and sound broadcasting, technological processes optimisation 85−20297
TV image block coding *(Bulgarian)* 86−23105
TV signals, source coding *(German)* 85−20341
TV studios, man-machine communication, partially-automated process control *(German)* 85−58359
twenty-element antenna array, design, optimization of convergence parameters *(Spanish)* 88−58961
twin loop antennas, optimisation 86−68904
two machine mixed shop scheduling problem with controllable machine speeds 87−44169
two-area power systems, megawatt-frequency control using two-level optimisation algorithm 86−65636
two-dimensional FIR digital filters, design using iterative optimisation technique 85−950
two-dimensional hybrid picture coding system optimisation *(Slovak)* 88−14808
two-dimensional recursive digital filter design, optimisation technique and stability testing 85−10629
two-dimensional recursive filters, optimal design using min-max criteria 86−52953
two-layer assignment problem for interconnect 86−20190
two-level system optimal recognition algorithms, numerical methods 88−21359
two-stage switching field with internal by-pass links 86−37636
two-terminal optimal α-β wire routeing 88−49932
two-voltage distribution networks, optimal design method 88−54981
TWT, electron bunching and energy exchange in optimal O-type interaction 88−25833
ultrasonic transducers, using KLM model 85−21037
UMN, unified multinetwork packet radio system of US Navy, distributed dynamic routing algorithm *(Portuguese)* 87−76184
unconstrained optimisation problems solving using BFGS's method *(French)* 85−22340
unidirectional ring gas laser, output irradiance, system optimisation 87−75173
unified dual optimisation and algorithms for image reconstruction and spectral estimation 86−16523
uniform circuit placement 86−21739
uniform convergence and Pareto optimality 87−31426
uniform filter banks, optimal, with specified composite response, design 87−59732
uniform search methods 85−16876
uniformly-shifting process, algorithm for economically setting 88−56038
unipolar superconducting machines, optimisation of EM screening coils *(Russian)* 85−39030
unit commitment problem soln. using dynamic programming *(Slovenian)* 88−56163
unmanned aircraft and spacecraft generators, optimum magnetic cct. configurations 85−53125
unreliable dynamic networks, performance optimisation 88−52321
upconversion receiver, noise optimisation in radio input stages 86−4833
UPS systems, microprocessor based technique for output filter optimisation 85−65347
urban area power structure optimisation model including ecological aims *(Croatian)* 87−78036
urban distribution networks, optimum sectioning point selection *(Russian)* 85−59670

utility plant header control and optimization 86−6585
utterance recogniser, discrete, dynamic time warping-based 87−47622
varactor microwave mixers, energy characteristics optimisation 87−65941
variability control and optimisation 88−18526
variable head multireservoir power system, optimisation for long term regulation 87−15586
variable length code with limited word length, algorithm 88−40788
variable-frequency induction motor drive 88−17613
vector differential pulse code modulation, hybrid image coding 88−34569
vector maximisation, multicriteria *(Russian)* 85−315
vector optimisation, dominance values and optimum concepts *(German)* 85−54322
vector optimisation, efficient solns., props., functional analysis 85−54297
vector optimisation, game theoretic compromise *(German)* 85−39645
vector optimisation, scalar representation 88−6378
vector optimisation and geometric optimisation, relationship *(German)* 85−54318
vector optimisation efficient points characterisation 88−43808
vector optimisation in infinite-dimensional spaces, survey 87−16509
vector optimisation problems 88−275
vector quantisers, optimisation algorithm *(Slovak)* 87−12882
vehicles multiplexing system for digital transmission and processing 88−18185
vertical power MOSFETs with thick drain oxide, optimum design *(Japanese)* 87−25311
very Hi-Fi PWM class D audio amps., optimisation design parameters, comments 86−17695
VHV and HV distribution substations, multi-stage hierarchical control systems development *(Czech)* 88−30966
video signals, DPCM quantisation, adaptive and optimised 85−37285
videoconferencing codec, 384 kbit/s *(Japanese)* 88−46733
visual motion measurement, unified perspective on computational techniques 88−8877
visual texture recognition using transformation trees 88−66685
VLF antennas for Omega navigational system 88−34408
VLSI, optimal behavioural-testing, simulated annealing approach 87−37123
VLSI, parametric yield optimisation 86−35825
VLSI, simulated annealing, temp. and energy scales 85−29231
VLSI, timing performance oriented synthesis with Yorktown silicon compiler 87−37116
VLSI architecture, optimised, for multiformat discrete cosine transform 87−60577
VLSI arrays, reconfiguration, covering approach 87−66150
VLSI block placement problem in layout, hierarchical simulated annealing method *(Japanese)* 88−50967
VLSI CAD, optimal/flexible delay management technique 87−1710
VLSI CAD using statistical design and response surface methods 88−33295
VLSI circuit testing using an adaptive optimization model 87−67449
VLSI contact resist. optimisation 85−45763
VLSI design and manufacturing cost minimisation approach 86−67941
VLSI floor-plan max. planar graph algorithm 86−67949
VLSI layout, placement problem of I/O blocks 88−50909
VLSI layout design, analysis of strategies for constructive general block placement 88−39562
VLSI layout design for global optimisation, routing algorithm 86−67950
VLSI macrocell placement algorithm using simulated annealing 87−60595
VLSI memory chip redundancy allocation for optimal productivity 88−70747
VLSI photolithography, process control eval. using response surface anal. procedure 87−11902
VLSI physical design, heuristics approaches 85−29230
VLSI placement, optimal tile placement in the plane 86−35816
VLSI standard cell placement using simulated sintering 87−67437
VLSI systems, automated attribute optimisation 85−12387
VLSI wave digital filters, CAD tools for optimised custom design 86−14411
voice packet transmission through switching network, packet length optimisation and delay study *(Spanish)* 85−2922
voiced/unvoiced decisions optimisation in nonstationary noise environments 87−33652
Volklingen combined cycle power plant, water-steam cycle optimisation *(German)* 85−4865
Walsh function, sinusoidal signal step approx. 86−23047
washing machine operation optimisation *(Rumanian)* 87−51648
water cooled cables, optimisation *(German)* 86−44982
water sensors, capacitive type, design optimisation 86−44300
WATOPT, optimizer for circuit applications 87−59055
wave digital circulator filters, coeff. optimisation 86−57982
wave digital Hilbert transformers, coeff. optimisation *(Chinese)* 86−64233
waveguides of arbitrary cross-sections, cut-off freqs., optimisation of Kohn-Kato bounds 87−39433
waveguides with arbitrary cross-section, cutoff freqs. determ., nonlinear optimisation of shape fns. in FEM 88−27567
weighted tree, algorithms for finding p-centres 86−7631
welding arc time reduction for fastest possible deposition rate 87−16211
Western Siberian oil industry distrib. networks, multicritical optimisation *(Russian)* 88−49316
wideband compact square waveguide polariser, computer-optimized design 85−45216
wideband microwave mixers, modelling and optimisation 88−56903
wideband RF matching ccts. design *(Czech)* 88−70432
Wien-bridge RC oscillator, parameter optimisation *(Polish)* 85−620
Wigner distribution, for signal detection 86−16397
Wigner-Ville distrib., optimum smoothing 87−61830
wind energy conversion system optimisation for remote area power supply, computer model 87−51129
wind power contribution to diesel supplied network, statistical optimisation method 86−12713
wind tunnel development, adaptive wall 86−32443
wind turbine, blade geometry optimisation, interpolation curve 87−57973
wind turbines cluster, Monte Carlo optimisation technique appl. 88−37130
wind turbines for low wind regimes, design optimisation 85−15956
wind- electric conversion system, power matching optimisation with turbine 87−42753
wind-driven DC shunt-generator for resistance heating, power output optimisation 87−35861
winding pattern optimisation for linear motors 88−55380
wire antenna arrays near elliptic cylinder, power gain optimisation 86−3706
optimisation continued
wire antennas, gain maximisation of dual frequency and direction array 85−62915
wiring connections design 85−61495
Woodward ambiguity function, radar signals synthesis 86−37089
workshop design for electricity meter reconditioning and maintenance, working environ. optimisation *(German)* 88−10047
WSI circuits with hierarchical redundancies, yield optimisation 86−47678
X-rays go on line at predrill tooling 87−53052
Y-junction circulator with triangular ferrites, experimental results 85−17779
Yagi antennas, optimisation 85−62927
YSPICE statistical optimization program for analogue ICs 86−2240
zero-memory quantisation, optimal design, for noisy channels 87−54889
Al double level metallisation process using RIE planarisation, optimisation 86−28448
Au, echelette gratings as wavelength demultiplexers in fibre optics 85−37011
C fuel cell electrode, porous, fractional-factorial design optimisation 88−43376
F doped single mode optical fibres, transmission characteris. optimisation 85−35481
Fe shield shape optimisation for superconducting solenoid magnets 87−67934
Fe yoke homogeneous field magnets, optimisation using computer program 88−52149
GaAs MESFET amplifier, X-band, intermodulation product and output power optimisation, Volterra series anal. 86−27588
GaAs MESFETs, circuit-oriented CAD 88−25550
GaAs MMIC distributed microwave amplifiers, optimisation using analytical/graphical technique 88−71060
GaAs MMIC, optimum substrate thickness for MM-waves 85−28710
GaAs double drift IMPATT diodes, doping profile effects at 33/44 GHz, performance optimisation study 85−6523
GaAs hybrid and double-Read diodes, doping profile variation, performance optimisation study at 60/94 GHz 85−6522
GaAs microwave FET limiting amplifiers, computer simulation to aid design 87−66542
GaAs n^+ self-aligned short-channel normally-off MESFET, optimisation by 2D numerical simulation 87−38313
GaAs power FET structs., optimisation 85−45734
Hg contactor structural parameter optimisation for max. reliability 87−73836
Hg probe design, for semiconductor doping profiles determ. 85−1654
HgCdTe IR bistable device parameter optimisation *(Chinese)* 88−40325
InSb TFT, vacuum evaporation fabrication, parameters extraction using optimisation technique *(Korean)* 88−7627
NH_3 sensitive MOS structures with Pt gates 87−70601
SF_6 MV and HV switchgear, contact pins and sockets optimisation using FEA *(German)* 88−30943
Si (100) channelling masks for masked ion beam lithography, charactn. and optimisation 87−38032
Si HV p-π-ν planar junction diodes, breakdown voltage optimisation 85−1560
a-Si, photoelectronic behaviour, computerised meas. for optimisation using golden section search 88−1402
Si solar cells, crystalline, metal grid optimisation and emitter tailoring, computer model extension 87−30933
Si solar cells, optimisation of dopant density profiles 88−37526
Si solar cells under highly concentrated radiation, optimum design parameters 88−11385
a-SiC:H solar cells, band gap optimisation 88−37516
TiO_2 antireflection coating for solar cells, screen printing coating process develop. and optimisation 88−18038

optimum control *see optimal control*

opto-couplers *see opto-isolators*

opto-isolators
3 kV, design *(German)* 86−28989
A/D convertor with opto-isolated data transmission channel, HV installations testing appl. 85−26233
ADC, use of opto-isolation techniques *(Spanish)* 88−839
amplifier with diode optoisolators and FETs 87−61044
analog opto-coupling cct., optical link controllable config. using optoelectronic negative resistances 87−54184
analogue controller appl. for power control 88−33876
analogue opto-coupling cct., optically controlled, constructed with series combination of optoelectronic negative resists. *(Japanese)* 85−56441
applications *(German)* 87−26193
bilateral opto-isolator circuit, improved for widespread echo suppression 85−42406
bilateral optocirculation circuit with three ports 88−8059
bilateral optoisolator amplifier with multiple feedbackloops, design and characts. 86−8012
biomedical optically isolated amplifier, EMG appl. 87−41972
current loop data transmission opto-isolators HCPL-4100 and HCPL-4200 for receiver/transmitter appl. *(French)* 85−12727
DAC, 12-bit optically isolated 85−40137
DC amplifier, low level, transient response improvement using negative feedback cct. of photocouplers *(Japanese)* 86−27111
DC measurement amplifier accuracy and speed with two-channel galvanic separation 85−20685
DC voltage regulator, for automatic recording of current-voltage characts., P136M model 86−40899
DC/DC converters for fibre optics power supplies, future trends 88−30826
degradation of optocouplers, accelerated tests and models comparison 86−54048
differential optron, frequency responses 86−48275
dual-probe, for plasma diagnostics 85−7328
electric motor supplies, phase control using optron transistor ccts. *(Russian)* 87−72157
electronic component reliability concepts and burn-in tests *(German)* 86−61968
explosion protection in the mining industry, electric cct. disconnection using opt-couplers *(German)* 88−11689
explosion-proof quad isolator amplifiers of Eurocardconstruction, design with opto-coupler *(German)* 86−40920
fibre optic hybrid sensors with optical power supply, GaAlAs laser array 88−29424
fibre optic pH sensor using liquid optrode joint 88−7908

opto-isolators continued
HCPL-2400 optocoupler IC 86−11065
Hewlett-Packard devices, radiation hardness charact. *(German)* 87−12317
Hewlett-Packard HCPL-3700, appl. in electronic car engine control system *(Italian)* 86−45787
Hewlett-Packard optocouplers *(German)* 86−48264
high isolation voltage opto-coupler from Telefunken, config. and charact. *(German)* 86−9680
high power optocouplers drive motors 88−30970
high speed opto-isolator for radar applications 87−46703
high voltage optocoupler 86−15575
high-speed opto-couplers, cct. configs. *(German)* 87−68278
HP optocouplers for industrial control and data communications *(Italian)* 86−30347
HV driver appl. cct. 86−34554
HV electro-optic driver with DMOS power FETs and optocoupling isolation 88−70563
HV fibre-optic isolator for CO_2 laser 88−20503
HV opto-isolator, using LEDs and photodiodes 86−29000
hydroacoustic data transmission, using differential opto-isolator 85−47867
improved PLC input circuit for process control 86−36334
industrial automation applications *(Italian)* 86−28982
isolated amplifier with minimal drift using opto-couplers *(German)* 86−14010
isolated optically coupled VCO 88−63571
isolation methods in A/D conversion *(Spanish)* 87−59648
LED-phototransistor system, analysis of dynamic behaviour of simple-optoelectronic sensors *(German)* 86−68401
light transmitter and receiver in opto-coupler *(German)* 85−31034
lightning protection, internal, optimisation using optoelectronic devices *(Hungarian)* 85−27096
linear opto-coupler, MOC 5010 85−12726
logic circuits interfacing 85−51052
low cost galvanic isolation amplifier 86−40922
Medelec RS232 data interface, optical isolation unit 85−48299
microprocessors and noise immunity *(German)* 85−11289
MOS switch composed of 2 MOSFETs and optocoupler, with high break-down voltage *(Japanese)* 88−57041
multi-function opto-isolator converter *(Polish)* 87−26204
NEC opto coupled MOS FET relay PF series, development *(Japanese)* 88−50470
noise parameters of optoelectronic decouplers 86−48276
operation an charact. 85−46261
optimal PLL circuits for speed measurement *(German)* 86−57726
opto-coupled solid state relays−advantages over electro-mechanical devices *(German)* 88−44410
optoarrays, miniaturisation of optoelectronic components *(German)* 88−26931
optocoupler appls. using advances in speed and voltage ratings 88−51674
optocoupler design, components and applications *(Danish)* 86−28988
optocoupler QC and reliability 85−62450
optocoupler triac drivers, dv/dt meas. 85−22737
optocouplers, advantages in local data networks *(Swedish)* 86−9700
optocouplers for radiation protection 86−68393
optocouplers with logic level interfaces 86−28985
optoelectronic components for fibre links, low loss, opto-isolators 85−14257
optoelectronic field direction switch for electromagnet 86−15579
Optologic family opto-coupler *(Spanish)* 87−46694
Optologic versatile optoelectronic logic circuit elements 86−42423
optron displacement sensor [geophysical application], geophysical equipment appl. 87−3749
optron phase detector, residual voltage at output investig. 87−54194
optrons and fibrons for utilization in high-voltagedevices 86−48265
OR202 and OR203 multiple element resistor optrons *(Russian)* 85−35632
photocoupler, 5 kV isolation voltage, conforming to British Standard 85−2153
photoresistance optoisolator, mathematical model *(Polish)* 87−12318
photoresistor-based optocouplers *(Russian)* 86−68403
photovoltaic optocouplers and phase control 87−46707
position sensing and domestic equipment control appls., optocoupler charact. *(Russian)* 86−70059
power supply control ccts., design aspects using opto-couplers *(German)* 88−24957
practical units and applications *(German)* 86−2950
pulse generators with diode opto-electronic couplers, design *(German)* 85−61162
pulse shaper with increased load capacity 88−32066
pulsed laser with optoelectronic control, synchronisation system 86−15747
quality aspects of optocoupler manufacture 85−35641
radio appl. 87−76531
Siemens light-link opto-couplers, design and charact. 88−14038
signal interfacing with opto-couplers 87−12311
single mode couplers for optical fibre sensor systems 88−4419
Sitac opto-triacs, charact. and appls. *(French)* 86−48263
SITAC used for automatic voltage switchover from 110 to 220 V 87−52368
slave device control appl. 86−14435
SMPS using light-link components in HF switching 88−44049
special components for professionals and hobbyists *(German)* 86−27405
switched power sets, voltage control by photocoupler *(French)* 85−11015
switching delay reduction in standard opto-couplers *(German)* 87−46678
switching time reduction *(Swedish)* 87−62961
switching time reduction to 1.5 μs 87−46696
target identification, aspect angles estimation by Kalman filtering 87−75845
test strategy, burn-in and temp. cycling tests *(German)* 88−45296
triac control by optocoupler, industrial heating and 3-phase control appls. *(French)* 87−67238
triac drivers, optically isolated, for AC power control by DC ccts. 87−74272
triac photocoupler, PB01AP series for 100/200 V AC lines *(Japanese)* 86−36339
triac-couplers, props. and appls. *(German)* 87−68279
triacs control using MOC 306X optocouplers *(French)* 88−8058
triax opto-coupler with integrated zero crossing cct., Motorola device series *(German)* 86−9679
TV RGB interfacing using opto-isolators 87−56375
ultrashort pulses isolation, using LV photoelectronic system 88−39999
very high isolation AC current measurement device 86−9681
voltage monitoring using optocouplers *(German)* 87−70734
zero-crossing detector cct. using dual optoisolator 85−33731
GaAs-SiO_2-Si monolithic optrons, cylindrical, light transmission 85−34669

optoacoustic effect *see photoacoustic effect*
optoacoustic spectra *see photoacoustic spectra*
optoacoustic spectroscopy *see photoacoustic spectroscopy*

chlorosulfonated polyethylene for low fire hazard offshore cables 88−55026
chlorosulfonated polyethylene/ethylene propylene terpolymer blends for cable insulation 88−55025
chlorosulphonated polyethylene, elastomeric insulating material study under extreme service conditions 88−71854
coaxial cable polymeric insulation, dielectric losses at various frequencies and temperatures 85−47397
combined insulation, relation between electric strength, structure and composition *(Russian)* 88−64841
combustion products, toxicity test examination, report 85−56039
complex ester based liquid impregnants, thermal ageing influence *(Slovak)* 86−15285
composite, ageing under combined stresses, elec. and microstruct. studies 86−68115
computer assisted selection/development of elec. insulating materials by AI 86−63508
cross-linked polyethylene high voltage cable insulation, dielectric ageing study 87−18432
cryogenic cables, taped insulation at liquid N_2 temps. 88−13620
cryogenic devices polymer insulation elec. strength, influence of thermocryogenic actions *(Russian)* 87−60708
cryogenic liquids, PD streamer interaction with polymeric films 88−44928
current ratings for PVC insulated power cables in multilayer groups 86−56438
cycloaliphatic epoxy impregnants of low viscosity for motor and generator insulation 86−62274
cycloaliphatic epoxy resin, ageing, irradiation environmental conditions effect 87−18430
cycloaliphatic resins, degradation processes under environmental and laboratory ageing 87−25724
cycloaliphatic resins for outdoor insulation systems, environmental ageing 85−40999
cyclohexane, degassed liquid hydrocarbon electron transport props. 85−56041
Delvin, polyacetal, insulator in surface discharge switch, charging charact. 86−47911
Delvin surface, discharge inception by cond. particles, proximity effect 85−23991
deteriorated XLPE cables testing, diagnostic device develop. *(Japanese)* 88−30373
dielectric with evaporated thin electrodes, chem. processes during elec. breakdown 87−53754
dielectrics, elec. resist., permitt., and dissipation, 0.1 to 60 Hz, 21 to 105°C 85−40949
distribution cables with XLPE insulation 87−4383
distribution networks, oil-filled polythene insulated cables *(Polish)* 86−25601
elastomeric polybutadiene sealing compound 86−62278
electric and mechanical breakdown, space environment effects simulation 87−18434
electric cable insulation/sheathing, flammability reduction and safety aspects *(French)* 85−11623
electric cables, PVC insulated, interaction with fires 85−21195
electric machine insulation, Friedelcraft polymer, polybenzimidazole and isocyanurate oxazolidone resin compositions 86−63500
electric machine organic insulation ageing and residual lifetimes calc. *(Slovak)* 86−61467
electrical insulating varnishes, solvent and solventless, comparison 87−18425
electrical performance of organic insulating materials as affected by environmental degrading factors 87−25726
electrical tape, matching substrates material to requirements 88−51078
electro-insulating polymer classification *(Romanian)* 88−1828
electronics insulation materials 87−32771
enamel coating, corona resistant turn insulation in AC rotatingmachines 86−66042

organic insulating materials continued
energy discharge capacitors, effects of dV/dt in polypropylene insulation films 87−22684
Envirotemp, elec. breakdown voltage of cond. samples, 30 to 180°C 85−56004
EPDM insulator weathershed materials, effects of accelerated weather ageing on dielec. props. 86−68128
epoxide insulation of Tokamak coils *(French)* 85−11615
epoxide-novolac block-copolymer, dielectric losses freq. and temp. depend. *(Bulgarian)* 86−21923
epoxy and glass fibre reinforced epoxy, moisture solubility and diffusion 85−22553
epoxy casting resin characts. and perform. tests for outdoor insulation use *(Japanese)* 86−61168
epoxy electrostatic powder-coated wire for transformers 86−2485
epoxy encapsulation compounds, bonding enhancement to Ag thick films 86−62961
epoxy filled with Al_2O_3 in SF_6 under DC stress, potential distortion from change on solid insulators 87−25681
epoxy insulation, aging at high frequencies due to partial discharges 87−67642
epoxy insulation, elec. ageing at elevated freq., determ. of dielectric strength 87−38595
epoxy insulation, potted, in nonuniform electric field, electrical strength *(Russian)* 87−11997
epoxy insulation study using X-ray computing tomograph 87−6946
epoxy insulators, SiC loaded, surface breakdown characts. 88−71855
epoxy mica paper insulation of resin-rich tape in large generators, appl. 86−70847
epoxy micaceous insulation, thermal and surface degradation due to discharge 87−6945
epoxy moulding resin impregnation and crack resistance tests using partial discharge inception voltage *(Japanese)* 86−58641
epoxy resin, dielectric breakdown under uniform and nonuniform fields 86−21921
epoxy resin, elec. props., γ-irradiation effects 87−25712
epoxy resin, filled, HVDC insulators in compressed-SF_6-insulated transmission lines, elec. charge accumulation 85−29372
epoxy resin, health hazards for cable installers *(Dutch)* 85−61012
epoxy resin, mech. stress effects on photocurrent and TSC 88−26617
epoxy resin, subjected to partial discharges, environmental testing methodology, temp. effect 88−71851
epoxy resin, tree growth at final stage of internal partial discharge degradation 86−28535
epoxy resin, treeing inception tests using needle electrodes 87−46248
epoxy resin as insulation in machines, properties *(Korean)* 87−78624
epoxy resin cast insulation life testing with maximum likelihood estimation *(Chinese)* 86−66886
epoxy resin casting insulating material, machining performance improvement 87−12003
epoxy resin composite moulding and processing methods *(Polish)* 86−20115
epoxy resin compound, transformer appls. *(Japanese)* 87−72205
epoxy resin insulation of HV transformer, microbreak detection by AE 88−33441
epoxy resin insulators, dielec. strength and ageing 87−25723
epoxy resin insulators, quartz-filled and unfilled, surface charge decay 85−29394
epoxy resin spacer, DC voltage stressed, accumulated surface charge, numerical anal. 87−67647
epoxy resin systems for SF_6 insulated substation components 86−68120
epoxy resins, $Al_2O_3.3H_2O$ filled, insulation performance under salt-fog conditions 86−47912
epoxy resins, complex permitt., freq. depend. 86−68113
epoxy resins, partial discharge resist., testing method 85−29399
epoxy resins, space charges and dielectric ageing 86−68039
epoxy resins microvoid formation and growth under mech. and elect. stress, meas. by laser scatt. 88−64860
epoxy spacer surfaces degradation characts., electron spectroscopy obs. 85−35254
epoxy spacers, influence of X-rays on partial discharges in voids 88−24536
epoxy spacers exposed to sparks and SF_6 arcing byproducts, surface characterisation 87−25638
epoxy support insulators in SF_6 insulated equipment, dielectric and partial discharge characts. 87−6947
epoxy surface, discharge inception by cond. particles, proximity effect 85−23991
epoxy-based thermosetting networks, elec. and thermal props., environmental degradation 88−38276
epoxy-insulated HV equipment, partial discharge location using ionising radiation 88−71839
epoxy-isocyanate resins, network polymers, as insulating materials 87−53826
epoxy-mica systems, electrical treeing, effect of barriers 88−64861
epoxy-tetrachloromethane mixtures, partial discharge meas., microcomputer-based system 85−37747
esters for EHV appls., synthetic Midel 7131 *(Italian)* 87−60710
ETFE fluoropolymer resin, extrusion foaming 88−24819
ethylene copolymers, elec. breakdown 87−53757
ethylene copolymers, electric breakdown and high-field conduction meas. 87−18380
ethylene polypropylene rubber insulated cables, DC and impulse breakdown strength props. 87−18431
ethylene propylene rubber, DC elec. cond., 20 to 120°C, effects of antioxidants 85−35251
ethylene-propylene elastomers for elec. insulating appls. 86−68122
ethylene-propylene rubber, effect of molecular structure on dielec. props. 88−26624
ethylene-propylene rubber, filled, TSC 88−30405
ethylene-styrene copolymer, higher breakdown strength, spectroscopy 88−20199
ethylene-styrene copolymer, insulating material, breakdown strength 87−38596
ethylene—aromatic monomer copolymers, elec. props. and breakdown voltages, new insulating materials 87−18379
extruded dielectric power cables, PD detect., location and charactn. 88−30382
extruded medium voltage cable materials and practices in the USA, Europe and Japan, survey 87−30208
extruded power distribution cable materials quality improvement trends 86−56437

organic insulating materials continued
extruded solid dielec. insulated power cables 86−70683
extruded synthetic cable construction, manufacturers' viewpoint *(Dutch)* 85−64915
extrusion welding of longitudinal seams in thermoplastic cable insulation 87−15325
FEP Teflon, thickness scaling for arc discharges onelectron-beam-charged dielectrics 86−35947
fibre-glass and polyurethane varnish tracking stability, climatic factors effects *(Russian)* 88−44924
filled epoxy casting resin, PD meas. with automatic measuring system 88−64838
fire hazard analysis of dielectric materials—a new approach 87−23288
fire hazards assessment of elec. insulating materials, and systems, development of guides 87−23287
fire involving polychlorinated biphenyl filled transformers, toxic contamination and causes 86−34001
fire tests, thermal, chemical and optical characteristics of electrical conductors *(Spanish)* 86−8540
fire tests, validity for cable insulation and sheathing materials 85−16719
fire-retardant cables for nuclear power plants, development 86−70691
fitted epoxy resin, filled, partial discharge detection and processing *(German)* 86−50209
flame retardant irradiated XLPE wire, super heat resistant *(Japanese)* 87−30239
flexible cable insulation for low and medium voltage range, radiation-cross-linking of elastomers 86−67547
fluid dielectrics for PCB replacement *(French)* 88−5747
Fluonlex, insulation material for wires and cables 86−14585
fluorocarbon gases, uniform field breakdown 85−35234
Formel NF dielectric fluid for nonflammable transformers 86−51677
FRPE, flame retardant polyethylene, insulation for intra-office termination cables 85−19998
fusion reactor coil insulator materials, neutron irrad., elec. resist., compressive fatigue 85−1794
gas filled gaps, aspects of surface elec. charge 88−68961
generator overheating faults in insulation, detection by gas and capillary chromatography 87−15686
glass fibre insulation, humidity effect on impulse strength characts. *(Russian)* 88−44926
glass fibre reinforced epoxy resin insulator, interface treeing phenomena study 87−18433
glass fibre reinforced plastic insulation for 3 T superconducting magnet design and development *(Korean)* 86−53923
glass fibre reinforced plastics, creep and on the fracture, conf., London, England (Apr. 1985) 85−44411
glass fibre reinforced plastics, overhead line insulators, brittle fracture and electrochemical failure 85−48606
Gruziya substation insulation, environmental protection using silico-organic hydrophobic coatings *(Russian)* 87−58145
gutta-percha tree for submarine telegraph cables insulation 88−33445
halato-telechelic polymers, thermally stimulated processes, elec. cond. props. 87−18436
halogen free cable insulation, NORYL PX 1766, for fire protection *(Italian)* 87−50802
halogen-free telecommunication cables, mould growth and metal carbonate deposition 88−25601
heat shrinkable transition joint between HV paper and XLPE insulated cables 88−55017
heat-shrinkable terminations for 66 kV polymeric cables 87−15358
n-hexane, liq., positive streamer propag. 85−50796
high solids wire enamels based on polyester resins 88−50455
high-polymer insulating materials at cryogenic temps., dielectric breakdown 87−6944
hot-line XLPE cables with water trees, diagnostic method 87−35642
HV, XPLE insulated cables, reliability information system *(Czech)* 87−35635
HV cables, insulation using paper and polymers 87−35646
HV cables, polyethylene insulation testing using resonance tester *(German)* 88−69621
HV co-axial cable in pulsed power system, polyethylene insulated, breakdown properties *(Japanese)* 87−9167
HV DC cables, LDPE and XLPE behaviour, press. wave propagation method *(French)* 88−42861
HV distribution station components, Polish materials quality and availability *(Polish)* 87−15839
HV glycerin-film insulation, production technology 86−15305
HV insulating systems, histogram for partial discharge signals 86−42018
HV insulation compounds, cleanliness determ. by laser inspection technique 85−15613
HV polymer insulation, partial discharges and electric strength at cryogenic temperatures 86−9337
HV polymer technology, appl. in electric train bushings and interiors 87−79135
HV polymeric insulated cable accessories, test methods 88−23539
HV polymeric insulated cables, terminations and jointing 87−21946
HV power cables, construction and installation, paper and XLPE insulated 87−42468
HV power capacitors, develop., testing 88−62554
HV rotating machine insulation, mica film with resin encasement 88−64844
HV transmission lines, polymer insulators, condition assessment *(Russian)* 87−57673
HV XLPE cable manufacture with continuous catenary vulcanising tube furnace 87−50820
hybrid polymer VPI insulation system with improved properties 88−64846
hydrocarbon liquids, prebreakdown phenomena 88−44906
hydrocarbon-halogenated elastomer blend for power cable insulation 88−55027
implanted cardiostimulators, polymeric insulation degradation *(Czech)* 87−14933
impregnant-polypropylene interactions in the all-film capacitor configuration 88−1049
impregnated paper vs. extruded synthetic cable selection *(Dutch)* 85−64916
impregnated paper vs. synthetic cable selection, technical and economic criteria *(Dutch)* 85−64914
impregnating agent wire enamel compatibility by bond strength evaluation 86−62317
impregnating resin insulating materials for stator coils, leakage mass eval. during curing *(Japanese)* 85−7119

organic insulating materials continued
impregnating technologies in the manufacturing ofelectrical machinery: an up to date assessment 86−70848
impregnating varnishes with high flashpoint 86−63510
impregnation study of porous elements of HV components 85−56030
improved nylon stability 86−62878
insulators for HVDC overhead lines, selection criteria 86−51081
isostatic polypropylene AC breakdown, temp. history influence 88−30387
Kapton, thickness scaling for arc discharges onelectron-beam-charged dielectrics 86−35947
Kapton insulation failure expts. simulating ECS solar array in-orbit power losses 87−77804
Kapton insulation for 3 T superconducting magnet design and development *(Korean)* 86−53923
Kapton polyimide film, wire insulation system 88−64009
KLPE, surface degradation characts. when exposed to partial discharges 87−25659
laminate spurs high-speed digital processing 87−53020
LDPE, aged, surface cond. 88−64864
LDPE, charge motion on moist surfaces 88−51085
LDPE, electrical tree nucleation 88−26568
LDPE, field-depend. water tree growth model anal. 88−71833
LDPE, gamma-irradiated, carrier traps polarity determ. by TSC meas. using temp. gradient 88−470
LDPE, initiation mechanism of electrical tree−chain scission by injection charge and role of oxygen 88−26625
LDPE, light emission during initiation of elec. trees 85−32180
LDPE, manufacturing process influence on behaviour under elec. stress *(French)* 88−39769
LDPE, near UV emission during electrical tree initiation 88−51055
LDPE, near UV emission during electrical tree initiation 88−51055
LDPE, probabilistic insulation life model for combinedthermal-electrical stresses 85−56026
LDPE, space charge accumulation meas. using field probe 85−32188
LDPE, space charge distrib., manufacturing process influence 88−51087
LDPE, space charge polarisation in divergent AC field, role of atmospheric gases 87−67646
LDPE, thermal stimulus current and space-charge meas. under needle plane electrodes 88−1827
LDPE, tree initiation, role of polymer interface 87−18426
LDPE, treeing resistance by organic additives 88−51056
LDPE, treeing resistance by organic additives 88−51056
LDPE, zero-field position determ. by thermally stimulated surface potential meas. with temp. gradient 88−469
LDPE cable insulation, gamma irradiation degradation, residual voltage 88−5355
LDPE films, charge trapping and cond., modification by additives 87−46268
LDPE films, corona and contact charged, surface charge decay 88−64852
LDPE insulation, space charge distrib., field probe techniques 88−71852
Lexan and Lucite, charge injection and resulting charge distribs. in commercially available polymers 88−29569
Lexan insulation, surface withstand voltage improvement in vac. 88−39768
linear low-density polyethylene for cable sheath *(Japanese)* 87−30238
liquid insulating materials for transformers and capacitors 87−25708
liquid-impregnated insulation characts. 87−25705
low noise type cast resin transformers for building power supply *(Japanese)* 87−72213
low-density polyethylene films, modified, electrophysical properties *(Russian)* 87−32769
low-freq. dielec. response meas. 86−68125
LPE cable insulation, moisture concentration measurement 86−65306
Lucite, PMMA, insulator in surface discharge switch, charging characts. 86−47911
LV switch insulation, polymer characts. and perform. *(Italian)* 86−47128
magnet wire dissipation factor−one layer at a time 88−50452
medium voltage XLPE cables, water trees in service aged and accelerated aged cables 87−15297
metallized paper capacitors 86−1416
mica-epoxy compound systems, AC dielectric breakdown test method of stator coils 86−21919
MIDEL synthetic ester replacing polychlorinated biphenyls in transformers 87−35976
MIND cables, polymeric insulation to prevent water ingress 87−15290
mineral insulating oils, consideration of paraffins or naphthenics *(French)* 87−1812
moisture effects on dielectric properties and water contents determ. 86−47918
Mol Pole integrated type cast resin transformer for outdoor use *(Japanese)* 87−72212
mono/dibenzyltoluene, elec. cond. and breakdown 88−26611
monoisopropyl biphenyl/polypropylene film HF high-power capacitors, materials consideration 85−34218
moulding compounds and hybrid technology 87−72829
moulding compounds for small-outline packaged devices, props. 86−62286
multi-layered insulation structures, field grading 88−44920
multilayer resin insulation impregnation using vacuum press. technique 86−42015
MV distribution, insulated overhead lines *(Spanish)* 88−5371
MV XLPE insulated cables, terminations, premoulded, Termini type 88−55056
Mylar, thickness scaling for arc discharges onelectron-beam-charged dielectrics 86−35947
NES 713 test for examination of combustion products of elec. insulation 88−64843
new organic binders for electrical insulating materials 85−40991
n-nonane liq. dielectric, gas form. under particle discharge 87−25633
oil filled cables, modern design and oil leakage prevention upto 180 kV 87−15306
oil rig submersible pumps, dielectric properties of power supply cable insulation, life testing 87−35639
oil-filled motors, polymer insulated conductors, thermobarometric pressure loaded, physical properties *(Russian)* 87−25702
oil-impregnated paper power capacitors, diagnostic methods 87−36087
oil-paper interface parallel to field, effect on breakdown voltage 88−64839
oil-paper power cables with synthetic oil, performance and elec. characts. 87−30215
oils, use in distribution transformers 86−68106
olefinic dielectric materials, vented water trees length distrib 87−16710
OMTI oil, incombustible for turbogenerators properties, influence on polymer materials for stator *(Russian)* 88−11172
organic insulating materials continued
overhead insulated wires tracking resist. eval., accelerated test method using *S*-type electrode 87−9183
paper-film power capacitors, diagnostic methods 87−36087
paper-oil insulation, influence of voltage prestressing on dielectric strength 87−25716
paper-oil transformer insulation, moisture equilibrium charts for drying characts. 85−16085
paraffin solid, ageing test in vac. under influence of elec. and mag. fields 85−40997
paraffinic oils, low-temp. physical behaviour 85−60240
partial discharge develop. and growth 88−64816
partial discharges, organic insulating materials, ageing processes model, spectrometry 87−53761
PCB, coolants, dielectric, transformers, properties and appl. *(Dutch)* 85−27454
PCB, props. and appls. in elec. engng. *(French)* 88−1831
PCB accidents, premises decontamination *(French)* 88−125
PCB anal. using gaseous phase chromatography *(French)* 88−1833
PCB analysis in the electrical industry *(French)* 88−1832
PCB and furan decontamination at IREQ HV laboratory, medical and protective measures 87−31262
PCB condensers in current compensation, DIN specification *(German)* 88−36737
PCB destruction, thermal, chemical, and biotechnical methods *(French)* 88−1836
PCB destruction by incineration *(French)* 88−1835
PCB leakage, preventive measures *(French)* 88−1834
PCB multicomponent polymers, predictive design 87−24553
PCB risks in transformers *(French)* 88−5743
PCB transformers, decision analysis for disposition 85−27486
PCB transformers, retrofill versus retrofit, technical and legal points of view 87−72219
PCBs in electrical equipment, toxicological data 85−114
perchloroethylene as substitute for PCB in transformer insulation 86−45484
perfluorocarbon liquid/plastic film. capacitor technology and HV dielec. system 85−34217
perfluorocarbon liquid/plastic film capacitors, material performance anal. 87−24499
perfluorocarbon-SF_6 ternary gas mixtures, impulse voltage breakdown characts. in coaxial cylinder gap 88−1823
performance studies of polymeric insulation for use in switchgear−the influence of moisture 88−69639
PET, surface pot. decay, elec. field-dipole interaction 85−41002
PET film, breakdown time lags after step voltage application 86−63482
PET film, low-freq. dielec. response meas. 86−68125
PET film, uniaxially drawn, dielec. strength, effects of heat treatment and mech. stresses 85−1769
PET films, heat treated biaxially drawn, dielec. and mech. props. 85−56028
PET insulating systems, dielec. strength and time-to-breakdown 88−1820
PET resins designed for electronic/electrical needs 85−29389
PFA, insulating dielectric, surface conductivity, moisture effects 85−45921
phenylacetylene resins as laminates for PCBs 85−6580
plastic film capacitors miniaturised 86−1406
plastic insulated electric power cables, DC pretesting methods *(German)* 88−23493
plastic insulating materials for LV electrical equipment, insulation testing 85−56036
plastic insulation for outdoor use 86−68104
plastic insulator design, materials tests 88−69025
plasticised PVC containing absorbed water resorption current and open-circuit voltage obs. 85−62133
PMMA, DC tree associated with space charge 87−67614
PMMA, elec. field and charge profiles of electron beam irradiated polymer to breakdown 88−29571
PMMA, electrical tree initiation, role of space charges 86−68030
PMMA, electron beam irrad., Kerr electro-optic field mapping meas. 87−53758
PMMA, electron beam irrad., spatial charge distrib. meas. using pulsed electroacoustic method 88−74578
PMMA, interrupted insulator surface, surfactants effect on flashover 85−1772
PMMA, leakage current, environmental contamination effect 88−71857
PMMA, meas. of space-charge distrib. using pulsed electrostatic technique 88−26620
PMMA, negative DC surface discharges, pulse-current waveforms 85−7108
PMMA, negatively charged, electrostatic discharges 86−68037
PMMA, subjected to ns pulses, impulse tree and discharge light study 85−1770
PMMA, surface discharges and flashover voltages, effect of contamination 86−68121
PMMA, trapped charge distrib. from electron irradiation, electro-optic meas. 88−51082
PMMA elec. trees with partial discharges, understanding 88−26582
PMMA fringing field effects in short-circuited volume-charged dielectrics 88−29570
PMMA insulators, 45° contact angle, breakdown under HV ns excitation, role of surface charging 85−29395
PMMA sheets, insulation failure by partial discharges, model 88−26581
PMMA surfaces, predischarge current and breakdown characts. in vac. and N_2 85−23989
Polish production of electrical insulation materials *(Polish)* 87−11998
polyamides, flame retardant additives, selection criteria for elec. appls. 85−120
polyamidoimide film, vacuum behavior 85−12451
polybutadiene resin system, modified for elec. and electronic appls. 86−63507
polycarbonate capacitor failure incident on NASA Voyager spacecraft 85−34215
polycarbonate-barrier insulation assembly, prebreakdown current pulses, surface charge densities, and flashover voltage 86−68119
polychlorinated biphenols in elec. engng., hazards disposal *(German)* 87−64653
polychlorinated biphenyl hazards of electrical equipment *(German)* 87−18423
polychlorinated biphenyl insulation for electrical equipment, compliance with EPA safety standards 85−10436
polychlorinated biphenyl management seminar, Seattle, WA, USA (Oct. 1985) 86−50759

organic insulating materials continued
polychlorinated biphenyl risks from transformer and capacitor fires and spills 86−61572
polychlorinated biphenyl risks from transformer fires and capacitors 86−61571
polychlorinated biphenyl sorption and attenuation in soil 86−44820
polychlorinated biphenyl vault transformer decontamination process 86−45467
polychlorinated biphenylene for elec. equipment insulation *(German)* 88−7772
polychlorinated biphenyls in electrical equipment *(German)* 87−22453
polychlorinated dibenzofurans and polychlorinated dibenzo-p-dioxins in transformers and capacitors 88−37281
polychlorobiphenyl, elec. cond. and EHD motion in a blade-plane electrodes assembly 85−50786
polyester, carbonate loaded, insulation eval. for outdoor appls. 85−1797
polyester capacitors, metallised, quality profile of range 86−1407
polyester fibre-epoxy resin insulator, prebreakdown space charge injection meas. 87−18383
polyester films, charged, return voltage obs. 87−18365
polyester foam insulating systems, elec. charactn. 88−64856
polyester foam mech. and dielectric characteristics *(Italian)* 86−9338
polyester glass fibre dielec. props., effect of ambient temp., volume and surface resistivity *(Russian)* 88−44925
polyester glass mat, insulation eval. for outdoor appls. 85−1797
polyester insulation on enamelled wire, influence of temp. and reduced press. 87−66610
polyester resin, stress wave generation by elec. discharges in voids 87−67613
polyester resin and composites charactn. by DSC and TGA 86−62279
polyethelene insulation for HV cables *(Croatian)* 88−68955
polyether ether ketone films, dielec. and cond. props. 87−46267
polyetheretherketone, elastomeric insulating material study under extreme service conditions 88−71854
polyethylene, AC elec., ageing phenomena, thermally stimulated discharge current meas. 87−46270
polyethylene, ageing phenomena at cryogenic temp., SEM study 86−68109
polyethylene, ageing phenomena at cryogenic temps., SEM study 85−35215
polyethylene, breakdown strength, thermal aging effects 85−40954
polyethylene, charge storage under high DC stress, effect of impurity ions 85−35256
polyethylene, chlorinated, voltage-reversal current, ion mobilities 85−56035
polyethylene, cross-linked, surface charging and discharging currents, effect of absorbed water 85−35261
polyethylene, cross-linking, residual voltage due to ionic space charge polarisation 86−28567
polyethylene, crosslinked, morphology influence on treeing, rel. to cable insulation 85−1799
polyethylene, degradation by combination of thermal ageing and γ irrad. 85−35249
polyethylene, dielec. breakdown, press. and temp. depend. 85−50790
polyethylene, dielec. loss and thermoluminesc. meas, in O_3/O_2 atm. 85−41003
polyethylene, dielec. props. degradation under combined γ-irrad. and thermal stresses 88−26605
polyethylene, elec. ageing effects 88−64863
polyethylene, elec. breakdown and high field conduction at high temps. 86−2453
polyethylene, elec. cond., 20 to 150 °C 88−71848
polyethylene, elec. cond., elongation effect 88−51088
polyethylene, elec. cond. between conductive fluid electrodes 85−41001
polyethylene, elec. prestressing, trapping centres and morphology 86−68036
polyethylene, elec. treeing props., effect of oxide layer at metal-polymer interface 86−68034
polyethylene, elec. treeing under hydrostatic press. 85−18499
polyethylene, electrically stressed HV power cable insulation, thermally stimulated discharge current spectra 88−55013
polyethylene, electrolum. under highly divergent field 85−29390
polyethylene, electron beam charged, space charge decay currents 87−16713
polyethylene, extruded, electrical insulation, thermal contraction and cracking at cryogenic temps. 87−1811
polyethylene, filamentary thermal breakdown, pre-breakdown current 86−2452
polyethylene, gamma irradiated, carrier traps polarity determ. by temp. gradient thermally stimulated current 88−13622
polyethylene, gaseous decomp. products due to high fields and partial internal discharges 85−35220
polyethylene, growth of electric trees 86−70687
polyethylene, heat treatment effect on gamma treeing stability *(Russian)* 87−74472
polyethylene, high and low density, dielec. γ relaxation 87−25623
polyethylene, high density, field-dependent injection 86−21925
polyethylene, high density, space charge, thermal pulse response 85−50808
polyethylene, high density, surface potential kinetics, trapping model 85−55988
polyethylene, high energy ion irrad., chem. changes, ESR study 88−26604
polyethylene, high-density, elec. conduction, space charge effects 86−15304
polyethylene, high-field dielec. dissipation factor 85−32190
polyethylene, internal structure and elec. behaviour of water trees *(Korean)* 87−74454
polyethylene, irradiated and moist surfaces, elec. cond. 88−33447
polyethylene, low density, additives for treeing resistance enhancement *(Korean)* 86−53856
polyethylene, low density, crosslinked, insulation, temp. effects 86−2454
polyethylene, low density, elec. cond., hydrostatic press. effect, rel. to breakdown mechanism 85−35260
polyethylene, low density, electric breakdown and high-field conduction meas. 87−18380
polyethylene, low density and crosslinked, for cable insulation, morphology study 85−1800
polyethylene, low-density, elec. discharges and tree channels under impulse voltages 87−18374
polyethylene, low-density, oxidised, reversal TSC 86−28569
polyethylene, low-density, time-depend. space charge conditions and initial breakdown 85−35224
polyethylene, low-density, water tree struct., gas permeation study 85−1771
polyethylene, oil production power cable insulation technological quality prediction *(Russian)* 86−33890
polyethylene, partial discharge current meas. in VLF range 86−68040
organic insulating materials continued
polyethylene, partial discharge detection and processing *(German)* 86−50209
polyethylene, partial discharge resist. in air and inert gases, effect of antioxidants 85−35257
polyethylene, PD meas. with automatic measuring system 88−64838
polyethylene, perform. and process eval. for telephone cable manufacture 88−53112
polyethylene, photocurrent transients 86−15303
polyethylene, prebreakdown nondestructive current pulses 85−56032
polyethylene, space charge accumulation under divergent field, TSC study 86−68019
polyethylene, space charges and dielectric ageing 86−68039
polyethylene, thermally stimulated depolarisation cond. and luminesc., simultaneous meas. 88−51083
polyethylene, tree initiation under square pulse conditions, space charge effect 86−28566
polyethylene, tree propag., stimulated monochannel meas. 86−68033
polyethylene, treeing inception tests using needle electrodes 87−46248
polyethylene, treeing propag. and breakdown mechanisms study 86−68046
polyethylene, voltage endurance test, meas. of treeing inception time and time to breakdown 85−1796
polyethylene, water tree growth, anion penetration 87−25644
polyethylene, water tree initiation mechanisms 86−41999
polyethylene, water tree propag., influence of mol. wt. 86−68045
polyethylene, water tree propag., salt soln. effect 86−47915
polyethylene, water treeing, microcavity distrib. and prebreakdown 86−68044
polyethylene, water treeing studies in dioxane-water mixtures 85−1774
polyethylene, water treeing under DC and AC voltages 87−25642
polyethylene, water-treeing, chemical structure and additives effects 87−25646
polyethylene and polyethylene/ethylene-vinylacetate copolymer laminated films, anomalous discharge currents 85−40953
polyethylene and XLPE insulation treeing in HV cables 87−42469
polyethylene cable insulation, ageing charact., elec. and IR spectra meas. 88−26606
polyethylene cable insulation, ageing process, struct. and elec. props. changes 85−38516
polyethylene cable insulation, ageing study using IR spectroscopy 86−68110
polyethylene cable insulation, nondestructive anal. using microspectrophotometry 85−29393
polyethylene cable insulation, struct. changes caused by thermal ageing 87−25720
polyethylene cable insulation, surface partial discharges effect on endurance and short-time breakdown 86−68108
polyethylene cable insulation charactn. methods 87−25718
polyethylene cable insulation containing water trees, dielec. response 85−1798
polyethylene cables tested in service-simulated conditions, partial discharge 86−67549
polyethylene copolymerised with various monomers, high field cond. and carrier traps 88−51081
polyethylene degradation by irradiation and thermal ageing 86−28565
polyethylene electric breakdown, electrical trees inception and growth, partial discharge phenomena *(German)* 85−23998
polyethylene electrical treeing, effect of absorbed O 85−56027
polyethylene film, effect of heat-treatment and mech. stress on dielectric strength *(Korean)* 88−6534
polyethylene film, highly elongated, surface potential decay and residual voltage 87−38626
polyethylene film, residual voltage charact. due to trapped charge carriers 86−70184
polyethylene film, short-term elec. strength 88−64849
polyethylene film insulation, dielectric breakdown in liq. nitrogen 86−47921
polyethylene film-liquid N_2 composite insulation, breakdown charact. 88−26569
polyethylene films, charged, return voltage obs. 87−18365
polyethylene films, low density, opposite-polarity residual voltage 86−2448
polyethylene films, residual voltage, electron irradiation effects 86−47914
polyethylene films, surface modification by corona discharge 87−25637
polyethylene foam insulation, permittivity analytical description *(Russian)* 85−62135
polyethylene HV cable impulse testing, resonant overvoltages 85−32185
polyethylene HVDC insulators in compressed-SF_6-insulated transmission lines, elec. charge accumulation 85−29372
polyethylene insulated cables, premature failure prevention *(German)* 88−36845
polyethylene insulated cables, welded joints morphology study using SEM, TEM and light microscopy 87−15324
polyethylene insulated conductors, linked, reticulation density meas. using IR spectroscopy *(German)* 86−63501
polyethylene insulated extruded cables, dielectric loss tangent meas. at cryogenic temp. 85−56037
polyethylene insulation, treeing behaviour and detection 86−47917
polyethylene insulation extruded for supercond. cable 86−70694
polyethylene insulation lifetime rel. to temp. and pulse frequency *(Russian)* 88−7773
polyethylene insulations, for power cables, effects on performance of chemical additives *(German)* 85−53329
polyethylene insulator, prebreakdown current meas. 85−23987
polyethylene IR absorption spectra modification by elec. fields 87−25717
polyethylene materials for insulating and jacketing appls. in power cables 87−42480
polyethylene model insulations, SF_6 diffusion influence on channel application time *(German)* 85−50804
polyethylene power cables, size effect in testing breakdown voltage 85−32184
polyethylene resistivity, ageing by partial discharges 88−71858
polyethylene simultaneous measurement of microscopic image and discharge pulses at the moment of electrical tree initiation 88−20200
polyethylene surface, discharge inception by cond. particles, proximity effect 85−23991
polyethylene tape/oil cable insulating system subjected to elec. and thermal stress 88−68960
polyethylene thin films, low temp. plasma polymerisation *(French)* 86−13819
polyethylene water treeing and ion injection 85−32177
polyethylene water treeing using the water needle method: the influence of the magnitude of the electric field at the needle tip 88−64840

organic insulating materials continued
polyethylene-(ethyl-vinyl acetate copolymer) interface, elec. props. 87−67648
polyethylene-ethylene vinyl acetate composite insulating system, elec. props. 86−68100
polyethylene-insulated cables, weathering props. 88−61936
polyethylene-ionomer blends, TSC peak assignment 88−64851
polyethylene/ionomer blend, TSC, poling temp., time and voltage effect 88−51084
polyethylene/ionomer blends, insulating material, aging characteristics 87−25713
polyethylene/oil insulation system, uniaxially oriented, air bubble movement and stability under elec. stress 85−29397
polyimide, filamentary thermal breakdown, pre-breakdown current 86−2452
polyimide, heat treatment study 86−66867
polyimide, thermostable polymers, appls. for electronic devices *(French)* 87−17875
polyimide, transient current, dielec. relax. and elec. cond. meas. 88−51086
polyimide films, anisotropy of photoconduction 88−64866
polyimide films, charged, return voltage obs. 87−18365
polyimide films, dielec. props., effect of equal biaxial stretching 86−68020
polyimide films, prebreakdown currents due to filamentary thermal breakdown 88−1829
polyimide films, uniaxially-stretched, conductivity and dielec. losses 87−25624
polyimide films for insulation, properties and modifications 86−62276
polyimide flow via profiling for VLSI multilevel metallisation 87−1706
polyimide multilayer solves surface mounting problems 85−11717
polyimide PCB processing 86−47184
polyimide polymer coating effect on residual currents of MOSFETs 85−55836
polyimide resin insulator for semiconductor devices 88−51079
polyimide screened tape cable 87−6178
polyimide taped air impregnated cable, partial discharge perform. assessment for radioactive environment 88−23497
polyimide thin films, interdiffusion 87−23759
polyimide wire insulation, hydrolysis temp. depend. 85−35248
polyimide-insulated wire for aerospace systems, environmental degradation 85−1793
polyimide-substrate bonding studies using γ-aminopropyltriethoxysilane coupling agent 86−62283
polyimide/Si_3N_4 trench isolation 85−40819
polyimides, appl. as insulators in semicond. technology 86−1943
polymer, in-situ insulator surface charge measurements in dielectric bridged vacuum gaps using an electrostatic probe 88−69018
polymer, water sorption effects on props. 85−32213
polymer, water tree growth mechanism, role of ions 87−53755
polymer cable insulation, topological mapping of disruptive discharges in extruded dielectrics. I. Mapping of the discharge path 88−30390
polymer cable materials, combustion gas toxicity tests chem. eval. 88−68958
polymer concrete, high voltage insulation, develops. 86−63504
polymer concrete insulator for power distribution 85−32210
polymer dielectric aging in constant elec. field with suppressed partial discharges *(Russian)* 87−60696
polymer dielectric breakdown, ageing and prebreakdown theory *(French)* 86−35928
polymer dielectric destruction in strong elec. fields, temp. drop eval. *(Russian)* 88−64803
polymer dielectric protection from mineral oil in cables 86−70685
polymer dielectrics, charge injection and transport 88−51043
polymer film, elec. breakdown by partial discharges in liq. dielectrics 85−45913
polymer film coated magnet wire, cure determ. 86−62280
polymer films, neutron irrad., radiation-induced cond. meas., nuclear reactor appls. 88−51074
polymer films as electrical insulators evaluation of ageing effects measurements 86−62277
polymer flashover potential, surface anal. using ESCA 87−18391
polymer foil polarisation, charactn. by DC transient meas. *(Hungarian)* 88−26609
polymer insulated power cables testing, HV laboratory *(French German)* 88−18448
polymer insulating foil releasement investigation using transient current anal. *(Hungarian)* 88−20193
polymer insulating materials for power overhead lines, life testing *(Russian)* 86−35946
polymer insulation lifetime prediction from internal electric field intensity *(Russian)* 87−67641
polymer insulation of geophysical cables, elec. characts., storage conditions and operating factors effect *(Russian)* 85−64912
polymer insulation pyrolysis testing, use of thermal imaging for the development of materials to withstand extreme service conditions 88−64868
polymer insulator, V-t characts. and elec. discharge limitation in voids 86−68107
polymer insulators, carrier injection, space charge, and elec. breakdown 87−67612
polymer insulators, nonequilib. charge carrier transport, stochastic description 87−67643
polymer insulators for nuclear power plant components, environmental influence on radiation ageing 86−70755
polymer insulators with organosilicon resin cover, electrical characts., comparison with glass and porcelain *(Russian)* 87−4419
polymer materials, tracking and erosion stability testing *(Russian)* 85−54549
polymer moisture swelling, bending-cantilever method 85−22554
polymer tape dielectrics, development and design parameters for flexible supercond. cables 88−55029
polymer thin films, electrical breakdown, mass spectroscopic studies 86−63481
polymer water treeing, parameters affecting field enhanced ionic migration 88−64862
polymer water treeing phenomena, progress in understanding 85−32175
polymeric, cable insulation, additives losses due to diffusion 85−32186
polymeric, treeing due to mechanical processes in the long term degradation of solid insulation 88−64859
polymeric and elastomeric insulation materials, compounding 88−33442
polymeric cable insulation, gas chromotographic analysis of trace elements 86−62312

organic insulating materials continued
polymeric cable insulation containing water trees, dielec. strength recovery study 86−67548
polymeric cables for 33 kV distrib. systems, conductors, insulation, moisture barriers 87−15286
polymeric compounds, qualitative estimation by NMR spectroscopy 85−1791
polymeric dielectrics, hot electron transport and elec. breakdown 85−40971
polymeric insulated HV cables, partial discharge tests using 3-phase coupling unit 88−17166
polymeric insulated power cables, extruded, elec. ageing determ. using dielec. loss meas. 87−46271
polymeric insulated power cables, influence of water on service performance 87−15292
polymeric insulating films, residual voltage polarity 87−6948
polymeric insulating material, dielec. breakdown strength rel. to lamella struct. 87−25658
polymeric insulating material performance in salt-fog, X-ray anal. of filler dispersion 87−46272
polymeric insulating materials, AC surface flashover voltage, effect of surfactant coating 86−47883
polymeric insulating materials, factors influencing of performance in contaminated environments 88−51091
polymeric insulating materials, solid breakdown process and pre-breakdown current 86−28537
polymeric insulating materials, space charge effects on electric field strength *(German)* 86−28568
polymeric insulation, dielec. breakdown, review of Japanese research 87−25630
polymeric insulation, intrinsic dielec. strength concept 88−39766
polymeric insulation, treeing initiation testing using needle electrodes 86−47919
polymeric insulation, water tree growth appl. of instrumental neutron activation analysis 88−13624
polymeric insulation, water treeing, failure and growth mechanisms 87−25648
polymeric insulation, water treeing, ion penetration 87−25645
polymeric insulation, water treeing and morphology 87−25643
polymeric insulation, water treeing study 86−47920
polymeric insulation tracking obs. *(Korean)* 86−47916
polymeric insulators, anomalous breakdown phenomena, effect of ambient temp. 85−40966
polymeric insulators, radiation effects, Japanese research 87−25706
polymeric materials, toxicity of combustion products 85−118
polymeric power cable insulation, dielectric ageing in wet locations 87−15296
polymeric prestressed insulator surface flashover, ageing and breakdown expts. 88−64842
polymers, acidic gas emissions, influence on electronic components 88−64855
polymers, carrier injection, space charge and elec. breakdown 86−68029
polymers, charging by particle stream impact *(German)* 85−35966
polymers, correlation of low voltage tracking behaviour with chemical structure 88−20197
polymers, elec. cond. and breakdown phenomena 87−25703
polymers, electrochemical method prep. insulating appls. 86−66866
polymers, filled, dielec. props. modification rel. to insulation appls. 88−64801
polymers, flashover form., effect of environmental contamination 86−63511
polymers, heat-shrink technology advances rel. to insulation appls. 88−63391
polymers, high field phenomena in solid insulating materials 88−26616
polymers, highly conjugated, dielec. props. 86−63478
polymers, insulating, elec. conduction, chem, structure effects 86−21924
polymers, interactions with water and suitability for use as electrical insulators 87−60709
polymers, laser excited fluorescence probes to study insulator damage 88−20198
polymers, LV tracking behaviour, correl. with chem. struct., TGA study 88−64854
polymers, polarisation effects as function of humidity 88−51045
polymers, radiation crosslinked, deployment in electronic and electrotechnical equipment *(Polish)* 85−17003
polymers, return voltage build-up 88−26603
polymers, space charge fields meas., progress 88−29572
polymers, surface flashover inhibition in vac. 87−38623
polymers, synthetic, elec. insulating solid, present status and future trends 88−51080
polymers, thermal ageing, effect of humidity 86−68112
polymers, vacuum-induced changes in dielec. and elec. cond. processes 87−38628
polymers, water tree inhibition using barbituric acid derivatives 87−53756
polymers, water tree struct. rel. to dielec. breakdown 85−1778
polymers, water treeing in cable insulation−are laboratory tests meaningful? 88−68962
polymers, water treeing rel. to morphology and microstruct. 87−53760
polymers, water treeing thermodynamics 88−26567
polymers, water treeing thermodynamics 86−68031
polymethylmethacrylate, treeing propag. and breakdown mechanisms study 86−68046
polymide insulator, prebreakdown current meas. 85−23987
polyolefin insulating materials, bow-tie and vented-tree formation 87−25647
polyolefin insulation oxidative degradation due to surface influences 87−53827
polyolefin insulators, water tree degradation, review 85−18513
polyolefin-insulated cables, extruded, reliability 86−27656
polyolefins with amine additives, low temp. losses, expt. study 85−1802
polyphenylacetylene films prep. by photochemical polymerisation, structure and elec. props. 88−64867
polyphenylene sulphide for injection moulding interconnection insulators, new developments 87−5519
polyphenylquinoxaline, thermostable polymers, appls. for electronic devices *(French)* 87−17875
polypropylene, cold plasma treated, physicochem. characts. 85−29392
polypropylene, dielec. props. rel. to struct. 85−35258
polypropylene, insulating dielectric, surface conductivity, moisture effects 85−45921
polypropylene, multilayered insulation structures, influence of electrode area and weight 87−25715

organic insulating materials continued

rubber insulators, cause of tracking induced abnormal drop in surface resist. 85−32209
rubber termination and joints for cables up to 36 kV 87−15348
semicrystalline dielectric cable insulation, differential scanning calorimetry for analysis 86−62314
service-aged, water-treed, XLPE insulated URD cables, voltage breakdown strength, thermal load effects 87−50812
silane XLPE, electrical breakdown study 87−11981
silicone, HV insulating material for spaceborne electronics, failure prevention 86−38887
silicone oil, direct breakdown voltage for highly nonuniform fields, additive effects 88−33453
silicone resin sheathed polymer line insulators, field trial results *(Russian)* 87−4424
silicone rubber, silicone vapor emission and contact failure due to formation insulating, Si compounds 88−38806
silicone-based thermally conductive insulating materials 85−29388
solid insulation cable manufacture, polyethylene crosslinking methods 88−36848
solid insulators in air and vacuum, electric breakdown, spark conditioning 85−23999
solid polymers, status and future trends 87−18428
solvent-free polyurethane elastomers for electrical equipment insulation and sealing *(Polish)* 87−74473
solventless epoxy impregnation materials for motor windings *(Polish)* 87−12002
solventless UP resin impregnation of elec. machines for insulation 88−43156
solventless varnishes versus solvent varnishes, comparison via systems testing 86−63506
spray insulation polymers, for current conducting busses, comparative charcts. 85−40994
stator coil impregnation using thermal resistant insulating resins *(Japanese)* 85−7118
structural thermoplastics, coloring by pigment concentrates 88−33444
submersible pump cables with polypropylene insulation, IEEE standard 86−51014
SULTAN superconducting magnet epoxy resin insulation system *(Italian)* 86−58718
SUNFLON 200 fluorinated polymer insulated flexible wires, H grade *(Japanese)* 88−68953
superconducting magnetic wire, effects of thermal and mechanical loads on enamel insulation 85−41082
surface flashover in vac., influence of electron impact energy and dielec. permitt. 85−40961
surface tracking deterioration detection using light sensors 88−1830
switchgear moulded insulation, temp. effects 88−69640
synthetic ester as transformer insulating fluid *(Italian)* 88−43245
synthetic insulation for power cables, 63-400 kV 86−70682
synthetic organic insulation and dielectrics, radiation effects response data 85−18512
synthetic polymers for insulation: PVC, butyl rubber and chloro-sulphonated polyethylene 88−20191
syntoflex new electrical insulating material based on polar polymer films and elastomer coatings 85−40989
Teflon FEP foils, positive charging by low energy electron irrad. 85−40996
Teflon-fluorinated ethylene propylene foil, corona charging with grid, expt. study 86−68024
telecommunication earth and 20 kV cable laying in marsh, polyethylene outer jacket tolerance *(German)* 87−21959
testing, volt-time charcts. of air gaps stressed by short tailed lightning impulses 86−68082
tetrachloroethylene insulated transformer arc failure by-product toxicity 86−51700
thermally stimulated elec. meas. of insulator space charge zero-field plane position 88−13621
thermoplastic elastomer flat cable with matched impedance transmission-line options 88−1060
thermoplastic insulation for flat cables *(Italian)* 88−57023
thermoplastics for connector bodies 87−73165
thin wall flame retardant non halogenated insulation for indoor telephone exchange wiring 88−26613
TIBER II, composite insulation materials for small, superconducting, ignited tokamak 88−64848

organic insulating materials continued
toxic hazard evaluation of plenum cables 86−70669
tracking breakdown, associated discharge light emission charact. 87−25700
transformer and capacitor organic insulation, trace combustion products 86−51701
transformer insulating material degradation, accelerated tests 88−26608
transformer insulation Kerr electro-optic field and space charge mapping meas. 87−43171
transformer oil streamer mechanisms under AC voltage conditions 87−25652
transformer oils, oxidation by-products influence on elec. props. 87−30748
transformer PCB insulation disposal by incineration 87−25701
transformer thermosetting winding insulation testing 86−56802
treeing in polymeric insulation of power cables, detection and anal. 88−55018
trees initiation in dielectrics, influence of vibration 87−18424
triple extrusion cable superiority over graphite-coated insulation *(French German)* 87−35649
UGILEC C101, impregnant for HV power capacitors 85−29398
UHV XLPE cables, develop. of extruded and molded straight joint *(Japanese)* 87−30237
ultrasonic welding for reconditioning polymer cable insulation 87−15326
underground cable insulation using XLPE, installation and failure 88−36842
uniaxially oriented polyethylene tape-oil insulating system, behaviour 88−5360
unsaturated solvent-less polyester resins for impregnation of insulation, tests, long-term eval. 88−50454
UP6-104 polymer insulating material for HV power devices 88−20194
UV curable dielectric for membrane touch switches and flexible circuitry, adhesion and failure modes 88−1814
vacuum pressure impregnation and resin manufacture 86−68096
vacuum pressure impregnation resin, General Electric's third generation 86−63505
vapour HF glow discharge characteristic obs. *(Korean)* 86−35936
varnish on magnet wire, compatibility eval. using dielectrometry 88−25607
varnishes, insulating, solvent and solventless, processing comparisons 88−64845
VILAD-13-1 and VILAD-14 polyurethane compounds, heat resistance comparison eval. 87−53823
VLSI polyimide interlevel dielec. layers, book contrib. 88−7675
void formation in XLPE at high temperatures 86−68126
Voltalit epoxy spacers in SF_6, HV cable insulation, DC conductivity obs. 86−18827
VPE medium voltage cable with water tree retarding insulation *(German)* 87−42473
water resistant polymers for cable insulation *(German)* 88−36857
water tree suppressive XLPE cable, develop. 86−39161
water treeing, mech, damage theory validity 85−32178
water-tree growth in styrenic dielectrics 88−51057
water-tree-retardant XLPE cables 85−38513
wet, polymer, organic dielec. performance, mixture model 87−18364
wet polymer, dielec. performance, mixture model 87−18364
wire and cable insulation using high performance polymers 87−50800
XLPE, accelerated oxidation 85−32187
XLPE, cable insulation, water treeing, microstructural effects 87−25641
XLPE, charge storage in irradiated polyethylene, insulator breakdown 87−25727
XLPE, chemical reaction when exposed to high temp. elucidation 88−30388
XLPE, cure method influence on sol content and physical structure 88−5359
XLPE, degradation by partial discharges, synthesis products 87−25636
XLPE, dielectric properties modification due to corona discharges, humidity effects 87−25639
XLPE, economic use of plastics for power cable production 87−50815
XLPE, high field ageing, TSDC spectra. study 86−68111
XLPE, high-field polarisation behaviour 88−30384
XLPE, hydrated and elec. stressed in power cable, dielec. behaviour 88−30383
XLPE, processing variables influence on morphology and dielec. strength 88−30389
XLPE, steam-cured, influence of microvoids on impulse breakdown voltage, expt. study 86−68048
XLPE, thermally stimulated surface pot. meas. using temp. gradient, trapped carrier polarity 87−67645
XLPE, water trees grown needle water electrodes, charact. 86−70686
XLPE and EPR power cable insulation, water tree resistance 87−15291
XLPE and ethylene-propylene diene rubber, thermal response of cable insulation, shield and jacket materials aged at 130°C and above 87−30214
XLPE and paper insulated cables, factors influencing cable choice 87−15305
XLPE and polyethylene, DC cable insulation conductivity as a function of temperature, polarity changes and time 88−30386
XLPE and polyethylene, high field conduction as a function of temperature in cable insulation for DC operation 87−30216
XLPE and polyethylene insulation, constant visualisation of water trees using scanning *(German)* 87−50837
XLPE blended with ionomers, charging behavior 88−26621
XLPE breakdown voltage, effect of temp. in presence of water trees 85−32179
XLPE cable, AC breakdown strength improvement by adding N-vinyl carbazol 88−30385
XLPE cable, water-treed, exam. by neutron activation anal. 86−68097
XLPE cable accessories 87−15360
XLPE cable insulation, high-performance liquid chromatographic analysis of trace elements 86−62313
XLPE cable insulation, manufacturing methods 88−33443
XLPE cable insulation, microwave freq. dielec. study of halos 88−63393
XLPE cable insulation, partial discharges and elec. ageing 87−42481
XLPE cable insulation, single impulse voltage breakdown charact. at elevated temps. 87−15301
XLPE cable insulation, water treeing mechanisms 85−35255
XLPE cable with added N-vinyl carbazole for improved voltage endurance *(Japanese)* 88−55008
XLPE cable with laminated waterproof layer 85−32181
XLPE cables, 66 kV, design, installation and operation in Bahrain 87−15308
XLPE cables, ageing mechanism, chem., phys., and microstruct. changes 87−25721
XLPE cables, DC withstand voltage, temp. depend. 86−70676
XLPE cables, field aged and containing water trees, impulse life tests 87−30212
XLPE cables, service aged, insulation charact. and breakdown strength 87−30209
XLPE cables, water tree growth meas. 88−68963
XLPE cables cross-linking, on-line calcs. 87−50816
XLPE develops. for long life cables 87−78148
XLPE distribution cable system, elevated temp. operation 86−70672
XLPE extruded cable insulation, low-voltage, impulse failures, thin tape exam. 85−1801
XLPE for electric insulation, CIM systems 86−63502
XLPE haloed cable insulation, TSC 85−32189
XLPE HV cable insulation, elec. breakdown 87−15300
XLPE HV cable insulation, partial discharge detection *(Czech)* 87−35636
XLPE HV cables, partial discharge location in manufactured lengths *(Czech)* 87−78138
XLPE HV cables and accessories, joints and termination 87−15357
XLPE insulated cable models, aging tests from combined stress viewpoint 87−71669
XLPE insulated cable models, voltage endurance 85−32183
XLPE insulated cables combined-stress behavior 86−70688
XLPE insulated cables for long circuit connections in London, 66 and 132 kV 87−15307
XLPE insulated cables manufactured by vulcanizing system 88−36843
XLPE insulated extruded cables, dielectric loss tangent meas. at cryogenic temp. 85−56037
XLPE insulated HV cables, optimal partial discharge measuring systems *(German)* 87−57644
XLPE insulated HV cables, partial discharge meas. *(German)* 88−23500
XLPE insulated HV cables, persistent polarisation and elec. ageing 88−64857
XLPE insulated overhead power lines of 20 kV *(German)* 88−23520
XLPE insulated power cables, current development and future trends 88−42852
XLPE insulated power cables, effect of water trees on life span 87−15293
XLPE insulated power cables, electric breakdown and long-term charact. *(Japanese)* 87−35651
XLPE insulated power cables, impulse breakdown strength improvement *(Japanese)* 88−68952
XLPE insulated power cables, influence of water trees on treeing breakdown phenomena 87−15295
XLPE insulated power cables, preparation required for correct cable jointing 88−23494
XLPE insulated underground cable, electrochemical anal. of halo phenomena 88−68933
XLPE insulated vinyl sheath cable for DC HV, breakdown under polarity reversal, space charge effect 87−30191
XLPE insulating and jacketing compounds for wires and cables 85−23178
XLPE insulating material for HV cables, develop. trends 88−55024
XLPE insulation, breakdown strength, effect of C particle agglomeration in semicond. material 88−71849
XLPE insulation, water tree retardant 86−53857
XLPE insulation, water treeing 87−25640
XLPE insulation, water treeing suppression *(Japanese)* 87−25711
XLPE medium voltage cable performance, factors 87−21944
XLPE medium voltage cable used in France, insulation ageing tests 86−70689
XLPE miniature cables water tree degrad., effects of freq. and temp. 87−21945
XLPE or PE power cables, short-circuit impedance nonlinearity due to Cu-wire screens 87−15282
XLPE power cable insulation, water tree retardant compounds 87−15294
XLPE power cables, 72 kV dry terminators 87−15359
XLPE power cables, insulator diagnostic methods 87−35640
XLPE power cables, test methods 87−35641
XLPE power cables, thermal and mech. performance under overload conditions, Al screens 86−51019
XLPE service aged cable insulation, oxidation and water tree formation 88−5361
XLPE surface, degradation patterns after exposure to partial discharges 85−29401
XLPE treeing phenomena, morphological study 85−32176
XLPE versus EPDM as insulation for distrib. cables, aging and water treeing tests 88−42857
XLPE water tree resistant insulated cables, comparative tests *(German)* 88−48578
XLPE-insulated cable models, progressively-censored aging tests 88−71850
XLPE-insulated power cables, material design improvements 87−25707
Al sheathed cables, protective coverings, soil burial test *(Japanese)* 87−30204
O_3 resistant materials for wire and cable 86−12436

organic semiconductors
aluminium phthalocyanine surfactant cell, photoelectrochem. charact. and behaviour 85−27595
aluminium phthalocyanine thin films, photoelec. props. *(Japanese)* 87−46645
amino group containing film exposed to organic vapours, mass and potential changes obs. 86−55884
anthanthrone-Ag struct., charge carrier photogeneration *(Japanese)* 87−18800
anthracene:2,3-dimethylnaphthalene mixed cryst. pulsed photocond. and antitraps 85−11969
anthracene, cluster form. and film deposition, electrolum. cell prep. 85−10806
azo-silicon compounds, elec. resist., Seebeck coeff., Si content effect 85−55478
benzimidazobenzophenanthroline type ladder polymer film, ion implantation doping, elec. props. 88−26043
biochips, research at Gentronix, Maryland, USA *(German)* 85−6613
2,2 bipyridene, carrier drift mobility and band struct. determ. suitability for photovoltaic devices 86−27967
bis(phthalocyaninato)lutetium, intrinsic molecular semiconductor based FET parameter determination, comparison with Si based device *(French)* 88−57638
bis-5,6-diseleno-11,12,-ditellurotetracene bromide (chloride), struct. and elec. cond. 87−24814

organic semiconductors continued
book 85−22152
carbazole-based polymer semicond., carrier photogeneration and recombination *(Russian)* 85−29701
conducting polymer, 1D semiconductor, nonlinear optical susceptibilities 88−72422
conducting polymer quasi-one-dimensional systems, p-n junctions and Schottky barriers 86−58312
conference, Balatonszeplak, Hungary (Sept. 1986) 87−43742
copper phthalocyanine, elec. conduction 85−18112
copper phthalocyanine, intrinsic and injection conductance, rel. to π-MO overlapping 86−21164
copper phthalocyanine, photovoltaic props., plasma treatment effects 88−14007
copper phthalocyanine, pref. oriented film prep. by cluster beam technique, Schottky diode prep. 85−10806
copper phthalocyanine evaporated thin films, mobility and trap concentration 87−1223
copper phthalocyanine films, NH_3 gas detector appls. using elec. cond. meas. 85−14775
copper phthalocyanine Langmuir-Blodgett film based vapour-sensitive chemiresistor 85−58661
copper phthalocyanine polymer films, form. by double source evap. 86−20094
copper phthalocyanine-acrylate films, photocond., xerographic photoreceptor appls. 86−68382
copper phthalocyanine-anthanthrone heterojunction, charge carrier photogeneration *(Japanese)* 87−18800
copper phthalocyanine-PMMA corona charged layers, surface pot. decay characts. 86−2918
copper phthalocyanine-resin binder type photoreceptors for xerographic appls. 86−57064
cyaninatometal compounds, phthalo- and naphthalo-based, synthesis and semicond. props. 87−53223
N,N′-dimethyl-3,4,9,10-perylenetetracarboxylic diimide-inorganic cpd. semicond. contact barrier heights, capacitance, I-V characts. 86−63080
diphthalocyanine thin film FET, electrical characts. 88−50834
N-docosylpyridinium-TCNQ-I_2 Langmuir-Blodgett films, elec. cond. 86−63064
dye layer system with Schottky barrier, transient photocond. studies 88−64270
electrical cond., electronic and optical device appl. 87−53222
electrically conductive polymers and their applications 86−26927
Eriochrome black T dye solar cells, CdS and AgBr sensitised, photovoltaic props. 86−26299
fluoroaluminium phthalocyanine, photovoltaic solar cells 85−27635
gallium phthalocyanine thin film, photocond. and rectification characteristic *(Japanese)* 88−26936
gallium phthalocyanine thin films, photoelec. props. *(Japanese)* 87−46645
gas sensor appl. 86−55686
heterojunction barriers, org.-inorg. contact barrier diodes, elec. characts. depend. on org. film comp. 88−32846
hydroxyaluminium phthalocyanine photoelectrochem. cells, phthalic acid treatment 87−58264
8-hydrozyquinolineformaldehyde metal chelates, electrical cond. meas. 86−63060
indium phthalocyanine thin films, photoelec. props. *(Japanese)* 87−46645
Langmuir-Blodgett films, p-n junctions, dye sensitised, ambipolar conduction 85−45421
Langmuir-Blodgett films from glycerol subphase, elec. and optical props. 87−66933
Langmuir-Blodgett superlattices containing two active components, SHG 86−42625
layered photoreceptor DC transient current Fourier anal. *(Japanese)* 88−33847
layered photoreceptor DC transient current obs. *(Japanese)* 88−33848
LB films of *N*-(4-*n*-dodecyloxyphenyl) and *N*-(1-pyrenyl) carbamates of 2-bromo-5-(2′-hydroxyethoxy)-TCNQ, towards organic rectifiers 87−60212
lead phthalocyanine Schottky solar cells, parameters and improvements 85−16238
lead phthalocyanine thin film gas sensor, based on film conductivity changes 86−50074
lead phthalocyanine/Ni Schottky barrier struct., cryst. struct. effects 85−12006
merocyanine dye/distearyl paraquat molecular p-n junction photodiodes of Langmuirmultilayer semiconductors 85−62447
merocyanine-CdS solar cells, fabrication using spray pyrolysis 88−18001
metal phthalocyanines, elec. and photocond., props., coordination metal effects *(Japanese)* 87−7200
metal-phthalocyanine-metal thin-film interdigital gas sensor elec. characts. 88−22567
metallo-phthalocyanine/metal junctions, space charge layer form., adsorbed O_2 effects 86−1815
metallophthalocyanine crystal thin films, electronic conductivity 87−53285
metallophthalocyanine thin films, cosublimation doping and Schottky contact formation 87−11428
metallophthalocyanine/metal contacts, elec. props., large frequency range 85−6749
molecular conductors, organic semiconductors and metals, superconductors 85−1350
molecular electronics, conference, Varna, Bulgaria (Sept. 1986) 88−69994
molecular electronics, developments and research 87−1224
molecular electronics, materials, properties and devices 85−12086
molecular fastener systems, high elec. cond. 87−53225
molecular semiconductor devices review 87−60119
monomolecular films, electronics appls. 85−55494
naphthalene, ultrapure, high mobility organic photoconductors 85−35586
organic p-n junction photovoltaic cell, spectral sensitisation 85−21797
organic photoconductive drum, features and overview *(Japanese)* 87−54159
organic-on-inorganic semiconductor contact barriers, surface state effects on diode pot. and AC admittance 86−27978
organosilicon plasma polymerised films, carrier photoinjection and energy levels 85−23481
oxime group containing film exposed to organic vapours, mass and potential changes obs. 86−55884
p-n heterojunction organic semiconductor solar cells, recent technological advances 88−37521
p-n heterojunction solar cells using thin film organic semiconductors 87−22755
perylene, ultrapure, high mobility organic photoconductors 85−35586

Vibration Laboratory at CPRI Bangalore for testing vibrations of power overhead lines 85−33137
wake induced oscillations of overhead power lines, study at CPRI 88−68967
wind loading, experimental technique for measurement of slender body oscillations 85−9811
wind turbogenerator, vertical-axis, connected to small hydroelectric network, real-time DC simulator study 85−48913
wind-induced cable galloping, origination mechanism anal. using transient wave procedure *(German)* 88−10872
WWER reactor, simulation of Xe-I oscillations *(Russian)* 86−18988
GaAs FET, Shubnikov-de Haas oscillations meas., doping levels calculation 85−45689
GaAs MESFETs, ion implanted, backgate-induced characts., expt. study 87−60459
GaAs MESFETs, mechanisms for LF oscills., expt. study 87−60458
GaAs/AlGaAs MQW waveguide resonator, optical self-oscillations 88−58186
GaAs-GaAlAs edge superlattices, Bloch oscills. and negative resist. 85−23513
n-InsB surface barrier diode, phase diagrams of oscillation processes *(Bulgarian)* 86−2102
Si:P depletion-mode MOSFETs, anomalous oscill. at low temp., expt. study 87−38244

oscillator strengths
poly(butene-1-sulphone) electron beam resist, interaction of low energy electrons, insulator model 88−57522
two-level atoms, coherently driven, first-order phase transition 87−33280
AlGaAs-GaAs superlattices, optical absorption coeffs. and exciton oscill. strength 86−21206
Er^{3+}:$SeOCl_2$-$SbCl_5$, liquid laser, Er^{3+} excited states, oscillator strengths, fluoresc. lifetimes 85−56569
$GaAs/Al_xGa_{1-x}As$ multiple quantum wells, transition energies and oscillator strengths 87−66947
Hg vapour, seventh harmonic generation of Nd-laser emission, interference effect 86−9957

oscillators
see also audio-frequency oscillators; Gunn oscillators; harmonic oscillators (circuits); microwave oscillators; parametric oscillators; radiofrequency oscillators; relaxation oscillators; tunnel diode oscillators; variable-frequency oscillators
2n self-excited oscillators with two types of resistive coupling, anal. 88−63570
2nd order resonance calcs. 87−65907
300 MHz gateable ring oscillator, cct. 85−39948
555 Design program 86−40821
4000 series CMOS oscillator ccts. 86−46603
7555 IC-based circuits *(Chinese)* 88−18961
'Latch-up' property in second order RC-activeoscillators 86−62479
active load component detectors, comparison of marginal oscillators *(Croatian)* 87−44701
active-C, single-amplifier capacitorless, and current-conveyor RC oscillators, design 87−65899
active-C oscillator, two operational amplifier config. 86−8043
active-R nonlinear negative resist. oscillators 86−46608
active-R oscillators, cct. designs using op-amps and resistors 86−34603
active-R oscillators, synthesis and freq. sensitivity minimisation 88−18962
active-R sinusoidal oscillator 86−46609
adaptive power supply for digital temperature compensating devices of quartz oscillators 87−44550
AF sinusoidal oscillator 86−52720
AFSK-1020 oscillator for RTTY tone generation 85−54712
AGC oscillator, noise-induced order *(Japanese)* 86−20354
all-quartz SAW resonator package 86−42085
almost sinusoidal oscillators with shifting bias, free-running and driven behaviour study 87−73359
amplifier for an oscillator power automatic-control system 88−6677
amplitude control by restoration of capacitor initial conditions 87−23975
amplitude-controlled oscillator with branching phenomena, injection synchronisation 85−17200
analogue switch oscillator using 4066 CMOS switch 86−8045
analytic signal representation, frequency stability analysis appl. 86−34612
approximate noise analysis of a feedback oscillator using a non-linear differential amplifier 87−52424
approximation of the amplifier transfercharacteristic in an oscillator 86−34578
asymptotic pause steady current response of a nonlinear oscillatory circuit to rectangular voltage waves 88−63564
asynchronous oscillation, simultaneous, cct. containing idler and resonators 85−638
atomic oscillators, comparison 88−65537
ATV-FM driver for the 13 cm band 88−47304
autodyne signal shape and distortion 87−47735
avalanche oscillations, optical control 86−62474
Bi-CMOS analog/digital LSI with the programmable280 bit SRAM 86−2411
Bi-CMOS electronic vol. IC technology and appls. 88−50969
bipolar transistor oscillators, low-noise, anal. 88−18972

oscillators continued
bipolar transistor self-excited oscillator, microregime steady-state oscillations 87−16931
bistable LED, self-excited oscillation and monostable operation *(Japanese)* 85−12739
broadband ring oscillators, oscillation frequency, thermal compensation 87−44656
calibration and checking of oscillators, clocks and watches, using 30-70 kHz receiver *(Czech)* 88−36247
canonic coupling of oscillators in a chain, anal. 88−18974
canonic coupling of oscillators in a ring, phenomena 86−27125
canonic coupling of triangular-wave oscillators 87−542
canonic sinusoidal RC-oscillators using differential amplifiers 87−65922
capacitor loss angle meter for use at higher frequencies *(Polish)* 87−77310
carrier recovery techniques using synchronous oscillators 87−23988
cascaded, phase-synchronised, computer analysis 86−52717
ceramic oscillators and piezoelectric ringers, use in electronic telephones 85−13987
chaos generation using Chua's circuit, expt. confirmation 85−22697
chaotic oscillation in a nonautonomous oscillator with a reactive nonlinearity 85−632
chaotic phenomena in the oscillator controlled by the DC current pulse *(Japanese)* 85−39955
circuit reflector synthesis appl. *(Japanese)* 88−38620
circular self-oscillating systems with nonlinear filter, dynamic chaos 86−34604
Clapp, amplitude control 85−17194
Clapp and Colpitts oscillators with a singletranslinear current converter, config. and characts. 86−8039
class E power amplification and conversion using oscillator switch *(German)* 87−31691
classification of sinewave oscillators 85−6217
clock signal interruption prevention cct. 86−41008
closed-loop control of stepping motor systems 87−43124
CMOS 4-bit single-chip microcomputer with dual-crystal oscillator system *(Japanese)* 86−52876
CMOS magnetosensitive square wave oscillator 87−35075
CMOS oscillator, start-up time study 87−44651
CMOS oscillators, configs. using logic gate ICs 88−12243
CMOS ring oscillator for latch-up prevention substrate bias generator 86−53810
CMOS ring oscillators using super self-aligned process technology process, device structure and elec. characts. 88−20136
coherent digital communication, effect of oscillator phase instability, model 86−64481
coherent phase-locked synchronous oscillator, config. and operation 87−5702
collector circuits for push-pull switching oscillatorswith resistive loading 86−34608
Colpitts crystal oscillator, computer anal. 86−40949
Colpitts integrable oscillator, linear temperature-to-frequency convertor appl. 86−24455
Colpitts oscillator, nonlinear analysis of total harmonic distortion 87−52445
Colpitts oscillator circuit for checking quartz crystals *(Spanish)* 86−8046
Colpitts-oscillator, calculation *(German)* 85−61145
complex resistance measurement based on invariance principle *(Russian)* 88−60862
controlled RC-oscillator with improved stability 85−33713
controlled-voltage oscillator for active power transducer *(Spanish)* 85−3974
coupled, nonlinear, stochastic oscills. 88−56506
coupled oscillators with lag, stochastic oscillations anal. 86−62477
crystal controlled satellite oscillator for very preciseorbitography: the DORIS program 86−40954
crystal oscillator, bridge config. with bidirectional frequency and feedback automatic level control 87−31751
crystal oscillator ccts., active impedance meas. method 87−52426
crystal oscillator ccts., theory, anal., and implementation 88−56499
crystal oscillator ccts. with transistor current noise, short-term freq. stability study 87−52425
crystal oscillator design and analysis using personal computers 87−16820
crystal oscillator for the GPS program 86−40955
crystal oscillators, ageing under various test conditions, expt. study 88−20221
crystal oscillators, computer anal. 87−52277
crystal oscillators, frequency stability models and fractional reactance slopes 87−59242
crystal oscillators, harmonic generation minimisation 87−37060
crystal oscillators, phase-noise performance improvement 86−42023
crystal oscillators, spurious oscillation prevention and design verification tests 86−8048
crystal oscillators, unwanted oscills. prevention, design process with verification tests 86−27134
crystal resonator noise study, models, oscillator noise relationship and meas. techniques 88−20219
crystal-controlled oscillator, steady state behaviour simulation, using WATAND CAD program 85−33705
crystal-controlled sinewave oscillators, design 87−10721
current conveyor ccts., appls. to oscillators and freq. depend. negative resistors 86−40916
current-conveyor sine-wave oscillators 88−25044
current-mirror phase-shifter oscillator using cascade config., design and characts. 87−23974
current-mirrors RC-oscillators, config. and performance 87−59231
current-tunable sinusoidal oscillator 88−18967
DC current pulse control, chaotic phenomena 86−67070
DC measurement converter based on push-pull magnetotransistor self-excited oscillator 86−44258
delayed-feedback oscillator 85−61153
describing functions of entrained oscillators 88−605
design using device line and load pull methods 87−16937
dielectric resonator oscillators, review of technology 88−18992
differential crystal oscillator 86−40948
digital clocks, TTL-based cct. designs 87−23981
digital CMOS oscillator design 87−52441
digital controllable oscillator circuits, design *(German)* 87−44660
digital increment oscillator: generation of sinusoidal waveforms in DPCM 87−31739
digital oscillator having low sensitivity and roundofferrors 86−40940
digital oscillator structure with low sensitivity and roundoff noise 88−606
oscillators continued
digital sinusoidal oscillators, performance improvement using error feedback ccts. 86−46605
digital sinusoidal oscillators based on lattice structures *(Japanese)* 88−12249
digital sinusoidal oscillators with error-feedback 85−17585
digitally controlled oscillator, design *(German)* 86−813
diode amplitude-stabilized, steady-state calcs. 88−70590
discrete-time oscillator model, periodic and aperiodic oscillations 87−23982
displacement sensor, using SAW delay-line oscillator with $LiNbO_3$ plates 87−49675
dissipative systems, stochastic synchronisation of oscillation 87−65908
distorted meander-line oscillators, regeneration, statistical anal. *(German)* 85−44862
distributed-parameter self-excited, nonlinear frequency correction 86−34607
driven diode resonator systems, $f(\alpha)$ spectra of attractors at transitions to chaos 88−6691
driven nonlinear oscillator, chaos, global features 86−8854
driven unlocked multimode SAW comb oscillator, beat frequency spectra 88−51115
DSTJ3000 smart transmitter field instrument *(Japanese)* 87−56484
DTCXO digital temp.-compensated crystal oscillator *(Czech)* 87−10723
dual-mixer time difference measurement system, common oscillator noise influence 87−23976
Duffing systems, stable, jump phenomena, numerical simulations 87−73362
ECL based crystal oscillators *(Spanish)* 87−44997
ECL ring oscillators in HJBT IC, design, modelling, and characterisation 86−63432
elastance modulation in oscillatory circuits, resonant frequency modulation 87−65898
electrodynamic vibrator design with DC excitation *(Rumanian)* 87−52428
electronic circuits, evolution, historical perspectives 86−701
electronic components for hobby and professional use *(German)* 85−33620
electronic door bell with random effect, cct. design using LF and HF oscillators *(Spanish)* 85−45205
electronically tunable SAW oscillator on temperaturestable quartz substrate 86−2546
electrostatic calibration of mechanical oscillators 88−29658
energy balance in a generalized oscillatory circuit 86−52716
errors determ. in frequency setting, using programmable hand calculator for data acquisition 88−35869
excitation of continuous oscillation analysis, due to external periodic force 86−824
externally driven excitable systems, phase locking, period doubling, chaotic phenomena 88−56504
feedback analysis and design techniques for amplifier and oscillator ccts. program listing 86−777
feedback oscillators, freq. and amplitude stability, deterministic theories 87−44650
FET, noise upconversion anal. 88−50057
FET dip oscillator construction and assembly 86−18014
FET oscillator-multiplier, output power determ. 86−14042
floppy disk read-amplifier system IC peak shift meas. 85−64162
fluctuation analyzer with ideal filter in circuit forming reference oscill., statistical estimate of error 87−70490
fluxon devices for data processing 87−38701
fluxon feedback oscillator 85−46098
FM, automatic discrete tuning of frequency deviation 87−52433
FM autooscillation systems, dynamic distortions anal. 87−65904
for capacitance meas. above 0.01 μF 88−36180
forced magnetic oscillator, dynamics of phase locking and points of resonance 87−37049
free-running oscillator design in CMOS 86−806
free-running simple bridge RC-multivibrator 86−821
frequency characteristics in resonance at self-oscillation harmonics 85−39951
frequency control, conf., Philadelphia, PA, USA (May 1986) 87−31135
frequency control and synthesis, conference, Guildford, Surrey, England (April 1987) 87−58560
frequency control symposium, Philadelphia, PA, USA (May 1987) 88−18316
frequency instability characterisation, in time and frequency domains 88−12250
frequency pulling in an oscillator with back-to-back varactors 88−44083
frequency stability, time-domain analysis, nonzero dead time counter technique, appl. 86−20359
frequency stability characterisation, RF filtering effect 85−54717
frequency stability characterisation from filtered signal 86−34611
frequency stability determ., RF filtering effect 86−20358
frequency stability meas., digital method, spectrum analyzer *(Czech)* 85−49774
frequency synthesizer architectures and design techniques 87−23985
frequency variator, design 88−63561
FSK of oscillator output, by composite method 87−47477
fundamental-mode Pierce oscillators utilizing bulk-acoustic-wave resonators in the 250-300 MHz range 85−17206
general qualifier for linear oscillators with amplifiers *(German)* 85−28413
GPS user receivers and oscillators 85−58259
grid-dip oscillator, coils design 85−61142
grounded base oscillators, design criteria, feedback capacitor 88−63572
harmonics coupled via tuned circuit, synchronous operating modes 85−61148
HF, with emitter-coupled dual-transistor active element, synch. 88−44082
HF band crystal controlled frequency and amplitude calibrator 87−41306
HF oscillator and cavity resonator interaction, nonlinear couplings with delay `anal. 88−44338
HF resonant oscillator in push-pull mode for DC to AC power conversion 86−66194
high precision SAW devices for CATV andcommunication use 86−15334
high-power narrowband-noise generator 87−37050
high-precision clock oscillators for modern microprocessor timing 85−6389
high-speed oscillator formed by ECL IC 86−46601
home-built receive convertor construction and layout 87−55954
HV current-fed parallel resonant oscillator for HF AC power 86−67074
hybrid bistable optical devices, integrated optical oscillators and multivibrators 85−50990
hybrid IC with distributed RC parameters for tunable active filters and oscillators, network and topology design *(Slovak)* 86−27759
hydrometeors, freq. determ. from radar echo signals *(Russian)* 86−6100

oscillators continued
hysteresis chaos generator *(Japanese)* 85−28416
ICs families and appls. 87−37051
identification of two-amplifier active-*R* sinusoidal oscillators 87−59225
image bearing photorefractive oscillators 87−55289
impedance inversion technique preventing oscillator saturation 88−32044
inductively coupled LRC circuits, quantum noise, finite temp. field theory anal. 88−70587
inductively coupled oscillating circuits for medical appls. 87−52427
injection locking for ultra low noise UHF and microwavesources 86−35964
injection-synchronised oscillators with quasi-sinusoidal behaviour, dynamical stability anal. 86−34602
integrated amplifier for a vibrating stringoscillator for precision balances 86−67972
integrated oscillators using thin film resonator technology 88−20216
internally resonant oscillator, global and local dynamics anal. 88−32042
interrupted signals detection, using RC phase-shift type synchronous oscillators 87−76868
inverting logic oscillators, design 85−17196
invertor systems, self-oscillating, optimal PWM patterns 88−43321
Josephson flux-flow oscillator, boundary-condition control 88−33575
Josephson oscillator, flux-flow type, junction geometry effects on performance 85−56201
keyed transistor oscillator with parallel shaping line, investig. 88−12247
Kuramitsu-Yokota equations for multimode oscillators *(Japanese)* 88−18979
ladder network RC self-excited oscillators, nonlinear anal. 87−10719
ladder oscillators, anal. using averaged potential 85−17191
ladder oscillators having active elements with sharp saturation 86−57715
latch ring oscillator, design and operation, VLSI chip testing appl. 85−17288
lateral field resonators, fabrication, eval. methods and oscillator cct. utilisation 88−20220
LC oscillator, simple triggering mechanism 86−46612
LC oscillators, gain requirement profile for reactive element values determ. 86−14036
LCML ring oscillator with 35 ps delay, construction using self-aligned heterojunction bipolar transistors 87−25247
LF noise sidebands, elimination using config. with odd-symmetrical characts. 85−627
LF noise sidebands elimination in oscillator with odd-symmetry characts. 87−44652
LF standard oscillator, study of displacement limiter circuit *(Chinese)* 85−49770
light path as delay line of sinusoidal-wave oscillator *(Japanese)* 88−36235
limiting wide-band matching of arbitrary impedances 85−49773
linear temperature-to-frequency converter using anintegrable Colpitts oscillator 86−14450
linear voltage-to-pulsewidth converter 85−61406
locking mechanisms in oscillator systems with unidirectional couplings 87−44654
look-up digital tunable sinusoidal oscillators , digital spectra of nonuniformly sample signals 88−70585
low distortion Wein bridge oscillator 86−8036
Low Frequency Oscillator waveforms and functions 85−58457
low phase noise oscillator design 86−62486
low-dissipation, magnetic susceptibility and low-temp meas. appls. 87−49980
low-noise limited oscillator for NMR magnetometer 87−52436
low-noise oscillator design, cct. topology, coupling, active device and resonator selection 85−11075
low-noise oscillator design using CAD tools 87−23978
low-noise oscillators and synthesizers, conf., London, England (Jan-1986) 86−33957
low-noise power-efficient oscillators, theory and design 86−62472
lower limit for bias termination conductance of a multiple-device oscillator 88−63565
magnetostatic wave delay line based oscillator, Q-factor 86−22031
magnetostatic-wave delay-line based oscillators, phenomenological theory 85−50850
mathematical model of a quasi-periodic oscillator 88−12248
microphone interface/test oscillator unit, design 86−55477
microwave and MM-wave monolithic ccts., conf., St. Louis, MO, USA (June 1985) 86−26502
miniature clock oscillators, products and technological trends 87−52680
minimum sideband noise in oscillators 86−34613
minimum-component single current conveyor RC oscillators 88−6689
modeling phase-noise measurement systems 88−60901
modified Allan variance, theoretical anal. 88−18982
modified Stiefel Bettis method for nonlinearly damped oscillators 88−63200
Monte-Carlo computer simulation for studying freq. stability problems *(Chinese)* 86−65023
MOS Pierce oscillators, analytical conditions for oscillation start-up *(German)* 86−807
MOS transformer-coupled oscillators, anal. method 88−18965
multicircuit oscillator, noise spectrum anal. 85−11086
multifrequency negative-resistance oscillators, stability criteria, theoretical and expt. study 85−6205
multifrequency oscillations in a distributed LCR oscillator 85−17203
multiloop frequency stabilisation systems, choice of types of couplings 86−20351
multimode, analysis using prob. calcs. 87−538
multimode ladder oscillator, mode locking by external signal 85−17202
multimode oscillations anal. using probability density *(Japanese)* 85−17197
multimode oscillator anal. via integral manifolds, non-resonant case 88−24944
multimode oscillator analysis via integral manifolds 87−65923
multimode oscillator analysis via integral manifolds, resonant case 88−24945
multimode oscillator with active element represented by seventh-degree charact., anal. *(Japanese)* 85−6210
multimode oscillator with rational ratio freqs., synchronisation phenomenon *(Japanese)* 86−14044
multimode oscillator with rational ratio frequencies, synchronisation 87−44646
multimode oscillator with sinusoidal characteristic active element; theoretical anal. *(Japanese)* 85−11091
multimode oscillators, weakly nonlinear, numerical soln. convergence *(Japanese)* 85−61151
multiphase active-R oscillator cct., config. and expt. characts. 88−12246
oscillators continued
multiple feedback oscillators, fluctuations anal. 88−601
multiple oscillator system, oscillation mode stability 85−61146

negative resistance oscillator cct., periodic-chaotic transition sequence, expt. study 86−46973
network transformations for incorporating nonideal simulated immittances in the design of active filters and oscillators 87−59706
new phase-locked oscillator adaptable to inputsignals with periodical phase jumps 86−62481
noise analysis, phase and frequency, fractal dimension approach 86−34588
noise estimation for feedback oscillators 88−50056
noise prediction in oscillators, SSB phase noise 87−37061
noise simulation 85−61155
nonautonomous generator, effects of synchronisation and bifurcation of synchronous and quasisynchronous oscillation 86−59022
nonisochronous mutually synchronised oscillators, characts. 85−635
nonlinear, chaotic oscillation studies *(Spanish)* 88−70591
nonlinear, nonautonomous networks and systems, periodic solns., computer-aided anal. *(German)* 87−16841
nonlinear, sinusoidally driven, parameter depend. of interior crisis meas. 85−17195
nonlinear, stochastic signals during repeated transition through resonance *(Russian)* 88−70493
nonlinear feedback oscillators under large-signal injection, anal. 87−541
nonlinear oscillating circuit, stochastic oscills. excitation 88−18980
nonlinear oscillation, Lie series averaging 87−65924
nonlinear oscillations spectral characts., natural parameter fluctuations 85−39950
nonlinear oscillator at onset of static and dynamic bifurcations 86−57603
nonlinear oscillators, periodical regimes, numerical determ. 87−10711
nonlinear oscillators representing rhythmic processes, synthesis 85−22705
nonlinear oscillatory circuits, steady state anal. by iterative decomposition method 87−5701
nonlinear oscillatory systems analysis 86−67085
nonlinear periodic electrical network, pattern formation 87−16842
nonlinear resonance features in ferroelectric oscillatory systems 87−46274
nonlinear resonance in thermally stabilized and bolometric systems 87−65909
nonlinear resonant medium, echo signals generation 88−38372
nonsymmetric one-comparator multivibrators with anauxiliary RC-circuit 86−822
numerically-controlled oscillator, performance analysis 87−24301
one-chip oscillator using air-gap type thin film resonator 88−50059
one-shot, squarewave and triangular oscillator design 87−5706
optical communication, coherent system using optical local oscillator to operate with photodetector mixer 85−3477
optical oscillation established using acousto-optic Bragg angle diffraction in conjunction with closed cavity feedback 88−8252
optical sweep oscillator, power level controlled, using GaAs semiconductor laser 88−20704
optoelectronic self-oscillatory circuit with optical future delayed feedback, injection locking 85−12696
oscillator circuit erases tapes and floppy discs 86−34600
oven quartz crystal oscillator, hybrid miniature 86−40952
overtone-mode AT-cut resonators 87−32805
PAM microtransmitter, SAW-stabilized 88−15363
parasitic AM meas. in frequency-modulated oscillators 87−52432
period-adding route to chaos in a two-transistornonlinear circuit 86−67083
phase diffusion anal. 87−37052
phase noise measurement of oscillators and other devices from 1 MHz to 20 GHz 87−16941
phase-locked oscillator control system for thyristor-controlled reactors 88−37268
phase-shift oscillators for capacitance meas. 87−29245
pi-network oscillatory system, design and anal. 87−59224
Pierce family crystal oscillators, computer-aided gain calc. 86−817
PLL oscillators with delay lines, carrier noise sidebands 86−27136
PLL oscillators with delay times, digital frequency tuning 87−52444
PLL phase noise prediction from oscillator data 87−52459
PLL with logical frequency/phase detector for master horizontal oscillator 86−20385
polyphase phase-locked oscillator for input signals with periodical phase jumps 88−18966
polyphase phased locked oscillator for ISDN user network interface *(Japanese)* 87−40092
portable microwave spectrum analyzer with phase locked SAW based frequency synthesis 88−50058
precharge ring oscillator using active loads 85−39949
precision clocks and oscillators, time-domain characterization methods 88−22803
precision comparators ease oscillator and data-converter design 88−32039
precision oscillators, linear stochastic differential eqn. model, diffusion coeffs., Allan variance 88−18981
precision surface-acoustic-wave (SAW) oscillators 88−57877
programmable sinewave oscillator from CMOS quad DAC chip 88−32040
pseudo-sine-wave circuit generates FSK tones without discontinuities 85−11078
PSK-signal detection, local oscillator phase noise degradation *(German)* 85−7857
q and oscillator stability, anal. 87−65900
quadrature active-R oscillator cct. 86−62470
quantum well oscillators, freq. and power limit 86−46600
quartz, crystal oscillators in hybrid cct. technique, design, manufacture and encapsulation 86−52724
quartz, oscillator, digital temperature compensated *(French)* 87−32786
quartz cryst. oscillators and atomic oscillators, comparison 87−63208
quartz crystal oscillator, digital temp. compensation techniques 87−37058

quartz crystal oscillator parameter meas., technique and network analyser config. *(German)* 88−9867
quartz crystal oscillator thermometer for digital temp. meas. *(Dutch)* 88−42313
quartz crystal oscillator with current-controlled freq. trimming, config. and expt. study 88−6687
quartz crystal oscillators, acceleration sensitivity, review 88−20218
quartz crystal oscillators, cct. configs. for optimum freq. stability *(Spanish)* 86−52719
quartz crystal oscillators, digital temp. compensation *(German)* 88−63560
quartz crystal oscillators, freq. shifts due to low-dose radiation, mechanisms 87−32795
quartz crystal oscillators, freq. stability study 87−16938
quartz oscillator, characteristics, evolution and future trends *(French)* 87−6956
quartz oscillators with TTL and HCMOS ccts., design and construction aspects *(German)* 87−10713
quasi-periodic oscillation via Volterra series 86−67081
quasi-periodicity and dynamical systems: An experimentalist's view 88−70486
quasisinusoidal oscillators, general eqn. 86−805
quasisinusoidal oscillators with cubic-type nonlinearity, synthesis 87−23973
quasisinusoidal quasistatic negative-conductance oscillators, refinement and extension of Belevitch's criterion through perturbation techniques 88−70589
ramp-type limiter based Robinson oscillator anal. extension 87−52431
random oscillation generator with external periodic input, behaviour 87−37055
rapid bifurcation of the Wien bridge oscillator 88−6685
RC op-amp oscillators, nonlinear, anal. using phase-space techniques 87−10727
RC oscillator synthesis 87−73363
RC oscillator with CMOS invertors, stability of frequency of oscillation *(Rumanian)* 85−623
RC oscillator with low distortion, review *(Japanese)* 88−4507
RC oscillators, circuit design 87−545
RC oscillators, extended-range parallel-path type, synthesis using state-variable techniques 86−8035
RC oscillators, fluctuation characts. and short term freq. instability anal. *(Slovak)* 88−12244
RC oscillators, freq. stability, linear theory 86−46606
RC oscillators, metrological parameter anal. using linear peak clippers *(French)* 88−18976
RC oscillators canonic realisation 86−57710
RC oscillators fluctuations, investigation via reduced symbolic eqns. approach 86−57713
RC oscillators using active-compensated amplifiers, HF design considerations 87−549
RC oscillators with low nonlinear distortion 85−47994
RC oscillators with single nonlinear active element, design procedure 87−547
RC phase shift oscillator, loop-gain modulator 88−6701
RC self-running generators with rejection phase-shifting ccts., anal. *(Russian)* 85−49772
RC sinusoidal oscillator ccts., current conveyor based, min. component configs. 87−73360
RC sinusoidal oscillators, frequency control by additional amplifier *(Polish)* 86−34610
RC transfer networks with gain greater than unity, analysis and appl. *(Spanish)* 86−34953
RC-active oscillator config. employing unity-gain amplifiers 86−804
RC-active oscillators transform. 88−6684
rC-oscillators with fast amplitude control 86−62480
RC-oscillators with single control resistor, synthesis 85−61150
recursive circuit, upper bound of nonuniform quantising noise 86−62746
resonant tunnelling oscillator, study of freq. limits 86−35636
resonator type oscillators, minimum sideband noise study 87−31749
review, techniques, cct. configs. and operation 87−52440
RF technology, conf., Anaheim, CA, USA (Feb. 1987) 87−36340
RF technology, conf., Anaheim, CA, USA (Jan./Feb. 1986) 87−16273
ring fluxon oscillators, rotating, gyroscopic effects 87−12070
ring transistor self-excited oscillators, single frequency oscillations 87−16935
ring-type, self-running, second order, nonlinear model *(Russian)* 88−70494
ring-type self-excited oscillator, chaotic dynamics 88−38412
SAW and Lamb-wave, ZnO/Si polymer-coated chemical sensors appl., digital simulation 88−47492
SAW clock oscillator and clock recovery circuit for digital transmission up to 200 Mbit/s 88−47091
SAW delay line, self-excited oscillators, transient anal. 86−40941
SAW delay line oscillator, design 86−46611
SAW delay line oscillator with extended tuning range 88−63558
SAW delay-line oscillator, polymer/water interactions study 88−44942
SAW delay-line oscillator with low-loss, frequency tuning 87−59229
SAW delay-line oscillators tuning using magnetic bubble garnet films 85−62177
SAW military-grade components from Raytheon 86−15327
SAW oscillator for PLL appl. low noise VCO 88−51113
SAW oscillator with waveguide, electrostatic voltage sensor 88−60711
SAW oscillators, random walk freq. fluctuations study 87−32818
SAW oscillators for UHF frequency sources in systems environment 85−44924
SAW resonator, appl. in high stability oscillators 85−50821
SAW resonator oscillator, 960 MHz, short term time domain stability, high resolution meas. 88−51114
SAW resonator oscillator design and performance, extremely low phase noise 88−51112
SAW resonator oscillators, 1/f noise and freq. shift ageing 85−630
SAW resonators, appl. in high-performance instrumentation 88−57876
SBAW versus SAW oscillator aging 85−62178
Schmitt trigger oscillator anal. 85−28415
scrambler counter as a phase-locked oscillator 86−8059
second-order oscillators with single op-amp, Loeb's criterion and latch-up effect 88−18969
seismometer testing, standard infralow-frequency vibration system design 86−32519
self excited oscillator synchronisation circuit, parameters selection 87−16934
self-excited, modulation characteristic linearization 85−6213
oscillators continued
self-excited generators of nearly periodic oscillations 86−40943
self-excited oscillation of flow through collapsible tube (a possible fluidic oscillator) 87−10725
self-excited oscillator, delayed and amplitude limited, numerical modelling of stochastic processes 86−27126
self-excited oscillator with fibre-optic delay line in feedback cct., one-frequency regimes 86−27127
self-excited oscillator with first-order inertial lag, stochastic oscillations 86−27128
self-excited oscillators, resistance-coupled, mutual synchronization 86−809
self-excited oscillators, signal amplitude estimation 88−25048
self-excited oscillators, transistor, transition mechanism to chaos 86−40942
self-excited oscillators with complex reactive coupling, mutual synchronisation 86−14043
self-excited oscillators with low-Q oscillator systems 86−27129
self-excited oscillatory systems, comparative analysis of natural fluctuations 88−38413
self-excited ring oscillator, chaotic transition, additive period increase 87−59237
self-excited systems, role of asymmetry in strange attractor formation 87−31675
self-excited vacuum-tube oscillators, automatic monitoring system 88−12245
self-injection/external locked, stability and noise, graphical anal. *(Japanese)* 85−637
self-loaded ring oscillator, cct. config. using NAND or NOR gates 85−28466
self-oscillators under random perturbations, limit cycle transitions 87−59227
self-oscillatory system, internal struct. of transitions to strange attractor 85−44922
semiconductor n-i heterojunction, time depend. tunnelling and coherent Zener oscills. 87−10724
sensitivity theory, direct and inverse problems 86−46615
sensors with oscillating elements 86−5230
series−resonance circuit, random oscillations 86−8042
series feedback design using graphical techniques 85−39928
short distance Doppler radar with self-detecting diode oscillator and external diode mixer 88−53374
Siemens tone generator ICs 87−49389
SIMOX thin film fabricated CMOS ccts., transistor and ring oscillator performance characts. 88−1790
simple AF sine oscillator circuit 86−34599
simulation type CR oscillator using D-R mutator *(Japanese)* 88−70586
simulations for sinusoidal oscillators with random numbers and initial impulses 87−5704
sine wave oscillator, frequency programming 86−46602
sine wave oscillator, nonlinear analysis 87−52446
sine wave oscillator cct. using high input impedance amplifier *(Japanese)* 86−40945
sine wave oscillator cct. with stiff element, transient and steady state anal. *(Japanese)* 86−67079
sine wave oscillator with good sensitivity, RC op-amp design 87−10726
sine-quadrature oscillator for cellular spin resonance up to 120 MHz 88−23028
sine-wave oscillator with operational amplifier , capacitance meas. appl., error determ. and reduction 88−74550
sinewave oscillator circuit with stiffness, transient and steady states anal., numerical method 88−12241
single op-amp single resistance controlled oscillator, identification and synthesis method 85−11085
sinusoidal, amplitude impulse stabilisation synthesis 85−49707
sinusoidal, design for minimum duration transient processes 88−63568
sinusoidal *RC*-oscillator with amplitude control by current splitting 88−32043
sinusoidal oscillators employing current conveyors 87−52430
sinusoidal oscillators in electronic instrumentation *(Spanish)* 87−5699
sinusoidal oscillators in feedback control system, anal. 86−20344
sinusoidal signal oscillators, transient process anal. 85−631
slowly varying oscillators, analysis by perturbation technique 86−57717
small-amplitude periodic solutions of the quadratic Lienard equation 85−44923
SMT quartz crystal units and oscillators 86−63513
SOI-CMOS high speed devices, fabrication by laser recrystallisation technique 86−8970
SOI/CMOS ring oscillators, fabrication in heat-sink structures, characteristics 86−9312
spectral and time domains, oscillators characterisation *(French)* 87−5705
spectral characts., effect of natural parameter fluctuations 85−6215
spectral purity and oscillator stability characteris., correlation method *(French)* 87−52439
spectral purity meas., stopband filter influence determ. 86−31624
spectrum analysers, design for 0 to 850 MHz 85−26249
square wave, maximum/minimum indicator appl. 88−16242
stable clock oscillators, high precision, for ISDN terminals 88−39777
stable quasi-sinusoidal oscill. in electronic oscillators 86−8038
stable reference oscillator for power supplies *(Slovenian)* 85−49733
start-up circuit for a ring oscillator 86−40939
steady state analysis of oscillatory circuits withharmonic components by Volterra series 87−539
stepping motors, parametric resonance 88−11252
stochastic process with frequency modulation, spectral characteristics 88−40946
stochastic self-excited oscillation phase synchronisation using periodic external signal 87−13027
stochastic self-oscillations in an oscillator with additional delayed feedback 87−65914
structural functions used in the design of automatic frequency control systems 87−65905
subharmonic entrainment of avalanche oscillationsthrough optical terminals 86−46610
subharmonic oscillations in three-phase circuitsf 86−8041
subharmonic phase-lock criteria for a class of weaklynon-linear high-order oscillators 86−8037
subharmonic sine-wave and pulse injection locking of oscillators 87−5698
substitution algorithm for solving nonlinear circuits with multi-frequency components 88−6633
substrate voltage regulator 85−6153
superconducting ccts., analytical method for stationary oscills. 87−67874

oscillators continued
superconducting circuits, influence of time-depend. gravit. fields 87−25902
surface mounting bears new fruit, from crystals to chips 88−7133
SW transmitter output circuit operation, antenna-feeder and oscillatory-system parameters effect 87−63121
switched capacitor impedance simulation circuit withunity gain buffers 86−67320
switched capacitor oscillators, clock-locking phenomena, expt. study 86−62484
switched-capacitor, general impedance convertor, oscillator appls. 86−820
switching, analysis taking rectifier filter parameters into consideration 86−40944
switching mode power convertor with phase locked oscillator as ultrasonic atomizer transducer driver 86−7989
switching transistor autodynes analysis 87−45130
synchronisation mechanism, physical interpretation 87−5700
synchronised, N-nodal network, phase and frequency transfer analysis 85−22696
synchronised oscillators, effect of unidirectional couplings 86−14041
synchronized oscillators, calc. of spectral densities of fluctuations using S-parameters 87−69160
synchronous oscillator as synchronisation/tracking network, theoretical/expt. study and appls. 86−34601
synchronous oscillator props. 86−40873
synchronous oscillators, carrier recovery techniques 87−37056
synchronous oscillators, performance considerations and comparison to PLLs 88−604
synchronous oscillators, synch. and tracking appls. 86−29929
synchronous oscillators, synchronisation and tracking 86−40950
synthesis employing only one unity-gain amplifier 86−20342
systems models, equations order reduction 87−16930
Tactical Miniature Crystal Oscillator (TMXO) 87−37063
TCXO, digital temperature compensation of crystal oscillators using temperature switches 87−31750
TCXO error reduction after ageing adjustment 86−40947
temperature compensation of surface transverse wavesfor stable oscillator applications using shallowgratings 86−2548
test oscillator with RC sensor, external perturbation parameters estimation 85−47957
testing, using self-checking frequency comparator 85−64083
thickness monitor using four quartz crystal oscillators for evaporation system 87−32785
third-order CR oscillator synthesis using D-R mutator *(Japanese)* 87−23983
third-order RC oscillators using D-R mutator 88−32047
three-dimensional nonlinear stabilized oscillator, solns. 87−10717
three-electrode devices, nonlinear negatron model 88−18973
three-phase compact oscillator models for two synchronous generator systems representation 87−58035
three-phase induction motor speed control using proportional drive 86−6760
three-phase oscillator, symmetrically stabilised, anal. and appls. 87−59226
three-phase triangular wave models 88−6683
torus knot oscillator design 86−819
trace chemical vapor detection using SAW delay line oscillators 87−49681
transducer immittance meas., book contrib. 86−5484
transfer-type automated manufacturing system, single-stage two-machine model, Markov chain *(Japanese)* 85−39954
transient comparison of two models for an oscillator with an amplitude control system 88−6686
transistor inverters controlled using Royer oscillator 86−45514
transistor oscillator with delayed feedback, synchronous and stochastic oscillations 87−65920
transistor oscillator/astable multivibrator ccts. 86−52721
transistor oscillators, oscillation amplitude stabilisation 87−44655
transistor oscillators with impedance noise matching 86−67087
transistor switch oscillators with reduced switching losses, multi-purpose parameter optimisation *(Russian)* 87−17439
TRANSIT and NAVSTAR satellite systems for precise time and positioning using oscillators and clocks 86−17535
transition phenomena in blocking oscillator 86−52723
triggered oscillator performance checking, using gated-frequency meas. 85−22691
TTL oscillator without external capacitors, cct. config., square-wave generator appl. 86−52715
tunable HF oscillator based on an SAW resonator 86−27133
tunable oscillators with operational transconductance amplifiers, realisation in IC form 85−6218
tunable SAW oscillator using differential SAW delay line with MOSFET control 86−2506
tuned LC quartz crystal oscillator, freq. spectrum determ. 85−29407
TV tuner, VHF, hyperband and UHF mixer/oscillator sections on one IC 88−22288
twin T-like ccts., oscills. in feedback systems 86−57716
twin-T bridge RC oscillator, fast amplitude control 86−57711
twin-T bridge RC oscillator using window comparator 86−67086
twin-T bridge RC oscillators, fast amplitude control 85−61143
twin-T bridge RC-oscillator using window comparator 86−57702
twin-T bridge RC-oscillator with multiplier based amplitude control amplitude transients 88−44077
twin-T RC oscillator employing amplitude control system with multipliers, linearised model 87−10718
two coupled electrical oscillating systems, grouping in mech. stable formations 86−823
two-phase coupled free-running oscillator, stationary signal anal. *(Russian)* 85−636
two-torus oscillator, design techniques for electronic cct. realisation 86−57714
type II intermittency in coupled nonlinear oscillator 87−65912
UHF oscillator design time reduction using FORTRAN PC program 88−44081
UHF oscillator stabilized by metal-dielectric resonator 87−5709
UJT in magnetic field, dynamic response 87−45897
ULF wien-bridge sine wave oscillator using MOS input linear IC *(Japanese)* 87−546
ultrasonic-oscillator position sensor 88−61688
uni-junction transistor second-order RLC series circuit, period bifurcation and chaotic behaviour *(Chinese)* 86−8034
unity gain op. amp. oscillator designs 88−596
VA5470 BiMOS-E op-amps, bridge oscillator ccts. 88−63532
value, computer analysis of operating modes *(Russian)* 85−11082
varactor tuned multimode SAW oscillator with interdigital-transducer delay-line filter 87−1853
very-low-frequency block-digital oscillator 85−54718
VHF dual-crystal-controlled oscillator utilising SC-cut resonators for low-noise 86−40953
vibration testing system, scanning oscillator freq. analysis *(Russian)* 87−65915
VLF block digital oscillator, design considerations 86−27142
VLF nonlinear digital oscillator, config. and characts. 85−33706
voltage-controlled crystal oscillators, practical considerations for freq. pulling 87−18449
voltage-controlled duty-cycle oscillator, A/D convertor appl. 86−52907
voltage-controlled oscillator cct. designs 87−23972
VSWR measurement technique using spectrum analyser 86−5507
Walsh-sine variance, short-term freq. stability characterization 88−38416
weakly non-linear oscillator circuits and averaging: a general approach 87−59230
Wein Bridge oscillator using VMOS transistor as gain control element 85−54714
wideband matching problem solution Youla coefficient restrictions based 88−38414
Wien bridge oscillator, config. and operating principles, for sinusoidal signal generators *(French)* 85−49775
Wien bridge oscillator using composite amplifiers, anal. and HF design 87−44653
Wien bridge oscillator using FET amplitude control, cct. 85−11080
Wien bridge oscillator using operational amplifiers, theoretical cct. anal. 88−38410
Wien-bridge oscillators, min. component configs. using current conveyors 88−18970
Wien-bridge RC oscillator, parameter optimisation *(Polish)* 85−620
Wien-type two-port with distributed parameter 85−44921
Z80 clock driver using 74HC04, cct. 85−61350
n^+-(Al,Ga)As/GaAs MODFET tiny oscillators, ultra-high-speed cctr. using self-aligned gate technology 85−54783
AlGaAs/GaAs heterostruct. transistor ring oscillators with submicron gates, fabrication and performance 85−29322
n-AlGaAs/GaAs planar p^+-gate 2DEG FET DCFL high-speed ring oscillator, struct. and characts. 86−52783
AlGaAs/GaAs submicron gate selectively doped heterostructure FETs, gate-length depend. of SSI speed 86−53819
AlGaAs/GaAs/n-AlGaAs HEMT ring oscillators, insulated gate inverted structure 86−8103
$Al_xGa_{x-1}As$/GaAs heterojunction oscillator, DC mag. field effects on real space electron transfer 85−625
GaAS MESFET microwave self-oscillating mixer *(Korean)* 88−44356
GaAs/n-AlGaAs inverted-structure MODFET, high-speed low-power ring oscillator 86−942
$LiNbO_3$ SAW oscillator for humidity and temp. meas. 87−3812
$LiTaO_3$ chip-type resonators, fabrication and appls. 86−15312
$Pb_{0.15}(NaBi)_{0.425}Bi_4Ti_4O_{15}$ bismuth layer-structured ferroelectric ceramic bulk-wave delay line oscillator 85−1821
Rb, Rb-3100 atomic oscillator, development 88−10093
α-Si TFT devices for matrix addressed LCD 86−67873
Si torsional oscillators, fabrication 86−2047
a-Si vertical-type MOSFET ICs, ring oscillators 88−63626
ZnO-SiO_2-Si SAW chemosensor for NO_2 gas concentration meas. 87−3602

oscillograms *see oscillographs*

single-phase short-circuit current directional protection for unearthed-neutral networks *(Russian)* 87−78200
SMPS, single-cycle over-current shutdown 85−61083
soft-start fluid couplings and solid state reduced voltage starters compared 87−64602
solid capacitors, internal fuses 88−63993
solid-state relay for transformer switching 87−4761
squirrel-cage induction motor, protection against unbalanced voltage operation, a computer study 85−53704
standby supply lines, max. current protection *(Russian)* 86−19428
step-down tertiary transformers, appls. and anal. of differential current protection *(Russian)* 86−61548
subscriber line interface circuits protection 88−9321
substations protection, by relays needing no external power and associated wiring 85−59816
superconducting machine development and transformer overcurrent protection 88−69286

overcurrent protection continued
surge divertors and resistances to protect against surge currents *(Swedish)* 88−55079
switches for overload protection 85−39153
switching device and fuse co-ordination, critical parameters 87−72348
switching power supply, programmable controller with overcurrent latch for constant primary peak current in capacitor charging FET switcher for Nova 85−5237
switching-power supplies, protection circuitry elimination 85−22641
telecommunication cables, protection of connector unit equipment and HF channel multiplexing equipment *(Russian)* 85−8285
telecommunication devices, extension to technical recommendations No.3 *(German)* 88−14399
telecommunication equipment, electrical protection 87−13197
telecommunication equipment current and voltage protection component specifications and tests *(French)* 88−41450
telecommunication equipment protection against power supply interference 87−33952
telecommunication lines and equipment, protection against overvoltages and overcurrents 86−4457
telephone exchange equipment, electrical protection 87−34274
TESLA protection devices for telecommunication equipment *(Slovak)* 87−68816
thermal and electrical characteristics of thick film overcurrent protector with self recovery 88−5404
thermal overcurrent relays for low-voltage motors protection 87−64502
thick film overcurrent protector, thermal and elect. characts. 88−25724
thyristor bridge convertors, high power, overcurrent protection *(Polish)* 87−4812
thyristor DC current interrupters, configuration and props. *(Russian)* 85−59819
thyristor frequency convertors for induction heating, protection by transition of current rectifier in invertor conditions *(Bulgarian)* 85−5175
time-overcurrent relay, field programmable, principles and test results 86−56464
traction motors overloading prevention by meas. armature temp. *(Czech)* 86−19568
transformer adaptive overcurrent protection synthesis using Boolean functions and two data levels *(Russian)* 88−30766
transformer overcurrent protection, IEEE guide for through-fault current duration 86−51698
transistor invertor design for AC drives 87−22597
transmission line protection by independent phase selection and simplified autoreclosure *(Chinese)* 87−4431
transmission line protection using digital impedance methods, evaluation criteria 85−32161
transmission lines, current protection devices 87−9188
transmission lines, sensitivity anal. of directional relay protection *(Russian)* 85−48611
transmission networks, overcurrent relay protection coordination using enhanced algorithms 86−56463
Trisil, voltage limitation and energy absorption circuits *(German)* 86−52975
universal overcurrent and earth fault relays, microprocessor control 86−25652
UPS technical aspects and protection co-ordination *(Italian)* 87−15861
USSR-Finland HVDC back to back link, power convertor equipment 86−51779
vacuum arc fault current limiters, laboratory expts. and design modifications 86−25656
vapour jet control, current limiting interruption technique for elec. arcs *(Japanese)* 87−9689
variable speed DC motor drive, fast-acting current-limit protection 87−16078
VAZP battery charger converter, circuit breaker closing, rectifier tripping prevention *(Russian)* 88−37285
VHF resonant convertors, fast undervoltage sensing cct. for short-cct. protection 86−7942
VLSI device input protection circuits, degradation following high-current impulse injection 87−53458
Voitsberg 3 thermal power station, 6 kV auxiliaries protection, warning systems *(German)* 85−9544
Voitsberg 3 thermal power station generators and transformers protection *(German)* 85−9740
voltage commutated systems connected to DC source semiconductors protection 88−69574
voltage source invertors, overcurrent protection considerations during parallel operation 88−55441
voltage transformer, protection efficiency from current overloads *(Russian)* 87−30710
SF_6 interrupting device, MV transformer circuits protection 88−24013

overhead line conductors
2-conductor bundle overhead line dynamic response to aeolian excitation 88−75191
3 kV DC traction system of Italian state railway, overhead contact wire system *(Italian)* 86−19570
6 to 10 kV overhead lines with ice accretions in crosswinds, increasing reliability *(Russian)* 86−39177
10 to 750 kV overhead power line conductors, anal. of cases of galloping *(Russian)* 87−42490
12-conductor bundles spacers, mechanical testing 86−32788
20 kV compact overhead line planning, development and costs *(Hungarian)* 87−64185
25 kV AC traction catenary damage by standing arcs at insulated overlaps 86−33790
35 to 220 kV overhead power lines, conductor phase design optimisation 87−21950
35-220 kV overhead transmission lines, parameter optimisation for design *(Russian)* 86−25610
100 kV line capacity improvements, pretensioning process to prevent sag 87−30224
110, 220 and 400 kV overhead power lines current-carrying capacity *(Polish)* 88−75195
132 kV and 220 kV overhead line optimum span, tower weight, power supply economics 87−42510
132 kV Kindaruma-Juja line, Kenya, voltage uprating to 220 kV 85−9520
138 kV transmission line Linnet conductors 86−18846
230 kV interconnection project, Jamuna River crossing, Bangladesh, construction problems 85−9436

overhead line conductors continued
275 and 400 kV supergrid overhead network, service life and refurbishment 87−50830
275 kV line composite overhead earth wire optical-fibre transmission characteristics *(Japanese)* 86−49619
380 kV conductors stringing across the Bosphorus Crossing 85−15651
380 kV overhead power lines of VEW network, construction and operation *(German)* 86−18838
400 kV power overhead line design considering wind gust phenomena 87−57667
500 kV, with ellipsoidal phase structure, characts. of AC corona on conductors *(Russian)* 88−68989
500 kV overhead line single-conductor corona discharge obs. *(Russian)* 88−5364
1150 kV transmission line, elec. field allowing for supports and conductor sag. 87−71709
AC resistance measurement in Al conductor, steel reinforced, model and expt. 86−51039
AC traction line EMI reduction factors, multiconductor calc. method 88−2623
ACSR conductors in national grid, corrosion examination and refurbishment strategy 88−10869
ACSR outdoor overhead cables, capacitance meas. 88−55034
ACSR overhead conductors AC resistance, magnetic and temperature effects 85−59758
aeolian vibration model for power overhead line conductors 86−18843
aeolian vibration problems, dampers for stress reduction 85−15639
aerial bundled conductors, insulator designs and advantages 85−64927
aerial wire systems for elec. cars, relation with pantograph *(Japanese)* 87−79019
ageing due to aeolian vibration, service lifetime estimation 87−50829
Al conductor steel reinforced, bare stranded, radial and axial temperature gradients, wind shielding 86−51036
ampacity, environmental effects, statistical appls., Brazil 88−55037
ampacity evaluation using conductor temp 87−78070
arc discharges caused by conductor clashing, characts. 86−44992
automatic compression fitting for jointing overhead line conductors 86−65747
autonomous power supply network, conductor cross-sections and location coordinates, optimisation *(Russian)* 85−21179
bare stranded overhead conductors, temp. gradients 88−75197
bimetallic conductor dimensioning error correction model *(Romanian)* 87−57661
breakage, transient response of transmission line, mathematical model 87−57657
broken distribution feeder conductor detect. using offline programs 85−64930
bundle conductors, for EHV and SHV systems, theory 87−21926
bundle wires monopolar corona, influence of wind 85−32201
buried and overhead line conductors, generation of EM fields, ground network 87−26600
cable disconnection fault *(Japanese)* 87−78153
cables and conductors for agroindustrial complex 85−64917
cap and pin insulators, defective porcelain detection 87−50828
clamped conductor endurance testing, guide to uniform method *(French, English)* 85−64924
climatic effects and protection for power overhead lines 85−59775
coaxial electrode configuration, corona capacitance 86−32790
compact design of overhead lines to increase power capacity *(Russian)* 86−65725
conductor life expectancy under wind-induced oscillations *(German)* 88−61947
conductor temp. meas. for line capability determ. 87−50827
corona losses and radio interference, bundling spacing influence 88−75199
cradle block system for overhead transmission line conductor stringing 86−32806
cross section-selection, multi-criterial optimisation problems 88−42866
cross sectional areas standardisation for Soviet rural overhead power lines *(Russian)* 87−42488
current carrying capacity in ACSR conductors 86−32789
current carrying capacity of overhead contact system conductors for electric traction 86−66460
current in horizontal wire above ground, quasi-TEM approximation 87−39422
current-carrying capacity in tropical climate 86−51044
design, based on limiting states *(Russian)* 86−39174
design for improved transmissive capacity *(Russian)* 86−25609
design of overhead distribution lines 87−30220
distribution network for commercial props., pole line equipment and accessories 87−64188
DYNAMP computer code for bare overhead conductors ampacity determ. 88−75205
EHV and UHV overhead lines, damping device efficiency for oscillating conductors 87−50824
EHV and UHV transmission lines, corona effects investigation 86−51027
EHV overhead distrib. gear conductors, electric strength of air spacing 87−42495
EHV overhead transmission line, impact pressure wave dynamic response calc. 87−64184
electric field strength reduction at split conductor using internal longitudinal screen *(Russian)* 87−21949
electric tramway suspension wire, maintenance *(Japanese)* 86−66417
electrical discharge through green wood branches, high impedance fault 86−44993
EM fields generated by buried and overhead single conductors 87−26599
EMP-induced corona effect expt. 88−8532
fatigue failure under wind-induced vibrations, countermeasure design and treatment 87−42505
feeder clamps for Al conductors, contact technical fundamentals 86−45008
flexible busbars up to 220 kV during short circuits, oscillations calc. *(Russian)* 87−9192
flexible conductors of outdoor switchgear and overhead lines, approx. calc. of electrodynamic stability *(Russian)* 88−68988
galloping amplitude rel. to insulator string loading, scale model tests *(Dutch)* 86−44989
galloping conductor aerodynamic stability model for damper effectiveness *(Dutch)* 86−12465
galloping frequency calc. *(Russian)* 88−17174
galloping phenomenon, calc. of curves in Romania for 63 to 400 kV 88−36861

overhead line conductors continued
galloping under action of wind and ice, conditions for occurrence 88−68985
gondolas for large-flux multiwire conductor stringing, production and testing *(Japanese)* 87−4416
ground clearance checking methodology *(Spanish)* 87−9195
GTACSR conductor improved current carrying capacity in overhead lines 88−55039
high-power generating equipment and current conductors, shielding coefficient *(Russian)* 88−68987
HV and VHV multiconductor lines, Telegraphist's Equations *(Russian)* 88−17173
HV bundle conductors design, to minimise radio interference production *(Spanish)* 85−38525
HV conductor support frame stress calc. 87−50834
HV conductors, corona induced vibration by BEM, space charge effect study 86−65733
HV conductors, corona-induced vibration, from water drops or hanging metal points 85−9518
HV overhead power lines, thermal behaviour anal. under various atmospheric conditions 88−55042
HV power overhead lines, corona damping and switching overvoltage load characts. *(German)* 86−18836
HVAC transmission lines, effect of altitude on audible noise and corona power losses 86−61157
HVDC transmission lines, ionised field eqns. soln. without Deutsch's assumption 88−69004
ice accretion onto overhead wires, numerical model 85−15624
ice coating effects on overhead line conductors in Vojvodina *(Croatian)* 85−32196
icing, asymmetrical loading, mechanical stresses, computation *(Czech)* 85−15625
icing occurrences and thickness, statistical trends 86−61152
icing-up of overhead line conductors serving agricultural industries *(Russian)* 86−32780
impulse breakdown characteristics of 13.2 kV covered conductor insulator/tie configurations 87−30222
installation methods, tools, equipment and procedures 88−68996
installation of overhead lines, environment compatible method *(German)* 85−59756
interconnected power system, compact overhead line conductors for increased capacity 85−48600
large-scale bundle conductor transmission line accessory developments *(Japanese)* 86−6378
lightning discharge parameters calc. during direct strike on conductors or shield wires *(Russian)* 86−25614
lightning EMP induced voltages in communication and control circuits 86−54314
lightning induced voltage calcs. 86−56450
lightning simulation tests for overhead line conductors with embedded optical communication cables 85−64929
LV overhead distribution lines, with insulated twisted conductors, characts. and calc. *(Italian)* 85−38521
maximum amplitude of conductor galloping, estimation by describing function anal. 86−39180
mechanical calc., statistical errors anal. *(Romanian)* 88−10876
mechanical oscillations of overhead line conductors *(German)* 86−18837
mechanical state, equations of catenary *(Croatian)* 88−48588
mining safety, fault current calc. for DC overhead system 86−13242
monopolar corona on bundle wires as influenced by wind 88−23523
multiconductor nonuniform power line NEMP-induced surge model 88−8530
multiconductor overhead lines, EM propagation characts. calc. *(Chinese)* 87−9194
multiconductor overhead lines, EM wave propagation theory *(Chinese)* 87−9193
multiconductor quasi-steady state interconnected systems, capacitance and induced voltage *(Russian)* 86−6384
multiwire overhead transmission lines with distributed parameters, steady state regimes 88−75200
Netherlands 380 kV overhead line design optimisation and conductor choice *(Dutch)* 86−12464
network transient analysis program (EMTP) for computation of transient heating *(French)* 87−15312
optimisation problem soln. for overhead transmission line conductors *(Russian)* 87−42494
overhead power lines, energised, safe maintenance method 87−21956
permissible current loading analysis and calc. *(Croatian)* 86−18840
pin insulators, conductor suspension checking for forced-out loads *(Russian)* 88−10889
power, transit sagging of conductors using a calculated angle of sight 85−9515
power, vibrations *(Russian)* 85−15630
power line conductor dancing suppression, anal. of methods *(Russian)* 87−64178
power overhead line corona effects on AC voltage, correlation, losses, RFI and acoustic noise 86−51059
power overhead line galloping phenomena of large bundle conductors under icing conditions, expt. results 86−51048
power overhead line maintenance and repair of bundle conductors and insulators under voltage 86−51052
power overhead lines, conductors and earth wire arrangements for improved reliability *(German)* 88−68972
power overhead lines, corona discharge intensity effect on radio interf. level *(Russian)* 88−17172
power overhead lines, ice loading study on conductors in West Germany *(German)* 88−68971
power transmission loss reduction by Small Power Loss ACSR *(Japanese)* 85−38486
pulse signal devices for warning of ice formation on overhead power lines 85−4653
radial temp. gradient, dynamic line rating methodology 87−50825
railway electric traction of Deutsche Reichsbahn, power supply, distribution and contact system *(German)* 86−26362
railways, electric installations for introduction of western Ried line into Mannheim main station *(German)* 86−26361
railways, power supply lines for high speed Italian, French and German railways *(German)* 85−5433
rapid transit line in Portland, overhead contact system and traction power supply *(German)* 86−26363
real-time ampacity solution, deterministic approach 88−55040

sag and distortion effects of conductor heating in hot climates *(Russian)* 87−4408
sag and mechanical stress calc. *(Russian)* 86−32781
self damping and bundle conductors and their accessories, Al alloys conductors 86−18833
short-circuit currents, arcs and flashover with trees 86−51047
short-circuits in inhomogeneous frozen ground, electric field anal. *(Russian)* 86−39178
snow effects on medium voltage, overhead power lines and towers 85−59774
spacer-dampers for transmission line two-conductor bundles, stiffness study 86−51061
span length calc. *(Russian)* 86−65726
split phase conductors, wave characts. under impulse corona conditions *(Russian)* 86−25611
split phase overhead power lines, calc. of vibrational forces on radial spreaders *(Russian)* 87−42491
split-phase conductors with concentrated weights attached, equilibrium position determ. *(Russian)* 87−78159
stability under wind loads and ice accretion *(Russian)* 87−57664
stranding machine efficiency improvement 88−55047
stranding optimisation for overhead cable loss improvements 88−17176
structural steel core replacement by composite materials 87−64187
substation service currents uprating, thermal loading of overhead line conductors 88−55549
T-2 motion resistance conductors and lattice arms on tangent poles of overhead line 87−15321
temperature, tension and sag variation with load current 86−65730
temperature monitoring at remote positions 85−59834
temperatures prediction with real-time computer program 85−59771
tensile and fatigue strength degradation analysis for replacement standard *(Japanese)* 86−6377
transmission conductors, develop. and installation, characts. 87−71708
transmission line, split-phase conductors galloping expt. study *(Russian)* 87−42500
transmission line conductor on permafrost ground, fixing device and short-circuit operation *(Russian)* 86−51120
transmission line conductor selection program to optimize economics 87−57640
transmission line conductors, thermal anal. using wind tunnels 88−68983
transmission line conductors design, technical and economic basis, limiting terms *(Russian)* 86−61149
transmission line lightning protection using shield wires, technical/economic anal. 86−51150
transmission line rebuilding and uprating by reconductoring and lattice structure refurbishment 88−5372
transmission lines up to 30 kV, construction aspects *(German)* 85−32198
trolley cable wear management by personal computers *(Japanese)* 86−66416
UHV 10 conductor bundle, anal. of audible noise and corona loss 87−35658
UHV 765 kV power line conductors, lateral environmental interference *(Korean)* 87−57666
UHV overhead line design criteria based on 1000 kV Project 86−51055
UHV transmission line conductors, audible noise and corona loss testing 86−18842
vertical clearances of overhead line conductors, National Electrical Safety Code requirements 86−18844
vertical dual bundle, tensorial forces in partial conductors and field spacers *(German)* 88−10870
VHF/UHF EM noise from corona on power-line conductors 88−40589
vibration control 86−51050
vibration waveforms, distortion by localised load *(Chinese)* 86−39182
wake induced oscillations of overhead power lines, study at CPRI 88−68967
weather conditions effect calc. in computer control of power systems *(Russian)* 87−4413
wind motion resistant T2 conductor for overhead transmission lines 86−12466
wind-excited vibrations and fatigue failures *(Croatian)* 86−65727
wood poles for overhead conductor support, nondestructive testing technique 87−50846
ZTACIR, heat resistant galvanised Invar-reinforced Al alloy conductor for power lines 85−59767
Al alloy conductors for power line loss reduction 87−64177
Al bunched and twisted conductor overhead cables for developing countries 86−12470
Al conductor for power overhead lines, loss and reliability study *(Hungarian)* 88−61954
Al conductor steel reinforced for power overhead lines, fatigue damage criterion 86−44991
Al contact wire with steel core, development for Japanese National Railways 87−9916
Al power overhead line conductors, corrosion behaviour and protection *(German)* 86−12460
Al-Mg-Si alloy conductors for overhead appls., develop. study 88−61945
Al-Mg-Si alloys for overhead line conductors, elec. and mech. props., service behaviour 87−50832
AlMgSi low resistivity overhead line conductors 87−64175
Cu conductor heat balance eqn. for variable dissipation factor *(Polish)* 87−78161

overhead line mechanical characteristics

oscillations meas. *(German)* 88−23519
oscillations of overhead line conductors *(German)* 86−18837
power cable wind-induced galloping, effects on stress and lifespan *(German)* 88−10871
power line conductor dancing suppression, anal. of methods *(Russian)* 87−64178
power overhead lines, aeolian vibration study using expt. test line 88−68981
power overhead lines, lifespan calculation, based on swing measurements and fatigue tests *(German)* 85−21220
power overhead lines, split-phase, conductors vibration *(Russian)* 85−21226
power overhead lines profiles design, by interactive computer-based graphics system *(Finnish)* 85−21217
power transmission line construction, maintenance and reliability *(German)* 88−68968
Prony method for vibration anal. *(French)* 86−25606
pylons, overhead lines and insulators, short-term dynamic stress calculations *(German)* 85−9514
railway electric cable relaxation calc. using electric operations computing service *(Japanese)* 86−66412
railway overhead wire displacement and stress anal. by FEA 87−36222
reliability design of overhead power transmission lines 86−18841
sag and distortion effects of conductor heating in hot climates *(Russian)* 87−4408
sag and mechanical stress calc. *(Russian)* 86−32781
sag compensation using Ni-Ti shape memory alloy *(Russian)* 87−78155
SCC detection without stripping of insulation *(Japanese)* 86−56439
self damping and bundle conductors and their accessories, Al alloy conductors 86−18833
separators for high-voltage overhead transmission lines 88−69006
short-term thermal capacity of overhead lines 88−55036
sleet and wind loads on overhead power line, investigation *(Hungarian)* 87−42497
sleet and wind loads on power overhead lines, investigation *(Hungarian)* 87−42498
snow effects on medium voltage, overhead power lines and towers 85−59774
span configuration and mechanical loads, computer-aided design and calc. *(German)* 85−32192
span length calc. *(Russian)* 86−65726
split phase overhead power lines, calc. of vibrational forces on radial spreaders *(Russian)* 87−42491
split-phase conductors with concentrated weights attached, equilibrium position determ. *(Russian)* 87−78159
stochastic modelling and stabilisation of galloping transmission lines 86−51031
structural steel core replacement by composite materials 87−64187
strung conductor mechanical characts., suspension point elevation and swinging insulator strings *(Czech)* 85−27078
suspended transmission line, spring consts., freq. characts. 85−21231
tensioned conductor as a physical pendulum−an analytical solution of short circuit effects *(German)* 87−57656
transmission line, split-phase conductors galloping expt. study *(Russian)* 87−42500
transmission line conductors design, technical and economic basis, limiting terms *(Russian)* 86−61149
transmission line design, wind speeds estimation 86−51040
transmission line dynamic wind load determ., statistical method *(Hungarian)* 88−61949
transmission line lightning protection using shield wires, technical/economic anal. 86−51150
transmission line wind loads, equivalent design wind pressure 86−61158
transport systems for high speeds, CAD of overhead suspension system *(Russian)* 85−10180
Vibration Laboratory at CPRI Bangalore for testing vibrations of power overhead lines 85−33137
vibration waveforms, distortion by localised load *(Chinese)* 86−39182
wake induced oscillations of overhead power lines, study at CPRI 88−68967
wake-induced vibration analysis 86−51042
weather induced overhead line loads, probability anal. 86−6379
wind induced vibration damage detection using radiography 87−50831
wind load probabilities for overhead power lines, IEC/TC 11 recommendations *(German)* 86−12456
wind motion resistant T2 conductor for overhead transmission lines 86−12466
wind speed mapping for overhead transmission line planning *(Russian)* 86−61151
wind-excited vibrations, mathematical model comparison 87−42503
wind-excited vibrations and fatigue failures *(Croatian)* 86−65727
wind-induced cable galloping, origination mechanism anal. using transient wave procedure *(German)* 88−10872
wind-induced galloping in aerial cable lines, planning and operation considerations *(German)* 87−64182
wire busbars, mechanical vibrations due to short circuit currents, computer aided eval. *(Finnish)* 86−6395
Al/fibre cables compared with Al/steel cables for overhead power lines *(German)* 87−15318

overhead line sagging *see overhead line mechanical characteristics*

overhead lines
see also power overhead lines; telecommunication overhead lines
6 kV and 10 kV overhead networks, meas. of short-circuit current to earth *(Russian)* 87−64180
25 kV transmission lines for railway traction; remote controlled relay protection *(Russian)* 86−61783

overhead lines continued
110 and 220 kV overhead lines, supply interruption due to insulation pollution, statistical anal. *(Polish)* 85−21223
AC railway electrification, computer aided train voltage analysis 85−10185
cable spans calc. *(Norwegian)* 86−35145
cable swinging, origination by natural stimulation study for HV overhead lines *(German)* 85−9512
cascade failure prevention for HV overhead lines and towers 85−15655
climatic and geographical considerations for transmission line and pylon design in GDR *(German)* 85−21221
coupled transmission lines, soln. of coupled wave eqns. in time domain *(German)* 88−45737
DC ion flow fields: uniqueness of solution and application of the charge simulation method 88−52049
dynamic stresses occurring in overhead lines, an overview *(German)* 85−9513
electrical industries in Iran, meters, overhead line and transformer manufacture 85−16758
EM field of overhead transmission line with grounded earth return, calc. 87−73831
EMP and plasma front, nuclear explosions produced, induced disturbances in conductor system *(French)* 85−17911
failure of overhead power supplies due to electrocution of birds, engineering solutions 85−15656
HV overhead lines, requirements calc., FORTRAN program *(Danish)* 85−27079
insulated wires tracking resist. eval., accelerated test method using *S*-type electrode 87−9183
insulators for overhead line, dielectric strength study for reduced air pressure conditions 85−4664
lightning induced overvoltages, validation of Rusck's scalar and vector potential expressions 88−5369
low wind pressure conductors, development for overhead power transmission lines 85−15632
maintenance, risks and accidents anal. *(French)* 85−16723
multiconductor transmission line above ground, leakage fields, modal anal. 85−63482
NEMP interaction with multiconductor transmission lines 88−14444
non-metallic optical cable with optical fiber catenaryfor long span aerial application 85−58136
NSB overhead contact system for railways using series capacitors for voltage increase *(German)* 87−64858
nuclear EMP phenomenon, origin and effects on transmission lines and antennas *(Czech)* 87−2310
plastic overhead line insulators, tracking and elec. arcing due to industrial pollution 88−30399
pylon stresses induced by foundation dislocations *(Hungarian)* 86−6392
pylons, overhead lines and insulators, short-term dynamic stress calculations *(German)* 85−9514
telecommunication cables, solid polythene insulation, nonmigratory antioxidants behaviour 85−57909
twisted self-supporting aluminium cables for LV overhead lines, composition and implementation 85−15627
weather effects on insulation, humidity, air density, wind and lightning considerations 85−15631

overvoltage
3-phase elec. utility system neutral grounding, IEEE standard 88−23286
6.3 kV, 500 MW unit auxiliary network, neutral grounding, relay protection, effect on overvoltages *(Russian)* 88−23421
6-10 kV mains, ferroresonance phenomena *(Russian)* 85−21192
6-35 kV distribution networks, statistical arc overvoltage characts. *(Russian)* 85−43595
6kV substations with voltage convertors, ferroresonance phenomena *(Czech)* 85−16100
34.5 kV distribution network, capacitor switching surge magnification 86−25584
110 kV cable system, reinforcement with VPE cable, overloading capacity *(German)* 85−43585
110 kV voltage transformer-circuit breaker sets, testing for ferroresonance *(Polish)* 85−44033
138 kV extruded dielectric cables, metal-oxide varistor arrester protection of shield interrupts 85−21212
275 kV, 150 MVA reactor interrupting tests, eval. in gas blast circuit breakers 86−51686
345 kV switched capacitor banks in New York transmission system, transient network analyser study 86−51929
400 kV transformer, tapchanger overvoltage phenomenon 86−51712
400 kV transmission network commissioning, unloaded line overvoltages *(Croatian)* 86−12379
400/200 kV autotransformers in Escom network, failure study 86−51711
460 kV SF_6 insulated substations at Porto Primavera, fast transient overvoltages 86−51863
500 kV Datong-Fangshan transmission line, China, expt. investig. of switching surge overvoltages 88−68940
500 kV overhead line towers, surge impedance meas. during lightning overvoltage 88−69039
500 kV overhead transmission lines, lightning strike effect on insulator string overvoltages 88−68990
500 kV power systems, statistical anal. of phase-to-phase overvoltages 88−68751
500 kV transmission system switching overvoltage meas. by transient network analyser and EMTP *(Spanish)* 86−25558
AC mains supply, voltage surge and noise 85−9553
AC system overvoltages for Oklaunion and Walker County-STP HVDC projects 86−12370
AC voltage ageing of ZnO ceramic surge arresters 86−51140
all-film power capacitor endurance eval. *(French)* 88−69663
autotransformer locomotive traction system, freq. domain model, harmonic penetration and resonant overvoltage studies 88−5971
barrier lightning protection equipment, origins, production develop., Poland *(Polish)* 88−61985
Bombay Electric Supply & Transport 11 kV distribution system overvoltage analysis 85−53315
brushless alternator field overvoltages under sequential three-phase fault 87−42904
buried coaxial cable with repeater, lightning induced voltages, calc. using Laplace inverse transformation *(Japanese)* 85−3335
bushings, 132 kV, diagnostic monitoring 88−75213

overvoltage continued
capacitor bank switching circuit-breaker requirements and selection criteria 86−12950
capacitor voltage transformers with improved transient response characts. *(Croatian)* 85−32556
circuit breaking arcs, small inductive current interruption, digital simulation *(German)* 85−16150
communication line, lightning induced EM field and voltage, numerical anal. *(Japanese)* 87−76513
computer controlled measurement system for overvoltage protective methods *(German)* 86−51084
converter station, overvoltages study, static compensators and generators representation 86−12907
corona loss characteristics for power network quasi-steady overvoltage calc. *(Russian)* 86−6312
cross channel link, fault conditions, dynamic overvoltages simulation 86−12392
DC chopper with energy recovery transformer for commutation loss and overvoltage reduction 86−34636
DC power systems, multiterminal parallel connected, anal., operation, control and protection 86−12389
differential type switches for pulsating currents and resistance to overvoltages *(Italian)* 86−12957
digital simulation of overvoltage protection by fault inception 86−6429
disconnecting switches in metal-clad switching substations, rapid overvoltage phenomena *(Czech)* 86−33543
disconnector induced overvoltages in gas-insulated substations 85−27574
distribution circuit-breakers during induction motor switching 86−56912
distribution line calculations of overvoltage and short-cct. currents using operational calculus *(Polish)* 88−30342
distribution network lightning overvoltage protection, direct and indirect strikes *(French)* 87−78114
distribution network overvoltages and disturbances, classification, trends and outstanding issues 85−53312
distribution network overvoltages due to fuse-blowing 85−53314
distribution network switching overvoltage meas. complications 85−48579
distribution networks, 10 kV, grounded by resistor, internal overvoltage calc. *(Croatian)* 85−15577
distribution networks, overvoltage propagation, appl. of Lapin 3.5 program *(French)* 87−78075
distribution of chopping times in a uniform field gap in compressed air under switching surges 88−64822
distribution power lines, lightning induced voltages meas., expt., 86−6424
distribution system reactive power rel. to voltage, series leakage and shunt reactance 86−6335
double impulse tests of long airgaps, engineering problems 87−11983
double impulse tests of long airgaps, leader decay and reactivation 87−11984
double-impulse tests on long air gap discharges *(French, English)* 87−53764
dynamic overvoltages calc. model, full machine, lumped line parameters in phase coordinates *(German)* 87−77921
effects on semiconductors and electronic instruments *(Czech)* 86−17588
EHV transformers, dielectric strength requirements and tests *(Polish)* 85−60253
EHV transmission, load characts. of overshooting curve of starting overvoltages *(German)* 86−65759
EHV transmission networks, conductor-conductor connection overvoltages and conductor-earth components *(German)* 86−56396
EHV/UHV transmission line design with dynamic insulation 85−21200
Ekibastuz-Kokchetav 1150 kV overhead industrial power line, overvoltage meas. and test results *(Russian)* 88−30394
electric fuses reliability, under cyclic loading *(Russian)* 85−21762
electric machine simulation using black-box-model, switching overvoltage considerations *(German)* 86−33274
electric motors switching, excess overvoltages caused, influence of switching equipment *(German)* 85−15970
electric railways, system oscillatory overvoltage calc. using time-domain anal. 88−5986
electrical installations design, developments for 80s and 90s *(Italian)* 86−18797
Electromagnetic Transients Program application guide 87−35542
EM and sparsely-oiled circuit breakers under motor switching conditions *(Russian)* 87−36052
EM commutation transient anal. during HV motor starting, digital simulation 87−9481
EMI protection for chemical plant control equipment *(German)* 88−40584
excavators, overvoltages in vacuum commutation apparatus in HV motors 87−72501
faulted transmission lines, single pole tripping, EM transient estimation using Laplace transforms 88−5319
ferroresonance in 110 kV networks with earthedneutrals *(Russian)* 86−32736
gas disconnector switching in switching substations, fast transient overvoltage suppression 87−30873
gas insulated substation earthing systems and transient ground potential rises *(French, English)* 87−51392
gas insulated switchgear, restriking transient overvoltage estimation on disconnecting switch 86−51804
gas-insulated substations, laboratory and field testing of switching disconnectors 86−19426
gas-insulated systems, transient overvoltages caused by disconnector operations 87−25669
Gezhouba-Shanghai HVDC transmission line, China, computer based statistical overvoltage study 88−68896
GTO invertor protection using lossless snubber *(German)* 87−64207
high pressure spark gap recovery after overvolted breakdown 87−17588
HV AC motors, switching overvoltage study *(German)* 87−9487
HV all-film power capacitors, development 85−60377
HV induction motor switching surge test circuit 85−65241
HV induction motors, expt. investig. into transient switching overvoltages *(Hungarian)* 88−17590
HV installation transient overvoltage reductions EMC problems *(German)* 88−55547
HV lines and cables grounding networks, EM impact in urban areas 86−51026
HV motor switching, overvoltages due to vacuum circuit breaker 88−55293
HV motors, switching overvoltages *(German)* 85−32430
HV network compensation inductor disconnection overvoltage theory and meas. *(Spanish)* 88−75166

overvoltage continued
HV overhead transmission lines transient responses *(German)* 86−18835
HV power capacitors, develop., testing 88−62554
HV power overhead lines, corona damping and switching overvoltage load characts. *(German)* 86−18836
HV power systems, switching overvoltage meas. using pure capacitive dividers *(Italian)* 88−42904
HV spark gaps, pulsed discharges in C_3F_8-Ar mixtures 85−5303
HV switching surges generation with distribution transformers, for laboratory insulation testing 85−56023
HV transmission line, switching overvoltages, computer aided and expt. study 86−51000
HV transmission lines, long, lightly loaded, electrification expansion in Ghana 86−50956
HVDC convertor stations, switching surges investig. 88−68895
HVDC convertors, overvoltage protection using metal-oxide varistors 88−68885
HVDC links, overvoltages due to convertor-blocking faults 88−68912
HVDC power transmission, economics, environmental advantage 88−61894
HVDC schemes, transformer inrush currents and associated overvoltages 87−4758
Indian power system disturbances affecting power capacitors 86−6960
indirect lightning strikes, fire damage to Austrian domestic and farming apparatus *(German)* 88−43664
induction motors, single phase, switching overvoltages 86−45409
industrial distribution network voltage regulation *(Russian)* 86−18812
industrial distribution systems, common disturbances and application aspects 85−53959
insulation coordination for the future 87−32767
insulators, flashover voltage, effect of nonuniform pollution *(German)* 86−53854
insulators, solid, cylindrical, with concave curved edges in vacuum, impulse withstand voltage capability, improvement 85−9524
interaction between DC and AC systems 88−68821
interconnected HVDC and AC systems, AC filtering and overvoltages 86−50880
lightning induced in power lines, validation of Rusck's scalar and vector potential expressions 88−5369
lightning overvoltage calcs. for impulse corona discharges *(Romanian)* 88−61963
lightning overvoltage source, principles and effects *(Portuguese)* 86−70714
lightning protection systems, induced overvoltages in current leakage areas *(German)* 86−56476
lightning stroke induced overvoltages in electrical devices and ccts., calc. method 88−68716
lightning surges in telecommunication lines, characts. meas. with obs. system using optical fibre cable 88−16369
lightning-produced overvoltages in cable ducts, simulation 88−8518
living cell model for electric field and overvoltage effects *(Polish)* 87−35448
long air gaps with HV electrodes, minimum dielectric strength 85−43652
LV AC power circuit connected equipment surge testing, ANSI IEEE standard 88−5231
LV AC supply mains, disturbance monitoring 88−30264
LV differential circuit breakers, influence of DC components and overvoltages *(Italian)* 88−43330
LV power system overvoltages, formulation of Indian national standards 85−53250
mains supply transient overloading, effects of electromechanical apparatus switching processes *(German)* 86−33480
medium voltage switchboards, industrial appls. *(Italian)* 86−19417
medium-voltage distribution network disturbances and overvoltages 85−53313
medium-voltage motor switching overvoltages and circuit-breaker comparison tests *(French)* 87−78620
medium-voltage substations, overvoltage defects, insulation ageing during service 88−24096
metal oxide surge arrester applied voltage ratio 88−69071
MHD generator electrode current adder, effect of switching processes on inter electrode voltage *(Russian)* 87−4969
mining facility power system, high-resistance and selective ground fault protection system 85−10304
molten carbonate fuel cell with tape cast electrolyte plate *(Japanese)* 86−61726
multi-pole line model with pulse corona and frequency-dependent damping, lightning overvoltage *(German)* 87−78156
MV fuses, switching overvoltage reduction study *(Hungarian)* 88−62507
MV power cable DC overpotential tests to assure reliability 87−78128
MV switching plants, damage risk from overvoltages, shock potential tests *(German)* 87−58226
nonlinear voltage surge limiters affected by switching, service life prediction 87−71748
oil filled HV cables, dielectric strength of insulation under overvoltages 87−57650
overhead lines, earth effects in series impedance and shunt admittance calc. *(Croatian)* 88−5367
overhead telecommunication lines, lightning induced surge transverse voltages, characts. study *(Japanese)* 85−3331
overheating distrib. of nonlinear resistors up to height of overvoltage limiters 87−66442
parameter investigation for inductive transformer current interruptions, digital simulation 88−11276
power cables, naturally-cooled, transient heating calcs., partial overloading capacities determ. *(German)* 85−21204
power capacitor behaviour under transient overvoltages 86−6959
power lines, lightning induced voltages, expt. 85−9517
power lines, lightning induced voltages, theory 85−9516
power overhead line insulation gap rationale, stresses caused by reduced line size 86−51053
power overhead lines, lightning stroke transient modelling *(Polish)* 88−48594
power station turbogenerators synchronised with circuit breakers, resultant overvoltages *(Russian)* 85−38558
power switcher behaviour, simulation for inner overvoltage computation *(German)* 87−58225
power system transient overvoltages, causes and anal. methods 86−50782
power systems, overload alleviation expert system 88−54947
power transformer insulation behaviour under short-time overvoltage and different moisture contents 87−35993
power transformer modelling for transient overvoltage calc. 87−78732
overvoltage continued
power transformer overvoltages calc., nodal capacitance matrix formulation algorithm *(Polish)* 86−56814
power transformer windings transient overvoltage stresses eval. using network model 87−15840
power transformers, diagnostics of dielectric failures *(Italian)* 86−56806
power transformers, induced voltage testing 85−28042
power transformers, self and mutual inductances calc. for transient overvoltages determ. *(Spanish)* 88−5742
power transmission line corona losses on single and bundle conductors for overvoltage analysis 86−25590
power transmission line polluted insulation, internal overvoltages and electrical strength *(Russian)* 86−25607
power transmission lines with nonlinear insulators, switching transient behaviour, simulation study *(Chinese)* 85−27058
power transmission system air gaps, predischarge current characts. 86−18888
pulse overvoltage causes, component failure, protection standards *(Italian)* 86−3550
reactive power controllers, effectiveness for power convertor bus of HVDC link 86−12329
resonance-switching overvoltages in a magnetothyristorgenerator, laser pumping appl. 86−832
rotating machine insulation, surge voltage breakdown endurance 88−48870
rotating machine insulation, transient switching overvoltages 88−5631
separated power system overvoltages, stability control 87−50659
series compensated transmission lines, load rejection overvoltage calc. using computer methods 88−5322
SF_6 configurations, dielec. strength under overvoltage, rel. to AC gas insulated substations 86−68055
slip ring induction motors, overvoltages during stator or rotor current cut-off *(Czech)* 85−5076
snubberless high-power rectifiers, characts. study aid simulation using COMPASS program 87−38196
solid-state battery porous and composite electrode phenomena 86−66233
spark gaps, voltage recovery after overvoltage 85−27127
static DC/DC convertors *(Italian)* 87−65818
static VAr systems, dynamic behaviour study by EDF *(French)* 87−15198
surge arresters, metal oxide, overvoltage failure prevention 87−15382
switchgear, HV, insulation clearances between screens when overvoltages are limited *(Russian)* 88−30954
switchgear, vacuum and SF_6 technologies comparison, 5 kV-38 kV range 86−6952
switchgear and busbar air insulation coordination for HF switching voltage surges 87−9687
switchgear station series capacitor characteristics and transmission capacity improvement *(Japanese)* 87−30879
switching overvoltage statistical analysis by hybrid simulator 86−12499
switching overvoltages across high-voltage house-auxiliarymotors at power plants 86−45333
switching overvoltages effects on bushing flashover 87−78181
switching substations, gas-insulated, transient sheath voltage rise reduction methods 85−49049
synchronous and induction distribution generators, causes of overvoltages 86−39703
synchronous generators in DC power systems, capacitive load induced field stresses 85−43949
synchronous machine, rectifier excited, prefault load overvoltage effect during 3-phase fault 86−12781
synchronous machines, rectifier excited, field overvoltages during sequential 3-phase faults 85−9849
synchronous machines with rectifier excitation, field overvoltage analytical model and eqns. 87−30545
synchronous motor, thyristor-excited, effective field quenching *(Russian)* 88−69311
telecommunication links, statistical dependences *(Czech)* 85−57902
telephone office terminal point on subscriber loop, indirect lightning surges, multichannel meas. equipment *(Japanese)* 85−19919
temporary overvoltages in long transmission lines during no load operation *(Rumanian)* 85−21165
three winding transformers, impulse transmission behaviour *(German)* 86−66123
three-phase overhead line step response, numerical calc. *(Croatian)* 88−61953
three-phase power transformers for rural system appls., overvoltage study 88−55415
three-phase rotating machine susceptibility to system disturbances and overvoltages 85−65196
thyristorised discharger with oscillatory cct., operation in presence of higher harmonics, anal. *(Russian)* 85−21723
traction system 16 $^2/_3$ Hz cable sheaths earthing, special problems *(German)* 85−32217
transformer inrush current prediction model 86−45485
transformer magnetic circuits, transients during switching *(Russian)* 87−51311
transformer overvoltage on three-pole reactor switching *(Croatian)* 86−70957
transformer saturation effects on EHV power system overvoltages 85−44042
transformer winding, overvoltage simulation, appl. of RESEL interactive program for electrical network transient anal. *(French)* 87−50761
transformer windings, internal stresses calc. using mathematical model *(German)* 85−27479
transformer windings, series insulation, lightning overvoltages calc. *(Polish)* 85−44035
transformers for power stations, resonant overvoltages initiated by cable network switching transients 86−51708
transformers of grounded networks, overvoltage stresses *(Hungarian)* 86−45474
transient overvoltage test waveforms, equations 88−40593
transient overvoltages on rotary flux compressor/compensated pulsed alternator windings 85−5061
transmission branch overloads corrective control algorithm using linear formulation 87−78017
transmission line and cable discontinuity overvoltage build-up, Bewley's lattice method development 87−50751
transmission line interphase energization overvoltages due to circuit breaker pole closure 88−23491
transmission line theory, overvoltages across capacitor stores with load connected discharger *(Russian)* 85−59656

overvoltage continued
transmission lines, transposed and untransposed, correl. of switching overvoltages 88−61943
transmission networks, overvoltages due to single phase and two phase earth faults *(French)* 85−9531
travelling wave phenomena in HV overhead lines and switchgear, expt. investigation *(German)* 87−21951
UHV untransposed transmission lines, internal overvoltage calc. using Laplace transforms and modal techniques 88−5321
underground 138 kV extruded dielectric cables, shield interrupt overvoltage study 85−21211
underground conductors, lightning pulse propagation and overvoltage occurrence calcs. using numerical simulation *(Russian)* 88−17115
underground lines, electrical circuit parameters determ. for atmospheric overvoltage simulation *(Russian)* 87−57639
underground power cables, lightning overvoltage calc. 86−12438
UPS system, single phase, fast acting detector for monitoring abnormal output voltages 87−64695
vacuum circuit breakers arc-model *(German)* 87−58243
vacuum contactors, appl. guidelines for motors 87−36080
vacuum contactors, overvoltage phenomena due to switching currents 87−15943
vacuum interrupters, chopping current and switching overvoltages during breaking, meas. and anal. *(Croatian)* 88−30945
vacuum switch switching overvoltages, generated by chopping circuits, analytic determ. *(German)* 85−60349
vacuum switches, multiple reignitions, statistical simulation and meas. 86−26207
vacuum switchgear, contact rebound effects on overvoltage and overcurrent *(Polish)* 85−10063
vacuum switchgear for intrinsic overvoltages, determination of switching circuit chopping currents *(German)* 85−16149
vacuum switching equipment, overvoltage phenomenon anal. technique 87−36073
virtual current chopping overvoltage prevention by vacuum switch with advanced opening pole *(Dutch)* 87−15928
voltage transformers, effects of distribution network feeding substation busbar overvoltage *(Russian)* 87−43147
Y-Y transformer bank, 25 kV/600 V, floating secondary terminals, electrostatic overvoltage 87−30747
Yugoslav 400 kV transmission line switching overvoltages and flashover risks *(Croatian)* 87−57610
O_2 varistor for overvoltages in elec. networks, stability and aging *(Polish)* 88−63982
SF_6 circuit breakers for switching voltage transients 88−5789
SF_6 gas insulation, voltage-time characts. *(French, English)* 86−2455
SF_6 gas puffer breaking chamber, closing resistor insertion 86−51847
SF_6 insulated 380 kV switching station secondary line transient overvoltage recording *(German)* 86−6944
SF_6 insulated 380 kV switching station secondary line transient overvoltage meas. *(German)* 86−6945
SF_6 self-extinguishing MV circuit breaker for industrial appls. 87−22667
n-Si/n^+-SnO_2/electrolyte integrated junction in photoelectrochemical cells 85−49110
ZnO arresters in AC HV network *(French)* 87−21989

overvoltage protection
3 kV DC electrified railway lines, protection against short-circuits *(Czech)* 85−21879
6 kV, in-house, supply circuits for thermal power stations, overvoltages *(Russian)* 86−32737
6 kV busbar system of hydroelectric power stations, overvoltage protection *(Rumanian)* 85−38545
6-10 kV distrib. network for mines, overvoltage limiters *(Russian)* 88−55764
6-10 kV industrial distributions networks, static compensator effects on arc short circuit induced overvoltages *(Russian)* 85−27104
6-10 kV network switching overvoltage meas. and protection *(Russian)* 86−32748
10-20 kV three phase distribution networks, overvoltage protection during single pole switching *(Danish)* 88−23435
10-30 kV cables overvoltage protection *(German)* 85−32218
10/20 kV distribution networks, neutral point earthing resistance *(Croatian)* 85−38547
11 kV and 22 kV rural distribution networks with wood poles, lightning effect studies 85−64958
12 V 5A DC power supply, design 85−61066
14 kV short-circuit generator overvoltage protection *(Czech)* 85−38568
36 to 72.5 kV power systems fed by delta connection, overvoltage protection, operating features *(German)* 86−65613
110 kV overhead lines, with insulated neutral transformers at trapping points, unbalanced phase operation prevention *(Russian)* 85−21224
110 to 220 kV power transformers, overvoltage protection of insulated equipment connected to neutrals *(Russian)* 87−43168
220 kV electromagnetic voltage transformers, ferroresonant switching overvoltage protection and study 85−21684
350 kW 1.5 kV 3000 rev/min variable-reluctance traction motor 88−18182
420 kV SF_6 insulated substation in UK, insulation coordination 86−51859
480 V cement industry distribution system, high resistance grounding experience 86−52082
2000 MW HVDC Cross-Channel Link, convertors and overvoltage protection 88−68878
AC and DC valve-type voltage arresters, elec. characts. *(German)* 87−9222
AC power lines, protection against transient overvoltages, techniques, components and systems *(French)* 86−45027
AC/AC cycloconvertors using power MOSFETs 88−17745
AC/DC regulator for direct mains connection, MAXIM chip devices with over/under voltage detectors *(German)* 87−65812
arcing-ground fault protection for LV distrib. networks in buildings 88−30363
asynchronous motors, vacuum contactor controlled, overvoltages and protection *(Polish)* 87−58087
atmospheric overvoltage and direct lightning stroke protection practice 86−12492
automatic device for protecting motors against damage *(Russian)* 88−75553
automobile DC elec. systems, transient voltage suppression considerations *(Spanish)* 87−51582
autotransformers, regulating winding protection failure from pulsed overvoltages *(Russian)* 87−72173

overvoltage protection continued
AZO-6 overvoltage protection apparatus for coal mines, perform. test results *(Russian)* 88−49325

breakdown type protection diodes *(Italian)* 88−33138
breakover diode surge protection device, design characts. and appls. *(French)* 85−27120
breakover diodes for thyristor protection against overvoltage 88−64479
buried coaxial cable with repeaters, lightning induced voltage reduction using metallic sheath earthing *(Japanese)* 85−3336
cable screening, interference and overvoltage protection *(German)* 86−45001
capacitor protection during switching in LV networks *(German)* 86−53081
CATV system transient damage and protection 87−56385
cement industry distribution networks, high resistance grounding 86−19678
circuit breaker stresses due to transient voltage following arc extinction in contact gap 87−30876
circuit protection devices and networks, modelling 88−19908
circuit protection devices for board-level surveillance 87−66674
Class-E amplifier power supply for HF elec. process heating appl., computer control method 88−43281
clipper diodes, operating time reduction 86−2116
CMOS circuits, overvoltage protection techniques *(German)* 87−32685
communication apparatus overvoltage protection using surge divertors *(Russian)* 87−42537
communication cables−interference, screening and overvoltage protection *(German)* 86−43700
communication installations *(German)* 86−64411
computer electrical protection 85−49006
computer power protection, longer term trends 87−9679
computers and sensitive equipment, surge protection 86−39947
constant current PSU design features 87−65838
controlled DC electric drives, overvoltage limitation across motor armature terminals 87−58364
current limiter diodes for overvoltage protection, Siliconix JR series, characts. and appls. *(German)* 85−29188
current surges protection for computers *(German)* 88−48612
current-limiting DC thyristor circuit breaker, for industrial applications 85−60370
data processing and communications equipment protection *(German)* 86−51144
data processing and communications installations *(German)* 86−45017
DC distribution networks, protection from overvoltages using protective diodes between busbar and earth *(Russian)* 87−42522
DC switchgear for rapid transit systems, circuit breaker and protection requirements 85−27580
digital anal. of overvoltage, lightning current modelling 86−56466
digital frequency meter, design with overvoltage protection *(Spanish)* 85−48020
digital modelling of lightning overvoltages on cable input connection to transformer station 87−15362
digital simulation of overvoltage protection by fault inception 86−6429
dispersed generators interconnection with wye-grounded distribution feeders, overvoltage considerations 85−27047
distributed control system AC power conditioning and load quality 86−26190
distributed photovoltaic system, utility interface problems 86−6617
distribution network arc overvoltage protection *(Russian)* 87−9157
distribution networks, with Y connection grounding resistor, internal overvoltage anal. *(Croatian)* 88−61982
distribution surge arresters with metal oxide varistors and pressure relief capability 86−6441
distribution system protection from overvoltages caused by generator separation using surge arresters 87−78192
distribution system surge protection, critical issues 86−65771
distribution system surge protection, underground cable failure problems 88−48556
distributor and rail section, overvoltage protection *(German)* 87−35679
effects on semiconductors and electronic instruments *(Czech)* 86−17588
effects on shunt capacitor banks and associated equipment 86−6398
EHV AC transmission lines with static thyristor compensators, overvoltage limiting 86−44968
EHV series capacitor overvoltage protection using metal oxide varistors testing procedures 88−75884
EHV series capacitor reinsertion, SiC varistors compared with ZnO varistors 87−4457
Ekibastuz-Ural power line, 1150 kV elec. equipment system 88−30367
electric booster melting equipment specifications for glass industry 85−54005
electrical installation protection, insulation coordination at LV *(French)* 86−45016
electrical installations, earthing clips, buried electrodes and overvoltage protection *(German)* 88−55062
electrical installations, international and Italian safety standards for general and special plants *(Italian)* 85−28025
electrical installations in buildings and struct., lightning protection 86−45018
Electrical Overstress/ESD Symposium, Orlando, FL, USA (Sept.-Oct. 1987) 88−49369
electron microscope accelerating voltage supply, overload protector 85−45372
electronic data processing installation overvoltage protection from lightning strikes *(German)* 87−71733
electronic equipment protection against mains fluctuation and disturbances, measures 85−10415
electronic equipment surge protection 85−32246
electronic equipment with semicond. components, protection for overvoltage and EMP *(German)* 85−36042
electronic instrumentation transient overvoltages suppression, caused by lightning discharges 85−14587
electronic private branch exchanges, impact potential strength, earthing and lightning protection *(German)* 86−55127
electronic telecommunication equipment, Austrian standards for transient overvoltage protection *(German)* 86−54661

VLSI and ULSI, assisted oxidation and annealing 87−18345
VLSI devices and thermal oxide morphology, cross-sectional TEM 87−25139
VLSI fabrication, LOCOS, bird's beak reduction technique 86−35760
VLSI isolation process with reduced bird's beak 86−58523
VLSI local oxidation mask using implanted Si_3N_4 film 85−1518
VLSI scaled cct. fabrication, fully recessed-oxide field isolation technology 86−35868
VLSI science and technology, conf., Philadelphia, PA, USA (May 1987) 88−70000
VLSI science and technology, conf., Toronto, Ont., Canada (May 1985) 86−19734
VLSI using advanced bipolar technology, poly-Si oxidation-induced defects elimination 86−21810
wafer thermal oxidation and characts. *(Japanese)* 88−57483
XLPE cable insulation, oxidation and water treeing 88−51077
Pt/SiO_2/n-Si photoelectrodes in I and Br aq. solns., elec. props. and thermal oxide growth 87−53405
Ag specimen, contact resist. meas., deform., fretting effects 87−8713
Ag surface, polycryst. and single cryst., anionic adsorpt., second harmonic generation studies 85−7518
$(Al,Ga)_{0.5}In_{0.5}P$ (100) surface, initial oxidation stage, XPS study 85−34871
Al/Si Schottky-barrier diode, forward voltage scatt., substrate oxidation during Al evaporation *(Japanese)* 86−41741
Al/SiO_2/Si struct., charged centres, oxidation and annealing processes depend. 86−28062
Al/SiO_2/p-Si MOS capacitors, postoxidation cooling in O_2, effect on interface property, expt. study 86−35447
Al/Ta_2O_5/Si capacitors, capacitance-voltage props. 88−32953
Al-SiO_2-Si MOS capacitors stressed by avalanche electron injection, interface and oxide trap annealing kinetics, HCl effects 88−57397
Al-SiO_2-Si MOS structure, low-temp. Thermal oxidation fabrication, elec. characts. study 86−21269
$Al_xGa_{1-x}As$ (100) surface, initial oxidation stage, XPS study 85−34871
AlN ceramics, directly bonded Cu metallisation for power hybrids 86−15099
AlN, substrate and casing material for electronic applics. *(German, English)* 88−64120
AlSi surface oxidation states, photoresist. removal, plasma stripping effects 88−71420
Au/Si film oxidation for self-confined interconnects 86−15069
$Au/TiW(Nb)/SiO_2$, adhesion failure, electron microscopy studies 86−15100
Au-GaAs micron range varactor diodes, fabrication technology, parametric amplifier appl. 85−6891
Au-Si, Schottky diode, effects of Si surface treatment on stability *(French)* 86−21504
Au-Si mixture films, oxidation behaviour, appl. for integrated circuits 87−60316
B_2O_3-P_2O_5-SiO_2 glass films, contact resist. behaviour, enhanced Si oxidation 87−66998
$BaTiO_3$, altering photorefractive props. by reduction and oxidation at 650°C 86−36114
$BaTiO_3$/Zn-Cu ceramic capacitor, oxidation ratio and migration tests 86−67530
Be-Cu alloy contact materials, heat treated, cleaning 88−38799
Bi-Sn eutectic films, oxidation kinetics and thermal contact resist. 88−56316
$Bi_{1-x}Pb_xPt(Pd)O_4$ linear chain semicond., powder elec. cond. studies 85−50225
Cd films, laser-induced oxidation, time-resolved optical reflectivity and transmission 85−50452
Cd-Cu, bronze, sliding contacts, electron spectroscopy of surface oxide films 87−37617
$Cd_{0.25}Hg_{0.75}Te$, p-type, surface props., XPS, transverse magnetoresist. 86−8781
$Cd_xHg_{1-x}Te$ plasma oxidation, mechanism 88−39225
n-$CdHg_{1-x}Te$, surface oxidation, influence of surface conductance on galvanomagnetic effects 88−12941
CdS-$CuInSe_2$ solar cells, oxidation of $CuInSe_2$ thin films 86−66343
CdS-$CuInSe_2$ thin-film solar cells, junction formation and O role, EBIC studies 87−16022
CdTe, Schottky barrier formation 86−47400
CdTe, oxidation, soft XPS studies 85−34841
CdTe polar (111) surface etching, AES study 88−33038
CdTe, thermal oxidation, kinetics and oxide composition 87−74201
Co ferrites, isometric pigments, spinel struct., prep. by wet processes 86−13853
Co sputtered films, mag. and struct. props., effect of O incorporation 86−28595
Co-Cr perpendicular recording media with oxidised surface layer, wear resistance 87−18514
Co-Cr sputtered films, mag. and struct. props., effect of O incorporation 86−28595
CoCr thin films, for use as mag. media, oxidation studies 85−56079
CoNi thin films for mag. recording, corrosion resist. improvement by surface passivation 87−60811
$CoSi_2$ interconnections, high-dose ion implantation form. and oxidation 88−71466

oxidation continued
CrSi thin films, chem. changes due to laser trimming, Auger, XPS and SEM determ. 85−45486
Cu contact surface, contaminant film growth, ellipsometric anal. 87−59941
Cu current collecting grid on Si solar cells, oxidation and spalling 87−16055
Cu, foil, outdiffusion to Cr_2O_3 corrosion inhibitor film, rel. to lamination of printed circuit boards 86−47191
Cu in multilayer board fabrication, oxide treatment using spray 87−45434
Cu thick-film conductors, solder acceptance, oxide formation influence 88−64133
Cu, thin evaporated films on alkali halide substrates in humid air, oxidation behaviour 85−10729
Cu wire resistor aging model *(Russian)* 87−59910
Cu-Sn-Zn alloy electroplate, temp.-time effects on oxide film growth 85−50074
n-$CuInSe_2$ in photoelectrochemical solar cells, dielectric props. of the interfacial layer 86−61741
$CuInSe_2$, pH effects on surface properties 87−16042
n-$CuInSe_2$ photoelectrochemical cells, efficiency improvement 86−66346
$CuInSe_2$-CdS high efficiency solar cells, oxidation, reduction 88−37572
Cu_2O, photovoltaic props. rel. to prep. technique, review 86−28964
Cu_2S/CdS heteroconvertors, oxidation and electrochem. decomp., degradation mechanisms study 86−19479
Fe particles, environmental stability studies 88−51220
Fe-Cl fuel cells for missile ground support power plants, operation and containment 85−49087
Fe-Co films, partially oxidised, mag. props. rel. to perp. recording appls. 88−44953
Fe-Co partially oxidized medium with perp. anisotropy 88−51184
Fe-Mn-Bi alloy, microscopic structure and mag. props. 88−13663
Fe-Nd-B-based permanent magnets, low field mag. props., thermomag. meas. 86−15357
Fe-rare earth-B powder oxidation during permanent magnet prep., DSC study 87−67715
$(FeNiNb)_{83}Si_5B_{12}$ amorphous alloy, mag. core loss, surface state effects 86−28705
Fe_2O_3, reactively sputtered thin films, heat treatment effect 85−44783
Fe_3O_4, reactively sputtered thin films, heat treatment effect 85−44783
γ-Fe_2O_3:Os films, effects of deposition and oxidation processes on mag. and structural props. 88−51225
Fe_2O_3-Fe_3O_4 thin film assisted CVD technique deposition, high density mag. recording 88−64958
Fe_2O_3-$NiFe_2O_4$-$ZnFe_2O_4$ thin films, assisted CVD technique deposition, high density mag. recording 88−64958
GaAlAs red LEDs, degradation due to surface oxidation and its prevention 85−46290
$Ga_{1-x}Al_xAs$, VPE grown, ageing, oxidation, SIMS and double X-ray diffr. studies *(French)* 88−49850
GaAs (-1-1-1), activated oxidation, XPS studies 86−63196
GaAs (001), cleaning procedures for MBE, XPS studies 86−2053
GaAs (001), substate etching in H_2SO_4-H_2O_2-H_2O soln., XPS studies 85−61850
GaAs (100), chemical etching and oxidation, XPS characterisation 87−11678
GaAs (110), optically enhanced low temp. O_2 chemisorption and oxidation 85−61862
GaAs (110) oxidation, O-1s core level photoemission studies 86−2048
GaAs (110), oxidation enhancement by mixed valence SM overlayers 87−38148
GaAs (110), oxidation mechanisms 86−47481
GaAs (110), oxidation, photoemission results and models 85−12192
GaAs (110) surface, native oxide layer, XPS study *(Chinese)* 86−8796
GaAs (111), surface oxidation 85−55722
GaAs MIS struct. prep. in presence of O, high temp. annealing, surface Fermi level shift 85−23576
GaAs, Schottky barrier form. mechanism 86−1805
GaAs, anal. of oxides, X-ray photoelectron spectroscopy, rel. to ion microprobe mass anal. 86−9036
GaAs, anodic oxidation in O plasma of HF discharge 85−34836
GaAs, doped, oxidation, in situ TEM obs. 87−11644
GaAs epitaxial layers anodic oxidation carrier concentration and mobility control, MESFET appl. *(Czech)* 85−40638
n-GaAs, laser stimulated etching photoelectrochemical reactions 88−39059
GaAs, laser-induced melting and nonlinear optical studies 87−6600
GaAs metal-deposited surface oxidation, XPS and SEXAFS anal. 88−64408
GaAs oxidation, surface As growth, Raman backscatt. studies 88−26069
GaAs, oxidation with surface PbS layer 88−39204
GaAs, oxide formation in CF_4+O_2 plasma 86−28205
GaAs, photochemical oxidation 85−45593
GaAs, properties, evaluated data handbook 86−40373
GaAs resist edges, etching profiles 87−1414
GaAs, semi-insulating undoped LEC wafers, preferential in-water oxidation around defects 86−15052
GaAs short gate-length FETs, fabrication using anodic oxidation and O diffusion 85−6937
GaAs substrate cleaning by thermal oxidation and sublimation in MBE 88−50724
GaAs substrate, passivating oxide layer, XPS study 88−39223
GaAs surface, HF etching, photoirradiation effects 85−12190
GaAs, surface cleaning by thermal oxidation and sublimation in MBE 88−33033
GaAs surface in aq. soln., deep UV laser light interaction, surface oxidation and dissolution 86−54190
GaAs surface oxidation, AES, XPS and ellipsometry studies 87−11680
GaAs, surface oxidation in air, XPS and ion scatt. spectroscopy study 86−47467
GaAs, surface oxidation, overlayer-induced enhanced rates 86−67805
GaAs surface, real, oxide layer struct. investig. using X-ray diffuse scatt. 85−29162
GaAs thermal oxidation at 250°C under high press., props. 88−13121
GaAs, thermal oxidation, high-pressure, in O_2 and H_2O vapour atmosphere 88−64404
GaAs, thermal oxidation in presence of $SbCl_3$ and $InCl_3$ 87−45789
GaAs/Al(Au-Ti) Schottky-barrier diodes, proton-irradiated, thermal annealing behaviour study 87−32467
GaAs/In_2S_3 structures, thermal oxidation 87−45788
n-GaAs/KOH electrolytic soln. junction, flatband pot. determ., surface modifications, photohole trapping 85−50344

oxidation continued
GaAs-Al_2O_3-Al structs prepared by plasma oxidation, DLTS and C-V characts. meas. 88−50677
GaAs-Al(Au), Schottky barrier height reduction by surface oxidation, effect on DLTS signal for EL2 level 88−32930
GaAs-SiO_2 MESFET, degradation mechanisms 87−52865
GaAs-metal contacts with UV grown oxide interface layer, elec. charactn. 88−64321
GaAs(100), optically induced oxidation, wavelength depend. 88−19810
GaAs(100) surface, oxidised, interface with Ni, effect of O on diffusion and compounding 87−11439
GaInAs, anodic oxides, growth and composition 87−17984
GaInAs/InP MOSFETs by OMVPE and water oxidation techniques 87−1556
GaP, oxidation in aq. H_2O_2 soln. by galvanic action and anodic reaction 86−63189
GaSb, electron-beam oxide layer, XPS study 88−50725
GaSb, thermal oxide, chem. depth profiling by XPS 85−29136
GdCo amorphous films, DC diode getter sputtered, with perp. anisotropy, anomalous aging characts. 87−67697
$GdSi_2$, oxidation behaviour studied by RBS 86−47492
GdTbCo films, RF diode sputtered, prep. conditions effect on mag. props. and ageing behaviour 87−67698
GdTbFeCo thin films, RF diode sputtered, microstruct., oxidation resistance, magneto-optical studies 88−58271
Ge (111), passive-thermal oxidation, formation of etch figures 87−1430
Ge (111), thermal oxidation kinetics, vacuum evaporation of oxides 85−29150
Ge, epitaxial layer formation on Si, implantation and oxidation 88−6446
Ge epitaxial layers on Si substrates, growth and charactn. 88−12015
Ge, native insulators, elec. charactn. *(French)* 87−67023
Ge, oxidation, insulator-semiconductor interface elec. props. 85−12178
Ge single-crystals, wet chemical oxidation 88−50721
Ge-Ge_2N_2O, native oxynitride film growth on Ge, materials characterisation, appl. for MOSFETs 88−57470
H_2 generation from optical fibre cable materials 87−8331
(Hg,Cd)Te, photochemical oxidation and interfacial electronic props. 85−34838
HgCdTe oxidation kinetics, AC impedance study 85−34840
$Hg_{0.69}Cd_{0.31}Te$ (HgTe), oxidation, soft XPS studies 85−34841
$Hg_{0.7}Cd_{0.3}Te$ native oxides, surface characterisation by UPS, XPS and EELS 85−34839
$Hg_{0.78}Cd_{0.22}Te$, stoichiometry of anodic oxides, quantitative meas. 87−17985
$Hg_{1-x}Cd_xTe$ anodic oxide growth mechanism and composition studies 86−67806
$Hg_{1-x}Cd_xTe$, chemical oxidation and etching, nondestructive anal. by spectroscopic ellipsometry 85−12175
$Hg_{1-x}Cd_xTe$-anodic oxide system, final cell volt., layer thickness depend. 88−39158
HgTe, epitaxial layers, chem. composition, effects of surface treatment 87−45798
InAs, surface oxidation, electron irrad., TEM obs. 88−39077
InAs-oxide anodic layers, effect of F ions on growth and props. 86−63182
InAs(P) surfaces, (110), oxidation mechanisms 86−47481
$InAs_xP_{1-x}$, thermal oxidation, Raman scatt. study 85−12173
$In_{0.9}Ga_{0.1}P$, thermally grown native oxide films, Raman study 86−41706
InN, surface oxidation, XPS study 88−1367
In_2O_3 and $In_{2-x}Sn_xO_3$ films, growth by post-oxidation of metal films 85−33474
In_2O_3:Sn, pure and doped films, elec. props. and vacuum deposition *(French)* 88−39088
InP (001), cleaning procedures for MBE, XPS studies 86−2053
InP (100), chemical oxidation and annealing, oxide film characterisation 86−2045

InP (110), oxidation rate enhancement by Cs catalyst 87−60327
InP (110)-oxide interface formation, early stages 86−47482
InP (111), chemically polished and etched, characterisation of native oxide layer, ion scatt. spectra, AES, ESCA 87−11672
InP MIS struct. with double insulators *(Chinese)* 87−37985
InP MIS structures, prep. by RF plasma oxidation, interface elec. props. 87−1334
InP, anodic oxidation using citric acid based soln. 88−33034
InP, catalytic oxidation, catalyst desorption 88−7485
InP, field assisted plasma grown oxide 87−25144
InP for IGFETs, plasma oxidation 88−39222
InP, high press. thermal oxidation in steam 88−33035
InP, laser enhanced low temp. oxidation, dissociation of N_2O 87−17981
n-InP, laser stimulated etching photoelectrochemical reactions 88−39059
InP, photoenhanced thermal oxidation, growth rates 85−23699
InP surface, H_2O and O_2 adsorption, electron stimulated, AES studies *(Chinese)* 85−29134
InP surface, electron beam modifications 88−1535
InP, surface oxidation, electron irrad., TEM obs. 88−39077
InP surface oxide form. and removal, Fermi level pinning, XPS study 88−71418
InP, surface oxides, XPS study 86−21400
InP:Zn epitaxial layers, elec. characts., defects, photoluminescence spectra, oxidation effects 86−58258
p-InP:Zn, thermal oxidation, donor-acceptor complexes dissociation 85−34862
InP/SiO_2 interface, native oxide form., surface treatment effects, electron microscopy and XPS studies 86−1837
InP/high press. thermal oxide interface, XPS study 86−2050
InP(110), Cs monolayer, catalytic oxidation, precursor molecular O state 88−44675
InSb MOS structure fabricated by thermal oxidation method 85−6755
InSb MOSFET with SiO_2/native oxide double-gate struct., design and characts. 85−45687
InSb, anodic oxide growth, SIMS studies *(Russian)* 88−44684
InSb, plasma and anodic oxidation, interface props., AES study 86−2068
InSb, semiconductor-oxide interface, variation of elec. characteristics 85−29050
InSb, surface oxidation, electron irrad., TEM obs. 88−39077
InSb:Te MOS capacitor, HF C-V characts. meas., surface state density estimation *(Chinese)* 86−35439
InSb-SiO_2 interface, elec. and comp. props. correl., surface treatments effect, MOS capacitor props. 88−32940

oxidation continued
InSb-anodic oxide layers, dielec. props., chem. comp. 86−63124
InSb(As)(P), oxidation, element-phase composition and MIS structure elec. props. 86−63199
$In_{2-x}Sn_xO_{3-y}$ thin films, RF magnetron sputtered, preparation and characts. *(Japanese)* 88−440
$In_{2-x}Sn_xO_{3-y}$/Si heterojunction photoelectrodes, cyclic voltammetry studies 86−63139
Ir-W mixed metal coated cathode, surface chemistry changes during activation 86−14788
$K_{0.3}WO_{3.15}$:Li electrochromic films, chem. diffusion kinetics 85−62280
LaB_6 single cryst. cathodes, volatility and morphology, effect of O_2 press. 86−35262
Li foil electrodes, thin-oxide surface layer study 87−78858
Li-S battery, polysulphides in THF solution, oxidation/reduction mechanisms 88−62564
LiAl/$NiPS_3$ button cells, rechargeable, ageing caused by storage and cycling at room temp. 85−39182
MOS IC process, dielec. isolation, completely consumed carbide, SiC material 86−21867
Mn thin films, thermal oxidation and stability 88−63385
Mn/GaAs interface formation on clean and oxidised (110) surfaces 87−24935
MnO_2, chemical synthesis methods, battery appls., review 86−13010
$Mn_{1-x}Zn_xFe_2O_4$ high-induction ferrites, powder synthesis and physiochem. props. 86−35985
$MoSi_2$/Si interface, degradation mechanism after annealing, interface oxide growth 86−28034
Nb Josephson tunnel junctions, low specific capacitance by ion-beam oxidation 86−63586
Nb films, RF sputter cleaning and re-oxidation, in-situ ellipsometric and XPS studies 85−29483
Nb small area superconducting tunnel junction fabrication and DC characts. 88−1904
Nb supercond. resonator, fabrication and characteris. 85−12526
Nb/Nb Josephson junctions with Cu interlayer, plasma-oxidized tunnel barrier 85−1863
Nb-NbO_x-PbIn thin film supercond. magnetometers, plasma processing prep. 87−67906
Nb-NbO_x-PbInAu Josephson junction fabrication by ion beam oxidation 87−12076
Nb-Pb Josephson junctions, fabrication process study *(Japanese)* 87−53922
Nb-oxide-Pb junction tunnel barrier, voltage induced variations 87−67028
Nb-oxide-PbAuIn Josephson edge function fabrication, role of Ar^+, CH_4^+, O_2^+ and backscatt. Pb^+ ions 85−56172
Nb-oxide-PbAuIn Josephson junctions, ion beam tunnel barrier processing, junction parameters 85−56175
NbN-Al_2O_3-NbN tunnel junction series arrays, processing 87−67850
NdDyFeB magnets, post-machining heat treatment, effect on mag. props., corrosion 88−57987
NdFeB permanent magnets, oxidation behaviour in corrosive environments 88−26648
$Nd_2Fe_{14}B$ sintered permanent magnets, magnetisation reversal temp. depend. study 86−15361
Ni, oxidation mechanism, embedded in $BaTiO_3$ ceramic, heat treatment 88−70365
Ni oxidation, thermobalance rig for instantaneous weight monitoring 88−36251
Ni plated Cu conductors, temperature rating as a function of plate thickness 88−25569
Ni silicides, room temp. oxidation, ESCA analysis 85−40632
Ni/CdTe electrodeposited interface, TeO_2 layer production, photoelectric study 86−36300
Ni-Cd cells, O_2 recombination rate on plastic-bonded Cd electrode doped with $Ni(OH)_2$ 87−30910
Ni-Cr thin film resistors, vacuum deposited, high-temp. heat treatment, stabilisation kinetics study 88−38941
$POCl_3$-doped interlevel oxidation, breakdown distrib. 85−55711
Pb accumulator paste, free Pb oxidation during curing, chemical anal. *(German)* 86−66298
Pb alloy Josephson junctions, RF CO_2 oxidation and double-layer resist technique 85−46099
Pb-In Josephson junctions, RF plasma oxidation, impurity effects 86−42163
Pb-In-Au fine-grained codeposited alloy films, RF plasma oxidation 87−25880
Pb-Pb_xO_y-Pb Josephson tunnel junctions for voltage standard 87−21185
Pb-Sn eutectic solder oxidation and degradation of thermal contact resistance 88−164
Pb-acid batteries, H_2, ionis. at positive electrodes 86−33599
Pb_3Bi superconducting films for Josephson junctions, microstruct. control 85−1861
PbO_2 electrode redox mechanism in Pb -acid cell 86−51882
PbO_2 on $PbSO_4$, nucleation and growth rel. to Pb alloying 85−5361
PbS polycrystalline films, recrystallisation with activation annealing, oxidation 87−53218
PbSe films annealed in O bearing atmosphere, ESCA surface analysis 88−39224
PbTe MBE film surface, oxidation and H interactions, elec. props. and surface comp. studies 86−58394
$PbTi_xZr_{1-x}O_3$ piezoceramic, annealing in gaseous media with controllable comp., effect on electrophysical props. 87−329
Pd silicides, room temp. oxidation, ESCA analysis 85−40632
$PrCo_5$ permanent magnets with energy products up to 26 MGOe 85−24190
Pt anode in fuel cell, performance in presence of CO and CO_2, CO poisoning adsorption parameters calc. 87−9725
Pt fuel cell anode, CO poisoning modelling, rel. to CO adsorption during H_2 oxidation 88−37376
Pt silicides, room temp. oxidation, ESCA analysis 85−40632
PtSi and Pt_2Si, oxidation in ultrahigh vacuum residual gas 88−39229
Ru_3Si_3, semiconducting, oxidation, SiO_2 formation rate 86−15037
S, aqueous kinetics meas. at micromolar concentration, optical method 88−22840

AlInAs-GaInAs selectively doped heterostructs., MOCVD growth, HIFET fabrication appl. 87−6410
$Al_{0.48}In_{0.52}As$-$Ga_{0.47}In_{0.53}As$, superlattice avalanche photodiode, impact ionization 87−74093
$Al_{0.48}In_{0.52}As$-$Ga_{0.47}In_{0.53}As$ heterosystem, alloyed AuGeNi/Ag/Au ohmic contacts 86−58320
$AlSb_{0.92}As_{0.08}$-InAs-GaSb unipolar hot electron transistor study 88−71487
As_2S_3 thin films, sheet resist., semicond. substrate depend. 85−55542
Bi_2Te_3-Bi_2Se_3 monocrystalline structure with p-n junction, prep. and characters, antisite defects conc. 88−25932
CdHgTe-CdS thin film tandem solar cells 86−66341
CdO-InGaAs phototransistor, wide spectral response *(Chinese)* 86−63718
CdS:Cu_2S, thin film photovoltaics, solar elec. 85−5372
CdS/CdTe heterojunction solar cells, electrodeposited, fabrication and characterisation 86−19484
CdS/CdTe sintered heterojunction solar cell *(Korean)* 86−13058
CdS/CdTe solar cells 85−23441
CdS/CdTe solar cells, sintered, photovoltaic props., effect of junction form 86−27980
CdS/CeTe solar cells prepared by electrochem. deposition 86−33690
CdS/$CuInSe_2$ solar cells, high efficiency material requirements 86−7105
CdS-CdTe heterojunction solar cell manufacture using thick film technology, review 86−13052
CdS-CdTe heterostructure, closed-tube CVD and charactn. 87−31517
CdS-CdTe screen printed solar cell modules, long term reliability tests 87−15994
CdS-Cu_2S solar cells, $In_2O_3(SnO_2)$ films appl. *(Chinese)* 85−1320
CdS-Cu_2S sprayed heterojunction solar cells, electrical characts. anal. 85−32710
CdS-Cu_xS solar cell props. rel. to sintered CdS film dipping and heat treatment times *(Korean)* 86−26313
CdS-$CuISe_2$ thin film solar cells, photovoltaic activity effects of $CuInSe_2$ structural characts. 85−34548
CdS-$CuInSe_2$ n-i-p solar cell performance, drift field influence 88−5870
CdS-$CuInSe_2$ photovoltaic devices anal., junction EBIC techniques 88−62601
CdS-$CuInSe_2$ solar cells, capacitance determ. of interfacial states 87−9815
CdS-$CuInSe_2$ solar cells, polycrystalline semiconductor heterojunction modelling 86−66348
CdS-$CuInSe_2$ thin film heterojunctions, capacitance anal. 85−61748
CdS-$CuInSe_2$ thin-film solar cells, junction formation and O role, EBIC studies 87−16022
CdS-InP solar cells, high efficiency, with thermally evaporated window layers 87−4939
CdS-polyacetylene, sprayed thin films photovoltaic heterojunctions, elec. and optical props. 86−48278
CdS−$Cu_{2-x}S$ heterojunction solar cells, reversible photofatigue processes 86−13059
CdSe-Cu_2Se heterojunction photovoltaic cells 86−36345
CdSe-Cu_2Se heterojunction solar cell, dry formation, electron microscope study 87−9867
CdSe-polypyrrole coated sintered electrodes for electrochemical solar cells 88−62595
p-CdTe films, in situ prep. by cathodic electrodeposition, CdS/CdTe heterojunction fabrication 85−44762
CdTe in polycrystalline form as basis for bipolar phototransistor 87−26195
CdTe large area thin film solar cells 86−7099
CdTe polycrystalline film heterosystem solar cells, structure and properties 85−44172
CdTe thin film heterojunction solar cells 87−16021
p-CdTe/CdS, heterojunction solar cell, electrochemical deposition 86−7106
CdTe/GaAs heterojunction, defect and impurity states, photovoltage meas. 87−11412
n-CdTe/p-$CuInSe_2$ heterojunctions I-V characts., photovoltaic effects and barrier pots. 86−41577
CdTe-$Cd_xHg_{1-x}Te$ heterostructures, electrical and photoconducting props. 87−46661
CdTe-CdS heterosystem, rear-barrier photoelectric transducer, preparation and props. *(Russian)* 87−56690
CdTe-CdTe-CdSe p-n-n film struct., photoelectrical props. 86−21185
CdTe-InSb heterostructures, OMVPE growth and elec. props. 86−28012
CdZnS/$CuInSe_2$ thin film heterojunctions, photocapacitance study 86−21194
CdZnS-$(CH)_x$ heterojunctions, geminate recombination processes, Onsager approach 88−12998
CdZnS-InP heterojunction solar cell, numerical anal. 87−15991
$Cd_{1-x}Zn_xTe$-CdTe, recombination within CdTe well, intrinsic processes 88−432
$CoSi_2$-Si RTA ultrashallow p^+-n junctions, self-aligned 87−60221
$Cu_{2-x}Cd_xTe$-$Zn_{39.5}Cd_{60.5}Te$:I, heterojunction solar cells, fabrication and characterisation *(Korean)* 87−22743
$CuGaSe_2$-$Zn_xCd_{1-x}S$ p-n junction thin film tandem solar cells investig. 86−13067
$CuGaSe_2$-ZnCdS wide bandgap solar cells for thin film tandem structs. 87−16026
$CuISe_3Se^o$-$CuInSe_2$ p-n heterojunction, formation by photoelectrochemical surface transformation 85−34578
$CuInSe_2$/CdS solar cells, modelling and anal. 87−9859
$CuInSe_2$/CdS, thin film photovoltaics, solar elec. 85−5372

GaAs-Si p-n heterojunctions, interface charge polarity 87−17752
GaAs-ZnSe heterojunctions produced in quasi-enclosed container, elec. and photoelectrical props. 86−21183
p-GaAs-n-ZnSe, scanning electron microscopy 85−28998
n-GaAs-p-GaAs-p-$Al_xGa_{1-x}As$ heterostructures, I-V characteristics in concentrated sunlight 86−19475
n-GaAs-p-GaAs-p-AlGaAs solar cells, thermal charcts. in concentrated sunlight 86−8831
(n-p)GaAs-p$AlGa_{1-x}As$ photocells, photoelec. conversion efficiency 85−24403
GaAs−$Al_xGa_{1-x}As$ heterojunctions in solar cells for improved efficiency 87−64807
GaAs$Al_xGa_{1-x}As$; quantized Hall resistance in two-dimensionalsystems, constants determ. appl. 85−63939
GaAsAs/GaAs, photoconductive detectors, 2D electron gas, device for photoreceiver applications 86−2970
GaAsInP avalanche photodiode, volt-ampere and noise props. obs. *(Czech)* 86−60251
GaAsInP photodiode, quaternary, volt-ampere and noise charcts. obs. *(Czech)* 85−24400
$GaAs_{0.6}P_{0.4}$:Te p^+n and Schottky diodes, RTA and Zn implementation, electron traps, DLTS study 87−66903
$GaAs_{1-x}P_x$-$Cu_{1.8}S$ hetero-photovoltaic cells props. study 87−46681
$GaAs_{1-x}P_x$-GaAs, heteroepitaxial layers, influence of substrate defect struct. on struct. perfection 88−6452
$GaAs_{1-x}P_xCu_{2-y}S$ heterojunction solar cells, photoelectric charcts. 87−64809
GaAsSb p^+-ν-n heterostructure, compositionally step-graded, optoelectronic appl. 86−54045
$GaAs_{1-x}Sb_x$ mixed cryst. heterostruct., photovoltaic effects 85−29684
$GaAs_ySb_{1-y}$ GaAs lattice-mismatched heteroepitaxial interface, MBE growth 86−53397
GaInAs JFET, with InP buffer layer by Be ion implantation and thermal rapid annealing 86−35676
GaInAs/InP abrupt heterojunction growth by MOVPE 85−5978
GaInAs/InP bipolar transistor, fabrication by two-step epitaxial process 86−53596
GaInAs/InP, photoconductive detectors, 2D electron gas, device for photoreceiver applications 86−2970
$Ga_xIn_{1-x}As$/InP, MOCVD grown, long wavelength microstruct. obs. 86−57471
GaInAs-AlInAs new resonant-tunneling devices with multiple negative resistance regions and high room-temperature peak-to-valley ratio 88−71507
GaInAs-AlInAs p-n heterojunction quantum well APD, photodetector appls. 87−49747
GaInAs-InP double-barrier heterostructs., room temp. resonant tunnelling, neg. resist. effects 87−32286
GaInAs-InP, energy relaxation, recombination of hot carriers 88−19708
GaInAs-InP, epitaxial heterostructure, characterisation, for optoelectronic and microwave devices 88−7332
GaInAs-InP heterojunction, two-dimensional hole gas 87−66972
GaInAs-InP heterostructure, MOCVD growth 85−396
GaInAs-InP, two dimensional electron gas, electronic props., effect of hydrostatic pressure 88−64313
$Ga_{0.47}In_{0.53}As$-InP, quantum well photodiode, photocurrent step-like struct. 87−74092
$Ga_{0.47}In_{0.53}As$-based heterostructs., electron-optic phonon coupling 86−53372
$Ga_{1-x}In_xAs$-InP heterostructures, MOVPE growth and characterisation 86−46330
$Ga_xIn_{1-x}As_yP_{1-y}$ solid soln. solar cells 85−27656
GaInAsP/AlGaAs visible laser diodes on GaAs, LPE, planar BH, 674 nm 87−39139
GaInAsP/InP crystal growth by organometallic VPE for integrated optics, formation of p-n junction 85−401
GaInAsP/InP surface emitting laser with flat surface circular buried heterostructure 87−18985
GaInAsP-InP, double heterostructure, LPE growth rate rel. to supersaturation 88−6450
GaInAsP-InP, double heterostructure, characterisation by IR spectroscopy, SEM modes, photoluminescence 88−8182
GaInAsP-InP, heterostructure, determ. thickness of active layer, profiling method 88−8183
GaInAsP-InP, prep. by LPE; etched channel regrowth by VPE 86−52498
$Ga_xIn_{1-x}As_yP_{1-y}$-InP DH lasers, low press. MOCVD growth, laser props. 86−15726
$Ga_xIn_{1-x}As_yP_{1-y}$-InP heterojunctions and superlattices, MOCVD growth 85−33510
GaInAsSb/GaSb heterostructure, hole density, IR reflection spectra 85−40505
GaInAsSb/GaSb p-n photodiodes characterisation 88−70346
GaInPAs-InP, heterostructure waveguide, liq. phase epitaxy 87−38764
GaP photovoltaic solar cells, p-n junction, fabrication and charcts. 85−27658
n-GaP/p-Si nonideal heterojunctions, I-V and C-V charcts. 85−23537
GaP-$GaAs_{0.35}P_{0.65}$, optical interference filter, photodiode, single-crystal integration 87−77285
GaP-dye-metal cells, photovoltaic effect *(Japanese)* 85−41242
$Ga_{1-x}P_x$-GaP-Si mechanically stacked multijunction solar cells, p-n junction model 87−4909
$GaS_{0.4}Se_{0.6}$/InSe heterojunctions, electric and photoelectric props. 86−14893
GaSb/GaAs heterojunction photodiodes, plasma-assisted epitaxial growth, photoresponse charcts. 85−46281
GaSb-AlGaSb(AlGaSbAs), spatial distrib. of defects, EBIC method 85−28996
GaSb-GaAs photodiode, low-temp. growth by plasma process *(Japanese)* 87−272
p-GaSb-n-GaAs, photodiode photoresponse 88−435
a-Ge:H/a-Si:H superlattice for solar cells, optoelectronic and PV props. 88−37438

p-n heterojunctions continued
n-Ge-In p-n junction, current-voltage charcts., carrier heating effects 86−1769
Ge-Si, artificially layered struct., automatic process control 87−73082
Ge-Si-SiO_x buried p-n junctions, photoelec. charcts. 86−28003
$Ge_{20}Bi_{15}Se_{65}$-$As_2Se_3(Ge_{20}Se_{80})$, n-p thin film junctions, amorphous chalcogenides, elec. and photovoltaic props. 88−71323
(Hg,Cd)Te as-grown p-n junctions, multilayer LPE growth and characterization 85−50261
(Hg,Cd)Te heterostructure photodiodes, MWIR and LWIR detectors appl. 87−46693
HgCdTe, conf., Dallas, USA (Oct. 1986) 88−11558

EMI/ESD shield using Cu-polyester laminate 86−54305
EMI/RFI protection of electronic equipment housings, design and construction aspects of seals *(French)* 87−43994
EMI/RFI shielding gasket use 87−12728
enclosure design, CAD system 86−19850
enclosure manufacture rel. to EMI/RFI and ESD protection 85−10506
enclosure manufacturers' trend towards more electronic skills 86−40541
enclosure materials options 86−34036
enclosure standards, organisations responsible in USA 86−66620
enclosure systems for demanding environments 85−16800
enclosures, design revolution, desire for aesthetic appearance 85−16791
enclosures, EMI control hints 87−54593
enclosures−current trends 85−183
enclosures and cooling systems for electronic equipment *(Spanish)* 87−72818
enclosures for control/instrumentation systems, UK market 88−43704
enclosures for electrical and electronic equipment 85−33177
enclosures for electronics, market approach rethinking 85−39553
enclosures market, review 85−16803
enclosures to protect electronic equipment against RFI, EMP, and seismic shock 85−185
environmental sciences, conf., Las Vegas, NV, USA (May 1985) 86−26473
environmental testing of UV-EPROMS, EE-PROMS, and fusible-link PROMS, airborne appls. 88−761
EPIC, a cost-effective plastic chip carrier for VLSIpackaging 86−40520
EPIC plastic chip carriers 88−11760
epoxide-packaged semiconductor components, mechanical decapsulation technique 88−31499
epoxy adhesives, Ag-filled, for Au/Sn sealed microelectronic packages, selection and cure optimisation 85−28060
epoxy blob top encapsulants, phys. and elect. testing 88−24575
epoxy die attach adhesive, elec. conductive, ultra-high purity, characts. and testing 86−53286
epoxy molding compounds, moisture sorption and its effects upon microstructure 88−24582
epoxy moulding compounds, post mould curing effect microstructure 87−16714
epoxy novolac resins impurities influence on reliability of semicond. devices 87−23360
epoxy resins for PCB manufacture 88−37975
epoxy substrate attachment, interface integrity 85−28882
